

DIVISION OF INNOVATIVE & LEARNING-CENTRIC INITIATIVES (ILCI)

Division of Innovative & Learning-Centric Initiatives (ILCI)

The Division of Innovative & Learning-Centric Initiatives (ILCI) serves the UNO community in the areas of online development of courses and programs, instructional design, academic technologies, workforce development, microcredential courses, and new market opportunities. As we help guide innovation at UNO, we focus on student-first strategies: supporting a comprehensive digital learning ecosystem; developing and celebrating the attainment of future-ready skills via digital badges; designing re-skilling and up-skilling microcredential courses; and offering flexible degree programs that fit within a student's busy life. Digital Learning is housed within ILCI, providing UNO faculty with workshops and training; assistance with instructional design and academic technology; and grant funding that support the delivery of high-quality courses in online and flexible formats. To learn more about ILCI, including the specific services we offer the campus, the current academic technology pilots we are coordinating, the current projects we are championing, and regular news and updates from our division, please visit [innovate.unomaha.edu](https://www.unomaha.edu/innovative-and-learning-centric-initiatives/).
