This course introduces students to the dynamism and growth of the role of Latinos, as a group of political actors, in the United States. This course provides students with an exposure to and understanding of various concepts and dimensions of this phenomenon, including historical and contemporary Latino political thought and the efforts to increase political empowerment (representation and participation) and influence through grassroots, social, and political movements. (Cross-listed with PSCI 8145, PSCI 3140, LLS 8145)

Prerequisite(s): PSCI 1100 is recommended.

Distribution: U.S. Diversity General Education course

LLS 3420 LATIN AMERICAN CIVILIZATION (3 credits)

What do we know about Latin American culture, geography, politics and languages? How has Latin America been imagined from the United States? Does it make sense to think of Latin America as one space brought together by a similar history or is it better to imagine it as twenty particular countries with intersecting pasts and futures? This course will attempt to answer these questions by introducing you to a number of key topics and debates common to contemporary Latin American culture, including issues such as democracy, class, race/ethnicity, gender/sexuality, religion, family and globalization. (Cross-listed with SPAN 3420).

Prerequisite(s): SPAN 3030 or SPAN 3010, LLS 1000 or instructor approval.

LLS 3510 IMMIGRATION LAW AND LATINOS (3 credits)

This course provides an overview of the U.S. Immigration laws with an emphasis on Latino migration. In analyzing Latino migration, we will look at the push and pull factors of migration, the channels available for lawful migration, and the impact immigrants have in our society. (Cross-listed with PSCI 3510).

Prerequisite(s): Must have taken at least one social science course as well as a different LLS course, junior standing or above, or permission of the instructor.

LLS 3680 GOVERNMENT AND POLITICS OF LATIN AMERICA (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Latin America. (Cross-listed with LLS 8685, PSCI 3680, PSCI 8685)

Prerequisite(s): PSCI 2500 or junior status or permission of instructor.

Distribution: Global Diversity General Education course

LLS 4140 INTRODUCTION TO LATIN AMERICAN FILM (3 credits)

The course will be a thematic study of significant Latin American films emphasizing and further investigating their relationship to history, culture, society and political issues that have often given rise to social movements. Films from a variety of Spanish-speaking countries including Mexico, Argentina, Chile, Cuba, Bolivia, etc. will be studied in their socio-political context. At the 8146 level, students will be introduced to theoretical approaches such as early film theory, montage theory, feminist theory, race theory, and phenomenological film theory in order to deepen their understanding these themes. (Cross-listed with SPAN 8146, SPAN 4140).

Prerequisite(s): SPAN 3030 or SPAN 3010, SPAN 3040 or SPAN 3020, SPAN 3060

LLS 4170 INTRODUCTION TO LATIN AMERICAN LITERATURES (3 credits)

The course is intended as an introduction to the study of canonical and non-canonical texts in Latin American literatures, from the 16th to 21st centuries. It seeks to acquaint students with the rich literary traditions of a large region, from South America to Central America and Mexico, as well as with the historical challenges posed by the salient heterogeneity of texts included in the Latin American corpus, from the standpoint of ethnicity, gender, social class, and literary genre. The course also focuses on continuing to develop Spanish language skills, specifically reading for comprehension and interpretation of metaphorical meaning, writing, and presentational speaking skills in Spanish. (Cross-listed with SPAN 8176, SPAN 4170).

Prerequisite(s): SPAN 3030, SPAN 3040; or SPAN 3010, SPAN 3020; SPAN 3060.

LLS 4240 SOCIAL TRANSFORMATIONS IN LATIN AMERICA (3 credits)

The course reviews the main social, economic, and political forces that have shaped Latin American societies, and the sociological theories used to understand Latin American development and underdevelopment. Race, ethnicity, gender and class in Latin America, as well as the region's position in the global economy are examined. (Cross-listed with SOC 8246, SOC 4240, LLS 8246).

Prerequisite(s): Must have taken at least one social science course as well as a different LLS course, junior standing or above, or permission of the instructor.

Distribution: Global Diversity General Education course

LLS 4250 RESEARCHING LATIN AMERICAN MIGRATIONS (3 credits)

In this course we will use an interdisciplinary lens to study the changes and continuities of migration in the Americas. The course starts with an overview of immigration to the Americas during the first era of mass migration (1850-1920) to explore the relevance of European migrations for national and identity constructions in the Southern Cone of America. Students then will be introduced to the impacts of social and political change on emigration flows, both regionally and beyond the region. They will also explore migration related policies at the national and regional level. We will also study the changes and continuities in the migration system of the Americas. Lastly, we will analyze the new North-South migration, as well as immigration to Latin America from Asia (recent and historical), Europe, and Africa. (Cross-listed with SOC 4250, SOC 8256, LLS 8256).

Prerequisite(s): Must have taken at least one social science course as well as a different LLS course, junior standing or above, or permission of the instructor.

Distribution: Global Diversity General Education course

LLS 4280 INTERNATIONAL RELATIONS OF LATIN AMERICA (3 credits)

Analysis of the role of Latin American states in the international political arena. Emphasis upon developing, applying and testing an explanatory theory of international politics through the study of the inter-American system: the regional, institutional and ideological environment, power relations, policies and contemporary problems. (This course fulfills the department's international politics requirement). (Cross-listed with LLS 8286, PSCI 4280, PSCI 8286)

Prerequisite(s): PSCI 2500 or junior standing or permission of the instructor.

Distribution: Global Diversity General Education course

LLS 4430 INTERNATIONAL MIGRATION, DEVELOPMENT AND CITIZENSHIP (3 credits)

The course examines the forces driving contemporary global migration, the impact of migration in both sending and receiving nations' development, as well as the politics and practices of migration policy development. The course also discusses the current debates on immigrant incorporation and citizenship in the receiving countries. (Cross-listed with LLS 8436, CACT 8436).

Prerequisite(s): Must have taken at least one social science course as well as a different LLS course, junior standing or above, or permission of the instructor.

LLS 4510 ILLNESS AND DISEASE IN SOUTHERN CONE LATIN AMERICAN LITERATURES AND CULTURES (3 credits)

The course will examine representations of illness, disease, and affections in literary and cultural texts from the Latin American Southern Cone, focusing in Argentina, Uruguay, and Chile. It will explore notions of health and disease, as embedded in literary and cultural texts from the late 19th to the 21st centuries. We will examine the ways in which physical ailments, mental health symptoms, and other conditions or disorders have been conceptualized and portrayed, co-relating the individual "disruptions" caused by unwellness with a host of social and cultural factors. The course will also explore current treatments and therapies for the illnesses discussed in the texts, taking into account the integration of western and alternative medicine and practices. (Cross-listed with SPAN 8516, SPAN 4510, LLS 8516).

Prerequisite(s): LLS 1000; SPAN 3030 and SPAN 3040 or SPAN 3010 and SPAN 3020; SPAN 3060; or special permission from instructor.

LLS 4650 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)

Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with BLST 8656, BLST 4650, HIST 8076, HIST 4070, LLS 8656).

Prerequisite(s): LLS 1000, junior standing, or instructor permission

LLS 4780 URBAN LATIN AMERICA (3 credits)

This course examines the experience of Latin American urbanization, attending to its contributions to urban sociology, social movements, and policymaking. Topics include urban transitions (e.g. pre-Hispanic to colonial, post-colonial to industrial, and the neoliberal turn), socio-spatial configurations (e.g. plazas, squatter settlements), urban marginality debates, urban politics, and planning as well as governance innovations (e.g. bus rapid transit systems, participatory budgeting). Students will compare city case studies across the region and to urban life in the United States. (Cross-listed with SOC 4780, SOC 8786, LLS 8786, CACT 8186).

Prerequisite(s): Must have taken at least one social science course as well as a different LLS course, junior standing or above, or permission of the instructor

Distribution: Global Diversity General Education course

LLS 4900 INDEPENDENT STUDY (3 credits)

This course is designed for those students who are capable of pursuing, independently, an area of Latino/Latin American Studies that is not covered under the existing curriculum. The student will be supervised by a member of the faculty of the LLS department. All course assignments, requirements, and expectations will be clearly indicated in advance. May be repeated for credit, up to six hours, under a different topic.

Prerequisite(s): Permission of LLS faculty member required.

LLS 4950 LATIN AMERICAN STUDY ABROAD (3 credits)

This course is designed as an international study abroad course that will introduce undergraduate and graduate students to the dynamism of socio-cultural, economic, and political changes taking place across Latin America. Note: International travel and special fees required. (Cross-listed with LLS 8956, INST4950)

Prerequisite(s): Senior standing or Junior standing with permission of the department. LLS 1000 or LLS 1010 or equivalent and departmental permission.

Law and Society (LAWS)

Law and Society Undergraduate Courses

LAWS 2000 SPECIAL TOPICS IN LAW AND SOCIETY (3 credits)

This special topics course will address specific topics which will vary by semester and is intended primarily for upper division business students who are pursuing a Legal Studies concentration.

LAWS 3000 INTRODUCTION TO THE LEGAL PROFESSION (1 credit)

This course provides experiences and assignments designed to enhance understanding of the legal system, legal education, law school admissions processes, legal career opportunities, legal analysis, the legal profession, and the law school experience.

LAWS 3170 ETHICS IN BUSINESS (3 credits)

Application of ethical concepts and principles to moral issues in business including corporate responsibility, discrimination, advertising, competition, whistle-blowing, trade secrets, multinationals, environment, workers' rights, government regulation, investment, bribes, product liability, and consumerism.

Prerequisite(s): ECON 2200 and ECON 2220.

LAWS 3460 REAL ESTATE LAW (3 credits)

Upper-level survey course in real estate law, which examines estates in land, conveyances, leases, mortgages, easements, zoning, environmental law, contracts, taxes, foreclosures, landlord-tenant relations, agency, Fair Housing, and Nebraska License Law. (Cross-listed with RELU 3460)

Prerequisite(s): RELU 2410 or RELU 3410.

LAWS 3930 BUSINESS LAW FUNDAMENTALS (3 credits)

LAWS 3930 introduces students to the legal system governing business transactions. This course emphasizes constitutional law, the Common Law, and relevant statutory law. The legal topics covered include litigation and ADR, torts, contracts, Sale of Goods, insurance, international law, and regulation of business.

Prerequisite(s): ENGL 1160, CMST 1110, ECON 2200, & MGMT 3200 or MKT 3200 all with 'C'(2.0) or better, 2.5 GPA.

LAWS 3940 LEGAL AND ETHICAL APPLICATIONS (3 credits)

LAWS 3940 exposes students to business organization law and ethics. Emphasis is on business organizations (e.g., agency, partnerships, corporations), financial transactions (e.g., checks, liens, securities), and property (e.g., environment, intellectual). Ethics is a discrete subject area studied and its analytical tools are applied to all of these areas of law.

Prerequisite(s): LAWS 3930 and ACCT 2020 both with C+ (2.3) or better; 2.5 GPA

LAWS 4220 LEGAL ISSUES IN MANAGEMENT (3 credits)

This course provides an overview of the general nature of legal knowledge in human resources administration. The course is designed to alert students of the legal considerations when an employer-employee relationship is established. Discusses how human resource practices have been impacted by recent legal developments, anti-discrimination laws, affirmative action and labor relations.

Prerequisite(s): MGMT 3490 and MGMT 3510 or MGMT 4030 with a C (2.0) or better, and a 2.5 GPA, or permission of instructor.

LAWS 4500 SPECIAL PROBLEMS IN LAW AND SOCIETY (1-6 credits)

Individual investigation of specific problems in the field of business law. (Fall, Spring)

Prerequisite(s): Senior and permission of program chair.

LAWS 4510 LAW AND SOCIETY INTERNSHIP (1-3 credits)

Students engage in an applied experience in their concentration area to gain relevant industry experience and to practice the skills and concepts learned in the classroom. Student reports on the internship experience and an employer's evaluation of the student's performance are course requirements. LAWS 4510 may be taken for a maximum of 3 credits. (Fall, Spring, Summer)

Prerequisite(s): Permission of Department Internship Coordinator.

LAWS 4910 SEMINAR ON BUSINESS LAW (3 credits)

Contact the instructor since the content will vary from semester to semester, but will have a strong emphasis on current events. The course will focus on one aspect of relationship between government and business, and its related ethical and international law issues. A major student research project is included.

Prerequisite(s): LAWS 3930, ECON 2200, and ACCT 2020, or permission of department chair.

LAWS 4930 INTERNATIONAL BUSINESS LAW (3 credits)

This course is designed to inform students interested in international business transactions of the major legal principles governing international law, the major legal systems affecting the conduct of international business transactions, the domestic and foreign policies of the United States which affect business overseas, and foreign business inside American borders.

Prerequisite(s): LAWS 3930.

Management (MGMT)

Management Undergraduate Courses

MGMT 1200 INTRODUCTION TO MANAGEMENT (3 credits)

This course will introduce foundational management concepts including management functions, leadership, planning, decision-making, quality improvement, ethics and careers in management.

MGMT 1500 INTRODUCTION TO BUSINESS (3 credits)

This course is for students who are interested in gaining foundational knowledge in many aspects of the business world including economics, finance, marketing, management, and accounting.

Distribution: Social Science General Education course

MGMT 3100 MANAGEMENT INFORMATION SYSTEMS (3 credits)

This course covers a broad spectrum of knowledge and techniques in MIS. Students will be given the opportunity to relate how technology and systems are utilized to support managerial decision making, streamline business processes, and enhance general organizational efficiencies. Topics centering around IT planning, network computing, electronic commerce, and data/knowledge management are all used to instill the importance of leveraging information systems for strategic advantage.

Prerequisite(s): ACCT 2020, MGMT 3200 or MKT 3200, and MGMT 3490, each with a 'C' (2.0) or better, and a 2.5 GPA. Not open to non-degree graduate students.

MGMT 3410 INTRODUCTION TO SUPPLY CHAIN MANAGEMENT (3 credits)

Supply chain management is the design and management of business processes needed to turn raw materials from suppliers into products and services that meet the needs of the final customer. The goals of this course center around providing students with the foundations of supply chain management and effectively managing the flow of goods, information, and services to obtain sustainable competitive advantage within an industry. Students will develop critical thinking skills focused on business process analysis and the use of key performance indicators to determine operational efficiencies for all organization levels. (Cross-listed with SCMT 3410, MKT 3410).

Prerequisite(s): Sophomore standing; GPA of 2.0 or better; or by permission of instructor. Not open to non-degree graduate students.

MGMT 3490 MANAGING PEOPLE AND ORGANIZATIONS (3 credits)

In this course, students will delve into applying management concepts to the real-world and the dynamic interplay between individuals, groups, and broader organizational contexts. The course uses effective management practices and leadership styles mixed with knowledge of organizational structures and intricacies of human behavior to promote individual's confidence in skills areas such as communication, conceptualization, interpersonal problems, and decision-making. Students are exposed to current management trends and the importance of successful management in modern organizations.

Prerequisite(s): ENGL 1160 and MGMT 3200 or MKT 3200 each with a "C" (2.0) or above, and a 2.5 cumulative GPA.

MGMT 3600 BUSINESS ETHICS (3 credits)

Students will learn about the factors, opportunities and pressures that lead to ethical dilemmas, and will develop their understanding of foundations and processes that encourage and reward ethical decision making and behaviors. Lots of examples, sourced from case studies and current events will be provided. (Cross-listed with BSAD 3600, MKT 3600)

Prerequisite(s): Junior classification (minimum of 58 earned credit hours) with a minimum 2.5 cumulative GPA. Completion of MGMT 3200 or MKT 3200 with a minimum grade of "C" (2.0). Not open to non-degree graduate students.

MGMT 3800 CROSS-SECTOR COLLABORATIVE LEADERSHIP (3 credits)

The goal of PA 3800/MGMT 3800 is to prepare students to serve as collaborative leaders of cross-sector initiatives. Specifically, this course will prepare students for success in working collaboratively across private, nonprofit and public sector organizations while also enhancing their overall development as a leader. Examples of successful and unsuccessful cross-sector collaborations will be explored along with discussions of theories related to cross-sector collaboration. (Cross-listed with PA 3800).

Prerequisite(s): Permission from instructor or MGMT 3490 with a grade of C or higher or enrollment in the cross-sector collaborative leadership minor.

MGMT 4000 SPECIAL TOPICS IN MANAGEMENT (3 credits)

This special topic course will address specific topics of management that vary by semester. The course is intended primarily for upper division students who are pursuing a management and leadership, supply chain management, or human resources management concentration.

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA; or permission of instructor.

MGMT 4010 TOTAL REWARDS (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee compensation and benefits programs. Students will gain and utilize effective strategies for managing the single largest controllable expense for organizations; employee pay and benefits. The design of this course is most beneficial for students pursuing future careers in management and human resource professions. (Cross-listed with BSAD 8146, MGMT 8146, HRM 4010, HRM 8146).

Prerequisite(s): MGMT 3490 with a C or better and MGMT 4030 with a C+ or better and a 2.5 GPA; or permission of instructor

MGMT 4030 HUMAN RESOURCE MANAGEMENT (3 credits)

This course is a comprehensive review of the field of human resource management and its relevance to employees, managers, and organization stakeholders for goal achievement. The design of this course is structured to educate future managers and leaders on the importance of utilizing effective HR methods that comply with federal laws and the critical role of HR professionals in achieving the organization's positive workplace culture, competitive advantage, and overall success. (Cross-listed with BSAD 8136, MGMT 8136, HRM 4030, HRM 8136).

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA; or permission of instructor.

MGMT 4040 MANAGING BEHAVIOR IN ORGANIZATIONS (3 credits)

In this course students will learn the knowledge and skills necessary to effectively manage and lead others. The foundations of Organizational Behavior are explored through discussion, application, and analysis, to build connection to critical aspects of real-world scenarios. Students are equipped with the tools and resources to understand the decision-making process, on both the individual and organizational level, to shape behaviors of topics overviewing attitudes, motivation, leadership, employee engagement, group dynamic, and company culture. (Cross-listed with HRM 4040).

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA; or permission of instructor. Not open to non-degree graduate students.

MGMT 4050 MANAGERIAL DECISION MAKING (3 credits)

This course will provide students with the opportunity to learn, understand, and apply techniques for effective individual and organizational problem solving. The students will interactively participate in generating, prioritizing and organizing their ideas in order to become better managerial decision-makers/problem solvers.

Prerequisite(s): MGMT 3490 with a C, or a 2.5 GPA, or permission of instructor

MGMT 4060 HEALTHCARE ANALYTICS FOR BUSINESS (3 credits)

This course will focus on the mixing of analytics and technology to develop key performance indicators that integrate and evaluate clinical, administrative, and financial performance. Concepts in this course explore the intersection of information management, performance metrics, data visualization, and result communication spanning across the healthcare ecosystem. Topics covering health outcome analysis, financial performance, developing analytic strategies, data quality and governance, and the four stages of actionable intelligence are all used to educate the advantages of leveraging analytics. (Cross-listed with BSAD 8066, HLSC 8066, MGMT 8066, SCMT 8066, SCMT 4060).

Prerequisite(s): MGMT 3490 or SCMT 3410; GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

MGMT 4090 MANAGING COLLABORATIVE ENGAGEMENT (3 credits)

This course will provide students with the opportunity to develop knowledge and strategies for leading teams, enhancing collaboration, building consensus, problem solving in teams, facilitating group processes, and designing collaborative workspaces. (Cross-listed with BSAD 8096, ACMP 4090, MGMT 8096, SCMT 4090).

Prerequisite(s): Junior standing or permission of instructor. Not open to non-degree graduate students.

MGMT 4100 MANAGING CHANGE AND INNOVATION (3 credits)

This course is designed to increase students' understanding and knowledge of today's rapidly evolving business landscapes. Navigating through aspects of value creation, obtaining competitive advantage, adaptability, and managing resistance supports individuals' ability in influencing change management and innovating environments in many organizational settings.

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA; or permission of instructor.

MGMT 4110 STAFFING THE ORGANIZATION (3 credits)

This course is a comprehensive review of issues and techniques involved in the acquisition and management of a high quality and diverse workforce for optimal organizational effectiveness. Students pursuing future manager and human resource professions will benefit from practice utilizing effective strategies for recruiting, selecting, placing, and integrating new employees into an organization's workforce. (Cross-listed with BSAD 8166, MGMT 8166, HRM 8166, HRM 4110).

Prerequisite(s): MGMT 3490 with a C or better and MGMT 4030 with a C+ or better and a 2.5 GPA; or permission of instructor. Students are encouraged to take MGMT 4220 prior to taking this course.

MGMT 4120 TALENT DEVELOPMENT (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee training and development programs to optimize human capital effectiveness in modern organizations. The course is designed to enable future managers and human resource professionals to utilize effective strategies for assessing employee training needs and developing appropriate solutions to maximize talent utilization. (Cross-listed with BSAD 8156, MGMT 8156, HRM 4120, HRM 8156).

Prerequisite(s): MGMT 3490 with a C or better and MGMT 4030 with a C+ or better and a 2.5 GPA; or permission of instructor.

MGMT 4150 GLOBAL BUSINESS MANAGEMENT (3 credits)

The central objective of this course is to explore the unique opportunities and challenges that confront international managers as they navigate the complex and ever-changing global economic, political, legal, technological, and cultural environment. This course will particularly focus on people, values, and culture, better equipping students to both undertake an international career as well as effectively lead organizations with a culturally diverse workforce in any environment. (Cross-listed with BSAD 8236, MGMT 8236).

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA, or permission of instructor. Not open to non-degree graduate students.

MGMT 4220 EMPLOYMENT LAW (3 credits)

This course is a comprehensive review of the legal framework in human resource management practice. The course is designed to prepare future managers and human resource professionals for the myriad legal issues involved in the employer-employee relationship and what is required for effective compliance. (Spring) (Cross-listed with HRM 4220).

Prerequisite(s): MGMT 3490 and MGMT 3510 or MGMT 4030 with a C (2.0) or better, and a 2.5 GPA; or permission of instructor.

MGMT 4230 LEARNING TO LEAD (3 credits)

The course provides students with the opportunity to learn historical and modern theories of effective leadership, gain insight into their own leadership styles and aspirations, and learn how to apply leadership theories to real-world leadership cases. Along with empowering individuals' leadership capabilities, this course explores the factors that can influence leader decision-making. (Cross-listed with BSAD 8436, MGMT 8436).

Prerequisite(s): MGMT 3490 with a C or better, a minimum cumulative GPA of 2.5, or permission of instructor. Not open to non-degree graduate students.

MGMT 4330 PROJECT MANAGEMENT (3 credits)

This course focuses on the systemic exploration of planning and executing complex projects to create organizational success. Using a comprehensive understanding of principles, methodologies, and tools within project management, students will learn how to initiate critical processes, plan objectives and constraints, execute management and leadership, monitor budgets and development, and close outcomes of complex projects. Skills obtained from this course enhance individuals' ability to recognize, identify, and prioritize organizations' culture and structure to lead projects across various industries efficiently. (Cross-listed with BSAD 8336, HLSC 8336, MGMT 8336, SCMT 4330, SCMT 8336)

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA; or permission of the instructor. Not open to non-degree graduate students.

MGMT 4440 QUALITY MANAGEMENT (3 credits)

This course approaches Quality Management from a practical quantitative-oriented point of view. Throughout this course, students will be introduced to all five steps of the six sigma continuous process improvement (Define, Measure, Analyze, Implement, and Control). The assignments are designed in project-based formats, in which students will initiate their own process improvement project and follow through with each step for a final grade. Upon the completion of this course, students will understand the ever-evolving nature of quality and quality management. They will also have practical experience in initiating and managing process improvement project at small scale and apply six sigma in their future work. (Cross-listed with BSAD 8446, SCMT 4440).

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA; or permission of instructor.

MGMT 4450 MANAGERIAL NEGOTIATION STRATEGIES (3 credits)

This course introduces students to the theory and practice of negotiation across various organizational settings. The ability to successfully negotiate an outcome is an important aspect of management and leadership. Negotiation can be used to determine multiparty relationships, manage conflict resolution, and improve organizational outcomes. Using a combination of conceptual frameworks, roleplaying exercises, and debriefing opportunities, the design of this course is structured to help students understand the power and influence negotiation has over the successful outcomes of managers, leaders, and organizations. (Cross-listed with BSAD 8456, HLSC 8456, MGMT 8456, SCMT 4450, SCMT 8456).

Prerequisite(s): MGMT 3490 with a grade of C or above, at least a cumulative GPA of 2.5, or permission of instructor.

MGMT 4480 CORPORATE AND BUSINESS STRATEGY (3 credits)

This collaborative course is a comprehensive study of the analytical techniques and managerial tasks associated with analyzing, formulating, and implementing strategy in organizations. Connections between the functional business areas and how to create and maintain a competitive advantage, achieve growth, and drive long-term success are explored through contemporary readings, business cases, team projects, and computerized situations.

Prerequisite(s): Must be a graduating senior, have a declared major in BSBA program, 2.5 cumulative GPA, MGMT 3200 or MKT 3200, MGMT 3490, MKT 3310, FNBK 3250 with a "C" (2.0) or better.

MGMT 4500 SPECIAL PROBLEMS IN MANAGEMENT (1-3 credits)

This independent study course gives students an opportunity to complete a focused project in the field of management, human resource management international business, supply chain management, or entrepreneurship under faculty supervision.

Prerequisite(s): MGMT 3490 with a C or better, 2.5 GPA; permission of program chair; junior/senior standing; must obtain agreement from a faculty member to supervise; submit completed Special Problems contract to MGMT Dept Chair. Forms in CBA advising office.

MGMT 4510 MANAGEMENT INTERNSHIP (1-3 credits)

Students can receive degree credit when engaging in part time employment with a business that is relevant to the management discipline. Work assignments are a valuable opportunity to gain practical experience and insight into various aspects of managerial roles within the workforce. Duties within the part time role must relate to general management (i.e., strategy, production/operations, project management, planning, organizing, leading, or controlling) and provide students with an environment to apply their academic knowledge to a professional setting. Combining both academic and professional atmospheres, students gain interpersonal development of leadership and build understanding of managerial responsibilities within organizations.

Prerequisite(s): MGMT 3490 with a C or better, a 2.5 GPA, and junior level standing; and permission of instructor.

MGMT 4520 HUMAN RESOURCES MANAGEMENT INTERNSHIP (1-3 credits)

Students can receive degree credit when engaging in part time employment with a business that is relevant to the human resources management discipline. Work assignments are a valuable opportunity to gain practical experience and insight into various aspects of HR managerial roles within the workforce. Duties within the part time role must relate to general HR management (i.e., staffing, training, employee relations) and provide students with an environment to apply their academic knowledge to a professional setting. Combining both academic and professional atmospheres, students gain interpersonal development of leadership and build understanding of HR managerial responsibilities within organizations. (Cross-listed with HRM 4520).

Prerequisite(s): MGMT 4030 with a C+ or better, a 2.5 GPA, and junior level standing; and permission of instructor.

MGMT 4550 COOPERATIVE EDUCATION IN BUSINESS ADMINISTRATION (3 credits)

Students participate in discipline-specific experiential learning activities designed to integrate academic concepts with real-world workplace experiences. The course is focused on the development and application of observation and critical thinking skills to make informed contributions to their organization. Students will create a body of work that will be assessed through self-reflection of the student, feedback from the employer, and evaluation by the instructor. The overall goal is to create a portfolio of work that demonstrates student achievements during the cooperative education experience. (Cross-listed with SCMT 4550).

Prerequisite(s): Full-time (Summer-only) 3 Credit Hours, Maximum COOP Credit Hours 15, MKT/SCMT/MGMT 3410 Introduction to Supply Chain Management and GPA of 2.5 or better; AND by permission of the instructor.

MGMT 4560 COOPERATIVE EDUCATION IN BUSINESS ADMINISTRATION (6-12 credits)

Students participate in discipline-specific experiential learning activities designed to integrate academic concepts with real-world workplace experiences. The course is focused on the development and application of observation and critical thinking skills to make informed contributions to their organization. Students will create a body of work that will be assessed through self-reflection of the student, feedback from the employer, and evaluation by the instructor. The overall goal is to create a portfolio of work that demonstrates student achievements during the cooperative education experience. (Cross-listed with SCMT 4560).

Prerequisite(s): Full-time (Fall and Spring Semesters only) 6-12 Credit Hours, Maximum COOP Credit Hours 15, MKT 3410/SCMT 3410/MGMT 3410 and GPA of 2.5 or better; or by permission of the instructor.

MGMT 4690 EMERGING TECHNOLOGY AND INNOVATION (3 credits)

This course equips entrepreneurially-minded students with a more complete range and vision of the viability of various startup opportunities (with a specific focus on innovative technologies and innovative business models). Students will become familiarized with the new and emerging technologies and innovations that define modern industries and product categories, as well as the various shifts in the way cutting-edge business gets done, regardless of industry. (Cross-listed with BSAD 8696, ENTR 4690, ENTR 8696, MGMT 8696).

Prerequisite(s): Junior standing or higher; 2.75 minimum GPA; or permission of instructor

MGMT 4720 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation. Concepts and techniques in innovation, entrepreneurship, and strategy will be used to aid students in the venture creation process. Important considerations impacting the viability of the venture post formation will also be explored. Practical real-world experimentation is the central component of the course and will help students to conceive, develop, and launch their own innovative ventures. (Cross-listed with BSAD 8726, ACMP 4720, HCC 8256, ENTR 4720, ENTR 8726, MGMT 8726, MKT 4720, MKT 8726).

Prerequisite(s): ENTR 3710 and junior standing or above or by instructor permission

MGMT 4960 CROSS-SECTOR COLLABORATIVE LEADERSHIP CAPSTONE (3 credits)

This is a capstone course that prepares students to be effective leaders in the 21st century. This course is the final leadership course in the Cross-Sector Collaborative Leadership minor. This minor requires a capstone project that encompasses the student's knowledge and training. It is designed to provide an applied service-learning opportunity for students. (Cross-listed with PA 4960).

Prerequisite(s): Must be completing either the Cross-Sector Collaborative Leadership Minor or the Cross-Sector Collaborative Leadership Concentration. Must have completed PA 3800/MGMT 3800. Not open to non-degree graduate students.

Marketing (MKT)

Marketing Undergraduate Courses

MKT 2210 SURVEY OF MARKETING (3 credits)

This course is designed for any student who has an interest in marketing and focuses on basic product and services marketing as well as digital and social media marketing.

MKT 3100 PROFESSIONAL SELLING (3 credits)

This course focuses on professional selling and relationship marketing principles and practices. A variety of personal and direct sales techniques, psychology, and application of personal communication theory will be applied. Role-plays and presentations will be utilized to help students learn and execute the sales process model.

Prerequisite(s): ENGL 1160 with 'C' (2.0) or better and GPA of 2.3 or better; or permission of instructor.

MKT 3200 BUSINESS COMMUNICATIONS (3 credits)

This course develops business communication skills such as selecting and using appropriate technologies for reaching intended audiences. Students will practice effective explanatory, narrative, persuasive, and investigative writing in the context of business communication.

Prerequisite(s): ENGL 1160 and CMST 1110, each with a grade of "C" (2.0) or better; 2.5 GPA.

Distribution: Writing in the Discipline Single Course

MKT 3310 PRINCIPLES OF MARKETING (3 credits)

An examination of marketing functions and the institutions which perform them, choice of criteria for marketing strategy decisions, marketing structural relationships, and the role of marketing in society.

Prerequisite(s): ECON 2200, MATH 1310 or MATH 1220, ENGL 1160, and MGMT 3200 or MKT 3200 all with 'C'(2.0) or better, and 2.5 GPA.

MKT 3320 CONSUMER BEHAVIOR (3 credits)

Consumers purchase, use, experience, and dispose of products and services as part of their consumption process. How and why consumers choose various brand options, form judgments about these brands, and decide which options to buy and/or re-buy are essential knowledge for marketing professionals. The course covers the psychological and social issues that guide consumption decisions. (Cross-listed with BSAD 8345).

Prerequisite(s): MKT 3310 with 'C+' or better; 2.5 GPA or better; or permission of instructor.

MKT 3340 OMNI CHANNEL MARKETING (3 credits)

This course is designed to provide students with an overview of the omnichannel marketing landscape. Omnichannel marketing focuses on creating a seamless shopping experience through the integration of multiple channels. Attention is paid to how modern-day retailers can create a holistic and highly personalized experience for customers.

Prerequisite(s): MKT 3310 with 'C+' or better; and GPA of 2.5 or better; or permission of instructor.

MKT 3350 MARKETING SERVICE PRODUCTS (3 credits)

This elective explores how intangibility forces customers to evaluate service products differently, creating more challenges for marketers. The course is based on the premise that financial benefits reward services that provide value to customers, and develops strategies for creating value.

Prerequisite(s): MKT 3310 with a 'C+' or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 3360 DIGITAL MARKETING COMMUNICATIONS (3 credits)

This course is designed to familiarize students with digital marketing concepts and applications. It provides a detailed understanding of relevant digital channels and platforms that companies use as part of their marketing mix. The course is structured to guide students through paid, earned, and owned digital media as part of a comprehensive digital marketing communications strategy. The course employs a mixture of lecture, discussion, simulation games, and sponsored consulting projects with real-world companies.

Prerequisite(s): MKT 3310 with 'C+' or better and GPA of 2.5 or better; or permission of instructor.

MKT 3370 SOCIAL MEDIA MARKETING (3 credits)

This course is designed to familiarize students with social media marketing concepts and applications. It provides a detailed understanding of relevant social media channels and platforms that companies use as part of their marketing mix. Students will apply their knowledge from class by completing several in-class exercises as well as graded assignments. The course employs a mixture of lecture, discussion, simulation games, and sponsored consulting projects with real-world companies.

Prerequisite(s): Completion of MKT 3310 with a C+ or better.

MKT 3380 INTERNATIONAL MARKETING (3 credits)

A study of the processes, procedures, characteristics and environments for goods and services in foreign market places. Reference is drawn to the theories and concepts of domestic marketing to appraise their applicability to international markets. Considerable attention is given to the features of the foreign market environments which both facilitate the marketing processes, inhibit them, and require strategies and tactics of accommodation.

Prerequisite(s): MKT 3310 with 'C+' or better; GPA of 2.5 or better.

MKT 3390 GRAPHIC DESIGN FOR MARKETERS (3 credits)

The course provides a hands-on introduction to the concepts and tools used in graphic design to create marketing communications. Material and assignments will focus on how design supports marketing communication strategy. Students will learn the principles and vocabulary of design, how to critique graphic design, and how to create basic print materials. Students will learn and practice the skills necessary to communicate with graphic designers and advertising professionals in order to successfully implement marketing strategies.

Prerequisite(s): MKT 3310 with 'C+' or better; 2.5 GPA or better.

MKT 3400 MARKETING INNOVATION (3 credits)

Product, service, and process innovation are essential drivers of firm performance. However, firms face considerable and complex challenges when bringing innovative ideas to life. For example, what marketing research methods should we employ to uncover vital consumer insights? How do these insights influence the development and launch of new products and services? What differentiated value are we delivering to our consumers? How do we successfully bring this new product or service to market? How does a brand's purpose and personality influence consumers' perceptions, purchase decisions, adoption, and engagement? This course will cover key marketing principles involved in the development and launch of new and innovative products and services - from conception to commercialization. Furthermore, we will explore how new-age technologies impact each stage of the development and launch processes. (Cross-listed with BSAD 8435).

Prerequisite(s): MKT 3310 with 'C+' or better; 2.5 GPA or better; or permission of instructor.

MKT 3410 INTRODUCTION TO SUPPLY CHAIN MANAGEMENT (3 credits)

Supply chain management is the design and management of business processes needed to turn raw materials from suppliers into products and services that meet the needs of the final customer. The goals of this course center around providing students with the foundations of supply chain management and effectively managing the flow of goods, information, and services to obtain sustainable competitive advantage within an industry. Students will develop critical thinking skills focused on business process analysis and the use of key performance indicators to determine operational efficiencies for all organization levels. (Cross-listed with SCMT 3410, MGMT 3410).

Prerequisite(s): Sophomore standing; GPA of 2.0 or better; or by permission of instructor. Not open to non-degree graduate students.

MKT 3600 BUSINESS ETHICS (3 credits)

Students will learn about the factors, opportunities and pressures that lead to ethical dilemmas, and will develop their understanding of foundations and processes that encourage and reward ethical decision making and behaviors. Lots of examples, sourced from case studies and current events will be provided. (Cross-listed with BSAD 3600, MGMT 3600).

Prerequisite(s): Junior classification (minimum of 58 earned credit hours) with a minimum 2.5 cumulative GPA. Completion of MGMT 3200 or MKT 3200 with a minimum grade of 'C' (2.0). Not open to non-degree graduate students.

MKT 3610 BUSINESS TO BUSINESS MARKETING (3 credits)

This course examines the decisions involved in marketing goods and services to the industrial buyer as opposed to the consumer buyer. Buyer motivation, promotion decisions, channel decisions, product development and pricing policies involved in the marketing of industrial goods are considered.

Prerequisite(s): MKT 3310 with 'C+' or better; 2.5 GPA or better; or permission of instructor

MKT 4000 SPECIAL TOPICS IN MARKETING (3 credits)

This special topics course will address specific topics which will vary by semester and is intended primarily for upper division students who are pursuing a marketing or sales concentration.

Prerequisite(s): MKT 3310 plus 6 hours of Marketing, all with 'C+' or better; GPA of 2.5 or better; or permission of instructor.

MKT 4200 CONSULTATIVE SELLING PRINCIPLES (3 credits)

The primary focus of the Consultative Selling Principles course is to develop the behaviors, methodologies, principles, and processes required to successfully lead and manage complex selling initiatives to a win-win close. The course examines and applies, through role playing and other activities, the critical relationship building, critical thinking, problem solving, listening and negotiating capabilities which are the foundation skills underlying consultative selling. (Cross-listed with BSAD 8206)

Prerequisite(s): MKT 3310 with 'C+' or better; MKT 3100 with C+ or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4210 SELLING FINANCIAL SERVICES (3 credits)

Selling Financial Services concentrates on methods to effectively sell services and products in the financial services industry, including the banking, brokerage and insurance sectors. Targeting, initiating, and acquiring client relationships, expanding business opportunities, and maintaining long-term client relationships are the course's focal points. This integrative course is designed to provide students with a basic understanding of the selling profession and sales culture within the financial services industry. (Cross-listed with BSAD 8216, FNBK 4210).

Prerequisite(s): MKT 3310 with a C+ or better grade and 2.5 GPA. Not open to non-degree graduate students.

MKT 4220 GLOBAL STRATEGIC ACCOUNT MANAGEMENT (3 credits)

Throughout this course, the management of strategic account programs at national, multi-country, and global levels will be addressed. The primary focus of the curriculum is on the critical success factors for driving revenue, sustainable long term-growth and profitability with a base of core strategic buyers. (Cross-listed with BSAD 8226)

Prerequisite(s): Senior or graduate student standing and permission of the instructor. Not open to non-degree graduate students.

MKT 4260 TECHNICAL BUSINESS DEVELOPMENT (3 credits)

Students will learn how to navigate the four main milestones of the technical sales process: Responding to requests for proposals (RFPs), conducting exploratory customer meetings, submitting RFP responses, and interviewing for projects. The course will broaden understanding of the sales process in technical domains where sales cycles are longer and decision processes are more complex. This class will also emphasize team selling. (Cross-listed with MKT 8266, BSAD 8266).

Prerequisite(s): Prerequisite(s): Junior standing; or permission of instructor. Not open to non-degree graduate students.

MKT 4300 MARKETING MANAGEMENT (3 credits)

This case study course examines product, price, promotion and channel of distribution policies. Major emphasis is placed on analysis of marketing problems and the facets of making marketing decisions.

Prerequisite(s): MKT 3310 with grade of 'C+' or better plus 6 hours of marketing, all with 'C' (2.0) or better, senior standing; GPA of 2.5 or better; or permission of instructor.

MKT 4320 SALES MANAGEMENT (3 credits)

The student will be exposed to current research findings in sales management and to business cases and simulations where sales management theories and concepts will be applied. This course will prepare students to develop and implement specific compensation, motivation, and evaluation strategies for managing sales professionals across a wide variety of organizations. (Cross-listed with BSAD 8326).

Prerequisite(s): MKT 3310 with 'C+' or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4340 MARKETING RESEARCH (3 credits)

Application of analytical tools to marketing problems including markets, products, distribution channels, sales efforts and advertising. Emphasis on planning, investigation, collection, interpretation of data and presentation of results.

Prerequisite(s): MKT 3310 with 'C+' or better; BSAD 2130 or BSAD 3140 or BSAD 3160 with 'C' (2.0) or better; GPA of 2.5 or better; or permission of instructor.

MKT 4360 E-MARKETING (3 credits)

This course focuses on utilizing the Internet as a marketing platform. Course content includes discussion of how the Internet is used by businesses for designing products, pricing, promotions, distribution, positioning, gathering information, and cultivating relationships with stakeholders. The discussion about the rise of social media, sharing economy, virtual reality devices, and other relevant trends will also be part of the course. (Cross-listed with BSAD 8366).

Prerequisite(s): MKT 3310 with 'C+' or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4370 MARKETING ANALYTICS (3 credits)

This course focuses on the application of data analytics in marketing decision making (e.g., segmentation, sales forecasting, and resource allocation). Students will learn to apply statistics and econometrics to solve marketing problems. Key topics in this course include marketing data visualization, marketing metrics, descriptive and predictive analytics, and digital marketing analytics. This course takes a very hands-on approach with real-world databases and equips students with tools that can be used immediately on the job. (Cross-listed with BSAD 8396).

Prerequisite(s): MKT 3310 with 'C+' or better; BSAD 2130 or BSAD 3140 or BSAD 3160 with 'C' (2.0) or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4380 INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT (3 credits)

This course will focus on the strategic procurement of products and services in order to gain a competitive advantage through integrated supply management. Students will learn about strategic supply management, contract negotiation, and supplier quality management. Students will develop an understanding of supplier performance management through the use of supply chain information systems. (Cross-listed with BSAD 8386, HLSC 8386, SCMT 4380, SCMT 8386).

Prerequisite(s): SCMT 3410; GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

MKT 4420 BUSINESS DEMOGRAPHICS (3 credits)

The goal of this course is to develop a demographic perspective in order to assist in understanding the business environment and business policy. How population change impacts consumer markets and all of the functions (for example, accounting, finance and management) that must exist for these markets to perform. Includes a history of population change and policy as well as a view toward international population considerations. (Cross-listed with BSAD 8426).

Prerequisite(s): MKT 3310 with 'C+' or better; GPA 2.5 or better, Junior Standing; or permission of instructor. Not open to non-degree graduate students.

MKT 4500 SPECIAL PROBLEMS IN MARKETING (1-3 credits)

This course consists of an individual investigation of specific marketing topics under the supervision of a faculty member and could include readings, independent research, and a written research paper.

Prerequisite(s): Principles of Marketing (MKT 3310) with minimum C+ or permission of instructor.

MKT 4510 MARKETING INTERNSHIP (1-3 credits)

Students engage in part time employment in the marketing discipline to gain relevant business experience and to practice the skills and concepts learned in the classroom. Work assignment must encompass duties related to general marketing or a specialization within the domain (i.e. selling, social media, advertising, market research).

Prerequisite(s): MKT 3310 with a C+ or better, a 2.5 GPA, and junior level standing; and permission of instructor.

MKT 4540 SUPPLY CHAIN MANAGEMENT INTERNSHIP (1-3 credits)

Students engage in part-time employment in supply chain management to gain relevant business experience and to practice the skills and concepts learned in the classroom. Work assignment must encompass duties related to the field of supply chain management (i.e., purchasing, scheduling, supplier relations, materials management, or logistics). (Cross-listed with SCMT 4540)

Prerequisite(s): MKT-MGMT 3410 Sustainable Supply Chain Management and GPA of 2.5 or better; or by permission of the instructor. Not open to non-degree graduate students.

MKT 4720 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation. Concepts and techniques in innovation, entrepreneurship, and strategy will be used to aid students in the venture creation process. Important considerations impacting the viability of the venture post formation will also be explored. Practical real-world experimentation is the central component of the course and will help students to conceive, develop, and launch their own innovative ventures. (Cross-listed with BSAD 8726, ACMP 4720, HCC 8256, ENTR 4720, ENTR 8726, MGMT 4720, MGMT 8726, MKT 8726).

Prerequisite(s): ENTR 3710 and junior standing or above or by instructor permission

MKT 4760 SELLING IN AN ENTREPRENEURIAL CONTEXT (3 credits)

Successful entrepreneurs are able to identify unmet needs in the marketplace and then design and sell products or services that fulfill those needs. Sales effectiveness is essential for entrepreneurs because they must be able to build sustainable sales pipelines that ensure profitable growth while simultaneously addressing other pressing issues including financing, staffing, and product development. This course will focus on consultative solution-based sales fundamentals that can be applied in an entrepreneurial selling environment. (Cross-listed with ENTR 4760, BSAD 8766)

Prerequisite(s): GPA 2.5 or better; MKT 3100 with a "C+" or better; MKT 3310 with a "C+" or better; or permission of instructor. Not open to non-degree graduate students.

MKT 4800 HONORS STUDIES IN MARKETING (3 credits)

A comprehensive examination of marketing as it is practiced among firms representing different industrial sectors. Course objectives include individual inquiry, theoretical applications and limitations, and an increased academic understanding of the discipline of marketing. Only grades 'B' and above will be awarded. Students exhibiting performance below the 'B' level will receive an 'F' for the course. Admission to this course is by invitation only.

Prerequisite(s): Permission of instructor. Senior standing, 3.2 GPA or above, declared business college specialization in MKT or BFIN or MGMT or communications (journalism, PR or broadcasting). Not open to non-degree graduate students.

Mathematics (MATH)

Mathematics Undergraduate Courses

MATH 1120 INTRODUCTION TO MATHEMATICAL AND COMPUTATIONAL THINKING (3 credits)

This course embraces the visual arts to introduce students to the foundational elements of mathematical and computational thinking. Visual patterns form the basis for explorations in arithmetic and geometric sequences, from which algebraic functions and corresponding functions in computer programs are reasoned.

Distribution: Math

MATH 1130 QUANTITATIVE LITERACY (3 credits)

Designed to equip students with the mathematical, statistical, and computational skills necessary to explore real-life situations. Students will learn and practice critical-thinking and problem-solving skills needed to use quantitative information to make responsible decisions in a variety of areas such as finance, health, and the environment.

Distribution: Math

MATH 1140 QUANTITATIVE REASONING FOR HEALTHCARE PROFESSIONALS (3 credits)

This course prepares students with the basic mathematical skills required for nursing programs. Topics include: fractions, decimals, percentages, ratios, conversions between measurement systems, dimensional analysis, formulating dosages and flow rates, interpreting drug orders, and nutritional analyses.

Distribution: Math

MATH 1210 INTERMEDIATE ALGEBRA (3 credits)

This course is designed to prepare students to be successful in MATH 1220, MATH 1300, and STAT 1530. Topics include simplifying mathematical expressions, the properties of equality, solving linear equations in one variable, using linear equations to solve problems, fractions, ratios and proportions, graphing and the rectangular coordinate system, relations and functions, systems of linear equations and inequalities in two variables, polynomial expressions and functions, factoring and solving polynomial equations. Credit earned in MATH 1210 will not count toward degree requirements.

MATH 1220 COLLEGE ALGEBRA (3 credits)

This course presents properties of real numbers, linear equations and graphing, systems of equations, linear inequalities, polynomials, algebraic fractions, exponents, logarithms, and an Introduction to Statistics. This course is designed to prepare students to be successful in MATH 1320 or MATH 1370. Students who have passed MATH 1310 with a C- or better should not take this course.

Prerequisite(s): Within the last two years: ALEKS score at least 3, ACT Math at least 19, SAT Math at least 460, SAT2016 Math at least 500, Accuplacer at least 3, MATH 1210 C- or better or MATH 1220. Students who passed MATH 1310 (C- or better) should not take MATH 1220.

Distribution: Math

MATH 1300 COLLEGE ALGEBRA WITH SUPPORT (4 credits)

This course teaches prerequisite material and all College Algebra (MATH 1320) content; it is intended for students who need additional mathematics support. This course will cover polynomial functions, exponential functions, logarithmic functions, and modeling of natural phenomena using these kinds of functions. Discussion of functions will center around four representations: algebraic, graphic, tabular, and verbal. Particular emphasis will be placed on development of covariational reasoning. Support sections will include arithmetic and algebra content necessary to engage with polynomial functions, exponential functions, and logarithmic functions at the College Algebra level, such as properties of real numbers, linear equations, graphing functions, factoring polynomials, and quadratic functions.

Distribution: Math

MATH 1320 COLLEGE ALGEBRA (3 credits)

This course will cover polynomial functions, rational functions, exponential functions, logarithmic functions, and modeling of natural phenomena using these kinds of functions. Discussion of functions will center around four representations: algebraic, graphic, tabular, and verbal. Particular emphasis will be placed on development of covariational reasoning.

Prerequisite(s): One of the following within the last two years: ALEKS score of at least 4, ACT Math at least 22, Math SAT at least 570, Accuplacer score at least 4, MATH 1220 or MATH 1310 each with C- or better, or MATH 1320

MATH 1330 TRIGONOMETRY (3 credits)

This course introduces elements of plane trigonometry, including trigonometric and circular functions, inverse trigonometric functions, solutions of triangles, identities and conditional equations, vectors, and conic sections.

Prerequisite(s): One of the following within the last two years: ALEKS score at least 5, ACT Math at least 25, Math SAT at least 590, Accuplacer at least 5, MATH 1320 or MATH 1300 with C- or better, or MATH 1330, or permission of instructor

MATH 1340 ALGEBRA AND TRIGONOMETRY FOR CALCULUS (5 credits)

A combined algebra and trigonometry course for science and engineering students planning to enroll in MATH 1950. Topics include: systems of equations, polynomials and rational functions, exponential and logarithmic functions, trigonometric functions and their inverses, trigonometric identities and applications, conic sections, and complex numbers. Credit for both MATH 1320/MATH 1324 and MATH 1340, or both MATH 1330 and MATH 1340 will not be given.

Prerequisite(s): One of the following within the last two years: ALEKS score of at least 4, ACT Math at least 23, Math SAT at least 540, Math SAT2016 at least 570, Accuplacer at least 5, MATH 1310 or MATH 1220 C- or better, or MATH 1340

MATH 1370 APPLIED ALGEBRA AND OPTIMIZATION WITH DATA ANALYSIS (3 credits)

This is an applied algebra course with optimization, teaching the following topics with an emphasis on data analysis and application: algebraic, exponential, and logarithmic functions; derivatives and applications thereof; and data analysis. The course will emphasize data analysis and applications of covered topics in order to demonstrate the relevance of mathematics to solving real-world problems.

Prerequisite(s): One of the following within the last two years: ALEKS score 4+, ACT Math sub score 23+, SAT Math 570+, Accuplacer 4+, MATH 1220/MATH 1300/MATH 1320 with C- or better, or MATH 1370, or permission of instructor

MATH 1930 CALCULUS FOR THE MANAGERIAL, LIFE, AND SOCIAL SCIENCES (3 credits)

Topics covered include functions, limits, derivatives, integrals, and applications. Trigonometry is not required. May not be used as a prerequisite for MATH 1960. Credit will not be granted for both MATH 1930 and 1950.

Prerequisite(s): One of the following within the last two years: ALEKS score 5+, ACT Math sub score 25+, Math SAT 590+, Accuplacer score 6+, MATH 1320 or MATH 1300 with C- or better, or MATH 1930, or permission of instructor

MATH 1940 CALCULUS FOR BIOMEDICINE (5 credits)

Introductory calculus with an emphasis on dynamical systems analysis applied to biological systems. Topics include differential and integral calculus, elementary chaos theory, discrete modeling, neural networks, and elementary differential equations, population dynamics, and biochemical signal transduction.

Prerequisite(s): One of the following within the last two years: ALEKS score at least 5, ACT Math sub score at least 25, Math SAT at least 570, Math SAT2016 at least 590, Accuplacer score at least 6, MATH 1320/MATH 1300 with C- or better; or permission of instructor

MATH 1950 CALCULUS I (5 credits)

This is a course in plane analytic geometry emphasizing the study of functions, limits, derivatives and applications, and an introduction to integration.

Prerequisite(s): One of the following within last two years: ALEKS score 6+, ACT Math 26+, Math SAT 590+, Math SAT2016 610+, Accuplacer 7+, MATH 1330/MATH 1340 C- or better; or permission of instructor. Prior enrollment in MATH 1950 cannot be used as prerequisite

MATH 1960 CALCULUS II (4 credits)

This course introduces applications of integration, techniques of integration, infinite sequences and series, parametric functions, and polar functions. A mathematical software package is introduced, with required assignments.

Prerequisite(s): MATH 1950 with a grade of C- or better or permission of instructor.

MATH 1970 CALCULUS III (4 credits)

This course presents vector functions, parametric equations, solid analytic geometry, partial differentiation, multiple integration, and an introduction to vector calculus. A mathematical software package is introduced with required assignments.

Prerequisite(s): MATH 1960 with a grade of C- or better, or MATH 1970 with a grade of F or better, or permission of instructor.

MATH 2030 DISCRETE MATHEMATICS (3 credits)

A foundation course in discrete mathematics for applied disciplines including computer science, computer engineering, or biology. Topics include: logic, sets, functions, induction and recursive definitions, elementary combinatorics, discrete probability, elementary chaos theory, elementary cellular automata, graphs, trees, matrices.

Prerequisite(s): MATH 1950 or MATH 1940 or MATH 1930, with a grade of C- or better.

MATH 2050 APPLIED LINEAR ALGEBRA (3 credits)

This course presents Matrix algebra, simultaneous equations, vector spaces, with applications of linear algebra and computational considerations. Mathematical software is utilized, with required assignments.

Prerequisite(s): MATH 1940 or MATH 1950 with a grade of C- or better

MATH 2200 MATHEMATICAL COMPUTING I (3 credits)

This is a first course in mathematical computing. It covers the basic elements of scientific programming in both a computer algebra system and a high-level programming language. Explored are implementation issues, problem description, model building, method development, and solution assessment.

Prerequisite(s): MATH 1950

MATH 2230 INTRODUCTION TO ABSTRACT MATH (3 credits)

This course provides a transition from the calculus to more abstract mathematics. Topics include logic, sets and functions, an introduction to mathematical proof, mathematical induction, relations. Important prerequisite material for a number of more advanced mathematics courses is studied.

Prerequisite(s): MATH 1960 or permission. Credit will not be given for both MATH 2030 and MATH 2230.

MATH 2350 DIFFERENTIAL EQUATIONS (3 credits)

Topics include solutions of linear and first-order nonlinear differential equations with applications, higher-order linear differential equations with applications, power series solutions, and Laplace transform methods.

Prerequisite(s): MATH 1960 with a grade of C- or better or permission of instructor.

MATH 3100 APPLIED COMBINATORICS (3 credits)

Basic counting methods, generating functions, recurrence relations, principle of inclusion-exclusion. Polya's formula. Elements of graph theory, trees and searching network algorithms. (Cross-listed with MATH 8105, CSCI 3100, CSCI 8105).

Prerequisite(s): MATH 2030, MATH 2040, MATH 2230, or CSCI 2030 all with a C- or better. Mathematical logic; Set theory; Relations; Functions; Congruences; Inductive and recursive definitions; Discrete probability; sets, graphs, trees, & matrices

MATH 3200 MATHEMATICAL COMPUTING II (3 credits)

This course is a second course in mathematical computing. It covers the design and development of algorithms and more advanced elements of programming in a mathematical context. The programming language Python will be used. The programming assignments are primarily based on data science and calculus concepts and are designed to reinforce and deepen the understanding of these concepts.

Prerequisite(s): CIST 1400 or MATH 2200, and MATH 1970 (the latter may be taken concurrently) all with a grade of C- or better.

MATH 2230 INTRODUCTION TO ANALYSIS (3 credits)

This course provides a theoretical foundation for the concepts of elementary calculus. Topics include real number system, topology of the real line, limits, functions of one variable, continuity, differentiation. (Cross-listed with MATH 8235).

Prerequisite(s): MATH 1960 and MATH 2230 each with a grade of C- or better.

MATH 3250 INTRODUCTION TO NUMERICAL METHODS (3 credits)

This course emphasizes the implementation of several numerical methods to problems that arise in science and engineering. It involves the application of the computer to solve mathematical problems using the following computational techniques: Taylor Series approximation, numerical differentiation, root-finding methods, interpolation, extrapolation, curve fitting, solution methods for matrix equations, numerical differentiation, numerical integration, and the solution of differential equations. (Cross-listed with MATH 8255).

Prerequisite(s): MATH 1960 and MATH 2050 with a C or better, or permission of instructor.

MATH 3400 THEORY OF INTEREST (3 credits)

A study of the measurement of interest, annuities, amortization schedules and other financial mathematics topics.

Prerequisite(s): MATH 1960 with a grade of C- or higher.

MATH 3640 MODERN GEOMETRY (3 credits)

This course will study the modern foundations of Euclidean and Non-Euclidean Geometry. Included will be a study of the principles of axiomatic systems. Euclidean Geometry will be investigated using Hilbert's axioms for Euclidean geometry (or another equivalent Euclidean geometry axiom set). Hyperbolic geometry will be encountered through the models of Klein and Poincare. Neutral geometry with Lambert and Saccheri quadrilaterals will be studied. Finite geometries and projective geometries will also be explored. (Cross-listed with MATH 8645).

Prerequisite(s): MATH 2230 with a grade of C- or better.

MATH 3850 HISTORY OF MATHEMATICS (3 credits)

An overview of the history of mathematics and famous mathematicians via studying and solving famous mathematical problems, exploring famous mathematical theorems, and studying the biographies of famous mathematicians. (Cross-listed with MATH 8855).

Prerequisite(s): MATH 1950 with a grade of C- or higher and one of either MATH 2230 or MTCH 2000 with a grade of C- or higher.

MATH 4010 INTRODUCTION TO THE THEORY OF RECURSIVE FUNCTIONS (3 credits)

This is a proof-oriented course presenting the foundations of Recursion Theory. We present the definition and properties of the class of primitive recursive functions, study the formal models of computation, and investigate partially computable functions, universal programs. We prove Rice's Theorem, the Recursion Theorem, develop the arithmetic hierarchy, demonstrate Post's theorem. Introduction to the formal theories of computability and complexity is also given. (Cross-listed with CSCI 4010, CSCI 8016, MATH 8016).

Prerequisite(s): MATH 2230 or MATH 2030 with a C- or better or CSCI 3660 with a C- or better or instructor's permission.

MATH 4030 MODERN ALGEBRA (3 credits)

Algebra is the study of mathematical manipulations that preserve something (like equality - when solving equations). The areas in which Algebra finds application are quite diverse, from Ancient Greek Geometry through to Modern Information Protection and Security (error correcting codes, data compression, and cryptography). This course begins with topics that should be familiar (such as ruler-and-compass constructions, and modular arithmetic) and builds upon this foundation through polynomial rings up to finite fields and basic group theory. (Cross-listed with MATH 8036).

Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better

MATH 4050 LINEAR ALGEBRA (3 credits)

Linear algebra is extensively utilized in the mathematical modeling of many natural phenomena. Many scientific and engineering disciplines, such as data science, chemical engineering and biology, make extensive use of the theory and techniques commonly present in basic to advanced linear algebra courses. The goal of this course is to help students to grasp a solid theoretical understanding of vectors, vector spaces, inner product spaces, linear transformations, eigenvalues, canonical forms, complex vectors, matrices, and orthogonality. By going through the materials in a mathematically rigorous way, students will develop deeper and more accurate intuitions of the basic concepts in linear algebra. Consequently, the applications of linear algebra will become much more transparent. (Cross-listed with MATH 8056).

Prerequisite(s): MATH 2050 with a grade of C- or better; MATH 2030 or MATH 2230 or equivalent with a grade of C- or better; or permission

MATH 4110 ABSTRACT ALGEBRA I (3 credits)

An introduction to group theory. Various classes of group are studied: symmetric groups, abelian, cyclic, and permutation groups. Basic tools are developed and used: subgroups, normal subgroups, cosets, the Lagrange theorem, group homomorphisms, quotient groups, direct products, and group actions on a set. The course culminates with the Sylow theorems in finite group theory. The theory is illustrated with examples from geometry, linear algebra, number theory, crystallography, and combinatorics. (Cross-listed with MATH 8116).

Prerequisite(s): MATH 4050/MATH 8056 with a C- or better or MATH 4560/MATH 8566 with a C- or better or permission of instructor

MATH 4120 ABSTRACT ALGEBRA II (3 credits)

An introduction to ring and field theory. Various classes of commutative rings are considered including polynomial rings, and the Gaussian integers. Examples of fields include finite fields and various extensions of the rational numbers. Concepts such as that of an ideal, integral domain, characteristic and extension field are studied. The course culminates with an introduction to Galois theory. Applications include the resolution of two classical problems: the impossibility of angle-trisection and the general unsolvability of polynomial equations of degree 5 or higher. (Cross-listed with MATH 8126).

Prerequisite(s): MATH 4110/MATH 8116 with a C- or better or permission of instructor

MATH 4150 GRAPH THEORY & APPLICATIONS (3 credits)

Introduction to graph theory. Representations of graphs and graph isomorphism. Trees as a special case of graphs. Connectivity, covering, matching and coloring in graphs. Directed graphs and planar graphs. Applications of graph theory in several fields such as networks, social sciences, VLSI, chemistry and parallel processing. (Cross-listed with MATH 8156, CSCI 4150, CSCI 8156).

Prerequisite(s): CSCI 2030 with a C- or better, or MATH 2030 with a C- or better, or MATH 2230 with a C- or better, or permission of instructor.

MATH 4200 NUMERICAL ANALYSIS (3 credits)

This course involves solving nonlinear algebraic equations and systems of equations, interpolation and polynomial approximation, numerical differentiation and integration, numerical solutions to ordinary differential equations, analysis of algorithms and errors, and computational efficiency. (Cross-listed with MATH 8206, CSCI 4200, CSCI 8206).

Prerequisite(s): MATH 1970 and MATH 2050 and MATH 2350 with a C- or better or permission of instructor.

MATH 4230 MATHEMATICAL ANALYSIS I (3 credits)

Provides a theoretical foundation for the concepts of classical calculus.

Topics include ordered fields, the real and complex number system, basic metric space topology, numerical sequences and series, limits and continuity in metric spaces, monotonic functions, differentiation, (functions of several variables included). (Cross-listed with MATH 8236).

Prerequisite(s): MATH 3230/MATH 8235 with a grade of C- or better.

MATH 4240 MATHEMATICAL ANALYSIS II (3 credits)

Provides a theoretical foundation for the concepts of classical Calculus (vector calculus included). Topics include sequences and series of functions, uniform convergence, power series, Fourier series, multivariable real differential and integral calculus, the Implicit Function Theorem, integration of different forms, and the important formulas, connecting those integrals, due to: Green, Gauss, Riemann, and Ostrogradski. (Cross-listed with MATH 8246).

Prerequisite(s): MATH 4230/MATH 8236 with a grade of C- or better.

MATH 4270 COMPLEX ANALYSIS (3 credits)

This course is an introduction to the theory of functions of a complex variable, a fundamental area of mathematics with multiple applications to science and engineering. Topics include the field of complex numbers, complex differentiation, the complex contour integral and Cauchy's integral formula, Taylor expansions and analytic functions, conformal mapping and Riemann's conformal equivalence theorem, residue theory and Laurent series, harmonic functions, and applications. (Cross-listed with MATH 8276).

Prerequisite(s): MATH 3230/MATH 8235 with a grade of C- or better or permission of the instructor.

MATH 4300 DETERMINISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of deterministic operations research models and algorithms. Topics include linear programming, network programming, and integer programming. (Cross-listed with CSCI 4300, CSCI 8306, MATH 8306).

Prerequisite(s): MATH 2050 with a C- or better or permission of instructor.

MATH 4310 PROBABILISTIC OPERATIONS RESEARCH MODELS (3 credits)

This is a survey course of probabilistic operations, research models and algorithms. Topics include Markov chains, queueing theory, inventory models, forecasting, and simulation. (Cross-listed with CSCI 4310, CSCI 8316, MATH 8316).

Prerequisite(s): MATH 2050 and either MATH 4740 or MATH 8746 or STAT 3800 or STAT 8805 all with a C- or better or permission of instructor.

MATH 4320 COMPUTATIONAL OPERATIONS RESEARCH (3 credits)

Survey of computational methods used in the solution of operations research problems. Some topics may include scripting to guide optimization software, constraint programming, heuristics and metaheuristics for optimization, basic machine learning algorithms, and simulation. (Cross-listed with MATH 8326, CSCI 4320, CSCI 8326).

Prerequisite(s): MATH 3200 or CSCI 1620, and MATH 4300 each with a grade of C- or better or permission of instructor.

MATH 4330 INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS (3 credits)

This course introduces the basic methods of PDEs guided by applications in physics and engineering. The main topics to be covered include The Linear First order PDEs, Transport equations, Characteristics, Classification of PDEs, Separation of variables, Heat conduction, vibrating membranes, boundary value problems, Maximum principle, Sturm-Liouville problems, Fourier series, Fourier integrals, Harmonic functions, Legendre polynomials, Distributions, Green's functions. (Cross-listed with MATH 8336).

Prerequisite(s): MATH 1970 with a C- or better and MATH 2350 with a C- or better, or permission of instructor; MATH 2050 recommended, not required.

MATH 4350 ORDINARY DIFFERENTIAL EQUATIONS (3 credits)

This course covers the theory of initial-, boundary-, and eigenvalue problems, existence theorems, real and complex linear systems of differential equations, and stability theory. There will be a strong emphasis on methods for finding solutions of initial and boundary value problems and analyzing properties of these solutions for various ordinary differential equations. (Cross-listed with MATH 8356).

Prerequisite(s): MATH 1970 with a C- or better, MATH 2050 with a C- or better, and MATH 2350 with a C-, or better or instructor's permission.

MATH 4400 THE FINITE ELEMENT METHOD (3 credits)

Introduction to finite elements methods for solving ordinary and partial differential equations. Theoretical foundations of finite element methods for boundary value problems, approximation by piecewise polynomial functions, variation formulation of partial differential equations, basic error estimates. The Rayleigh-Ritz-Galerkin method, convergence of approximations, time-dependent problems, error analysis, discretization and computer implementation, applications to problems in elasticity, heat transfer, and fluid mechanics. (Cross-listed with MATH 8406).

Prerequisite(s): MATH 1970, MATH 2050 and MATH 2350 all with a C- or better or instructor permission. MATH 3300/MATH 8305 and MATH 4330/MATH 8336 recommended. Students should be able to use a programming language (ie MATLAB) to complete computational assignments

MATH 4450 INTRODUCTION TO MACHINE LEARNING AND DATA MINING (3 credits)

This is an introduction to machine learning and data mining which covers the following topics with an emphasis on mathematical and statistical analysis in supervised learning. Topics include machine learning workflow, evaluation metrics, validation approaches, classification models including logistic regression, decision tree, boosting, random forest, support vector machines, neural networks, Bayesian methods, etc. If time allows, text mining and unsupervised learning topics will also be introduced in the course. Statistical software will be used. (Cross-listed with MATH 8456, STAT 4450, STAT 8456)

Prerequisite(s): MATH 4740/8746 with a C- or better or STAT 3800/8805 with a C- or better or permission of instructor.

MATH 4560 NUMBER THEORY & CRYPTOGRAPHY (3 credits)

An overview of one of the many beautiful areas of mathematics and its modern application to secure communication. The course is ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics to be covered include: prime numbers, congruences, perfect numbers, primitive roots, quadratic reciprocity, sums of squares, and Diophantine equations. Applications include error-correcting codes, symmetric and public key cryptography, secret sharing, and zero knowledge proofs. (Cross-listed with MATH 8566, CSCI 4560, CSCI 8566).

Prerequisite(s): MATH 2230 with a C- or better or MATH 2030 with a C- or better or CSCI 2030 with a C- or better or permission of instructor

MATH 4610 INTRODUCTION TO TOPOLOGY (3 credits)

This is a proof-oriented course presenting the foundations of topology. Metric spaces and general topological spaces are introduced. The course explores the properties of connectedness, compactness and completeness, and operations of Tychonoff product and hyperspace. (Cross-listed with MATH 8616).

Prerequisite(s): MATH 3230 with a C- or better or permission of instructor.

MATH 4620 ITERATED FUNCTION SYSTEMS AND FRACTALS (3 credits)

This is a proof-oriented course presenting the foundations of fractal geometry. It introduces students to the beauty, magic, and applications of fractals and iterated function systems, with emphasis on the mathematics behind it all. Topics range from contractions on hyperspaces and their fixed points to fractal dimensions to Julia and Mandelbrot sets. (Cross-listed with MATH 8626).

Prerequisite(s): MATH 4610 with a C- or better or permission of instructor.

MATH 4660 AUTOMATA, COMPUTABILITY, AND FORMAL LANGUAGES (3 credits)

This course presents a sampling of several important areas of theoretical computer science. Definition of formal models of computation and important properties of such models, including finite automata and Turing machines. Definition and important properties of formal grammars and their languages. Introduction to the formal theories of computability and complexity. (Cross-listed with CSCI 4660, CSCI 8666, MATH 8666)

Prerequisite(s): MATH 2030. Recommended: CSCI 3320/CSCI 8325.

MATH 4740 INTRODUCTION TO PROBABILITY AND STATISTICS I (3 credits)

A mathematical introduction to probability theory including the properties of probability; probability distributions; expected values and moments; specific discrete and continuous distributions; and transformations of random variables. (Cross-listed with MATH 8746).

Prerequisite(s): MATH 1970 and either MATH 2230 or MATH 2030 all with a grade of C- or better or permission of instructor.

MATH 4750 INTRODUCTION TO PROBABILITY AND STATISTICS II (3 credits)

Theory and methods of statistical inference including sampling distributions, estimators, estimation, and statistical hypotheses. (Cross-listed with MATH 8756).

Prerequisite(s): MATH 4740/MATH 8746 with a grade of C- or better.

MATH 4760 TOPICS IN APPLIED MATHEMATICS (3 credits)

Selection of such topics such as dynamical systems and chaos, Boolean networks, modeling of discrete or continuous systems, matrix theory, difference equations, information theory, discrete events simulation and other approved by Upper Curriculum Committee. (Cross-listed with MATH 8766).

Prerequisite(s): MATH 3100/CSCI 3100 with a grade of C- or better, or permission of instructor.

MATH 4900 INDEPENDENT STUDIES (1-3 credits)

A variable credit course for the junior or senior who will benefit from independent reading assignments and research-type problems. As independent study courses are intended to enrich a student's regular academic program, they may not normally be taken as substitutes for scheduled classroom courses of the same nature. May be repeated for credit, up to six hours, under a different topic.

Prerequisite(s): Permission of the Upper Curriculum Committee of the Mathematics Department via submission of the Undergraduate Independent Study Form available on the Mathematics website.

MATH 4950 TOPICS IN THEORETICAL MATHEMATICS (3 credits)

This course introduces students to a specialized subject matter in the areas of theoretical mathematics not covered in existing courses. The course may be repeated for different topics up to a maximum of six credit hours. The specific topics will vary, depending upon when the course is offered. One example of a course is Axiomatic Set Theory. (Cross-listed with MATH 8956).

Prerequisite(s): Permission of Instructor.

MATH 4970 SEMINAR IN APPLIED MATHEMATICS (3 credits)

A seminar in Applied Mathematics, where the students would read and present research in applied math and write their exposition of those topics.

Prerequisite(s): MATH 3100/CSCI 3100 with a grade of C- or better, or permission of instructor.

MATH 4980 SEMINAR (3 credits)

A seminar in mathematics. This course introduces students to an important form of mathematical activity and culture, where a specialized mathematical subject matter (not covered in typical courses) is studied and discussed in a collaborative setting. The course may be repeated for different topics up to a maximum of six credit hours. The specific topics will vary, depending upon when the course is offered. One example of a seminar topic is Current Trends in Set Theory of the Reals.

Prerequisite(s): Permission of instructor.

Mathematics for Teachers (MTCH)

Mathematics for Teachers Undergraduate Courses

MTCH 2000 MATHEMATICS FOR ELEMENTARY TEACHERS I (3 credits)

This course builds the conceptual underpinnings behind the arithmetical reasoning typically taught in school curriculum. Topics include addition, subtraction, and multiplication of whole numbers and of rational numbers. The course aims to help students understand not just how to solve mathematical problems from a variety of approaches, but to understand the reasoning that make the approaches valid. The course is particularly useful for students who are planning on teaching mathematics at the K-6 level.

Prerequisite(s): Prerequisite(s): A grade of C or better in one of TED 2060, TED 2100, TED 2200, or TED 2250, and one of the following: A grade of C or better in MATH/STAT 1100 or above, ACT Math Sub-Score at least 23, or SAT Math Sub-Score at least 570.

MTCH 2020 NUMBER SENSE, ALGEBRA, AND GEOMETRY FOR MIDDLE SCHOOL EDUCATION (3 credits)

The course covers the following major concepts: standard algorithms for Arithmetic with rational numbers, proportional reasoning, number theory topics in K-8, beginning Algebra concepts, and beginning Geometry.

Prerequisite(s): TED 2100 (EDUC 2020) or TED 2200 (EDUC 2030) each with a C or better and College of Education major and MATH 1950 with a C or better. Not open to non-degree graduate students.

MTCH 3000 MATHEMATICS FOR ELEMENTARY TEACHERS II (3 credits)

This course develops the numerical, geometric, and algebraic reasoning taught in K-6 curriculum for future teachers. The course develops students' understanding mathematics concepts from multiple representations including place value representations, base-ten models, area models, number line models, and set models. The course also expands students' understanding of connections between these representations, the meaning of the whole numbers, rational numbers, and integer; and the common operations' algorithms and properties. The course also makes connections to early algebraic reasoning, number theory, and problem solving.

Prerequisite(s): MTCH 2000 with a grade of C or better.

Mechanical Engineering (MECH)

Mechanical Engineering Undergraduate Courses

MECH 130 INTRODUCTION TO CAD (3 credits)

Principles and accepted practices of geometric design. Computer generation of 2D and 3D models for mechanical systems. Introduction to engineering design practices such as specifications, dimensioning and tolerancing.

MECH 200 ENGINEERING THERMODYNAMICS (3 credits)

First and Second Laws of Thermodynamics, properties of gases and vapors, and cycles. Sources of energy and its conversion to work.

Prerequisite(s): MECH 223. Not open to non-degree graduate students.

MECH 220 STATICS (3 credits)

Fundamental concepts, equilibrium of force systems, analysis of simple frames and trusses. Centroid and moments of inertia and friction.

Prerequisite(s): MATH 1950

MECH 223 ENGINEERING STATICS (3 credits)

The action of forces on engineering structures and machines. Force systems, static equilibrium of frames and machines. Friction, center of gravity, moment of inertia, vector algebra.

Prerequisite(s): MATH 1960 with grade of C or better and PHYS 2110 with grade of C or better

MECH 324 STRENGTH OF MATERIALS (3 credits)

Stress and strain analysis in elastic materials. Use of properties of materials in the analysis and design of welded and riveted connections, statically determinate and indeterminate flexure members, columns. Combined stresses, axial, eccentric and torsional loading. Observations of laboratory tests for axially loaded specimens. Introduction to shear and moment diagrams.

Prerequisite(s): MECH 220

MECH 325 MECHANICS OF ELASTIC BODIES (3 credits)

Concept of stress and strain considering axial, torsional and bending forces. Shear and moments. Introduction to combined stresses and column theory.

Prerequisite(s): MECH 223 (grade of C or better), and MATH 1970

MECH 373 ENGINEERING DYNAMICS (3 credits)

A study of force action related to displacement, velocity and acceleration of rigid bodies. Kinematics of plane motion, kinetics of translation and rotation. Mass moment of inertia, vibration, work, energy and power, impulse and momentum.

Prerequisite(s): MECH 223 (grade of C or better), and MATH 1970

MECH 399 UNDERGRADUATE RESEARCH AND THESIS (1-5 credits)

Engineering design or laboratory investigation that an undergraduate is qualified to undertake.

Prerequisite(s): Not open to non-degree graduate students.

MECH 491 SPECIAL TOPICS IN ENGINEERING MECHANICS (1-6 credits)

Treatment of special topics in engineering mechanics by experimental, computational and/or theoretical methods. Topics will vary from term to term. (Cross-listed with MECH 891).

MECH 498 RESEARCH (0-6 credits)

Faculty-supervised research. (Cross-listed with MECH 898).

MECH 891 SPECIAL TOPICS IN ENGINEERING MECHANICS (1-6 credits)

Treatment of special topics in engineering mechanics by experimental, computational and/or theoretical methods. Topics will vary from term to term. (Cross-listed with MECH 491).

MECH 898 RESEARCH (0-6 credits)

Faculty-supervised research. (Cross-listed with MECH 498).

MECH 999 DOCTORAL DISSERTATION (1-24 credits)

Doctoral dissertation

Prerequisite(s): Admission to doctoral degree program and permission of supervisory committee chair.

Medical Humanities (MEDH)

Medical Humanities Undergraduate Courses

MEDH 1000 INTRODUCTION TO MEDICAL HUMANITIES (3 credits)

This is an interdisciplinary survey course in Medical Humanities. It focuses on the contributions and perspectives of arts and humanities in providing a broad and culturally diverse understanding of health, illness, healing, and medicine.

Distribution: Humanities and Fine Arts General Education course

MEDH 2010 SYMBOLIC LOGIC (3 credits)

A first course in symbolic logic designed to introduce students to formal systems of sentential logic and predicate logic. The course explores the nature of both syntax (the formal structure of elements of language) and semantics (interpretive relations between language and subject matter including notions such as truth and reference). Students learn how to translate between English and formal languages, how to construct truth-tables and interpretations to test for key semantic properties, and how to construct derivations. In addition, students will consider the nature and relationships between important logical properties and explore foundational issues in logical metatheory. Throughout the course, students will encounter broad philosophical themes such as the purpose of language, constraints on translation, and nature of meaning itself. (The study of logic is also excellent preparation for the LSAT and the reasoning portions of other examinations for graduate study.) (Cross-listed with PHIL 2010).

MEDH 2030 HISTORY OF MEDICINE: FROM ANTIQUITY TO THE PRESENT (3 credits)

This course will cover the history of medicine and medical practices from the earliest civilizations to the present. In addition to this chronological scope, the course will also examine medical practices in cultures from across the world. (Cross-listed with HIST 2030).

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

MEDH 2060 ART AND SCIENCE OF MEDICAL DECISION-MAKING (3 credits)

The course explores multiple facets of medical decision-making, including the perspective of the patient, the family, and the healthcare provider. Topics include basic anatomy and medical terminology, which will be used to understand decision-making in the context of the provider. Students use literature and other records to generate and critically evaluate clinical decisions. The course does not satisfy requirements for degree programs in the Department of Biology minor, BA, BS in Biology; BS in Biotechnology. (Cross-listed with BIOL 2060).

Prerequisite(s): BIOL 1060 or concurrent.

MEDH 2100 EXPLORING MUSIC THERAPY AND ADAPTIVE MUSIC THERAPY (3 credits)

An exploratory introduction to music therapy and adaptive music in the rehabilitation and reorganization of human beings into social life, health, and wellbeing. A survey of the history of music therapy is included and with the processes and principles used by practicing music therapists. (Cross-listed with MUS 2100).

Prerequisite(s): Not open to non-degree graduate students.

MEDH 2300 BIOMEDICAL ETHICS (3 credits)

In the rapidly evolving fields of medicine and healthcare, ethical considerations play an ever-increasing role. This course is designed to equip students with the conceptual tools necessary for ethical reasoning and decision-making in medical contexts. This course investigates critical issues such as informed consent, end-of-life decisions, reproductive ethics, genetic testing, and research ethics. Ideal for students thinking about a career in healthcare, philosophy majors, medical humanities majors, or anyone interested in grappling with the complex ethical questions that accompany advancements in biomedical science and healthcare practice. (Cross-listed with PHIL 2300).

MEDH 3000 MEDICAL HUMANITIES COMMONS (3 credits)

A multidisciplinary study of a health-related topic from the perspective of medical humanities. Each semester the course will focus on a different topic or problem for exploration and inquiry. The course topic or problem is examined using disciplinary perspectives, interdisciplinary intersections, and translational opportunities.

Prerequisite(s): MEDH 1000 or Permission of the instructor.

MEDH 3440 EXPLORING ART THERAPY (3 credits)

This course provides an overview of the field of art therapy and the use of therapeutic art. Topics covered include: The historical use of art as healing across cultures, the contemporary use of art therapy with various populations and settings; an introduction to the theories, techniques; and the profession of art therapy. Students participate in representative art therapy activities, but previous art experience is neither required nor expected. This course does not qualify participants to practice art therapy but will provide information on its safe and effective utilization by health professionals. (Cross-listed with ART 3440, THEA 3440, WRWS 3440).

MEDH 3450 PHILOSOPHY OF MEDICINE (3 credits)

This course considers a range of philosophical questions raised by and within the practice of medicine. The course begins with a conceptual investigation of the meaning of "health" from "illness." Is the classification of individuals as healthy or ill an objective, scientific matter? Or is it instead a matter of social and ethical values? What follows from answering this question one way, versus another? This introduction forms the backdrop against which we move on to investigate a range of further topics. Examples of some of the topics that may be covered include: medical and social models of disability; the role morality of doctors and other medical providers; abortion, euthanasia, and conscientious objection in the healthcare professions; health measurement and quality of life; "death panels" and health resource rationing; conditions on appropriately voluntary and informed consent to medical procedures; and the ethics of biomedical research. (Cross-listed with PHIL 3450).

Prerequisite(s): 6 hours of Philosophy OR Sophomore status OR permission of the instructor

MEDH 4000 TOPICS IN MEDICAL HUMANITIES (3 credits)

This course introduces students to a specialized subject matter in the disciplines of medical humanities not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours. (Cross-listed with MEDH 8006).

Prerequisite(s): Junior standing or the permission of the instructor.

MEDH 4280 CLINICAL ETHNOGRAPHY (3 credits)

Using ethnographic texts, this course explores the clinical world from an anthropological perspective. Students will use anthropological theories and methods to learn about cultures of medical practices, diverse health professions, the contexts of health care delivery, and the structural, cultural, and historical forces that influence the practice of healthcare in the U.S. and cross-culturally. (Cross-listed with ANTH 8286, ANTH 4280).

Prerequisite(s): ANTH 1050 or MEDH 1000 or permission of the instructor.

MEDH 4290 DRUG USE, ADDICTION, & CULTURE (3 credits)

What does "addiction" and its treatment look like in different cultures? How do social practices and cultural values shape drug use and addiction? Why do some people become addicted to drugs and others don't? This course examines drug use and addiction cross-culturally. Using anthropological theories and methods, we will explore: definitions of addiction across time and place; drug use and addiction in relation to social inequalities; interventions targeting drug use and the assumptions underlying them; and lived experiences of drug use and addiction. We will also consider the implications of these issues for healthcare, policy, and social justice in the context of contemporary problems such as the rise in opioid overdose in the U.S. (Cross-listed with ANTH 8296, ANTH 4290)

Prerequisite(s): ANTH 1050, MEDH 1000, or permission of the instructor

MEDH 4900 CAPSTONE IN MEDICAL HUMANITIES (3 credits)

In this capstone course for students majoring in Medical Humanities, students will curate and complete their portfolio of educational experiences in the discipline. To integrate and apply their previous course work and experience, students will participate in a community-focused medical humanities project.

Prerequisite(s): Senior standing (or students in junior standing with permission from the instructor) and MEDH 1000, MEDH 3000 and a writing in the discipline course approved for the major. Not open to non-degree graduate students.

MEDH 4940 PUBLISHING THE LINDEN REVIEW (3 credits)

This course will offer students an experiential learning opportunity within the publishing field. Students will work as an editorial team advised by their instructor to publish a biannual, international, online literary journal named The Linden Review. The Linden Review's mission is to publish high-quality creative nonfiction and book reviews that investigate the complexities of the word health. Health will be defined broadly as a deep understanding and appreciation of bodily, emotional, spiritual, social, political, and environmental well-being. (Cross-listed with ENGL 8946, ENGL 4940).

Prerequisite(s): Prerequisite: ENGL 1160 or equivalent

MEDH 4950 BRINGING THE WAR HOME: DEPICTIONS OF WAR VETERANS IN LITERATURE AND FILM (3 credits)

Course explores the impact of war on combatants, their families and communities as represented in literary fiction, film, historical documentation, first-person accounts, and other texts written in or translated to English. (Cross-listed with ENGL 8956, ENGL 4950).

Prerequisite(s): ENGL 1160 prerequisite

MEDH 4990 INDEPENDENT STUDY IN MEDICAL HUMANITIES (1-3 credits)

This course is guided reading or independent research in special topics in Medical Humanities under the supervision of a member of the Medical Humanities faculty. This course is designed primarily for the student interested in topics not currently available in the program offerings and who has demonstrated ability to work independently. May be repeated once for credit. (Cross-listed with MEDH 8996).

Prerequisite(s): Junior standing or permission of the instructor. Not open to non-degree graduate students.

Military Science (MILS)

Military Science Undergraduate Courses

MILS 1000 LEADERSHIP LABORATORY (0 credits)

Leadership Laboratory provides basic and advanced military leadership experience in military courtesy, drill and ceremonies, and practical application of classroom taught subjects. Functions and responsibilities of leadership positions are developed through cadet staff actions and command positions. Leadership Laboratory meets Mondays through Fridays from 1530-1730 at the Military Science Building or various training locations in the Omaha Metro area. All military science students must register for MILS 1000.

MILS 1010 LEADERSHIP AND PERSONAL DEVELOPMENT (2 credits)

Examines the role of the commissioned officer in the U.S. Army. Discussion focuses on the role and organization of the Army, the military profession, general leadership, role of the non-commissioned officer and officer, customs of the service, military pay and benefits, career opportunities, and personal development.

MILS 1020 INTRODUCTION TO TACTICAL LEADERSHIP (2 credits)

Focuses on the relationship between leadership and personal development. Also introduces basic soldier skills, to include land navigation and map reading.

MILS 2000 LEADERSHIP LABORATORY (0 credits)

Leadership Laboratory provides basic and advanced military leadership experience in military courtesy, drill and ceremonies, and practical application of classroom taught subjects. Functions and responsibilities of leadership positions are developed through cadet staff actions and command positions. Leadership Laboratory meets Mondays through Fridays from 1530-1730 at the Military Science Building or various training locations in the Omaha Metro area. All military science students must register for MILS 1000.

MILS 2010 INNOVATIVE TEAM LEADERSHIP (2 credits)

Develops student leadership and critical individual skills. Training is basic in nature and includes leadership techniques, written and oral communication, rifle marksmanship, fundamentals of land navigation, and physical fitness.

Prerequisite(s): MILS 1010 and MILS 1020.

MILS 2020 UNITED STATES MILITARY HISTORY (3 credits)

This course will introduce students to the history of the American Military establishment and its relationships to American society from colonial times to the present. Students will become acquainted with the evolution of warfare, military theory and the military profession, with particular emphasis on the place of military institutions in society, so as to develop a sense of historical awareness.

MILS 2050 BASIC CAMP (3 credits)

Six weeks of training at Fort Knox, Kentucky. Travel pay and salary stipend provided through the Department of Military Science. The student is not obligated to any military service as a result of attending Training Camp. Camp graduates are eligible to enroll in Advanced Military Science courses and compete for two-year military science scholarships. This course is designed for those entering the ROTC Program with no prior military service and will be Academic Juniors beginning in the Fall after Basic Camp completion.

Prerequisite(s): Graduate of MS 1000-3000 or Army Basic Training

MILS 2120 FOUNDATIONS OF TACTICAL LEADERSHIP (2 credits)

Continues the development of student leadership and critical individual military skills. Training focuses on advanced military skills and includes orienteering, field survival skills, operation and training.

Prerequisite(s): MILS 2010

MILS 2130 INNOVATIVE TEAM LEADERSHIP (2 credits)

Designed to develop leadership and critical individual skills. Training is basic in nature and includes leadership techniques, written and oral communication, rifle marksmanship, fundamentals of land navigation, and physical fitness.

Prerequisite(s): MILS 1030. Not open to non-degree graduate students.

MILS 3000 LEADERSHIP LABORATORY (0 credits)

Leadership Laboratory provides basic and advanced military leadership experience in military courtesy, drill and ceremonies, and practical application of classroom taught subjects. Functions and responsibilities of leadership positions are developed through cadet staff actions and command positions. Leadership Laboratory meets Mondays through Fridays from 1530-1730 at the Military Science Building or various training locations in the Omaha Metro. All military science students must register for MILS 1000.

MILS 3010 ADAPTIVE TACTICAL LEADERSHIP (3 credits)

Students learn the fundamentals of land navigation, the role and functions of a military line and staff organization, the role of the non-commissioned officer, training management, how to prepare military correspondence, how to conduct oral presentations, and how to arrange and conduct meetings and conferences. Includes physical training.

Prerequisite(s): Department approval and enrollment in MILS 3000.

MILS 3020 LEADERSHIP IN A CHANGING ENVIRONMENT (3 credits)

Students learn the fundamentals of small unit leadership skills and tactics, how to conduct personal, performance and discipline counseling, and examine leadership case studies in detail. Includes physical training.

Prerequisite(s): Department approval and enrollment in MILS 1000.

MILS 3070 ADVANCE CAMP (3 credits)

The ROTC cadet attends six weeks of intensive leadership and management training. The training is conducted during the summer months at Fort Knox, KY. The student's ability to lead his unit and to plan and conduct small unit operations is thoroughly evaluated. Travel pay and salary stipend are provided through the Army.

Prerequisite(s): MILS 3010 and MILS 3020

MILS 4000 LEADERSHIP LABORATORY (1 credit)

Leadership Laboratory provides basic and advanced military leadership experience in military courtesy, drill and ceremonies, and practical application of classroom taught subjects. Functions and responsibilities of leadership positions are developed through cadet staff actions and command positions. Leadership Laboratory meets Mondays through Fridays from 1530-1730 at the Military Science Building or various training locations in the Omaha Metro area.

MILS 4010 DEVELOPING ADAPTIVE LEADERS (2 credits)

Leadership seminar on military ethics, ethical reasoning, decision making and value clarification. Contemporary problems and ethical issues are discussed using the case study method. Entering a new organization, communications and human relations skills, the importance of power and influence are learned.

Prerequisite(s): Department approval and enrollment in MILS 4000.

MILS 4020 LEADERSHIP IN A COMPLEX WORLD (2 credits)

Develops military management skills by providing a working knowledge of the Army personnel management system, the military justice system, the Army logistical system and post and installation support agencies. The focus of this course is to provide an understanding of basic leadership and management skills required by newly commissioned officers.

Prerequisite(s): Department approval and enrollment in MILS 4000.

MILS 4030 DIRECTED INDEPENDENT READINGS (1-3 credits)

A variable topic course in Military Science designed to consider an issue or field of interest that relates to the military establishment. Student will read and report on military related books. Student should contact designated faculty member for specific course requirement prior to registration.

Prerequisite(s): Permission of instructor.

MILS 4040 DIRECTED INDEPENDENT STUDIES (1-3 credits)

A variable credit course in Military Science designed to consider an issue or field of interest that relates to the military establishment. Student should contact designated faculty member for specific course requirement prior to registration.

Prerequisite(s): Permission of instructor.

Multidisciplinary Studies (MLTI)

Multidisciplinary Studies Undergraduate Courses

MLTI 3000 MULTIDISCIPLINARY FOUNDATIONS SEMINAR (3 credits)

A foundational course for the Bachelor of Multidisciplinary Studies degree. Students explore the requirements, goals, and objectives of the program as well as gain an understanding of emotional intelligence capabilities.

Prerequisite(s): Not open to non-degree graduate students.

MLTI 4000 MULTIDISCIPLINARY CAPSTONE SEMINAR (3 credits)

This capstone course engages Bachelor of Multidisciplinary Studies (BMS) students with significant themes or topics around a real-world issue or problem. The capstone requires the development of a substantial final project that combines learning from multiple sources and perspectives, including general education courses, BMS degree courses, prior learning in and outside the classroom, as well as co-curricular experiences. As the concluding experience for BMS students, the capstone provides the opportunity for students to reflect, through their Multidisciplinary Learning Portfolio, on how their education informs their future professional, personal, and educational lives.

Prerequisite(s): MLTI 3000 and ENGL 1160. Student must have 102 earned credit hours to enroll. This course should be taken towards the end of the Bachelor of Multidisciplinary Studies degree program as a culminating experience. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

Music (MUS)

Music Undergraduate Courses

MUS 115A APPLIED BASSOON (1-2 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 115B APPLIED CELLO (1-2 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115C APPLIED CLARINET (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 115D APPLIED DOUBLE BASS (1-2 credits)

This course provides individual weekly instruction on bass. Students work with the instructor to schedule lessons for one credit hour (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required. The primary goal of the bass student is to develop the highest level of technical and musical proficiency on his/her instrument. Through weekly applied lessons and personal practice time, it is intended that the student will gain the tools necessary to become a more mature musician.

Prerequisite(s): This course requires an audition performed for & approved by the string or jazz faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115E APPLIED EUPHONIUM (1-2 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115F APPLIED FLUTE (1-2 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): An audition performed for and approved by the woodwind faculty is required. Students enrolled in this course must also enroll in an instrumental ensemble. Music majors must be concurrently enrolled in MUS 1000-001 and MUS 1000-007.

MUS 115G APPLIED FRENCH HORN (1-2 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115H APPLIED GUITAR (1-2 credits)

This course provides individual weekly instruction on guitar. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115I APPLIED HARP (1-2 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115J APPLIED OBOE (1-2 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 115K APPLIED PERCUSSION (1-2 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons for one credit hour (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the percussion faculty. Music majors must attend the weekly masterclass.

MUS 115L APPLIED PIANO (1-2 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credits (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 115M APPLIED PIPE ORGAN (1-2 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 115N APPLIED SAXOPHONE (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 115O APPLIED TROMBONE (1-2 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115P APPLIED TRUMPET (1-2 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115Q APPLIED TUBA (1-2 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 115R APPLIED VIOLA (1-2 credits)

This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115S APPLIED VIOLIN (1-2 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (violin majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 115T APPLIED VOICE (1-2 credits)

This course provides individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one credit hour (non music majors) or two credit hours (voice music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the voice faculty. Students must also enroll in a choral ensemble MUS 2700/MUS 4100 and attend the weekly masterclass. MUS 115T students are also required to attend Freshman Voice Seminar.

MUS 115U APPLIED CARILLON (1-2 credits)

This course provides individual weekly instruction on carillon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the keyboard faculty.

MUS 167B APPLIED CLASS - PIANO (1 credit)

Basic reading of treble and bass clef are a prerequisite for this course. Beginning with learning correct posture, hand position and technique, a deeper understanding of key musical elements such as key signatures, dynamic markings, time signatures, rhythmic values, and musical terminology will begin the coursework. Reading, coordination, rhythm, scales, improvisation, technology, duet and solo repertoire will be used to strengthen both keyboard and overall musical skills. *This is a sequential course whereby all students must pass the fall semester before enrolling in spring semester.

MUS 167C APPLIED CLASS - VOICE I (1 credit)

This course provides class instruction in the development of elementary basic skills in applied voice.

MUS 167E APPLIED CLASS - PIANO FOR NON-MUSIC MAJORS (1 credit)

Instruction in this course will prepare students with basic keyboard skills. An emphasis will be placed on the following skills during the first semester: keyboard posture, basic notes and rest values, the keyboard and groupings, notation, and notation symbols, five finger patterns, reading notes, intervals, slurs and phrase markings and rhythmic studies. Diverse music with fun games and popular music to sing along with playing the keyboard will show how fun learning the piano can be.

Prerequisite(s): Non-music majors only

MUS 169D APPLIED CLASS JAZZ PIANO (1 credit)

This course will consist of class instruction designed to teach students basic jazz piano skills.

Prerequisite(s): MUS 1420 or MUS 2430

MUS 215A APPLIED BASSOON (1-2 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 215B APPLIED CELLO (1-2 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 115B. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of cello and attend the weekly masterclass.

MUS 215C APPLIED CLARINET (1-2 credits)

This course provides individual weekly instruction on clarinet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 215D APPLIED DOUBLE BASS (1-2 credits)

This course provides individual weekly instruction on double bass. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 115D. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of double bass and attend the weekly masterclass.

MUS 215E APPLIED EUPHONIUM (1-2 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215F APPLIED FLUTE (1-2 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition for & approval by the woodwind faculty, OR successful completion of 4 hours of MUS 115F. Students must also enroll in an instrumental ensemble. Music majors must be concurrently enrolled in MUS 1000-001 & 1000-007.

MUS 215G APPLIED FRENCH HORN (1-2 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215H APPLIED GUITAR (1-2 credits)

This course provides individual weekly instruction on guitar. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the string faculty. Must also enroll in an instrumental ensemble. Music majors must attend the weekly master classes.

MUS 215I APPLIED HARP (1-2 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 115I. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of harp and attend the weekly masterclass.

MUS 215J APPLIED OBOE (1-2 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 215K APPLIED PERCUSSION (1-2 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the percussion faculty. Music majors must attend the weekly masterclass

MUS 215L APPLIED PIANO (1-2 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 215M APPLIED PIPE ORGAN (1-2 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 215N APPLIED SAXOPHONE (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credits (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 215O APPLIED TROMBONE (1-2 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215P APPLIED TRUMPET (1-2 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215Q APPLIED TUBA (1-2 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 215R APPLIED VIOLA (1-2 credits)

This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 115R. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of viola and attend the weekly masterclass.

MUS 215S APPLIED VIOLIN (1-2 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 115S. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of violin and attend the weekly masterclass.

MUS 215T APPLIED VOICE (1-2 credits)

This course provides individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one credit hour (non music majors) or two credit hours (voice music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for and approved by the voice faculty. All enrolled students must also enroll in a choral ensemble (MUS 2700, MUS 4100). All students must attend the weekly masterclass.

MUS 315A APPLIED BASSOON (1-2 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 315B APPLIED CELLO (1-2 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215B. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of cello and attend the weekly masterclass.

MUS 315C APPLIED CLARINET (1-2 credits)

This course provides individual weekly instruction on clarinet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 315D APPLIED DOUBLE BASS (1-2 credits)

This course provides individual weekly instruction on double bass. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215D. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of double-bass and attend the weekly masterclass.

MUS 315E APPLIED EUPHONIUM (1-2 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315F APPLIED FLUTE (1-2 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Audition for & approval by woodwind faculty OR successful completion of 4 hrs of MUS 215F and a "PASS" in the Sophomore Continuation Jury. Concurrent enrollment in an instrumental ensemble. Music majors: Concurrent enrollment in MUS 1000-001 & 1000-007.

MUS 315G APPLIED FRENCH HORN (1-2 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315H APPLIED GUITAR (1-2 credits)

This course provides individual weekly instruction on guitar. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215H. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of guitar and attend the weekly masterclass.

MUS 315I APPLIED HARP (1-2 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215I. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of harp and attend the weekly masterclass.

MUS 315J APPLIED OBOE (1-3 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 315K APPLIED PERCUSSION (1-2 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the percussion faculty. Music majors must attend the weekly masterclass.

MUS 315L APPLIED PIANO (1-2 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 315M APPLIED PIPE ORGAN (1-3 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 315N APPLIED SAXOPHONE (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 315O APPLIED TROMBONE (1-2 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315P APPLIED TRUMPET (1-2 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credits (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315Q APPLIED TUBA (1-2 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 315R APPLIED VIOLA (1-2 credits)

This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215R. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of viola and attend the weekly masterclass.

MUS 315S APPLIED VIOLIN (1-2 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215S. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of violin and attend the weekly masterclass.

MUS 315T APPLIED VOICE (1-2 credits)

This course provides individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one credit hour or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for and approved by the voice faculty. All enrolled students must also enroll in a choral ensemble (MUS 2700, MUS 4100). All students must attend the weekly masterclass.

MUS 415A APPLIED BASSOON (1-2 credits)

This course provides individual weekly instruction on bassoon. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 415B APPLIED CELLO (1-2 credits)

This course provides individual weekly instruction on cello. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 315B. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of cello and attend the weekly masterclass.

MUS 415C APPLIED CLARINET (1-2 credits)

This course provides individual weekly instruction on clarinet. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 415D APPLIED DOUBLE BASS (1-2 credits)

This course provides individual weekly instruction on double bass. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 315D. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of double bass and attend the weekly masterclass.

MUS 415E APPLIED EUPHONIUM (1-2 credits)

This course provides individual weekly instruction on euphonium. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. This level of applied study provides instruction on fundamental brass playing concepts. Weekly assignments can include technical studies, scale exercises, tone and articulation studies, breathing exercises, solo and orchestral repertoire, chamber music, etc.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415F APPLIED FLUTE (1-2 credits)

This course provides individual weekly instruction on flute. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition for & approval by the woodwind faculty, OR successful completion of 4 credit hours of MUS 315F. Students must also enroll in an instrumental ensemble. Music majors must be concurrently enrolled in MUS 1000-001 & 1000-007.

MUS 415G APPLIED FRENCH HORN (1-2 credits)

This course provides individual weekly instruction on french horn. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415H APPLIED GUITAR (1-2 credits)

This course provides individual weekly instruction on the guitar. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 315H. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of guitar and attend the weekly masterclass.

MUS 415I APPLIED HARP (1-2 credits)

This course provides individual weekly instruction on harp. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 315I. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of harp and attend the weekly masterclass.

MUS 415J APPLIED OBOE (1-2 credits)

This course provides individual weekly instruction on oboe. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 415K APPLIED PERCUSSION (1-2 credits)

This course provides individual weekly instruction on percussion. Students work with the instructor to schedule lessons for one credit (BA) or two credit hours (BM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the percussion faculty. Music majors must attend the weekly masterclass.

MUS 415L APPLIED PIANO (1-2 credits)

This course provides individual weekly instruction on piano. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the piano faculty. Music majors must attend the weekly masterclass.

MUS 415M APPLIED PIPE ORGAN (1-3 credits)

This course provides individual weekly instruction on organ. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires an audition performed for & approved by the keyboard faculty. Music majors must attend the weekly masterclass.

MUS 415N APPLIED SAXOPHONE (1-2 credits)

This course provides individual weekly instruction on saxophone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the woodwind faculty. Music majors must attend the weekly masterclass.

MUS 415O APPLIED TROMBONE (1-2 credits)

This course provides individual weekly instruction on trombone. Students work with the instructor to schedule lessons for one credit hour (BA), two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415P APPLIED TRUMPET (1-2 credits)

This course provides individual weekly instruction on trumpet. Students work with the instructor to schedule lessons for one credit hour (BM) or two credit hours (BM), or three credit hours (MM). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415Q APPLIED TUBA (1-2 credits)

This course provides individual weekly instruction on tuba. Students work with the instructor to schedule lessons for one credit hour (non-majors) or two credit hours (music majors). Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): Enrollment in this course requires an audition performed for and approved by the brass faculty. Music majors must attend the weekly masterclass.

MUS 415R APPLIED VIOLA (1-2 credits)

This course provides individual weekly instruction on viola. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 315R. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of viola and attend the weekly masterclass.

MUS 415S APPLIED VIOLIN (1-2 credits)

This course provides individual weekly instruction on violin. Students work with the instructor to schedule lessons for one credit or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 215S. Must also enroll in an instrumental ensemble. Students must be Music Majors in the area of violin and attend the weekly masterclass.

MUS 415T APPLIED VOICE (1-2 credits)

This course is a continuation of the applied music sequence of study for music majors. This course provides individual weekly instruction for voice. Students work with their assigned instructor to schedule lessons for one credit hour or two credit hours. Students are evaluated at each lesson on their musical and technical progress. A lab fee is required.

Prerequisite(s): This course requires successful completion of MUS 315T. This course requires an audition performed for and approved by the voice faculty. All enrolled students must also enroll in a choral ensemble (MUS 2700, MUS 4100) and attend the weekly masterclass.

MUS 1000 CONVOCATION (0 credits)

This course is a weekly meeting of all music majors which provides students with performance opportunities for themselves as well as recitals and lectures by guest artists.

Prerequisite(s): Music majors only.

MUS 1010 MUSIC TECHNOLOGY NOW (0 credits)

This course is a weekly meeting of all music technology majors. The course includes presentations of ongoing student projects, lectures by resident and visiting music technologists, audio engineering training and practicum opportunities, and critical listening experiences.

Prerequisite(s): Not open to non-degree graduate students.

MUS 1050 MUSIC OF THE PEOPLE: THE BEATLES (3 credits)

The Beatles are arguably the most influential and important rock band in history. Their music influenced not only the shape of popular music but youth culture. Course objectives are to learn the history of the music of the Beatles from their early influences and formation to their break-up and legacy; to understand the relationship of this music to larger cultural, political, and economic formations; to become familiar with aspects of the diverse musical structures used in their music; and to become familiar with the advances in sound and recording technology their music spawned and influenced innovation to music today.

Distribution: Humanities and Fine Arts General Education course

MUS 1070 MUSIC OF THE PEOPLE: ROCK AND POP (3 credits)

The objectives of this course are 1) to learn the history of rock music from its beginnings in earlier forms of popular music to the beginning of the 21st century 2) to understand the relationship of this music to larger cultural, political, and economic formations; and 3) to become familiar with aspects of musical structure which have been used in rock music.

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

MUS 1080 MUSIC OF THE PEOPLE: THE WORLD (3 credits)

A study of music of various cultures throughout the world practiced primarily by individuals who produce music as a part of their everyday life. Using music as a window into various cultures the course gives students an insight into cultures that may vary from their own.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

MUS 1090 MUSIC APPRECIATION (3 credits)

A listening course for the non-music major designed to promote a better understanding of noteworthy compositions from various periods and styles. Lab fee required.

Distribution: Humanities and Fine Arts General Education course

MUS 1100 MUSIC OF THE PEOPLE: JAZZ (3 credits)

In this course, the history of jazz will be traced from its origins up to the present. Designed primarily for non-music majors, the course will chronicle the development of various stylistic trends which characterize jazz and discuss the prominent musical artists that influenced each style period within the history of jazz. Lab fee required.

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

MUS 1170 FOUNDATIONS OF MUSIC TECHNOLOGY (3 credits)

This course addresses the foundational people, concepts, and terms of music technology. The course covers a broad spectrum of themes including acoustics, psychoacoustics, microphones, Musical Instrument Digital Instrument (MIDI), synthesis, computer music, notation, and sampling. Intended for students pursuing a Bachelor of Arts with a concentration in Music Technology.

MUS 1390 BASIC MUSICIANSHIP (3 credits)

This course is designed to develop basic music reading skills through experiential learning that promotes music literacy skills of note reading, rhythmic reading, key signatures, and simple meter. It is designed for students interested in music degree tracks who have limited understanding of music theory.

Prerequisite(s): Music major or permission of the instructor. Not open to non-degree graduate students.

MUS 1400 MUSIC FUNDAMENTALS (3 credits)

Introduction to Music Studies will cover the basics of music including music reading in multiple clefs, scales, key signatures, meter signatures, rhythm, triads, seventh chords, and elementary aural and singing skills. The primary purpose of the course is to prepare students for further study in music at the college level.

Prerequisite(s): Music major or permission of instructor. Not open to non-degree graduate students.

MUS 1410 MUSIC CORE CURRICULUM I (4 credits)

The study of basic elements of music and their application to musical performance, education, and analysis.

Prerequisite(s): Music Major or permission from the instructor. Successful completion of 1400 (C or better). Not open to non-degree graduate students.

MUS 1420 MUSIC CORE CURRICULUM II (4 credits)

The study of basic elements of music and their application to musical performance, education, and analysis.

Prerequisite(s): Completion of MUS 1410 with the grade C or better or permission of the instructor. Not open to non-degree graduate students.

MUS 1430 COMMERCIAL MUSIC THEORY I (3 credits)

This course will integrate Roman Numeral, Lead Sheet, and Nashville notations through realization and analysis. It will also combine Common Practice Period music theory with Jazz theory in an effort to promote practical usage of theoretical systems in performance and practice.

Prerequisite(s): Prerequisites include MUS 1390 and MUS 1400.

MUS 1600 INTRODUCTION TO ARTS EDUCATION (1 credit)

This course is designed to provide an overview of the arts education profession. It will focus on the history, philosophy, and fundamentals of arts education in the United States. (Cross-listed with ART 1600).

MUS 1640 DICTION FOR SINGERS I (1 credit)

A study of the International Phonetic Alphabet (IPA) and the rules of pronunciation as applied to vocal literature of the English and Italian languages.

Prerequisite(s): Music major

MUS 1660 DICTION FOR SINGERS II (1 credit)

A study of the rules and guidelines of pronunciation as applied to vocal literature of German and French languages.

Prerequisite(s): Successful completion of MUS 1640

MUS 1680 PIANO MENTORSHIP (0 credits)

This course offers students feedback and mentorship by individuals with expertise in piano pedagogy, child development, business and technology.

Prerequisite(s): Permission of Instructor

MUS 1690 KEYBOARD SKILLS I (1 credit)

Instruction in this course will prepare students for keyboard skills for continued success as a professional musician, teacher or music educator. An emphasis will be placed on the following skills: scales/chords, sight reading, SATB reading, open score reading, improvisation, basic accompaniment, continued development of technical skills through individual piano selections and exciting project using contemporary music. Arrangements of popular music, chord charts and stylistic awareness in regards to the piano will be developed throughout the course. Beginning skills of ensemble playing will be encouraged throughout the semesters. This is a sequential course whereby all students must enroll in fall semester and pass before enrolling in spring semester.

Prerequisite(s): MUS 167B (Piano) or equivalent. Permission.

MUS 2100 EXPLORING MUSIC THERAPY AND ADAPTIVE MUSIC THERAPY (3 credits)

An exploratory introduction to music therapy and adaptive music in the rehabilitation and reorganization of human beings into social life, health, and wellbeing. A survey of the history of music therapy is included and with the processes and principles used by practicing music therapists. (Cross-listed with MEDH 2100).

Prerequisite(s): Not open to non-degree graduate students.

MUS 2200 AUDIO RECORDING TECHNIQUES I (3 credits)

This course provides students with basic instruction in analog and digital audio recording. Topics include hardware, software, microphones, and basic production. Upon completion of the course students will have the skills and the knowledge to do basic audio recording such as recording live concerts and simple multi-track recording.

Prerequisite(s): MUS 1170 OR permission of the instructor. Not open to non-degree graduate students.

MUS 2300 SOUND DESIGN FOR VIDEO GAMES, FILM, AND SOUND ART (3 credits)

This course provides an overview of sound design theory & techniques. Using various multimedia platforms, students will effectively create compelling audio assets for video games, film, and artistic sound installations.

Prerequisite(s): C or higher in MUS 1170, MUS 3170, or permission of instructor. Not open to non-degree graduate students.

MUS 2410 MUSIC CORE CURRICULUM III (4 credits)

The study of intermediate elements of music and their application to musical performance, education, and analysis.

Prerequisite(s): MUS 1420 or permission. Not open to non-degree graduate students.

MUS 2420 MUSIC CORE CURRICULUM IV (4 credits)

The study of advanced elements of music and their application to musical performance, education, and analysis.

Prerequisite(s): MUS 2410 or permission. Not open to non-degree graduate students.

MUS 2430 COMMERCIAL MUSIC THEORY 2 (3 credits)

As a continuation of MUS 1430, this course will integrate Roman Numeral, Lead Sheet, and Nashville notations through realization and analysis. It will also combine Common Practice Period music theory with Jazz theory in an effort to promote practical usage of theoretical systems in performance and practice.

Prerequisite(s): MUS 1390, MUS 1400, and MUS 1430

MUS 2480 JAZZ IMPROVISATION AND THEORY (3 credits)

This course is intended for the serious music student who wishes to gain basic knowledge and skills in the area of jazz improvisation. The course will emphasize beginning improvisation skills, basic jazz literature, chord scale relationships, melodic concepts, ear training, and analysis of improvised solos.

Prerequisite(s): MUS 1410 or MUS 1430

MUS 2510 MUSIC AND THE BLACK EXPERIENCE (3 credits)

Music and the Black Experience will provide students with historical and cultural knowledge of African Americans in the American music entertainment industry; the cultural influences of West African music traditions in African American music; and the American socio-political experiences that influenced music genres unique to Black people. Students will explore how West African music traditions survived and evolved through American slavery, reconstruction, the Civil Rights era, and into the 21st century; and how Black musical artists challenged racial discrimination in the music industry to create distinct music genres culturally unique to Black people. Overall, students taking this course will gain an understanding of the cultural role of music throughout the Black experience in America, and an appreciation for African American musical artists and composers who influenced all popular American music genres, from Spirituals to Broadway. (Cross-listed with BLST 2510).

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

MUS 2550 MUSIC HISTORY I (3 credits)

This course is intended for music majors who wish to undertake a study of music literature and history of the Ancient, Medieval, Renaissance, and Baroque eras. The objective of the course is to illustrate the musical concepts, styles and performance practices through composers, individual works and scores that typify these eras and the cultural context surrounding them. Outside listening, reading, musical analysis and discussion will supplement lectures.

MUS 2560 MUSIC HISTORY II (3 credits)

This course is intended for music majors who wish to undertake a study of music literature and history of the Pre-Classical, Classical, Romantic, and Modern eras. The objective of the course is to illustrate the musical concepts, styles and performance practices through composers, individual works and scores that typify these eras and the cultural context surrounding them. Outside listening, reading, musical analysis and discussion will supplement lectures.

MUS 2600 FUNDAMENTALS OF CONDUCTING (2 credits)

The purpose of this course is to provide a basic foundation of conducting skills.

Prerequisite(s): This course is limited to music majors. Students must have successfully completed MUS 1410, MUS 1420. Not open to non-degree graduate students.

MUS 2610 ADVANCED PIANO TECHNIQUES I (1 credit)

Instruction in this course will prepare piano majors with advanced keyboard techniques for continued success as a professional musician or private instructor. An emphasis will be placed on the following skills: sight reading, SATB reading, open score reading, improvisation, intermediate/advanced accompaniment, and continued crafting of personal skill sets. Students will arrange contemporary music. Intermediate to advanced skills of ensemble playing will be cultivated throughout the semesters. This is a sequential course whereby all students must enroll in fall semester and pass before enrolling in spring semester.

Prerequisite(s): Piano Major

MUS 2620 ADVANCED PIANO TECHNIQUES II (1 credit)

Instruction in this course will prepare piano majors with advanced keyboard techniques for continued success as a professional musician or private instructor. An emphasis will be placed on the following skills: sight reading, SATB reading, open score reading, improvisation, intermediate/advanced accompaniment, and continued crafting of personal skill sets. Students will arrange contemporary music. Advanced skills of ensemble playing will be cultivated throughout the semester. This is a sequential course whereby all students must enroll in fall semester and pass before enrolling in spring semester.

Prerequisite(s): Piano Major; Successful completion of MUS 2610. Not open to non-degree graduate students.

MUS 2630 KEYBOARD SKILLS FOR MUSIC TECHNOLOGY (1 credit)

This course focuses on beginner keyboard proficiency, musicianship skills in the context of music technology and the contemporary industry. Students will explore the use of performance keyboard technologies like hardware and software synthesizers, multilayered and split range MIDI controllers, synchronous backing tracks and click tracks, and auxiliary instrument routing and effects. Performance outcomes will be based a wide range of musical communication standards ranging from common practice notation to lead sheets and guitar tabs as well as an equally wide range of improvisational styles and techniques. Projects will emphasize the importance of collaboration and creativity while encouraging a diverse musical repertoire aligned with the comprehensive skills needed in today's music industry.

Prerequisite(s): majors only; corequisite: MUS 1400

MUS 2690 KEYBOARD SKILLS II (1 credit)

Continuation of keyboard skills curriculum for continued success and independent thinking allowing students skill level for the following: scales/chords, sight reading, SATB reading, open score reading, improvisation, basic accompaniment, continued development of technical skills through individual piano selections and exciting project using contemporary music. Advanced arrangements of popular music, chord charts and stylistic awareness continue to develop throughout the course. Advanced skills of ensemble playing and experience will be a part of the curriculum. Class instruction in advanced development of keyboard skills including sight reading, harmonization, open score reading, accompaniments and facility.

Prerequisite(s): MUS 1690 or equivalent. Permission.

MUS 2700 UNIVERSITY CHORUS (0-1 credits)

University Chorus is an ensemble open to all University students, faculty and staff. No audition necessary. All styles of music, including popular. Students wanting humanities/fine arts general education credit must register for 1 credit hour.

Prerequisite(s): University Chorus participants need to be aware of the importance of rehearsals and concerts, and commit to those times in their schedule. Student must seek approval from the Director of Choral Activities in order to take this course for 0 credits.

Distribution: Humanities and Fine Arts General Education course

MUS 2730 CHAMBER ORCHESTRA (0-1 credits)

A string orchestra with selected winds performing symphonic repertoire. Public performance. Open to all students and members of the greater metropolitan community.

Prerequisite(s): Audition is required.

MUS 2740 CHAMBER MUSIC (0-1 credits)

Specialized chamber music groups from the string, wind, percussion, jazz, technology, or commercial music area. Literature will be chosen from the extensive materials available for these combinations of instruments.

Prerequisite(s): Audition and permission.

MUS 2750 MARCHING BAND (0 credits)

Open to all full and part-time UNO students during the fall semester only. No audition is required. K-12 instrumental music education majors are required to enroll in Marching Band for two semesters.

MUS 2760 UNIVERSITY CONCERT BAND (0-1 credits)

University Band is a performing ensemble that is open to all UNO students, staff, and faculty. The band has varied programming of contemporary and classical works. There is no audition necessary.

Prerequisite(s): There are no prerequisites for University Band, but participants need to be aware of the importance of rehearsals and concerts and commit to those times in their schedules.

Distribution: Humanities and Fine Arts General Education course

MUS 2770 JAZZ ENSEMBLE (0-1 credits)

A select ensemble performing jazz literature from all periods. Open to all full- and part-time UNO students. An audition is required with the director.

Prerequisite(s): Acceptance into jazz ensemble is by audition only. Students must demonstrate technical command of their instrument, sightreading skills in multiple jazz styles and ability to demonstrate credible jazz improvisation skills.

MUS 2790 COLLABORATIVE PIANO (1 credit)

This course is designed to develop skills useful for pianists to learn to collaborate with vocalists, instrumentalists and ensembles. Individual class times will also accompany rehearsals with designated collaborative partners. The vast repertoire and stylistic knowledge for areas such as musical theater, voice, choral, strings, brass, orchestra and wind ensemble set the beginning of exciting partnerships throughout a musical career.

Prerequisite(s): Completion of MUS 167B, MUS 1690, MUS 2690.

Permission. Not open to non-degree graduate students.

MUS 2800 SOUND REINFORCEMENT (3 credits)

This course provides students with basic instruction in the fundamental knowledge and techniques of live sound production. Topics include equipment, processes, and systems used in a variety of scenarios with emphasis on practical, hands-on production. Upon completion of the course students will have the skills and the knowledge to provide basic sound reinforcement.

Prerequisite(s): Activities include on-location sound reinforcement, written live sound observations, in-class practicum, and electronics labs. Not open to non-degree graduate students.

MUS 2810 MUSIC IN LATIN AMERICAN CULTURE (3 credits)

This course surveys musical traditions from countries in Latin America and the Caribbean. Characteristic regional genres, ensembles, instruments, and music rituals will be examined. We will also trace the historical, cultural, and socio-political aspects of Latin American music on a global scale and delve into the developments of some international musical genres. (Cross-listed with LLS 2810).

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

MUS 2820 INTRODUCTION TO MUSIC INDUSTRY (3 credits)

This course provides an initial survey of the historical and modern music industry. Students learn about the interdisciplinary nature of the music industry by exploring careers in prototypical record companies, publishing companies, arts management, and self-funded entrepreneurship. Other topics include pathways to commercialization of intellectual property and current trends in the music industry.

Prerequisite(s): Music major or permission of instructor.

MUS 3100 MUSIC INFORMATICS (3 credits)

Surveys the use of digital music data in the study, composition, performance, analysis, storage, and dissemination of music. Various computational approaches and technologies in music informatics including music information retrieval will be explored and implemented by students. (Cross-listed with ACPM 3100)

Prerequisite(s): Successful completion of one of the following three courses satisfies the prerequisite requirement: CIST 1300 or MUS 3170 or MUS 3180. Not open to non-degree graduate students.

MUS 3170 EXPLORING MUSIC TECHNOLOGY (3 credits)

An overview of computers and music. The course will focus on broad themes of people, procedures, data structures, software, hardware, and computer music environments. Intended for students with limited music or computer backgrounds.

MUS 3180 ELECTRONIC MUSIC PRODUCTION (3 credits)

An exploration of the potentials of electronic music. Concepts of electronic music are presented through the use of a computer, software, and appropriate hardware. Students create assignments that demonstrate the application of basic techniques.

MUS 3190 JUNIOR/NON DEGREE RECITAL (1 credit)

This course is designed for all undergraduate performance music majors performing a junior or any student who wants to perform a non-degree recital.

Prerequisite(s): Applied Music (MUS 1150-3150) and/or permission of applied instructor. Payment of Recital Fee (Conductors' fees are automatically waived). Not open to non-degree graduate students.

MUS 3200 JAZZ PEDAGOGY (1 credit)

Course includes middle school and high school instrumental jazz literature, basic improvisation, rhythm section techniques and laboratory ensemble experiences.

Prerequisite(s): MUS 2410 or MUS 2430

MUS 3210 AUDIO RECORDING TECHNIQUES II (3 credits)

This course provides students with advanced instruction in sound recording and digital audio production. Topics include microphone technique, analog audio hardware, digital audio software, and advanced production techniques.

Prerequisite(s): MUS 2200

MUS 3260 MUSICAL THEATRE AND OPERA WORKSHOP (1 credit)

THEA 3260/MUS 3260 Musical Theatre and Opera Workshop is an ensemble offered during fall semester that integrates singing, movement and acting through rehearsal, private musical coaching and group exercise. It is designed for students in opera and musical theatre and develops the skill sets that are needed for performance. (Cross-listed with THEA 3260).

Prerequisite(s): THEA 1200 or MUS 115 T; PEA 111Q or PEA 111R or PEA 112W; THEA 1300 or THEA 2300. These prerequisites can be waived by the professors.

MUS 3300 RECORD LABEL (3 credits)

Managing the student-run record label, this course familiarizes students with the organization of independent record labels. Students will learn and work collaboratively on the development of music projects to complete the specific duties of each department of a record label, including but not limited to artists and repertoire, business affairs, production, marketing, and distribution.

Prerequisite(s): Open to Music Majors or by permission of instructor to students of Sophomore Standing or above.

MUS 3400 FORM AND ANALYSIS (2 credits)

The study of musical forms and their application to musical arranging for choir, band, and orchestra.

Prerequisite(s): MUS 2420

MUS 3440 COMPOSITION I (1 credit)

Individualized applied study of the basic craft of musical composition in small media and various styles.

Prerequisite(s): MUS 2420 and written permission. Not open to non-degree graduate students.

MUS 3480 CLASS APPLIED JAZZ IMPROVISATION II (2 credits)

This course is intended for the serious music student who wishes to gain advanced knowledge and skills in the area of jazz improvisation. This course will emphasize advanced improvisation skills, standard jazz literature, advanced jazz harmony, chord/scale relationships, melodic concepts, ear training, and analysis of improvised solos.

Prerequisite(s): MUS 2480

MUS 3600 MUSIC EDUCATION CORE I - ELEMENTARY (5 credits)

Methods and materials for teaching elementary (K-6) general, instrumental and choral music.

Prerequisite(s): Students must be accepted to the College of Education, Health and Human Sciences (CEHHS) Teacher Preparation Program and have completed MUS 1600 and MUS 1410 with a C or better; Music Education Majors only. Not open to non-degree graduate students.

MUS 3604 MUSIC EDUCATION BEGINNING PRACTICUM (1 credit)

In Beginning Practicum, teacher candidates are observing and practicing instructional strategies for music students in grades K-5 in school settings. Students will spend a minimum of 20 hours in an elementary music classroom.

Prerequisite(s): MUS 3600 - corequisite, 2.75 NU GPA. Not open to non-degree graduate students.

MUS 3610 MUSIC EDUCATION CORE II - MIDDLE SCHOOL/JUNIOR HIGH SCHOOL (5 credits)

Course includes brass and percussion pedagogy, middle school instrumental and choral literature and techniques, general music, conducting, and laboratory ensemble experiences.

Prerequisite(s): MUS 3600 or permission.

MUS 3614 MUSIC EDUCATION INTERMEDIATE PRACTICUM (1 credit)

In Intermediate Practicum, teacher candidates are observing and practicing instructional strategies for middle school students in school settings. Students will spend a minimum of 30 hours in a middle school music classroom.

Prerequisite(s): Prerequisites: MUS 3600, MUS 3604; Corequisite: MUS 3610; 2.75 NU GPA. Not open to non-degree graduate students.

MUS 3630 MUSIC EDUCATION CORE III - HIGH SCHOOL METHODS (5 credits)

This course explores all aspects of administering high school vocal and instrumental music programs as well as prepares the student for clinical teaching and the job search process.

Prerequisite(s): MUS 3600 and MUS 3610 or permission, 2.75 NU GPA.

MUS 3634 MUSIC EDUCATION ADVANCED PRACTICUM (1 credit)

In Advanced Practicum, teacher candidates are observing and practicing instructional strategies for high school students in school settings. Students will spend a minimum of 30 hours in a high school music classroom.

Prerequisite(s): Prerequisites: MUS 3600, MUS 3604, MUS 3610, MUS 3614. Corequisite: MUS 3630; 2.75 NU GPA. Not open to non-degree graduate students.

MUS 3640 MUSIC EDUCATION FINAL PRACTICUM (2 credits)

This course is designed to link theoretical concepts learned in the classroom to the practical application of "real world" situations and to familiarize students with the profession of music education. Hours completed in this course count as the final practicum as specified by the College of Education Teacher Preparation Program and required by the Nebraska Department of Education for teacher certification.

Prerequisite(s): MUS 3630, 2.75 NU GPA. Not open to non-degree graduate students.

MUS 3650 INTERSHIPS IN MUSIC (0-3 credits)

A course designed to link theoretical concepts learned in the classroom to the practical application of "real world" situations and to familiarize students with attitudes, operations and programs of various musical organizations.

Prerequisite(s): Junior standing or permission of Music Department Chair. Not open to non-degree graduate students.

MUS 3660 ADVANCED CONDUCTING (2 credits)

An advanced course in conducting for music majors. This course will provide a theoretical and practical study of various materials and methods as they relate to conducting score study, gestures, rehearsal strategy and related performance practices.

Prerequisite(s): Successful completion of MUS 2420.

MUS 4000 SPECIAL STUDIES IN MUSIC (1-3 credits)

Seminars or workshops in Theory, History, Performance, and Music Education designed to meet specific interests and needs of students. Topics and number of credits for each specific offering will be announced during the prior semester. (Cross-listed with MUS 8006).

MUS 4100 CONCERT CHOIR (0-1 credits)

A select choral ensemble specializing in outstanding examples of music of all styles and from all periods. Public performance. Open to all University students.

Prerequisite(s): The prerequisite for Concert Choir is an audition. Student must seek approval from the Director of Choral Activities in order to take this course for 0 credit.

MUS 4120 CHAMBER CHOIR (0-1 credits)

A select choral ensemble of 20-32 singers, specializing in outstanding examples of a cappella choral music. Preparation and performance of all styles of music. Appearances in concerts throughout the year, on campus; in the metropolitan area; and occasionally, in various other regions of Nebraska and the world.

Prerequisite(s): Auditions at start of each semester - solo, sight-sing, range check, & group audition to match voice qualities. Must seek approval from Director of Choral Activities to take course for 0 credits. Not open to non-degree graduate students.

MUS 4130 UNIVERSITY ORCHESTRA (0-1 credits)

Heartland Philharmonic Orchestra is a full symphony orchestra performing symphonic repertoire. Public performance. Open to all students and members of the greater metropolitan community. Repertoire is drawn from the four periods of music associated with symphonic literature: Baroque, Classical, Romantic, and Modern.

Prerequisite(s): Audition and permission.

MUS 4160 SYMPHONIC WIND ENSEMBLE (0-1 credits)

The Symphonic Wind Ensemble performs the finest concert band literature at four campus concerts, professional conferences, and tours. Open to all full- and part-time students.

Prerequisite(s): Audition is required for membership in the Symphonic Wind Ensemble.

MUS 4190 RECITAL (1 credit)

This course is designed for all undergraduate students performing a senior recital. All recitals are to be one half hour to one hour depending on the student's degree requirements.

Prerequisite(s): Recital fee payment (conductor's fees waived) & applied instructor's permission. BM-Education & BA Students: 4 semesters of appropriate Applied Music (MUS 1150-3150). BM-Performance: MUS 3190; 7 semesters of appropriate Applied Music (MUS 1150-3150).

MUS 4220 AUDIO RECORDING TECHNIQUES III (3 credits)

This course provides students with advanced instruction in sound mixing, digital audio editing, audio post-production and mastering. Topics include advanced digital audio editing, audio signal processing techniques, analog signal processing hardware, automation, and final product authoring and mastering.

Prerequisite(s): MUS 3170, MUS 4200 & MUS 4210. Not open to non-degree graduate students.

MUS 4240 ADVANCED AUDIO RECORDING TECHNIQUES (3 credits)

This course provides students with advanced instruction in sound mixing, digital audio editing, audio post-production and mastering. Topics include advanced digital audio editing, audio signal processing techniques, analog signal processing hardware, automation, and final product authoring and mastering. (Cross-listed with MUS 8246).

Prerequisite(s): MUS 3170, MUS 4200 & MUS 4210. Not open to non-degree graduate students.

MUS 4280 ADVANCED TOPICS IN MUSIC TECHNOLOGY (3 credits)

A seminar in Music Technology on an advanced or emerging topic in the field. The topic for each offering will be announced the prior semester.

Prerequisite(s): Permission of department.

MUS 4290 MUSIC CAPSTONE PROJECT (1 credit)

This course is to serve as a capstone project for students in the Bachelor of Arts in Music degree. Projects must be approved by the faculty and a member of the faculty will be assigned to advise on the project.

Prerequisite(s): Senior standing and successful completion of MUS 1420 or MUS 1430. Not open to non-degree graduate students.

MUS 4300 BUSINESS OF MUSIC (3 credits)

An overview of the global music industry as practiced in the United States, this course will provide insights into a number of key areas of business related to music. Students will also explore a diversity of music industry career paths in areas such as arts management, music products & merchandizing, public relations, music production & recording, publishing, and online music distribution.

Prerequisite(s): Students must be enrolled as music majors, or by permission of instructor.

MUS 4400 ADVANCED COMPOSITION (1 credit)

Individualized applied study of the craft of musical composition in larger media and various styles.

Prerequisite(s): MUS 3440 and written permission. Not open to non-degree graduate students.

MUS 4430 ARRANGING FOR JAZZ ENSEMBLE (3 credits)

Techniques of writing for jazz ensembles of various combinations of instruments. (Cross-listed with MUS 8436).

Prerequisite(s): MUS 2480 or MUS 2420

MUS 4440 MUSIC SINCE 1945 (3 credits)

This course covers important developments in music in the United States and Europe since 1945. (Cross-listed with MUS 8446).

Prerequisite(s): Completion of MUS 3420 or permission of instructor.

MUS 4450 ORCHESTRATION (2 credits)

Basics of instrumentation and scoring for band and orchestra.

Prerequisite(s): Completion of MUS 2420 with a C or better. Not open to non-degree graduate students.

MUS 4530 HISTORY OF WESTERN OPERA (3 credits)

This course will consist of significant music theater works in the Western world from 1600 to the present. (Cross-listed with MUS 8536).

Prerequisite(s): MUS 2550 and MUS 2560, Junior standing.

MUS 4540 RENAISSANCE MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature c. 1350-1600. (Cross-listed with MUS 8546).

Prerequisite(s): MUS 2550, MUS 2560, and MUS 2570. Not open to non-degree graduate students.

MUS 4550 BAROQUE MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from c. 1600-1750. (Cross-listed with MUS 8556).

Prerequisite(s): MUS 2550 and MUS 2560.

MUS 4560 CLASSICAL MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from c. 1750-1815. (Cross-listed with MUS 8566).

Prerequisite(s): MUS 2550, MUS 2560, and MUS 2570.

MUS 4570 ROMANTIC MUSIC LITERATURE (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of Music literature from c. 1815-1912. (Cross-listed with MUS 8576).

Prerequisite(s): MUS 2550 and MUS 2560.

MUS 4580 MUSIC FROM 1900 - 1945 (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of music literature from the post-romantic period to 1945. The objective will be to provide the student with a broad overview with special attention given to composers and individual works which typify a style or form. (Cross-listed with MUS 8586).

Prerequisite(s): MUS 2560.

MUS 4590 AFRICAN-AMERICAN POPULAR MUSIC FROM BEBOP TO HIP-HOP (3 credits)

This course is intended for music majors who wish to undertake a comprehensive survey of African-American popular music literature from c. 1900-present. The objective will be to provide the student with a broad overview with special attention given to musicians and individual works which typify a style or form. Listening assignments will be an integral part of the course, and attendance at live performances will supplement the lectures, discussions and readings. (Cross-listed with MUS 8596).

MUS 4600 PIANO PEDAGOGY (3 credits)

This course is a survey of the art of teaching the piano. Course content will include a survey of beginning and intermediate piano methods, literature for the beginning/intermediate piano student, studio business practice, professional organizations, and group piano instruction pedagogy. (Cross-listed with MUS 8606).

Prerequisite(s): Permission of instructor.

MUS 4610 VOICE PEDAGOGY (3 credits)

This course is a study of the physiological and acoustical properties of the vocal mechanism and of the various techniques used in developing the singing voice. Also, it will apply knowledge acquired about the voice through studio teaching and observations of other voice teachers. (Cross-listed with MUS 8616).

Prerequisite(s): Voice Music Major or permission of instructor.

MUS 4620 INSTRUMENTAL PEDAGOGY (3 credits)

This course is a study of the physiological and acoustical properties of various instruments and of techniques used in developing instrumental technique. Also, it will apply knowledge acquired about the instrument through studio teaching and observations of other instrumental teachers.

MUS 4660 HEALTH AND WELLNESS FOR MUSICIANS (3 credits)

Health and Wellness for Musicians gives an overview of the dimensions of wellness and common health/wellness challenges for musicians. The course provides students with a toolbox of ideas and strategies for the development, design, and implementation of a music wellness campaign for non-musicians and individualized wellness plans for specific instruments and voice types. (Cross-listed with MUS 8696).

MUS 4720 CHORAL LITERATURE (3 credits)

A survey course in the study of significant choral genre of the various periods of music from plain song to contemporary music. (Cross-listed with MUS 8726).

Prerequisite(s): MUS 2570 and MUS 3640. Junior music major standing or permission of the instructor.

MUS 4730 KEYBOARD LITERATURE (3 credits)

This course will examine literature written for keyboard (piano) from the 16th century to the present. Emphasis will be placed on solo literature of the Baroque, Classic, Romantic, and Contemporary periods. Included are keyboard concertos with orchestra and works for four hands and two pianos. (Cross-listed with MUS 8736).

Prerequisite(s): Permission of instructor.

MUS 4740 VOICE LITERATURE (3 credits)

This course is a study of the development of art song in Europe and America. Emphasis will be given to German and French song literature and their influence on English and American song. (Cross-listed with MUS 8746).

Prerequisite(s): Junior voice or permission of instructor.

MUS 4750 INSTRUMENTAL LITERATURE (3 credits)

This course is a study of the development of instrumental (brass, winds, strings, percussion) literature in Europe and America.

Prerequisite(s): Not open to non-degree graduate students.

MUS 4830 ARRANGING FOR JAZZ ENSEMBLE II (3 credits)

This course provides students with advanced instruction in the principles and techniques of writing and arranging for large jazz ensembles. Topics include instrumentation, jazz harmony, voicings, rhythmic devices, orchestration, form, and analysis of historical styles. Students will create effective arrangements for big band by examining the dynamic and expressive qualities of instrument families as they relate to timbre, range, balance, and rhythmic variation. (Cross-listed with MUS 8836).

Prerequisite(s): MUS 4430: Arranging for Jazz Ensemble

Native American Studies (NAMS)

Native American Studies Undergraduate Courses

NAMS 1100 INTRODUCTION TO NATIVE AMERICAN STUDIES (3 credits)

This course will introduce the diverse cultures of Native Americans. Using both historical and contemporary experiences, students will learn about the cultural, historical, social, economic and/or political factors that have shaped Native experience in North America. Students will also acquire new insights about American history and culture by looking through the lens of contemporary native cultures, nations and individuals.

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

NAMS 4060 FIRST NATIONS: SPIRIT IN ARTS AND CULTURES (3 credits)

First Nations: Spirit in Arts and Cultures explores how contemporary Indigenous/Native (First Nations, Metis and Inuit) artists in the lands now known as Canada express their cultures, especially beliefs, through the fine arts. While we will focus on visual culture (sculpture, painting, film, mixed media), literary works (a novel, poetry) and music will also be included. First Nations, Metis and Inuit artists often simultaneously express traditions, their own experiences, and reflections on the present and past through their work. By doing this, they share valuable perspectives on health and healing as well as the national process of Truth and Reconciliation. Trying, so much as possible, to let the artists speak for themselves, we will explore how spirituality manifests itself in contemporary cultures for these Indigenous artists north of the border. (Cross-listed with RELI 4060, RELI 8066, NAMS 8066).

NAMS 4140 INDIAN GAMING (3 credits)

This course will be an in depth study of the history and development of Indian Gaming law and policy. (Cross-listed with PSCI 4430).

Prerequisite(s): NAMS 1100 or permission of the Instructor.

NAMS 4240 CONTEMPORARY TRIBAL NATION BUILDING (3 credits)

This course applies traditional North American tribal governance and leadership beliefs and practices in a critical examination of contemporary tribal governments, tribal courts and programs, and tribal leaders. This course challenges students to assess present tribal governments and leaders concerning their effectiveness in meeting the needs of tribal people today. (Cross-listed with PSCI 4450).

Prerequisite(s): NAMS 1100

NAMS 4270 DECOLONIZING NATIVE AMERICAN HEALTH (3 credits)

This course will utilize an interdisciplinary lens to interrogate Native American health and wellness grounded in the decolonizing theoretical and methodological tools drawn from Medical Anthropology and Native American Studies. Topics covered will include: Health Disparities, Federal Indian Health Policy, Historical Trauma, Medical Mistrust, Traditional Healing, Food Sovereignty and Research Ethics. (Cross-listed with ANTH 8276, ANTH 4270, NAMS 8276).

Prerequisite(s): NAMS 1100 or Instructor permission

NAMS 4400 HISTORY OF NATIVE AMERICAN INDIGENOUS PEOPLES (3 credits)

This survey of North American Indigenous peoples provides a historical overview of the peoples and their interactions with settlers, wars, policies, and other events that have shaped modern Tribal and U.S. relations. (Cross-listed with HIST 8406, HIST 4400).

Prerequisite(s): NAMS 1100; Junior standing or permission of instructor.

NAMS 4440 FEDERAL INDIAN LAW (3 credits)

This course provides an overview of tribal legal authority as it exists within federal law. It includes traditional North American tribal governance and leadership practices. Key topics include the federal-tribal trust relationship, Indian treaties, federal Indian policies and case law, and 20th Century establishment of modern tribal governments and courts. (Cross-listed with PSCI 4440).

Prerequisite(s): NAMS 1100

NAMS 4900 INDEPENDENT STUDY (1-6 credits)

An individualized course of study with a member of the Native American Studies faculty. Either independent research or advanced readings may be pursued. May be repeated, for credit, up to six hours, under a different topic.

Prerequisite(s): NAMS 1100 and permission of the instructor

NAMS 4920 SPECIAL TOPICS IN NATIVE AMERICAN STUDIES (3 credits)

The content of this course varies from semester to semester, giving instructor and students an opportunity to investigate a variety of topics in Native American Studies. May be repeated for credit as long as the topic differs.

Prerequisite(s): NAMS 1100 and/or permission of instructor.

Natural Sciences (NSCI)

Natural Sciences Undergraduate Courses

NSCI 1050 SCIENCE AND CRITICAL THINKING (3 credits)

Introduction to the fundamental laws and principles of science and practice using the scientific method in everyday life to distinguish between scientific evidence and pseudoscientific thinking. Students will examine the science underlying popular pseudoscientific subjects such as ghosts, psychics, Bigfoot and other monsters, and space aliens. Offered every fall semester.

Distribution: Natural/Physical Science General Education course

NSCI 1060 INTRODUCTION TO URBAN HEALTHCARE (2 credits)

Students will explore current topics such as biological, environmental, sociological, and psychological determinants of health and disease, and health issues as they relate to healthcare in urban environments. This course is designed to prepare students to enter health professions and successfully apply these concepts in an urban underserved healthcare setting.

Prerequisite(s): Instructor permission required.

NSCI 3940 WRITING IN CHEMISTRY (2 credits)

Techniques and practices for writing in chemistry. Fulfills 2 credit hours of the third writing course requirement for students with a major in chemistry. (Spring)

Prerequisite(s): ENGL 1160, and CHEM 2400 or 2500 with a grade of C- or better.

Distribution: Writing in the Discipline Sequenced Course

NSCI 4060 BASIC LABORATORY CONCEPTS (1 credit)

This course introduces basic clinical laboratory practices and techniques, principles of laboratory safety and infection control, professional ethics, specimen collection, handling, and processing, laboratory math concepts, and phlebotomy.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program.

NSCI 4080 CLINICAL IMMUNOLOGY & SEROLOGY (1 credit)

The course introduces the study of the immune system and the laboratory tests used to identify its disorders with practical application of immunologic and serologic principles to aid in the diagnosis of infectious and autoimmune diseases. The theory and application of basic molecular diagnostic tools are also addressed. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program.

NSCI 4100 CLINICAL CHEMISTRY I (4 credits)

This is the first semester of a two semester series on clinical chemistry. This course introduces the theory, technical performance, and evaluation of clinical chemistry laboratory procedures. Basic physiology of organ systems and clinically significant analytes are emphasized. Correlation of clinical laboratory data with the diagnosis and treatment endocrine disorders is also introduced. The course will include instrumentation, methodologies and quality control. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program.

NSCI 4110 CLINICAL CHEMISTRY II (3 credits)

This is the second semester of a two semester series on clinical chemistry. This course expands on the theory, technical performance, and evaluation of chemistry laboratory procedures introduced in NSCI 4100 Clinical Chemistry I. Practical application and correlation of clinical laboratory data with disease states and treatment is emphasized, with a thorough examination of methodologies and problem-solving concepts. Advanced analytical skills, improved laboratory testing efficiency, workload management, and the resolution of unexpected laboratory results are covered in this course. Quality management which includes quality control, quality assurance, and instrument maintenance will also be included. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4100.

NSCI 4120 CLINICAL HEMATOLOGY I (4 credits)

This is the first semester of a two semester series on clinical hematology and hemostasis. The course involves the study and testing of red blood cells, white blood cells, and blood clotting factors. In addition, the function of blood and the blood-forming organs is taught in this course. The course includes an overview of basic microscopy. Practical application and correlation of clinical laboratory data with disease states is emphasized. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program.

NSCI 4130 CLINICAL HEMATOLOGY II (3 credits)

This is the second semester of a two semester series on clinical hematology and hemostasis; the course builds on the material introduced in NSCI 4120 Clinical Hematology I. Theoretical aspects of specialized hematology and coagulation techniques are reviewed, with a thorough examination of testing methodologies and problem-solving concepts. Hematology and coagulation disease states are thoroughly studied and correlated to the clinical laboratory data. Emphasis is placed on advanced analytical skills, improved laboratory testing efficiency, workload management, and the resolution of unexpected laboratory results. Quality management which includes quality control, quality assurance, laboratory techniques, and instrument maintenance will also be included. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4120.

NSCI 4140 CLINICAL IMMUNOHEMATOLOGY I (3 credits)

This is the first semester of a two semester series on immunohematology. This course introduces the study of blood group antigens and antibodies as applied to the transfusion of blood and blood components. The course involves the study of the principles, procedures, and clinical significance of transfusion medicine. Included will be a brief overview of genetics, immunology, and regulations governing blood banks. Recognition of unexpected laboratory results will be emphasized. Quality testing which includes quality control, basic transfusion medicine laboratory techniques and procedures, and safety will also be included.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program

NSCI 4150 CLINICAL IMMUNOHEMATOLOGY II (3 credits)

This is the second semester of a two semester series on immunohematology. The course continues the study of the principles, procedures, and clinical significance of transfusion medicine introduced in NSCI 4140 Clinical Immunohematology I. Advanced immunohematology theory and laboratory techniques are taught, with a thorough examination of methodologies and problem-solving concepts. These include, but are not limited to: compatibility testing, adverse transfusion events, hemolytic anemia, differentiating multiple blood group antibodies, and the resolution of unexpected laboratory results. Emphasis is placed on advanced analytical skills, improved laboratory testing efficiency, and workload management. Quality management which includes quality control, quality assurance, laboratory techniques, and instrument maintenance will also be included.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4140

NSCI 4160 CLINICAL MICROBIOLOGY I (4 credits)

This is the first semester of a two semester series on clinical microbiology. This course introduces the study and laboratory identification of bacteria of clinical significance using culture, biochemical, molecular, and microscopic methods, as well as, the performance and interpretation of bacterial antibiotic susceptibility testing. The course introduces the study of viruses and their detection and identification. Instrumentation and quality control are also included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program

NSCI 4170 CLINICAL MICROBIOLOGY II (4 credits)

This is the second semester of a two semester series in clinical microbiology; the course builds on the material introduced in NSCI 4160 Clinical Microbiology I and NSCI 4080 Clinical Immunology and Serology. This course advances the study and laboratory identification of bacteria of clinical significance, with a thorough examination of methodologies and problem-solving concepts, including the resolution of unexpected laboratory results. The course includes the study of viruses, parasites, and fungi, and their detection and identification. The course continues the study of serologic principles and methods to aid in the diagnosis of infectious diseases. Emphasis is placed on advanced analytical skills, improved laboratory testing efficiency, and workload management. Quality management which includes quality control, quality assurance, laboratory techniques, and instrument maintenance will also be included.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4160; NSCI 4080.

NSCI 4180 CLINICAL MICROSCOPY I (1 credit)

This is the first semester of a two semester series on clinical urine and body fluid analysis. Study of urine includes physiology of renal function, as well as, the significance of cellular and chemical constituents of urine. Microscopic evaluation of other significant body fluids and clinical diagnoses are introduced. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program

NSCI 4190 CLINICAL MICROSCOPY II (1 credit)

This is the second semester of a two semester series on clinical urine and body fluid analysis. This course expands on the theory, technical performance, and evaluation of laboratory procedures introduced in NSCI 4180 Clinical Microscopy I. The physiology of renal function and the significance of cellular and chemical constituents of urine are reviewed, with a thorough examination of methodologies and problem-solving concepts. Practical application and correlation of clinical laboratory data along with patient diagnosis is emphasized. Students develop multi-tasking and trouble-shooting skills to aid in workload management. Quality management which includes quality control, quality assurance, laboratory techniques, and instrument maintenance will also be included. A laboratory component is included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4180

NSCI 4200 CLINICAL LABORATORY MANAGEMENT I (1 credit)

This course introduces the study of the basic concepts and principles of the management process with particular emphasis on laboratory operations. Laboratory safety, quality control, professionalism, scope of practice, research applications, and educational methodologies are topics included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program

NSCI 4210 CLINICAL LABORATORY MANAGEMENT II (1 credit)

This course builds on the study of the basic concepts and principles of the management process introduced in NSCI 4200 Clinical Laboratory Management I. Laboratory compliance and regulatory issues, financial resource management, human resource management, method validation, professionalism, and quality management are topics included in this course.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4200.

NSCI 4230 MEDICAL LABORATORY SCIENCE CLINICAL CORRELATION (2 credits)

This is a comprehensive course that uses lecture and case studies as an in-depth review of the theory and laboratory findings in all areas of the clinical laboratory including: immunology & serology, chemistry, hematology, immunohematology, microbiology, and microscopy. Practical application and correlation of clinical laboratory data, disease states, and diagnoses are emphasized.

Prerequisite(s): Enrollment in the Nebraska Methodist Hospital Medical Laboratory Science Program; NSCI 4080; NSCI 4100; NSCI 4120; NSCI 4140; NSCI 4160; NSCI 4180

Neuroscience (NEUR)

Neuroscience Undergraduate Courses

NEUR 1000 SUPERHEROES, ZOMBIES, CYBORGS AND DROIDS: COULD THEY LIVE AMONG US? (3 credits)

Neuroscience is constantly pushing the boundaries of what is possible, and concepts once relegated to the realm of science fiction are quickly becoming not only possible, but inevitable. In this course, we will use superheroes, zombies, cyborgs, and droids as vehicles into the wonderful and exciting world of neuroscience and how the brain and nervous system function. Mind control, enhanced strength, artificial brains...these may all seem like pure fantasy, but the reality may surprise you. This course fulfills the General Education: Natural and Physical Sciences requirement.

Prerequisite(s): High School Biology and High School Chemistry recommended. Not open to non-degree graduate students.

Distribution: Natural/Physical Sci General Education lecture

NEUR 1520 INTRODUCTION TO NEUROSCIENCE I (3 credits)

The nervous system is intricate, complex, and is the subject of one of the most exciting fields in the life sciences. This course is part 1 of a 2-semester sequence designed for neuroscience majors or students who are contemplating neuroscience as a major. This course will focus on understanding how the nervous system interacts at the cellular and molecular levels: anatomy and function of neurons, communication within and between neurons, and how neurons interact to perceive and process sensory information.

Prerequisite(s): High school biology and chemistry. Not open to non-degree graduate students.

NEUR 1540 INTRODUCTION TO NEUROSCIENCE II (3 credits)

The nervous system is intricate, complex, and is the subject of one of the most exciting fields in the life sciences. This course is part 2 of a 2-semester sequence designed for neuroscience majors or students who are contemplating neuroscience as a major. This course will focus on understanding how the nervous system interacts at the organismal, behavioral and cognitive levels: how the nervous system develops, how the motor system, hormones, and physiology influences behavior, and how cognition and systems neuroscience leads to understanding of the mind.

Prerequisite(s): NEUR 1520 or permission of instructor. Not open to non-degree graduate students.

NEUR 1560 NEUROSCIENCE PATHWAYS TO DISCOVERY (3 credits)

Experience the tools, strategies, challenges, and joy of discovery in neuroscience in a hands-on, active-learning environment. This laboratory/lecture course will introduce concepts of research exploration, guide students in developing topics for experimentation, and help students build ways to assemble the pieces needed to answer questions in neuroscience.

Prerequisite(s): Recommend concurrent with NEUR 1520 or NEUR 1540. Not open to non-degree graduate students.

NEUR 3500 BIOLOGICAL PRINCIPLES OF AGING (3 credits)

The Biological Bases of Aging Course provides a survey of the primary topics in the biology of aging field for undergraduate students. This a required course for the Gerontology major. By the end of the course, students will understand major theories, biological methods, and seminal research studies in the biology of aging field. Furthermore, students will learn how to critically analyze and interpret primary research about biological aging. This course provides preparation for students considering graduate school in gerontology or biology, geriatric nursing and social work, geriatric medicine, neuroscience, psychology, and exercise science. (Cross-listed with GERO 3500, BIOL 3500)

Prerequisite(s): Sophomore/Junior/Senior Standing. Not open to non-degree graduate students.

NEUR 3600 RESEARCH METHODS IN NEUROSCIENCE (3 credits)

In this course, students will get an introduction to how neuroscientists acquire, interpret, discuss, and share knowledge. Skills covered include study design, reading primary research articles, interpreting statistics, and writing scientific papers.

Prerequisite(s): PSYC 3130 or STAT 3000, and ENGL 1160 (or permission of Instructor) Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

NEUR 4000 SYSTEMS NEUROSCIENCE (3 credits)

This course is designed to provide a solid understanding of the peripheral and central connections that make the systems of the body function. Data and theories of brain-behavior relationships from current research in neuroscience will be discussed. (Cross-listed with NEUR 8006).

Prerequisite(s): NEUR 1520 and NEUR 1540 or permission. Not open to non-degree graduate students.

NEUR 4050 ADVANCED BIOLOGY OF AGING (3 credits)

This course covers biological aging topics at an advanced level, and is designed for undergraduate and graduate students who have some prior knowledge about biology or aging. The course will be interdisciplinary in nature and focus on topics relevant to gerontology, biology, psychology, and exercise science. Students will learn how to think critically about primary research in the biology of aging. Furthermore, they will apply their knowledge of the biology of aging field by creating a handbook of healthy aging for older adults. (Cross-listed with GERO 4050, GERO 8056).

NEUR 4160 NEUROPHARMACOLOGY (3 credits)

Neuropharmacology will introduce students to ligand-receptor interactions and their effects on behavior, cognition, and development. This course will characterize the molecular structure of ligands and how these small molecules or biologics affect central nervous system receptors and transporters. Students will learn about structure-activity relationships and principles of pharmacology: distribution, metabolism, pharmacokinetics, and elimination) and explore the historical milestones in drug development. We'll also discuss the dynamic actions of drugs of abused drugs and the mechanisms of action. For undergraduate Neuroscience Majors, the course counts as a Neuroscience Block 1. (Cross-listed with NEUR 8166, PSYC 4160, PSYC 8166).

Prerequisite(s): Need at least one: NEUR 1520 or NEUR 1540 or PSYC 1020 or BIOL 1450. And need NEUR 3600 or PSYC 3140. PSYC 4230 recommended for students who have not taken NEUR 1520 or BIOL 1450.

NEUR 4200 ADVANCED NEUROSCIENCE LABORATORY (3 credits)

This course is designed as a capstone laboratory course for Neuroscience majors. The course will provide students with hands-on experience in collecting data in diverse areas of neuroscience, analyzing these data, interpreting the data, and preparing written and verbal presentations of the data.

Prerequisite(s): NEUR 1520, NEUR 1540, and PSYC 3140 or NEUR 3600. Junior or Senior status or permission of Instructor. Not open to non-degree graduate students.

NEUR 4230 BEHAVIORAL NEUROSCIENCE (3 credits)

A comprehensive study of the relationship of the nervous and other organ systems to behavior. Research on both human and other animal species is considered. (Cross-listed with PSYC 4230).

Prerequisite(s): BIOL 1450 OR PSYC 1010

NEUR 4290 NEUROETHOLOGY (3 credits)

In the field of Neuroethology a major goal is to understand the neural bases of animal behaviors in a natural context. In this course students will investigate how behaviors are generated and modulated by the nervous system in organisms ranging from insects to mammals. We will explore the neural mechanisms underlying a variety of animal behaviors as they interact with their natural environment ranging from sensory perception of the world (e.g. echolocation, electrolocation), to locomotor movements (e.g. flying, swimming), to more complex behaviors (e.g. learning, memory). (Cross-listed with NEUR 8296, BIOL 4290, BIOL 8296, PSYC 8296).

Prerequisite(s): NEUR 1520, NEUR 1540 and BIOL 1750; or by permission of instructor. Not open to non-degree graduate students.

NEUR 4330 SOCIAL NEUROSCIENCE (3 credits)

This course will evaluate the biological substrates of sociality and social behavior, and examine how brain events bias social behavior and cognition, as well as how social behavior and cognition influence brain functioning. We will explore the neural mechanisms that inform social behavior and explain our ability to recognize, understand and interact with others. Cutting edge questions on concepts such as love, trust, empathy and prejudice will also be explored. (Cross-listed with NEUR 8336, PSYC 8336).

Prerequisite(s): NEUR 1520 and NEUR 1540 or permission of Instructor. Not open to non-degree graduate students.

NEUR 4340 ADVANCED BEHAVIORAL NEUROSCIENCE (3 credits)

Building on content from Introductory Neuroscience courses, this course will deeply explore the fundamental link between behavior and biological processes. Prepare to unravel the mysteries of behavior, cognition, emotions, sensory systems, and disorders by exploring cutting-edge neuroscience methods to reveal the specific cells and neurobiological processes that give rise to human and animal behavior. PSYC 4230 should not be taken after the completion of this course. (Cross-listed with NEUR 8346, PSYC 4340).

Prerequisite(s): NEUR 1520 and NEUR 1540, or PSYC 4230

NEUR 4480 NEUROIMMUNOLOGY (3 credits)

The course explores the bi-directional mechanisms by which the brain and the immune system communicate with each other in health and during injury or infection. This course also introduces human immunology as a basis for understanding the advanced content in neuroimmunology. Topics include innate immunity in the central nervous system (CNS), inflammation in neurodegenerative diseases, CNS infections and autoimmune diseases. Reading and evaluating neuroimmunology primary literature, presentation and scientific writing will be emphasized. Counts as a Neuroscience Block 1 course requirement. (Cross-listed with NEUR 8486).

Prerequisite(s): NEUR 1520 and NEUR 1540, or permission of Instructor.

NEUR 4640 NEURAL MECHANISMS OF SUBSTANCE USE DISORDERS (3 credits)

This course details how the brain changes during and after the administration of illicit substances. Illicit drugs 'hijack' the natural reward pathways and brain circuits. Material highlights brain regions, neural circuits, and structural alterations that accompany illicit drug use. Modern neuroscience research techniques that measure and manipulate brain function reveal opportunities for therapeutic interventions. The course will explore how therapeutic interventions repair the brain. (Cross-listed with NEUR 8646).

Prerequisite(s): NEUR 1520 and NEUR 1540 and either NEUR 3600 or PSYC 3140.

NEUR 4650 NEUROMECHANICS OF HUMAN MOVEMENT (3 credits)

A study of basic principles of neural process as they relate to human voluntary movement. Applications of neural and mechanical principles through observations and assessment of movement, from learning to performance, as well as development. (Cross-listed with BMCH 4650).

Prerequisite(s): NEUR 1540 or permission of instructor

NEUR 4810 BEHAVIORAL GENETICS (4 credits)

This lecture and laboratory course will explore the interaction between behavior and genetics. Topics addressed will include research systems used in behavioral genetics research, ways of studying animal behavior, gene function, gene expression, genetic manipulation, genome sequencing, and bioinformatics. Research techniques will include behavioral observations, cognition assays, and traditional and cutting edge genetics research techniques and analyses (DNA/RNA isolation, PCR, gel electrophoresis, transgene generation, quantitative PCR, next generation sequencing). Students will design, conduct, analyze, and present semi-independent research projects over the course of the semester. (Cross-listed with BIOL 4810).

Prerequisite(s): BIOL 2140

NEUR 4840 GLIA IN HEALTH AND DISEASE (3 credits)

While neurons are often highlighted as the primary drivers of brain function, evidence is rapidly growing that a lesser-known class of cells, glia, are intimately involved in virtually all aspects of central nervous system function. This course is designed for students looking for an in-depth discussion on the various glial cells of the central system, with an emphasis on cutting-edge research and the techniques used to study them. Counts as a Block 1 Neuroscience requirement. (Cross-listed with NEUR 8846).

Prerequisite(s): NEUR 1520 or NEUR 1540, or permission of Instructor.

NEUR 4850 NEUROBIOLOGY OF LEARNING AND MEMORY (3 credits)

This course will evaluate the neurobiology of learning and memory. In this course students will explore how learning and memory processes are encoded and stored at the cellular and molecular neurobiology levels. We will examine both classic and cutting edge studies to see how changes in molecular activity, genetics, and cellular physiology can influence learning and memory processes. Counts as a Block 1 course for Neuroscience Majors. (Cross-listed with NEUR 8856).

Prerequisite(s): NEUR 1520 & NEUR 1540 or Instructor Permission. Not open to non-degree graduate students.

NEUR 4870 MOLECULAR AND CELLULAR NEUROBIOLOGY (3 credits)

This course presents foundational topics in molecular and cellular neurobiology in the context of how the nervous system is functionally organized. Topics include: nervous system cell types and their subcellular organization; electrical properties of neurons and glia; energy metabolism and biochemistry of the brain; intra- and intercellular neuronal signaling; the regulation of gene expression in neuronal cells; synaptic plasticity; and how these are altered in disease. (Cross-listed with BIOL 4870, BIOL 8876, NEUR 8876).

Prerequisite(s): NEUR 1500, or both NEUR 1520 and NEUR 1540, or BIOL 3020, or permission of instructor.

NEUR 4890 GENES, BRAIN, AND BEHAVIOR (3 credits)

This course will evaluate the complex interaction between an organism's genome and neural activity pattern in the nervous system as related to behavior. In this course students will explore how changes in gene expression (allelic variants, epigenetics, differential regulation) and gene networks within neural tissue can reciprocally influence behaviors such as communication, foraging, reproduction, and cognition. (Cross-listed with NEUR 8896, BIOL 4890, BIOL 8896, PSYC 8896).

Prerequisite(s): NEUR 1520, NEUR 1540, and BIOL 2140. Or by permission of instructor. Not open to non-degree graduate students.

NEUR 4910 SPECIAL TOPICS IN NEUROSCIENCE - BLOCK 1 (3 credits)

Fulfills Neuroscience BLOCK 1 or Neuroscience Elective requirement. A study of designated special topic in neuroscience. Students may repeat this class as long as the specific topic is not duplicated.

Prerequisite(s): NEUR 1520, junior-senior status (sophomore status by permission), or instructor permission. Not open to non-degree graduate students.

NEUR 4920 SPECIAL TOPICS IN NEUROSCIENCE - BLOCK 2 (3 credits)

This course fulfills Neuroscience BLOCK 2 or Neuroscience Elective requirements. A study of designated special topic in neuroscience. Students may repeat this class as long as the specific topic is not duplicated.

Prerequisite(s): NEUR 1520 or NEUR 1540, junior-senior status (sophomore status by permission), or instructor permission. Not open to non-degree graduate students.

NEUR 4930 SPECIAL TOPICS IN NEUROSCIENCE - NEURO ELECTIVE BLOCK (3 credits)

This course will provide for an in-depth study of a designated topic in neuroscience that is different than the focus of an existing course in the neuroscience curriculum. Students may repeat this class as long as the specific topic is not duplicated. Fulfills a Neuroscience Elective requirement.

Prerequisite(s): NEUR 1520 or NEUR 1540, or Instructor permission.

NEUR 4960 EXPERIENTIAL STUDY IN NEUROSCIENCE (1-6 credits)

Focused research projects, data analysis, and/or directed readings with faculty supervision. Oral and written reports based on empirical research are expected outcomes.

Prerequisite(s): NEUR 1520; PSYC 3130. PSYC 3140 recommended. Instructor permission required.

Pharmaceutical Sciences (PHSI)

Pharmaceutical Sciences Undergraduate Courses

PHSI 1010 INTRODUCTION TO FOUNDATIONS AND CAREER PATHS IN PHARMACEUTICAL SCIENCES (1 credit)

This course provides an overview to the field of pharmaceutical sciences. It will discuss the roles of a pharmaceutical scientist and the career options one can pursue in pharmaceutical sciences. A description will be given for how a Bachelor of Science in Pharmaceutical Sciences (BSPS) degree prepares one for these options. Lectures will be given by UNMC/ UNO faculty and practitioners in these fields. This course will introduce professional development related to pharmaceutical sciences, including concepts for application preparation for professional and graduate careers.

PHSI 2920 SPECIAL TOPICS IN PHARMACEUTICAL SCIENCES (2 credits)

More thorough examination of a pharmaceutical sciences topic than in the regular curriculum. Content (e.g., advocacy, alternative medicine) will vary with offering.

Prerequisite(s): PHSI 1010 with a grade of C- or higher

PHSI 3110 CURRENT RESEARCH TOPICS IN PHARMACEUTICAL SCIENCES (1 credit)

This course will provide the student with examples of how pharmaceutical science research is being applied to solve problems in the pharmaceutical industry. The basic approach for each lecture will be: 1) introduction to a disease state, 2) the current therapy for the disease state, 3) identification of the problems with this therapy and, 4) research underway to solve the problem. Lectures will be given by faculty members in the UNMC Departments of Pharmaceutical Sciences and Pharmacy Practice, UNO Department of Chemistry or special guests from industry and academia. Offered in Fall semesters.

Prerequisite(s): Prior completion of CHEM 2260 and CHEM 2274 with minimum grades of "C-" and passing score in PHSI 1010 OR instructor permission.

PHSI 3210 FOUNDATIONS OF MOLECULES TO MEDICINE (3 credits)

The first of a two courses sequence about the processes of drug discovery and how molecules become medicines. Emphasis will be placed on natural products and synthesized drugs, and the aspects involved in bringing drugs to the market (including target identification, validation, lead optimization, absorption/distribution/metabolism/excretion (ADME) phases and studies, investigational new drug (IND) options, and clinical trials).

Prerequisite(s): "C-" grade or higher in CHEM 2260 & CHEM 2274, and PHSI 1010. Also required: Concurrent enrollment in CHEM 4650 and 4654 or prior completion with minimum "C-" grade; OR instructor permission.

PHSI 3310 APPLICATIONS OF MOLECULES TO MEDICINE (3 credits)

Applications of Molecules to Medicines is a team taught course that will introduce students to five specific disease states and how commonly prescribed medications are used to improve patient outcomes. Emphasis will be placed on a basic understanding of disease pathogenesis and the medicinal and pharmacologic basic of specific medications that are prescribed and administered to patients in addition to determining whether the medication improves patient outcome.

Prerequisite(s): Prerequisites: "C-" grade or higher in CHEM 2260 & CHEM 2274, and PHSI 1010. Also required: Concurrent enrollment in CHEM 4650 and 4654 or prior completion with minimum "C-" grade; OR instructor permission.

PHSI 4010 INTRODUCTION TO PHARMACEUTICAL SCIENCE (3 credits)

Introduction to pharmaceutical terminology, drug discovery and development process, concepts and principles of pharmaceutical formulation and delivery, functional group chemistry, acid/base chemistry of drug molecules, chemical basis of drug action, receptor concepts, basic pharmaceutical calculations, principles of chemical kinetics and stability. **Prerequisite(s):** Completion of MATH 1940 or MATH 1950; and CHEM 2260, CHEM 2274 with a C- or higher; completion with a C- or higher or co-enrollment in CHEM 4650 and 4654 or permission of instructor. Not open to non-degree graduate students.

PHSI 4210 CONTEMPORARY USE OF MEDICINES (2 credits)

This course provides an overview of medication access and use in the US considering innovation and general health care system dynamics. Discussions of current practices and trends will highlight key factors that pharmacists face in their profession, including social, policy, and behavioral factors that influence medication use in the United States. The course includes the perspectives of key stakeholders including providers, patients, payers, and the pharmaceutical industry.

Prerequisite(s): PHSI 1010 with a grade of "C-" or higher

PHSI 4410 PHARMACEUTICAL SCIENCES RESEARCH EXPERIENCE (1 credit)

Practical research experience for students in the bachelor of science program in Pharmaceutical Sciences. Students will work with faculty in UNO Chemistry with accepted PHSI research or UNMC Pharmaceutical Sciences or Pharmacy Practice to select and approve a research laboratory where they will carry out an independent investigation for one semester. Typically offered Fall and Spring semesters.

Prerequisite(s): "C-" or better in CHEM 4650 & 4654, PHSI 1010, and PHSI 3110; or permission of instructor.

PHSI 4510 ADVANCED RESEARCH EXPERIENCE IN PHARMACEUTICAL SCIENCES (1 credit)

The second of two courses of practical research experience for students in the Bachelor of Science program in Pharmaceutical Sciences. Students will work with faculty in UNO Chemistry or UNMC Pharmaceutical Sciences or Pharmacy Practice to select a research laboratory where they will carry out an independent investigation over the course of the semester.

Prerequisite(s): "C-" or better in CHEM 4650 & 4654, PHSI 1010, PHSI 3110 and PHSI 4410; or permission of instructor.

PHSI 4920 ADVANCED SPECIAL TOPICS IN PHARMACEUTICAL SCIENCES (2 credits)

In depth examination of a pharmaceutical sciences topic not offered in the regular curriculum. Content (e.g., Medicine and Cannabis) will vary with offering.

Prerequisite(s): PHSI 1010 with a grade of C- or higher, CHEM 2260 with a grade of C- or higher or permission of instructor

Philosophy (PHIL)

Philosophy Undergraduate Courses

PHIL 1010 INTRODUCTION TO PHILOSOPHY: MEANING OF LIFE (3 credits)

We all find ourselves at one point or another wondering what everything adds up to. This sentiment manifests itself as different questions: 'why are we here?', 'what's my purpose?', 'how can I lead a fulfilling life?', or, perhaps most relevantly, 'what is the meaning of life?'. Now that you're in college, these questions are of the essence. Where will you go from here? Which skills should you develop? Which major should you choose? What should you pursue? Love? Family? Friendship? Education? Career? Fame? Fortune? Religious devotion? Service to others? Fulfillment? Happiness? What does it mean to be happy or fulfilled? In this course, we're going to set all else aside and dedicate real effort to coming to grips with these questions. Our focus will be on developing our ability to think about what we're asking and acquiring the tools necessary to assess the responses on offer.

Distribution: Humanities and Fine Arts General Education course

PHIL 1020 CONTEMPORARY MORAL PROBLEMS (3 credits)

Introduction to the application of basic moral concepts and theories to contemporary moral issues. Discussion topics will vary and may include: distribution of wealth and resources, environmental ethics and sustainability, animal rights, capital punishment, torture, euthanasia, abortion, cloning, genetic engineering, privacy rights, drug laws, marriage and sexuality, gun control, and affirmative action.

Distribution: Humanities and Fine Arts General Education course

PHIL 1030 INTRODUCTION TO PHILOSOPHY: BRAINS, MINDS, AND MACHINES (3 credits)

Introduction to Philosophy: Brains, Minds, and Machines examines central questions in philosophy about the nature of the mind, the self, human rationality, perception/experience, and technology through the lens of work in cognitive science, neuroscience, artificial intelligence, and psychology. Some major topics and questions include: What are minds? Is the human mind a digital computer? Could a machine - e.g., a robot or a computer - be truly intelligent, or have experiences like humans and animals do? How does the brain "represent" its environment? In engaging these questions, the course also introduces students to foundational issues in cognitive science and artificial intelligence including: nativism vs. empiricism, mental representation, classical artificial intelligence vs. neural networks, modularity, evolutionary psychology, embodied cognition, and extended cognition.

Distribution: Humanities and Fine Arts General Education course

PHIL 1040 INTRODUCTION TO PHILOSOPHY: LAW, POLITICS, AND SOCIETY (3 credits)

A first course in philosophy designed to introduce students to the foundational theories and concepts of legal philosophy, ethics, and social/political philosophy. Students engage theories and concepts by exploring how they are relevant to life in contemporary society. Discussion topics may include free speech, immigration, racism, authoritarianism and populism, human rights, and humanitarian intervention.

Distribution: Humanities and Fine Arts General Education course

PHIL 1050 INTRODUCTION TO PHILOSOPHY: PHILOSOPHY, TECHNOLOGY, AND SCIENCE FICTION (3 credits)

This course introduces core philosophical ideas through a selection of accessible science fiction short stories and films. Does a society's technology determine its values and development? Does technology reflect our values or is it neutral? How does the development of new technologies help or harm people? Will ordinary humans be overtaken by artificially intelligent machines? Can an algorithm make ethical decisions? We will be exploring these questions in the philosophy of technology through how technological advances have been presented in science fiction. In addition, we will also be exploring the philosophical issues around how biological systems could be manipulated. What are the prospects and dangers of biohacking? What are the boundaries of what makes us human? How could different life and ecosystems evolve? How would alien life evolve? Finally, the course will ask questions about the boundaries of science. Should scientists refrain from researching certain scientific questions for ethical reasons?

Distribution: Humanities and Fine Arts General Education course

PHIL 1210 CRITICAL REASONING (3 credits)

A study of the principles of correct reasoning: induction, deduction, formal and informal fallacies. Critical reasoning is excellent preparation for the LSAT and the reasoning portions of other examinations for graduate study.

Distribution: Humanities and Fine Arts General Education course

PHIL 1230 LOGICAL REASONING FOR STANDARDIZED GRADUATE EXAMINATIONS (3 credits)

This course offers an intensive, boot-camp training in logical reasoning which emphasizes the specific skills needed to solve the logic problems included on many standardized graduate admissions exams, such as the LSAT (Law School Admission Test), GMAT (Graduate Management Admission Test), and MCAT (Medical College Admission Test). Substantial portions of these exams assess critical reasoning and logical problem solving ability. This course offers a condensed review of logical techniques required to analyze and solve such problems, not only with the goal of improving student performance on exams, but also because examining the underlying structure of these reasoning problems helps to improve logical analysis and evaluation skills across a wide range of other purposes.

PHIL 2010 SYMBOLIC LOGIC (3 credits)

A first course in symbolic logic designed to introduce students to formal systems of sentential logic and predicate logic. The course explores the nature of both syntax (the formal structure of elements of language) and semantics (interpretive relations between language and subject matter including notions such as truth and reference). Students learn how to translate between English and formal languages, how to construct truth-tables and interpretations to test for key semantic properties, and how to construct derivations. In addition, students will consider the nature and relationships between important logical properties and explore foundational issues in logical metatheory. Throughout the course, students will encounter broad philosophical themes such as the purpose of language, constraints on translation, and nature of meaning itself. (The study of logic is also excellent preparation for the LSAT and the reasoning portions of other examinations for graduate study.) (Cross-listed with MEDH 2010).

PHIL 2020 INTRODUCTION TO PHILOSOPHY OF MIND (3 credits)

This course is an introductory overview of fundamental issues in the study of mind, thinking, and consciousness. Students explore these philosophical issues from the perspective of current research in psychology, neuroscience, linguistics and computer science.

PHIL 2030 INTRODUCTION TO ETHICS (3 credits)

A critical study of basic moral concepts and problems contained in ethical theories of important western philosophers: relativism, egoism, happiness, obligation, justice, freedom, conscience, love, religious precepts, moral rules, moral attitudes and moral language.

Distribution: Humanities and Fine Arts General Education course

PHIL 2040 INTRODUCTION TO EAST ASIAN PHILOSOPHY (3 credits)

This course makes a critical and philosophical inquiry into the fundamental questions raised in East Asian Philosophy, typically including a critical evaluation of the traditional theories in Confucianism, Buddhism, and Taoism of China, Korea, and Japan, as well as contemporary responses to those theories, e.g., Kyoto School or Maoism.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

PHIL 2300 BIOMEDICAL ETHICS (3 credits)

In the rapidly evolving fields of medicine and healthcare, ethical considerations play an ever-increasing role. This course is designed to equip students with the conceptual tools necessary for ethical reasoning and decision-making in medical contexts. This course investigates critical issues such as informed consent, end-of-life decisions, reproductive ethics, genetic testing, and research ethics. Ideal for students thinking about a career in healthcare, philosophy majors, medical humanities majors, or anyone interested in grappling with the complex ethical questions that accompany advancements in biomedical science and healthcare practice. (Cross-listed with MEDH 2300).

PHIL 3000 PHILOSOPHY WRITING SEMINAR (3 credits)

This course focuses on writing instruction, with a particular emphasis on logical argument, editing and revision, and research methods in the discipline of philosophy. It is designed for students who are beginning to take upper-level coursework and is suitable for Philosophy majors, minors, and non-majors, particularly those who seek additional preparation in argument-focused writing.

Prerequisite(s): Composition II or the equivalent, and three hours of Philosophy, are required.

Distribution: Writing in the Discipline Single Course

PHIL 3010 PHILOSOPHY OF JUSTICE (3 credits)

An examination of the concept of justice from Greek moral philosophy to modern moral philosophy with focus on the problems of modern moral philosophy and the application of those ideas in government and society.

Prerequisite(s): Junior or 3 credits in philosophy.

PHIL 3020 THE JUSTIFICATION OF PUNISHMENT (3 credits)

The course examines the major philosophical arguments concerning the conditions under which punishment is justifiable, and provides a background of ethical theory in order to make these arguments comprehensible.

Prerequisite(s): Junior, or 3 credits in philosophy, or 1 course in criminology & criminal justice.

PHIL 3040 PHILOSOPHY OF LAW (3 credits)

An overview of central issues in the philosophy of law, including the nature, source, and legitimacy of law, the relationship between law and morality, competing theories of legal reasoning and interpretation, the sources and structure of rights and responsibilities, and theories of punishment.

Prerequisite(s): Junior standing or 6 hours in Philosophy.

PHIL 3050 ETHICAL THEORY (3 credits)

This course surveys issues and controversies in meta-ethics, that is, in the theoretical understanding of ethics. A central organizing question is whether or not there are objective ethical facts that we use ethical language to report and discuss. If there are ethical facts, what kind of facts are they and how could we know them? There seems to be no scientific experiment or mathematical proof which could demonstrate an ethical claim. If there are no ethical facts, is ethics simply a matter of emotional self-expression, arbitrary cultural norms, or the like? If so, can there be significant ethical truth and substantive ethical knowledge? All in all, students will survey a variety of proposals on the fundamental nature of ethics and develop an understanding of their relative strengths and weaknesses.

Prerequisite(s): PHIL 2030 or 6 hours in philosophy or permission of instructor.

PHIL 3060 VALUES AND VIRTUES (3 credits)

This course explores advanced topics in ethics with particular emphasis on value theory and virtue ethics. Topics to be considered include the meaning and status of value claims, sources of value, intrinsic goods, agent-relative goods, practical reason, moral development, happiness, moral ambiguity, moral luck, the identification of virtues, and relationships of care, trust, and responsibility. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with CACT 8215)

PHIL 3070 LEADERSHIP ETHICS IN PRACTICE (3 credits)

In today's complex and interconnected world, ethical leadership is a necessity. Ethical leaders inspire trust, foster a positive organizational culture, and drive sustainable success. This course aims to equip future leaders with the essential moral knowledge and reasoning skills required to navigate the broad and difficult challenges they will confront. In particular, students will study the philosophical foundations of ethical leadership, examine how these illuminate historical and contemporary cases of leadership success and failure, and apply the lessons to their own experience. In short, this course aims to cultivate the ethical leadership skills that will not only propel careers but will help students meaningfully contribute to a better, more responsible world.

PHIL 3110 HISTORY OF ANCIENT PHILOSOPHY (3 credits)

A survey of the major philosophers and schools of ancient Greece and Rome: pre-Socratics, Plato, Aristotle, Cynics, Epicureans, Stoics, Skeptics, and Neo-Platonists. The original texts examined in this course explore fundamental questions about the purpose of human life and the value of self-examination, the nature of the universe and possibility of knowledge, and the achievement of virtue and human happiness.

PHIL 3130 HISTORY OF MODERN PHILOSOPHY (3 credits)

The Modern Period (roughly 1600 to 1800) was a time of great scientific advancement, political upheaval, and philosophical progress. During this period, philosophers wrestled with fundamental metaphysical questions about the nature of matter, causation, mind, and God, key epistemological questions regarding the nature and grounds of knowledge, and central ethical and political questions about our rights and duties. As such, the philosophical work of this period provides the foundations for contemporary work in epistemology, metaphysics, philosophy of mind, philosophy of science, ethics, and political philosophy. In this course, students will explore the interpretation and implications of work by some of the most influential thinkers of the period such as Descartes, Spinoza, Locke, Leibniz, Berkeley, Hume, Reid, and Kant.

Prerequisite(s): 3 hours in Philosophy or permission of the instructor.

PHIL 3140 NINETEENTH CENTURY PHILOSOPHY (3 credits)

An examination of major views in 19th century philosophy including the development of German idealism, British empiricism, and Marxism. Special attention will be paid to the origins of existentialism, pragmatism, and modern empiricism as reactions to 19th century positions.

Prerequisite(s): Junior or permission of instructor.

PHIL 3150 PHILOSOPHY OF HISTORY (3 credits)

This course is designed to introduce students to the thinkers and issues in the philosophy of history (and historiography). After being coined by Voltaire, the term 'philosophy of history' has taken on different meanings. Prior to the twentieth century, philosophy of history meant speculation over the course and aims of history. It sought to investigate the subject matter of history, that is, the historical process itself. Consequently, philosophers of history aimed at comprehensive views of this process. During the twentieth century, however, philosophy of history became "analytical or critical." The aim of this approach is to question and criticize the ways that historians work, so issues of knowledge and explanation have become very important for the present-day philosopher of history. Although the course takes a thematic approach to the study of the philosophy of history, prominent philosophers who have investigated history will be introduced throughout the course.

Prerequisite(s): Junior or 3 credits in philosophy.

PHIL 3170 ETHICS IN BUSINESS (3 credits)

An application of ethical principles to moral issues arising in business: corporate responsibility and agency, fiduciary duties, discrimination, advertising, whistle-blowing, trade secrets, environmental protection, product safety and liability, employee rights, government regulation, investment and duties to shareholders, commodification and consumerism.

Distribution: Humanities and Fine Arts General Education course

PHIL 3180 ENVIRONMENTAL ETHICS (3 credits)

This course introduces students to the thinkers and issues that make environmental ethics what it is today. It includes the analysis and evaluation, from ethical viewpoints, of such topics as: intrinsic value of animals, plants and ecosystems; animal rights; climate change; conservation and preservation; environmental law and politics; obligations to future generations; sustainability and new technologies; war, immigration, and the environment; human rights and the environment; nature and the built environment; and environmental activism. (Cross-listed with ENVN 3180).

Prerequisite(s): Junior or 3 hours of philosophy.

PHIL 3200 PHILOSOPHY OF RELIGION (3 credits)

What must a being be like to be rightfully called "God"? Why think that such a being exists? Why would such a being allow there to be suffering and evil in the world? Could you ever be justified in believing that a miracle occurred? Are faith and reason compatible? What is the role of religion in morality? Students will consider these BIG questions and the best answers to them.

PHIL 3210 SOCIAL PHILOSOPHY (3 credits)

An examination of the problems and concepts of social and political philosophy.

Prerequisite(s): 3 credits in philosophy or junior or permission of instructor.

PHIL 3220 PHILOSOPHY OF ART (3 credits)

The course is an inquiry into historical and contemporary philosophical perspectives on the making, interpreting and criticizing of works of art, including relations of the arts to other dimensions of cultures. Students will wrestle with foundational questions (e.g., "What is beauty?", "What is art?", "What makes good art good?", "Is there a right way to interpret art?"), consider connections between art and ethics, culture, and politics (e.g., "Can an artwork be both immoral and good?", "Can a particular culture have exclusive rights to an artform?", "How does public art create political communities and divisions?"), explore questions within particular arts (e.g., "Can music represent?", "Why do we respond emotionally to fictions?"), and experience and evaluate art in light of these investigations. (Cross-listed with PHIL 8225)

Prerequisite(s): Junior or 3 credits in philosophy.

PHIL 3230 PHILOSOPHY AND POPULAR MEDIA (3 credits)

This course examines Philosophy in the context of contemporary popular media including graphic novels, interactive art, video games and VR worlds, or other still-emergent formats. The specific forms of popular art or media selected as a focus area during each term may change in successive course offerings, to suit thematic emphases or new developments (e.g. webseries graphic novels, video games and their associated literature, fictional universes shared between comics and film).

PHIL 3260 HISTORY OF AMERICAN PHILOSOPHY: 20TH CENTURY (3 credits)

This course is designed to introduce students to the thinkers and movements in 20th century American thought, particularly pragmatism, idealism, naturalism, new realism, and critical realism. One chief concern is the issue of what constitutes American philosophy. Is there such a thing as "American philosophy"? This course is intended to address this issue. To set the stage for a look at 20th century philosophical thought, students will briefly look at American thought prior to the 20th century: Puritan thought, the American Enlightenment, and Transcendentalism (Emerson and Whitman). Students will then examine the classical American pragmatists (Royce, Peirce, James, and Dewey), as well as contemporary pragmatists (Rorty, Fraser, Putnam, and Hacking). The course will end with a look at naturalism, new and critical realism, and contemporary moral, social, and political philosophy.

Prerequisite(s): Junior or 3 credits in philosophy.

PHIL 3300 EARLY ANALYTIC PHILOSOPHY (3 credits)

This course focuses on the foundations of the Analytic tradition (from 1879 to 1930). During this period, central figures such as Gottlob Frege, Bertrand Russell, G.E. Moore, Ludwig Wittgenstein, and Frank Ramsey aimed to bring clarity and precision to a wide range of philosophical problems by focusing on fundamental issues in the philosophy of logic and the philosophy of language. Understanding the developments of this period is essential to understanding the development of philosophy in the 20th and 21st centuries.

Prerequisite(s): 3 credits in philosophy or permission of instructor.

PHIL 3370 CONCEPTS OF NATURE (3 credits)

An examination of key philosophical conceptions of nature from the Greeks through the 21st century. Topics covered include concepts of time, the cosmos, causation, determinism, natural law, the relationship between God and nature, and the place of humans and animals in nature.

Prerequisite(s): Previous experience in philosophy, especially PHIL 3110, would be helpful.

PHIL 3400 PHILOSOPHY OF NATURAL SCIENCE (3 credits)

An examination of the philosophical problems associated with the methods of the natural sciences, the presuppositions of scientific inquiry, and the nature of scientific laws and theories.

Prerequisite(s): 3 credits in philosophy or permission of instructor.

PHIL 3410 PHILOSOPHY OF SOCIAL SCIENCE (3 credits)

This course introduces students to central philosophical issues that are raised by and within the practice of social science. Some key questions are: In which respects is social science similar to natural science and in which respects is it dissimilar? Does social science aim at forming generalizable explanations, or does it seek to provide humanistic understanding? Can social science be conducted in a purely objective, disinterested way, or does the practice of social science always rely on at least implicit value assumptions? Must responsible researchers interrogate their research for such assumptions, and, if so, what does it take for research to "pass?"

Prerequisite(s): 3 credits in philosophy and junior, or permission of instructor.

PHIL 3430 PHILOSOPHY OF BIOLOGY (3 credits)

Philosophy of Biology will consider foundational conceptual issues in biology like the nature and structure of biological explanation, the possibility of laws in evolutionary theory, the relationship between different causal components of biological processes (genetics and development), the problem of species reality and classification, the explanatory character of ascription of biological function, and the extension of biological explanations to human psychology and culture. It is designed for both the philosopher who can explore central epistemological and metaphysical issues in the context of biological science and for the biologist who wants to explore the conceptual foundations and presuppositions of her science.

Prerequisite(s): 3 hours in philosophy or biology or permission of instructor.

PHIL 3450 PHILOSOPHY OF MEDICINE (3 credits)

This course considers a range of philosophical questions raised by and within the practice of medicine. The course begins with a conceptual investigation of the meaning of "health" from "illness." Is the classification of individuals as healthy or ill an objective, scientific matter? Or is it instead a matter of social and ethical values? What follows from answering this question one way, versus another? This introduction forms the backdrop against which we move on to investigate a range of further topics.

Examples of some of the topics that may be covered include: medical and social models of disability; the role morality of doctors and other medical providers; abortion, euthanasia, and conscientious objection in the healthcare professions; health measurement and quality of life; "death panels" and health resource rationing; conditions on appropriately voluntary and informed consent to medical procedures; and the ethics of biomedical research. (Cross-listed with MEDH 3450).

Prerequisite(s): 6 hours of Philosophy OR Sophomore status OR permission of the instructor

PHIL 3480 PHILOSOPHY OF RACE (3 credits)

Where does the concept of race come from? Where did the racial categories on the US census come from? How has the concept of race influenced scientific theories? Do empirical findings of genetic differences between racial groups show that races are biologically real? Why are racial categories used in medicine? Can all health disparities between races be explained by social factors? Is some particular concept of race necessary for political and social opposition to racism? The course will involve reading original articles and book extracts from a range of disciplines, including history, philosophy, and several sciences. These articles will be explained and discussed in class through a philosophical lens. The course aims to provide students with the philosophical tools and concepts to think about race and racism in a nuanced and reflective way.

Prerequisite(s): Sophomore Status OR 6 credit hours Philosophy OR Permission of the Instructor

Distribution: U.S. Diversity General Education course

PHIL 3490 GENDER AND PHILOSOPHY (3 credits)

This course examines philosophical arguments concerning gender and sexual difference, gender issues and women in the history of philosophy, and major views in feminist theory. Using arguments derived from feminist theory, we will undertake a critical inquiry into the ways in such gender, geography, and power inform political institutions and, in particular, medical research and health disparities. Taking the perspective of women's lives from across the globe through case studies, we will interrogate feminist theory in relation to non-US perspectives on gender and sexuality. (Cross-listed with WGST 3490).

Prerequisite(s): Sophomore status OR 6 hours of PHIL OR 6 hours of WGST.

Distribution: Global Diversity General Education course

PHIL 3500 PROBLEMS IN PHILOSOPHY (3 credits)

Seminar on specialized topic in philosophy. (See "Topic" in class search for specification of particular topic.)

Prerequisite(s): Junior or 6 hours in philosophy.

PHIL 3510 PHENOMENOLOGY AND EXISTENTIALISM (3 credits)

A critical examination of phenomenology and existentialism as historical and philosophical movements. Course focus includes such thinkers as Edmund Husserl, Martin Heidegger, Jean-Paul Sartre, and Simone De Beauvoir.

Prerequisite(s): Junior or 3 credits in philosophy or permission of the instructor.

PHIL 3520 HERMENEUTICS IN PHILOSOPHY (3 credits)

Introduction to hermeneutics or the notion of interpretation in certain thinkers and philosophy movements since the late 19thC. Focus includes Nietzsche, pragmatism, Heidegger, Gadamer, Frankfurt School, and Derrida. Course to exclude topics or things covered in PHIL3510.

Prerequisite(s): 3 hours in philosophy, junior, or permission of instructor.

PHIL 3570 UNDERSTANDING SELF-DECEPTION (3 credits)

What is it to deceive yourself? Why do we do it? Is it necessarily a bad thing? This course is designed to introduce students to a variety of problems associated with the issue of self-deception. Students will investigate the nature of self-deception from both philosophical and psychological perspectives. Students will apply foundational theories to explore the ethical implications of self-deception and the relation of self-deception to issues like imposter syndrome and the project of autobiography.

PHIL 3600 EPISTEMOLOGY (3 credits)

The course covers major theories and debates in Epistemology (i.e., the study of evidence, reasons, justification, warrant, knowledge, explanation, and understanding). The course covers both foundational structural debates (e.g., the structure of justification, the analysis for knowledge, the requirements of explanation, and the nature of understanding) and applied issues (e.g., expertise and testimony, peer disagreement, burden of proof, group deliberation and voting, epistemic bubbles and conspiracy theories, and the value of feelings of confidence, surety, and certainty).

Prerequisite(s): 6 hours of philosophy or permission of instructor.

PHIL 3650 PHILOSOPHY OF MIND (3 credits)

A discussion of various accounts of the nature of minds which focuses upon philosophical problems such as whether the mind is identical with the brain, the extent of similarities between human minds and computers, the nature of personal identity and the relationship of mental activity to behavior. (Cross-listed with PHIL 8655, PSYC 3650).

Prerequisite(s): No Prerequisites. Some prior coursework in Philosophy is recommended, but not required.

PHIL 3700 SPACE, TIME, AND REALITY (3 credits)

What is space? Is there more to space than the arrangement of things in it? What is time? Is time travel possible? What is the relation between space and time? This course introduces students to the study of the fundamental nature of reality with a focus on the elusive nature of space and time. The course places emphasis on the challenge of finding metaphysical truths about the world given the epistemic constraints imposed by our observational limits. Some representative views from the history of philosophy will be covered, though special attention will be given to contemporary debate.

Prerequisite(s): 3 hours of philosophy or permission of instructor.

PHIL 3960 READINGS IN PHILOSOPHY (1-3 credits)

Readings in specialized areas or individual problems in philosophy.

Prerequisite(s): Permission of instructor.

PHIL 4000 ADVANCED PHILOSOPHY WRITING SEMINAR (3 credits)

This is the capstone course of the philosophy major, designed to teach students to write at an advanced level. Students will present their own writing and critique the writing of others, under close guidance of the instructor. By the end of the seminar, each student will have produced a "journal-length" (approximately 20 page) paper on a philosophical topic, and gained extensive experience in revising papers and editing the work of others.

Prerequisite(s): Junior standing and 15 hours in philosophy including 9 hours consisting of 3000-level courses, or instructor permission. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

PHIL 4220 NEUROETHICS (3 credits)

Neuroscience is a burgeoning field that yields new insights into the workings of the human mind and brain. Work in basic neuroscience also yields technological innovations - brain scans, smart pills, brain modification techniques, etc. - that have profound ethical and social implications. In this upper level philosophy course, we will primarily examine the social, legal, medical, and ethical implications of current and emerging neuroscience technologies and research practices. The emerging field of "neuroethics" examines the ethical ramifications of neuroscience using the concepts of normative and applied ethics. The course will discuss the ethics of neuroscientific technologies - e.g., the use of neuroimaging in the clinical and legal contexts - using the major ethical theories (utilitarianism, virtue ethics, deontological ethics) and principles central to biomedical ethics (autonomy, beneficence, justice, non-maleficence, competence, and informed consent).

Prerequisite(s): Prior Philosophy coursework, particularly PHIL 2300, or prior coursework in Neuroscience, is recommended but not required. Sophomore standing or above.

PHIL 4240 PHILOSOPHY OF EMOTION (3 credits)

In this class, we will aim to understand emotions, moods, attitudes, and other affective phenomena from a broad, empirically informed perspective while keeping practical issues in mind. We will ask questions such as: What are emotions, moods, and the rest? How are these various affective phenomena related to one another? How do they provide information about our relationship to the world? Under what conditions are they appropriate or inappropriate? What role do they play in our reasoning and decision-making? What role do they play in our ethical lives? What role do they play in the arts (e.g., music, literature, film)? (Cross-listed with PSYC 4240).

Prerequisite(s): No prerequisites. Some prior philosophical coursework would be useful, but it is not required.

PHIL 4250 LIMITS OF CONSCIOUSNESS (3 credits)

Consciousness is often considered one of the last great mysteries of science. Despite our internal experience of pleasures, sights, sounds, and pains, it is a largely open question why we have these experiences and what makes them happen. This upper level seminar class examines the philosophy, psychology, and neuroscience of consciousness. Topics covered will include neuroscientific theories of consciousness, unconscious perception, the relationship between attention and consciousness, animal consciousness, and detecting consciousness in the persistent vegetative state. (Cross-listed with PHIL 8256, PSYC 8256, PSYC 4250).

Prerequisite(s): PSYC 1010; or 6 hours in Philosophy. Not open to non-degree graduate students.

PHIL 4260 MORAL PSYCHOLOGY (3 credits)

The growing interdisciplinary field of moral psychology studies our moral beliefs and decision-making processes using the tools of anthropology, psychology, philosophy, and neuroscience. Topics in the science of morality will include the moral-conventional distinction (the distinction between moral norms and non-moral norms such as etiquette), the role of reasons vs. emotions in moral judgment, the brain basis of moral decision-making, cultural differences in moral norms, psychopathy, and the development of morality in children. Psychology studies the nature of moral judgment using behavioral tasks. Neuroscience employs techniques such as functional magnetic resonance imaging (fMRI), transcranial magnetic stimulation (TMS), and other tools for monitoring and manipulating brain processes to study "where" in the brain moral decision making occurs and the nature of these decisions. Throughout the course, we will examine how these empirical findings intersect with the ethical choices that we ought to make. (Cross-listed with PSYC 4260).

Prerequisite(s): No prerequisites. Prior Philosophy coursework is recommended but not required.

PHIL 4610 PHILOSOPHY OF LANGUAGE (3 credits)

This course provides an introduction to the central problems and foundational theories in the philosophy of language. We will investigate central semantic issues concerning the nature of reference, meaning, and truth; examine key pragmatic issues concerning the role of context and the ways in which we use language; and explore expressive and figurative uses of language such as metaphor. Such issues lie at heart of many perennial philosophical puzzles, encompass debates in linguistics and psycholinguistics, and pose challenges to work in Computer Science and, especially, Artificial Intelligence.

Prerequisite(s): 6 hours of Philosophy OR Sophomore status OR Permission of Instructor

Physical Education Activities (PEA)

Physical Education Activities Undergraduate Courses

PEA 111A RACQUETBALL (1 credit)

This course is designed to develop the fundamental skills and knowledge of the sport of racquetball.

PEA 111B TENNIS (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of tennis. Included will be the fundamental skills and strategies of playing the game.

PEA 111C GOLF (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of golf.

PEA 111D JUDO (1 credit)

A basic judo course designed primarily for men and women students with limited experience in judo. The course includes techniques of falling, self-balance, body management, disturbing opponent's balance, throwing techniques, techniques of pins, recognition of choking and armlocks, and judo principles for self-defense and individual sport techniques.

PEA 111E SELF-DEFENSE (1 credit)

This is a self defense course designed primarily for men and women students with little experience in self defense.

PEA 111F TAEKWONDO (1 credit)

Originally designed as a means of self-defense. Taekwondo is also excellent for physical conditioning, increasing agility, and building self-confidence. The purpose of the course is to introduce the student to the basic techniques and philosophies of Taekwondo.

PEA 111G BASIC HAPKIDO (1 credit)

In addition to the kicks and strikes normally associated with Oriental martial arts, Hapkido adds throws, take-downs, and restraint and submission holds. Hapkido is also excellent for physical conditioning, increasing agility, and building self-confidence. The purpose of the course is to introduce the student to the basic techniques and philosophies of Hapkido.

PEA 111H WEIGHT TRAINING/BODY CONDITIONING (1 credit)

The course is designed to develop the skills and knowledge necessary to begin and participate in a program of weight lifting as a lifelong activity.

PEA 111I ADVANCED WEIGHT TRAINING (1 credit)

The course is designed to enhance weightlifting and conditioning skills to an advanced level from skills already possessed by the student.

PEA 111N KICKBOXING (1 credit)

The course is a combination of boxing and kicking techniques and total body conditioning. It will focus on low, moderate, and/or high impact movements. The course will concentrate on safe and effective exercises that will develop the aerobic endurance and strength of the student. Students will utilize hand-wraps, gloves, focus mitts, and kicking shields during the course.

PEA 111O MULTICULTURAL DANCE (1 credit)

This course is designed to provide students with an introduction to dances from Europe, Asia, Africa, and North and South America.

PEA 111P MODERN DANCE (1 credit)

This course for men and women students is designed to develop technique in modern dance and acquire a brief knowledge, understanding, appreciation of modern dance, its history, and composition.

PEA 111Q BALLET (1 credit)

The course introduces the student to basic ballet technique and fosters an appreciation for ballet as an art form.

PEA 111R JAZZ I (1 credit)

The course is designed to introduce the student to various fundamental techniques in jazz dance and to incorporate these techniques into dance sequences.

PEA 111S RELAXATION TECHNIQUES (1 credit)

This course involves discussion about stress and its health related aspects. The focus is on demonstration and practice of selected stress management skills.

PEA 111T YOGA I (1 credit)

This course actively covers the scope of hatha yoga through both demonstration and participation as well as historical review of yoga.

PEA 111U YOGA II (1 credit)

This course actively continues to cover the scope of hatha yoga through both demonstration and participation as well as historical review of yoga.

PEA 111V BEGINNING/INTERMEDIATE SWIMMING (1 credit)

This course in Beginning and Intermediate Swimming is designed to expose the student to the basic skills involved in safe and efficient aquatics practices. Skills and information dealing with general water safety will be covered in order to create an awareness of the cause and prevention of water accidents, to develop a desire to be safe and to encourage healthy and safe water recreation.

PEA 111W SCUBA (1 credit)

SCUBA is an exciting, lifetime recreational activity that you can enjoy anywhere in the world and opens the doors to future tracks such as Marine Biology, Engineering, Physical Sciences and more. This course teaches students the basics of open water diving including equipment preparation, pre-dive safety checks, assembly and maintenance, underwater dive safety including ascents, buoyancy, emergency preparation and much more. Included in the course fee are the digital materials, logbook, purchase of snorkel gear and use of the pool and other necessary gear. During the nine sessions at Diventures you will complete the classroom, pool work and open water training to provide you a lifetime Open Water Diver certification from Scuba Schools International (SSI). Classroom and Pool are to be held at Diventures. The training dives are to be held the following weekend, weather dependent.

Prerequisite(s): A Medical Statement & Questionnaire (before the course) and Water Fitness Evaluation (Swim Assessment and Survival Float - during the course) must be completed.

PEA 111X BASKETBALL (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of basketball.

PEA 111Z BACKPACKING & CAMPING (1 credit)

This course is designed to introduce the student to backpacking and orienteering in order to provide the students with an appreciation for the outdoor environment.

PEA 112A SWIM CONDITIONING (1 credit)

This course in Swim Conditioning is designed to expose the participants to the benefits and variety of swimming as a lifetime fitness exercise.

Prerequisite(s): Participants should have the ability to continuously swim 25 yards.

PEA 112C POWER YOGA (1 credit)

This course provides an exercise program based on traditional yoga poses (asanas) in a continuous series of exercises. The course will concentrate on safe, effective, exercise that will develop the cardiovascular fitness, muscular strength, endurance and flexibility of the student.

PEA 112D PILATES MATWORK (1 credit)

This course is based on a method of exercise develop by Joseph H. Pilates. The course will concentrate on safe, effective exercise that will develop the cardiorespiratory fitness, muscular strength, endurance and flexibility of the student.

PEA 112E JAZZ II (1 credit)

The course is designed to build upon the techniques learned in Jazz Dance I. **Prerequisite(s):** PEA 111R or permission of instructor

PEA 112F ROCK CLIMBING (1 credit)

This class focuses on the basic knowledge and skills necessary for the sport of rock climbing. Topics covered will include protecting the climber from falling, movement on the rock, rappelling, and an introduction to anchor setting and ethics. Each topic will emphasize risk management and current accepted technique in the field.

PEA 112G BALLET II (1 credit)

The course builds on the work introduced in Ballet I. While still basic, there is increased complexity as the student begins to demonstrate greater ability.

Prerequisite(s): PEA 111Q or permission of instructor

PEA 112H BALLROOM DANCE I (1 credit)

This course is designed to introduce the student to various fundamental techniques in Ballroom social dance and to incorporate these into basic Ballroom, Latin, and Swing dances.

PEA 112I TAI CHI FOR MOVEMENT IMPROVEMENT (1 credit)

This course is designed to teach students various forms of Tai Chi. There will be emphasis on balance, coordination, flexibility, relaxation, and strength. It is designed for all levels of ability.

PEA 112J MODERN DANCE 2 (1 credit)

The course is designed to further the student's study of modern dance techniques.

Prerequisite(s): PEA 111P or permission of instructor. Not open to non-degree graduate students.

PEA 112K SOCCER (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of soccer.

PEA 112L WALKING/JOGGING (1 credit)

This course is designed to help the students improve personal fitness through walking and jogging.

PEA 112M VOLLEYBALL (1 credit)

This course is designed to develop the fundamental skills and knowledge of the game of volleyball.

PEA 112N ZUMBA (1 credit)

Zumba is a fitness program inspired by Latin dance. Zumba combines Latin rhythms (salsa, bachata, merengue, and chachacha.) with cardiovascular exercise to create an aerobic routine that is fun and easy to follow.

PEA 112O BALLROOM DANCE II (1 credit)

The course is designed to further the student's study of Ballroom Dance techniques.

Prerequisite(s): PEA 112H or permission of instructor

PEA 112P INDOOR CYCLING (1 credit)

This activity course is an indoor stationary cycling program. It is a high intensity, cardiovascular fitness program designed to promote lifetime fitness.

PEA 112Q HIP HOP (1 credit)

This course is designed to give students a beginning understanding and appreciation of hip hop dance.

PEA 112R NET GAMES (1 credit)

This course is designed to teach students the fundamental skills and rules of Badminton, Tennis, Pickleball, and Table Tennis.

PEA 112S CROSS-TRAINING (1 credit)

This course is designed to develop the technique, fitness level and knowledge base to effectively participate in cross-training activities. Individuals will be exposed to a variety of methods such as, but not limited to, plyometrics, agility training, kettlebells, and core training.

PEA 112T ADVANCED MARTIAL ARTS (1 credit)

The purpose of this course is to expand upon the basic techniques and philosophies presented in the UNO Martial Arts Introductory classes. The class will review the basic concepts and techniques taught in the intro classes which may be new to the student depending on the introductory class experience of the student.

Prerequisite(s): PEA 111G, PEA 111F, or PEA 111D; or instructor consent.

PEA 112U QI GONG (1 credit)

This course actively covers the scope of Qi Gong through demonstration and participation as well as through a systematic elucidation of the history and theoretical underpinnings of Qi Gong.

PEA 112V MINDFULNESS MEDITATION (1 credit)

This course actively covers the scope of Meditation practices, including Mindfulness, through demonstration, lecture, discussion, and participation. Various methods will be taught, as well as the history, philosophy and practices of meditation. Contemporary research will also be discussed.

PEA 112W TAP I (1 credit)

The course is designed to introduce the student to various fundamental techniques in tap dance and to incorporate these techniques into dance sequences.

PEA 112X BARRE FITNESS (1 credit)

This is a fitness course that utilizes safe barre exercises to develop muscular endurance, flexibility, and neuromotor training. The course will concentrate on integrating the use of the ballet barre, light weights, and various props.

PEA 113A BEGINNING ICE SKATING (1 credit)

This course is designed for beginning ice skaters. Instructional emphasis will be placed on safely learning the life-long activity of ice skating. Students will develop an understanding of the basic principles and terminology of the sport of ice skating, improve on any current ice skating skills, and develop new skills such as forward and backward skating, crossovers, turns, and stops.

PEA 1130 ADAPTED PHYSICAL EDUCATION (1 credit)

This course is designed to provide an opportunity for independent physical education activity for a disabled person.

Prerequisite(s): A disability which does not allow participation in regularly scheduled physical education activity courses.

Physics (PHYS)

Physics Undergraduate Courses

PHYS 1030 PHYSICS OF EVERYDAY LIFE (3 credits)

A conceptual course in the principles of physics and their relationship to man and his environment. Topics included relate the basic laws of physics and recent developments in science to their effects on man. This course is intended for students not majoring in the sciences and may be used in partial fulfillment of the natural science requirement.

Prerequisite(s): High School algebra or equivalent.

Distribution: Natural/Physical Sci General Education lecture

PHYS 1034 PHYSICS OF EVERYDAY LIFE LABORATORY (1 credit)

A physics laboratory consisting of a series of concise experiments which relate man directly to his physical environment.

Prerequisite(s): High school algebra or equivalent; PHYS 1030, prior or concurrent.

Distribution: Natural/Physical Sci General Education lab course

PHYS 1050 INTRODUCTION TO PHYSICS (4 credits)

A terminal one-semester course covering major topics in mechanics, heat, sound, electricity, magnetism, light and modern physics. Designed particularly for non-science liberal arts majors or others for whom such a one-semester coverage might be deemed adequate. (Does not count towards physics requirement for chemistry, physics and engineering majors.)

Prerequisite(s): High school algebra or equivalent.

Distribution: Natural/Physical Sci General Education lecture

PHYS 1054 INTRODUCTION TO PHYSICS LABORATORY (1 credit)

A series of concise experiments on varied topics in physics, such as scientific sampling, optics, elasticity, motion, sound, light and electricity are covered in this one-semester course. Emphasis is placed on data collection and graphing, and error reduction.

Prerequisite(s): High school algebra or equivalent; PHYS 1050, prior or concurrent, or permission of the instructor

Distribution: Natural/Physical Sci General Education lab course

PHYS 1110 PHYSICS FOR LIFE SCIENCE I (4 credits)

This course is the first part of a two-semester series designed for students with no prior background in physics. Students will develop problem-solving skills and a conceptual understanding of physics by exploring topics such as motion, forces, energy, equilibrium, elasticity, and thermodynamics. Through experiments, simulations, and problem sets, students will apply physics principles to real-world scenarios, including biological phenomena such as viscosity, drag, osmosis, and diffusion. The course focuses on foundational concepts in mechanics, heat, and fluid dynamics, with an emphasis on applications relevant to biological and life sciences.

Prerequisite(s): MATH 1220 or MATH 1300 or MATH 1310 or MATH 1320 or equivalent, or MPE score above 2 or permission of instructor

Distribution: Natural/Physical Sci General Education lecture

PHYS 1120 PHYSICS FOR LIFE SCIENCE II (4 credits)

This course is the second part of a two-semester, algebra-based series designed for students with no prior background in physics. It explores the principles of electricity, magnetism, optics, and wave phenomena, emphasizing applications relevant to biological and medical systems. This course provides the tools necessary for students to connect physics to biorelevant fields of study, preparing them for advanced coursework and professional applications.

Prerequisite(s): PHYS 1110 or permission.

PHYS 1154 GENERAL PHYSICS LABORATORY I (1 credit)

One-semester laboratory course for students enrolled in PHYS 1110 or PHYS 2110. Covers experiments in mechanics, wave motion and heat.

Prerequisite(s): PHYS 1110 or PHYS 2110, prior or concurrent.

Distribution: Natural/Physical Sci General Education lab course

PHYS 1164 GENERAL PHYSICS LABORATORY II (1 credit)

One-semester laboratory course for students enrolled in PHYS 1120 or PHYS 2120. Second semester covers experiments in electricity and magnetism, optics, and modern physics.

Prerequisite(s): PHYS 1120 or PHYS 2120, prior or concurrent.

PHYS 1350 PRINCIPLES OF ASTRONOMY (3 credits)

An introductory course that satisfies divisional requirements in natural science. Topics discussed include the night sky, gravity, telescopes, atoms and radiation, the solar system, the sun and stars; and cosmology.

Prerequisite(s): High school algebra or equivalent.

Distribution: Natural/Physical Sci General Education lecture

PHYS 1354 INTRODUCTORY ASTRONOMY LAB (1 credit)

Laboratory sessions acquaint students with basic phenomena, methods and data acquisition in astronomy. By use of the experiments, students will be able to explore and add to what has been discussed in lecture. Several night observing sessions will also be available for students to use telescopes.

Prerequisite(s): PHYS 1350 prior or concurrent.

Distribution: Natural/Physical Sci General Education lab course

PHYS 1750 FUNDAMENTAL PHYSICS OF SOUND (4 credits)

A course designed for music and communication majors. It covers transmission of sound, wave motion, pitch, quality, sound synthesis, acoustics, resonance, interference, musical scales, string and wind instruments, recording and reproduction of sound. Three lectures and one discussion per week.

Prerequisite(s): High school algebra or equivalent.

PHYS 1754 FUNDAMENTAL PHYSICS OF SOUND LABORATORY (1 credit)

A laboratory that accompanies PHYS 1750. The experiments are coordinated with the music-related portions of lecture course. The laboratory is designed for music majors.

Prerequisite(s): PHYS 1750 prior or concurrent and music major or permission of instructor.

PHYS 1950 PHYSICS GATEWAY COURSE (1 credit)

Designed for first year physics majors, a one-semester introduction to concepts and tools to be encountered and used in earning a physics degree.

Prerequisite(s): High school algebra or equivalent.

PHYS 2030 ENERGY AND FUELS (3 credits)

This one semester course focuses on energy from a macroscopic perspective. Viewpoints based on the law of physics are distinguished from unsupported opinion. Topics include: electricity production and consumption; mineral and fossil fuel resources; nuclear, solar, fossil fuel and biomass energies; pollution, conservation and recycling; extrapolation and interconnections.

Prerequisite(s): MATH 1310 or MATH 1220

PHYS 2040 RADIATION FUNDAMENTALS (3 credits)

This one-semester course examines the ways radiation affects our daily lives. Topics include: structure of matter and types of radiation, half-life and activity, biological effects of radiation, radiation standards and protection, uses of isotopes and radiation, nuclear wastes life-cycle, nature of risk versus benefit, dose calculations and shielding fundamentals.

Prerequisite(s): MATH 1310 or MATH 1220, minimum of PHYS 1050.

PHYS 2110 GENERAL PHYSICS I - CALCULUS LEVEL (4 credits)

First part of a two-semester continuing course for students majoring in some area of science, mathematics or engineering. Mechanics, molecular properties of matter and heat are covered in the first semester.

Prerequisite(s): MATH 1950 (MATH 1930 for Geology majors) or permission of the instructor. High school physics or PHYS 1050 is recommended.

Distribution: Natural/Physical Sci General Education lecture

PHYS 2120 GENERAL PHYSICS-CALCULUS LEVEL (4 credits)

Second part of a two-semester continuing course for students majoring in some area of science, mathematics or engineering. Wave motion, electricity, magnetism and light are considered during the second semester.

Prerequisite(s): PHYS 2110 and MATH 1960 (MATH 1930 for Geology majors) or permission of the instructor.

PHYS 2130 MODERN PHYSICS (4 credits)

The course is composed of introductions to relativity theory and quantum theory with applications to atomic and nuclear structure. Topics include: Planck radiation law; Compton Effect; photoelectric effect; the Rutherford experiments and Bohr model of the atom; the Schrodinger electronic structure of atoms; nuclear reactions, nuclear models, radioactive decay, fission, fusion and elementary particles.

Prerequisite(s): PHYS 2110, PHYS 2120, MATH 1950, & MATH 1960; or permission.

PHYS 2350 SPECIAL TOPICS IN ASTRONOMY: OBSERVATIONAL ASTRONOMY (2-3 credits)

This one semester course emphasizes personal study of the sky, including observing, measuring and recording celestial positions. Students will be shown how to observe and measure the Sun, the Moon, visible planets, and stars, and how to document astronomical observations. Students will be required to study outdoors on their own and will also use the department's observing facilities.

Prerequisite(s): PHYS 1350 or instructor permission.

PHYS 3250 MATHEMATICAL METHODS OF PHYSICS (3 credits)

Training in the use of mathematical techniques applicable to physics problems encountered in upper-level physics courses. Vector operators, Fourier analysis, frequently used differential equations (ordinary and partial), orthogonal functions, and matrix methods of coordinate transformation are included. Emphasis is given to solving problems from mechanics such as vectorial mechanics, oscillatory systems, wave motion, potential theory, etc.

Prerequisite(s): MATH 1950, MATH 1960, MATH 1970 and PHYS 2160 or 2120 or permission.

PHYS 3260 COMPUTER TOOLS FOR PHYSICISTS (2 credits)

This course will introduce a wide selection of computer-powered mathematical tools for doing physics or any upper level science courses. It will introduce software packages in real and complex algebra, trigonometry, calculus I & II, linear algebra, statistics, differential equations, special functions, graphics, document preparation, and programming in the manner of a research scientist.

Prerequisite(s): PHYS 1120 or PHYS 2120 and MATH 1960.

PHYS 3300 INTRODUCTION TO BIOMEDICAL PHYSICS (3 credits)

This course is designed primarily for students desiring to specialize in Biomedical Physics. The course emphasizes an understanding of the fundamental principles of physics and the use of these principles in a variety of biological and medical applications with the major goal to merge physics, biology, and medicine in a unified perspective. PHYS 3300 covers various topics relating basic physics to living systems, including mechanics, fluid mechanics, thermodynamics, sound, electricity, optics, atomic physics, nuclear physics, and nanotechnology. It also describes various technologies widely used in modern medicine such as laser surgery, ultrasound imaging, X-ray, computed tomography, and magnetic resonance imaging. Each topic briefly introduces related background of physics principles as well as comprehensive overview of biological/medical application, thus (although highly recommended) very little background in physics or biology is required. This course will benefit students with interests in medicine, biology, biophysics, or medical physics.

Prerequisite(s): PHYS1110 is required. PHYS2110 and PHYS1120 or PHYS2120 are recommended.

PHYS 3450 CLASSICAL MECHANICS (3 credits)

Statics and dynamics of particles and rigid bodies including the equations of Lagrange and Hamilton.

Prerequisite(s): MATH 1970, PHYS 3250 or permission.

PHYS 3500 ELEMENTS OF ELECTRONICS (3 credits)

The topics covered will include basic circuit theory, principles and operation of electronic devices such as diodes, transistors and integrated circuits. Application of these devices in various electronic circuits. Both analog and digital circuitry will be studied. (Cross-listed with PHYS 8505)

Prerequisite(s): PHYS 1120 or PHYS 2120 and MATH 1970

PHYS 3504 EXPERIMENTAL PHYSICS I (1 credit)

A set of experiments designed to complement PHYS 3750 and PHYS 4200.

Prerequisite(s): PHYS 2120

PHYS 3524 EXPERIMENTAL PHYSICS II (1 credit)

A set of experiments designed to complement PHYS 3760 and PHYS 4210.

Prerequisite(s): PHYS 2120

PHYS 3544 EXPERIMENTAL PHYSICS III (1 credit)

A set of experiments designed to complement PHYS 3450, PHYS 3850, and PHYS 4200.

Prerequisite(s): PHYS 2120

PHYS 3564 EXPERIMENTAL PHYSICS IV (1 credit)

A set of experiments designed to complement PHYS 3020 and PHYS 4220.

Prerequisite(s): PHYS 2120

PHYS 3600 THERMODYNAMICS AND STATISTICAL PHYSICS (3 credits)

Topics include: empirical and absolute temperature, equations of state, work, heat, entropy, the four laws of thermodynamics, phase changes, thermodynamic potentials, classical and quantum statistics of an ideal gas. Applications to be included: Einstein theory of a solid, paramagnetism, blackbody radiation, and conduction electrons. (Cross-listed with PHYS 8605)

Prerequisite(s): PHYS 2120 and MATH 1970.

PHYS 3750 ELECTRICITY AND MAGNETISM I (3 credits)

An advanced study of electrostatics and magnetostatics, including Coulomb's law, Gauss' law, the scalar potential, conductors and dielectrics, electrostatic energy, special methods, electric current, Ampere's law, the magnetic induction, Faraday's law, and the electromagnetic wave equation as obtained from Maxwell's equations, with simple examples such as transmission lines and antennas. (Cross-listed with PHYS 8755)

Prerequisite(s): MATH 1950, MATH 1960, MATH 1970, PHYS 3250, or permission.

PHYS 3760 ELECTRICITY AND MAGNETISM II (3 credits)

A selection of more advanced topics from electromagnetic theory, including a deeper treatment of the electromagnetic wave equations derived from Maxwell's equations, extending to propagation, reflection and refraction of plane waves, waves in wave guides, and radiation. Other topics covered might be magnetism and magnetic energy, plasmas and special relativity. (Cross-listed with PHYS 8765)

Prerequisite(s): PHYS 3750

PHYS 3800 OPTICS (3 credits)

The behavior of electromagnetic radiation as formulated in the ray, wave, and quantum models. Topics will include: reflection and refraction, vergence, matrix method, optical instruments, scalar waves, electromagnetic waves, blackbody radiation, interference, diffraction, and lasers; if time permits, fiber optics and holography will also be included. (Cross-listed with PHYS 8805)

Prerequisite(s): PHYS 1120 or PHYS 2120 and MATH 1970

PHYS 4200 INTRODUCTION TO QUANTUM MECHANICS (3 credits)

This course provides an introduction to the historical development of modern physics and to the Schroedinger formulation of quantum mechanics. Specific topics will include square wells potential barriers, the simple harmonic oscillator potential and the hydrogen atom. Characteristics of multi-electron atoms, including angular momentum coupling schemes, spectra and transition rules will also be included. (Cross-listed with PHYS 8206)

Prerequisite(s): PHYS 3250 or permission.

PHYS 4210 QUANTUM THEORY (3 credits)

The matrix operator formalism is covered along with philosophical implications of this approach. The methods developed will be applied to simple harmonic oscillator and hydrogen atom potentials. Raising and lowering operators, creation-annihilation operators, and first and second order perturbation theory will be discussed. (Cross-listed with PHYS 8216)

Prerequisite(s): PHYS 4200 or permission.

PHYS 4220 PHYSICS OF MOLECULES AND SOLIDS (3 credits)

This course covers the various types of atomic bonding found in molecules and solids. Electronic energy levels and spectra of molecules will be discussed. Topics in solid state physics will include mechanics and thermodynamics of crystals, the scattering of waves, including x-ray and neutron scattering, electron scattering and phonon and photon interactions. (Cross-listed with PHYS 8226)

Prerequisite(s): PHYS 4200 or permission.

PHYS 4230 SPECIAL RELATIVITY AND NUCLEAR PHYSICS (3 credits)

This course includes a brief historical background of the development of relativity theory and the importance of the experiments performed in conjunction with it. Lorentz transformations and covariant formalism will be developed and applied to certain problems in mechanics and electricity and magnetism. The nuclear physics portion of the course will include the historical development of the concept of the nuclear atom. Theoretical models of nuclear structure will be discussed, along with the theory of alpha, beta and gamma decay. Fission and fusion discussed as time permits. (Cross-listed with PHYS 8236)

Prerequisite(s): PHYS 4200 or permission.

PHYS 4300 GENERAL RELATIVITY (3 credits)

A study of general relativity theory and its leading applications. Physical motivations and conceptual foundations will be explored. Students will be guided step-by-step to mastery of the tensor analysis required by this theory. Topics covered will include the equivalence principle, recap of special relativity, tensors, curvature and geodesics, Einstein field equations, black holes, cosmology, and gravitational waves. (Cross-listed with PHYS 8306)

Prerequisite(s): PHYS 3750 and PHYS 4230, or permission of instructor.

PHYS 4350 ASTROPHYSICS (3 credits)

This course introduces the fundamentals of astrophysics to students with a prior knowledge of physics and mathematics. A review will be given of light and telescopes, classical and quantum mechanics and special relativity. Basic laws of physics will be applied to various topics such as: the sun, nuclear fusion and particle physics, evolution and end state of stars, interstellar medium, galaxies and cosmology. (Cross-listed with PHYS 8356)

Prerequisite(s): PHYS 2130 or 4200 and MATH 1970. Recommended: PHYS 1350.

PHYS 4400 GEOPHYSICS (3 credits)

A study of geophysical techniques used to understand the earth, study environmental problems, and in resource exploration. Seismic, gravity, heat flow, magnetic and other methods will be presented. The insights from these methods into earthquake events, stress distributions, rock rheology and plate tectonics will also be addressed. Interpretive skills will be emphasized. (Cross-listed with GEOL 4400).

Prerequisite(s): GEOL 1170, PHYS 1110 or higher, or permission of instructor

PHYS 4500 BIOLOGICAL PHYSICS (3 credits)

This course is designed primarily for students specializing in Biomedical Physics. As a part of Biomedical Physics program at the Department of Physics, the course introduces the fundamental principles of physics and the use of these principles for various biological applications. PHYS 4500/8506 covers various topics including cells, polymers, polyelectrolytes, membranes, mesoscopic forces, self-assembly, photonics, fluid mechanics, motility, chemical kinetics, enzyme kinetics, modern experimental techniques of biophysics. Each topic connects biomolecules with their functions and relevant biological phenomena from a physics perspective. This course will benefit students with interests in biological and medical physics, as well as chemistry, biology. (Cross-listed with PHYS 8506).

Prerequisite(s): PHYS 2110 is required. PHYS 2120 and PHYS 3300 are recommended.

PHYS 4550 PHYSICS IN MEDICINE (3 credits)

This course is designed primarily for students desiring to specialize in Biomedical Physics. The course introduces principles and applications of various medical imaging modalities and medical physics based therapies. Topics include such imaging techniques as ultrasound, X-ray imaging, Computed Tomography (CT), MRI imaging, and positron emission tomography. The course discusses physical principles behind medical imaging and therapeutic applications and covers interaction of different kinds of radiation with biological matter. (Cross-listed with PHYS 8556).

Prerequisite(s): PHYS 2110; PHYS 2120, and PHYS 2130 for Physics majors or permission of the instructor. PHYS 3300 and PHYS 4500 are recommended.

PHYS 4800 INTERNSHIP (1-6 credits)

Internship with agencies or corporations enabling students to gain knowledge and experience in practical applications of physics and/or environmental principles.

Prerequisite(s): Junior or senior standing. Permission.

PHYS 4950 PROBLEMS IN PHYSICS (1-3 credits)

Individual laboratory and/or library work, or reading course in some field of physics. (Cross-listed with PHYS 4960, PHYS 8956, PHYS 8966)

Prerequisite(s): PHYS 2120 and permission of instructor.

PHYS 4960 PROBLEMS IN PHYSICS (1-3 credits)

Individual laboratory and/or library work, or reading course in some field of physics. (Cross-listed with PHYS 4950, PHYS 8956, PHYS 8966)

Prerequisite(s): PHYS 2120 and permission of instructor.

Political Science (PSCI)

Political Science Undergraduate Courses

PSCI 1000 INTRODUCTION TO POLITICAL SCIENCE (3 credits)

This course introduces students to political ideas, behaviors, processes, institutions, and issues on a national and global level.

Distribution: Social Science General Education course and Global Diversity General Education course

PSCI 1100 INTRODUCTION TO AMERICAN NATIONAL GOVERNMENT (3 credits)

This course introduces students to the foundational principles, institutions, processes, and policies of national government in the United States.

Distribution: Social Science General Education course and U.S. Diversity General Education course

PSCI 2000 INTRODUCTION TO POLITICAL INQUIRY AND WRITING (3 credits)

This course introduces students to how political scientists conduct inquiry into political questions and how they write about the results of their investigations for various kinds of audiences. Students will learn the basics of quantitative and qualitative research methods in political science, will learn how to use the library and other available sources of information, and will produce the various kinds of writings by which political scientists communicate their findings to the public, to other scholars, and to political and governmental actors.

Prerequisite(s): PSCI 1100 or PSCI 1000 preferred. ENGL 1150 required and ENGL 1160 recommended.

Distribution: Writing in the Discipline Single Course

PSCI 2110 INTRODUCTION TO PUBLIC POLICY (3 credits)

An introduction to the formation and evaluation of public policy, with particular focus on the stages of public policy development.

Distribution: Social Science General Education course

PSCI 2120 INTRODUCTION TO LEADERSHIP (3 credits)

This course introduces students to civic leadership in a public setting, including theories of leadership, models of leadership, cases of success and failure, and the inherent tensions among democracy, leadership, and administration.

Distribution: Social Science General Education course

PSCI 2130 AFRICAN POLITICS (3 credits)

African Politics examines the socio-cultural and economic environments which characterize political life in contemporary Africa. This course examines contemporary African politics and government in post-independence Africa, and the pre-colonial political and economic systems which influence contemporary African politics. The course assesses the various approaches used to study the political development of the African continent; examines the processes, features, and institutions of the African states; addresses key and persistent issues about African politics; and examines dimensions of social change and political reform. (Cross-listed with BLST 2130).

Distribution: Global Diversity General Education course

PSCI 2150 CAREERS IN LAW AND POLITICS (3 credits)

This course introduces students to a diversity of career paths in both the public and private sector that are available in the fields of law and politics, and the motivations, qualifications, and expertise necessary for each.

Prerequisite(s): PSCI 1000 or PSCI 1100 is recommended. Not open to non-degree graduate students.

PSCI 2180 INTRODUCTION TO LAW (3 credits)

This course introduces students to the foundations, principles, functions, institutions, processes, issues, and fields of law with a special emphasis on the American political and legal systems.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

PSCI 2210 INTRODUCTION TO INTERNATIONAL RELATIONS (3 credits)

This course introduces students to historical and contemporary questions and major theoretical approaches to world affairs through examination of the international system in terms of the economic, military, and political forces between states, international organizations, and transnational actors.

Distribution: Global Diversity General Education course and Social Science General Education course

PSCI 2310 INTRODUCTION TO POLITICAL THOUGHT (3 credits)

This course introduces students to the nature and scope of politics, the foundations of political thought, and competing traditions of political theory through the ideas of major political philosophers, the interpretation of their ideas, and the possible application of their ideas today.

Distribution: Humanities and Fine Arts General Education course

PSCI 2500 INTRODUCTION TO COMPARATIVE POLITICS (3 credits)

This course introduces students to the fundamental concepts and theoretical approaches used to study political institutions, processes, and public policies in different country settings. This course also illustrates the rich diversity of political life and the importance of global political and economic change.

Distribution: Global Diversity General Education course and Social Science General Education course

PSCI 3000 QUANTITATIVE ANALYSIS IN POLITICAL SCIENCE (3 credits)

This course introduces students to the techniques that political scientists use to answer research questions with quantitative data, as well as issues of research design, hypothesis formation, and causation. The course emphasizes the methods used to collect, analyze, and extract information from data using statistical computer software. (Cross-listed with PSCI 8005)

Prerequisite(s): MATH 1120, MATH 1130, MATH 1530, MATH 1220 or MATH 1310 or permission of department.

PSCI 3010 URBAN POLITICS (3 credits)

This course introduces students to the development, powers, forms of government, and functions of cities and their suburbs as well as the problems faced by elected officials, business and community leaders, and citizens in the urban setting. (Cross-listed with PSCI 8015)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 3040 GOVERNMENT AND POLITICS OF NEBRASKA (3 credits)

This course introduces students to the development, structures, functions and public policies of the government of the state of Nebraska. (Cross-listed with PSCI 8045)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor. .

PSCI 3050 STATE GOVERNMENT AND POLITICS (3 credits)

This course introduces students to the development, structures, functions and public policies of states. (Cross-listed with PSCI 8055)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 3100 LGBT POLITICS (3 credits)

This course introduces students to the political struggle for Lesbian, Gay, Bisexual, and Transgender (LGBT) equal rights in the United States using a model of political empowerment, which may be applied for all minority or identity groups and social movements, generating operationalized measures of progress toward the loci of political power. (Cross-listed with PSCI 8105, WGST 3100, WGST 8105)

Prerequisite(s): PSCI 1100 is recommended.

Distribution: U.S. Diversity General Education course

PSCI 3120 THE AFRICAN AMERICAN EXPERIENCE IN POLITICS (3 credits)

This course will provide a historical and contemporary survey of the African American political experience in the United States, from the passage of the 15th Amendment in the late 1800s, to the 1965 Voting Rights Act, and continuing into the 21st century. Students will examine the evolution of the Black political experience, with emphasis on the fight against enslavement, segregation, lynchings and mass incarceration, and the long struggle of African Americans against institutional and structural racism in the American political system. (Cross-listed with BLST 3120)

Prerequisite(s): PSCI 1000 or PSCI 1100

Distribution: U.S. Diversity General Education course

PSCI 3130 WOMEN AND POLITICS (3 credits)

This course introduces students to women's political participation, including holding elective office, socialization, the feminist movement and its opposition, and public policies with particular impact on women. The focus is on contemporary perspectives on women in American political ideas and behavior. (Cross-listed with PSCI 8135, WGST 3130, WGST 8135)

Prerequisite(s): PSCI 1100 is recommended.

Distribution: U.S. Diversity General Education course

PSCI 3140 LATINO/-A POLITICS (3 credits)

This course introduces students to the dynamism and growth of the role of Latinos, as a group of political actors, in the United States. This course provides students with an exposure to and understanding of various concepts and dimensions of this phenomenon, including historical and contemporary Latino political thought and the efforts to increase political empowerment (representation and participation) and influence through grassroots, social, and political movements. (Cross-listed with PSCI 8145, LLS 3140, LLS 8145)

Prerequisite(s): PSCI 1100 is recommended.

Distribution: U.S. Diversity General Education course

PSCI 3150 ASIAN PACIFIC AMERICANS AND THE NEW MINORITY POLITICS (3 credits)

This course will be devoted to a broad discussion about the emergence of Asian Pacific Americans by birth and immigration, the fastest growing minority in the U.S., as a significant factor in American politics. (This course fulfills the department's American politics requirement).

Prerequisite(s): Junior standing or by professor's permission.

PSCI 3160 POLITICAL PARTIES (3 credits)

This course introduces students to the origin, development, structure, and functions of political parties in the United States as political organizations, coalitions of voters, and governing coalitions that seek to hold office and influence public policy. (Cross-listed with PSCI 8165)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 3170 INTEREST GROUPS (3 credits)

This course introduces students to the theories, formation, organization, and activities of interest groups and their impact on public policy, particularly through their role in campaigns and elections and lobbying. (Cross-listed with PSCI 8175)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 3180 CAMPAIGNS AND ELECTIONS (3 credits)

This course introduces students to the evolution and modern application of campaigns and elections in the United States through examination of campaign management and campaign strategy in congressional and presidential elections. (Cross-listed with PSCI 8185)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 3210 GEOPOLITICS OF CENTRAL ASIA AND SOUTH ASIA (3 credits)

This course will focus on the geographic area of Central Asia-South Asia (CASA) and provide students with opportunity to understand the dynamics that made this region a traditional contest area between regional and global powers for centuries. Central Asia-South Asia region is home to successful democracies, a monarchy, and dictatorships. This course is designed to help students analytically assess the geopolitical variables concerning the CASA region and the players involved. Post 9/11 developments in Afghanistan have brought the whole region once again to the forefront of geopolitical struggle between global and regional players, thus reigniting the struggle of the New Great Game in the region. These multiple elements of regional, development, stability and instability will be discussed in this course.

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor. Recommended: INST 2130: Introduction to International Studies.

PSCI 3220 INTERNATIONAL ORGANIZATIONS (3 credits)

This course introduces students to the history, principles, structures, and processes developed to organize and legitimize peaceful reconciliation of the differences of nation-states and to advance their mutual interests in the contemporary global political and economic system. (Cross-listed with PSCI 8225)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor.

PSCI 3230 GENDER AND GLOBAL POLITICS (3 credits)

This seminar introduces students to gender politics in comparative and international politics. (Cross-listed with PSCI 8235, WGST 3230, WGST 8235)

Prerequisite(s): PSCI 2500 is recommended.

Distribution: Global Diversity General Education course

PSCI 3240 THE POLITICS AND PRACTICE OF HUMAN RIGHTS (3 credits)

This course introduces students to human rights issues across the globe and explores the theoretical foundations of human rights as well as human rights institutions and transitional justice. (Cross-listed with PSCI 8245)

Prerequisite(s): PSCI 2210 or junior standing or permission of the instructor.

PSCI 3250 GLOBAL SECURITY ISSUES (3 credits)

This course introduces students to issues of national and international security that cross boundaries and threaten all countries including issues such as climate change, environmental deterioration, population and demographics, gender issues, disease and public health, the media, asymmetrical warfare, drugs/organized crime, and cyberthreats. (Cross-listed with PSCI 8255)

Prerequisite(s): PSCI 2210 or junior status or permission of instructor.

PSCI 3260 UNITED STATES FOREIGN POLICY (3 credits)

This course introduces students to the analysis of foreign and defense policy processes in the United States, including the role of the President, Congress, Departments of State and Defense, the intelligence community, and other actors/factors affecting policy formulation and implementation. (Cross-listed with PSCI 8265)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor.

PSCI 3340 AMERICAN POLITICAL THOUGHT (3 credits)

This course introduces students to the ideals, ideologies, identities, and institutions of American political thought from the country's origins to the present. Topics to be covered may include the political thought of the early American settlers and of the founding generation, the debates over the creation and implementation of the Constitution, the 19th century arguments over slavery, the rise of progressivism, the New Deal and its critics, and contemporary American conservatism and liberalism. (Cross-listed with PSCI 8345)

Prerequisite(s): PSCI 1100 or PSCI 2310 or junior standing or permission of instructor.

PSCI 3410 LAW AND THE BLACK COMMUNITY (3 credits)

Law and the Black Community provides an in-depth examination of the racialized American legal process as it pertains to and affects African Americans in the U.S. From the formation of the U.S. Constitution to present day, this course analyzes intersections of race, law, politics and culture, and explores the administration of justice and Black experiences through a critical legal perspective. (Cross-listed with BLST 3410, CRCJ 3410).

Prerequisite(s): BLST 1000 or CRCJ 1010 or Junior standing or instructor permission

Distribution: U.S. Diversity General Education course

PSCI 3450 AFRICAN ECONOMIC DEVELOPMENT (3 credits)

African Economic Development critically examines historical, political, and socioeconomic forces that have shaped African economies. Students taking this course will learn about the evolution of the modern economic systems, methods of production, distribution and exchange which affect African economies. The course examines the historical impact of colonialism, capitalism, and imperialism on the displacement of ancient trade routes and markets throughout the African continent; the historical impact of these foreign colonial states and tools on the development of contemporary African private sectors, economic institutions, and global competition; and contemporary strategies of economic development, regional cooperation, and international trade, particularly as they affect Sub-Saharan Africa. (Cross-listed with BLST 3450).

PSCI 3500 EUROPEAN POLITICS (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Europe, including the European Union. (Cross-listed with PSCI 8505)

Prerequisite(s): PSCI 2500 or junior status or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 3510 IMMIGRATION LAW AND LATINOS (3 credits)

This course provides an overview of the U.S. Immigration laws with an emphasis on Latino migration. In analyzing Latino migration, we will look at the push and pull factors of migration, the channels available for lawful migration, and the impact immigrants have in our society. (Cross-listed with LLS 3510).

PSCI 3580 GOVERNMENT AND POLITICS OF RUSSIA AND THE POST-SOVIET STATES (3 credits)

This course introduces students to the political cultures, institutions, processes, and public policies of Russia and the states of the former Soviet Union. (Cross-listed with PSCI 8585)

Prerequisite(s): PSCI 2500 or junior status or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 3640 GOVERNMENT AND POLITICS OF CHINA AND EAST ASIA (3 credits)

This course introduces students to the political cultures, institutions, processes, policies, and other characteristics of China and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 8645)

Prerequisite(s): PSCI 2500 or junior standing or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 3660 GOVERNMENT AND POLITICS OF JAPAN AND EAST ASIA (3 credits)

This course introduces students to the political cultures, institutions, processes, policies and other characteristics of Japan and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 8665)

Prerequisite(s): PSCI 2500 or junior standing or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 3680 GOVERNMENT AND POLITICS OF LATIN AMERICA (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Latin America. (Cross-listed with PSCI 8685, LLS 3680, LLS 8685)

Prerequisite(s): PSCI 2500 or junior status or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 3700 GOVERNMENT AND POLITICS OF THE MIDDLE EAST (3 credits)

This course introduces students to government and politics in the contemporary Middle East, including considerations of state formation, authoritarianism and democratization, state-society relations, religion, culture, gender, and economy. (Cross-listed with PSCI 8705)

Prerequisite(s): PSCI 2500 or junior standing or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 3910 SPECIAL TOPICS IN POLITICAL SCIENCE (1 credit)

This course introduces students to a specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours.

PSCI 3920 SPECIAL TOPICS IN POLITICAL SCIENCE (2 credits)

This course introduces students to a specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours.

PSCI 3930 SPECIAL TOPICS IN POLITICAL SCIENCE (3 credits)

This course introduces students to a specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours.

PSCI 4030 THE PRESIDENCY (3 credits)

This course introduces students to the development and modern application of presidential leadership through examination of presidential selection, presidential decision-making, the relationship of the presidency with other governmental and non-governmental actors, and the role of the presidency in making public policy. (Cross-listed with PSCI 8036)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4040 CONGRESS AND THE LEGISLATIVE PROCESS (3 credits)

This course introduces students to the development of the Congress and modern application of the legislative process through examination of congressional elections, congressional leadership, congressional decision-making, legislative rules and procedures, the relationship of the Congress with other governmental and non-governmental actors, and the role of the Congress in making public policy. (Cross-listed with PSCI 8046)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4050 THE JUDICIAL PROCESS (3 credits)

This course introduces students to the administration of law in federal and state courts with respect to the organization of the courts, judicial selection, judicial powers, judicial decision-making, judicial policy-making, the bar, and reform movements in the pursuit of justice. (Cross-listed with PSCI 8056)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4100 MONEY IN AMERICAN POLITICS (3 credits)

This course surveys facts and scholarship about two types of money in American politics: money as a political resource and money as policy. As a political resource, money is critically important for candidates to win elections, for interest groups to exert influence on government, and for policy expertise from civil society to inform government policy. As policy itself, in history or in modern times money has lain at the heart of policy debates like the creation of a national bank, gold and silver as legal tender, and financial regulations, as well as perennial governmental processes like federal budgeting and appropriations and the selection of congressional party leaders. This course trains students to comprehend, analyze, critically evaluate, and build on key research on these topics. (Cross-listed with PSCI 8106).

Prerequisite(s): PSCI 1100 is a strongly recommended prerequisite.

PSCI 4110 POLITICAL PSYCHOLOGY (3 credits)

This course introduces students to the role of human thought, emotion, and behavior in politics through examination of the psychological factors that motivate political elites and the mass public. (Cross-listed with PSCI 8116, PSYC 4110, PSYC 8116)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4120 PUBLIC OPINION AND POLLING (3 credits)

This course introduces students to the origins, nature, measurement, and consequences of public opinion on policymaking. (Cross-listed with PSCI 8126)

Prerequisite(s): PSCI 1100 or junior standing or permission of the instructor.

PSCI 4130 BROWN V. BOARD OF EDUCATION (3 credits)

Brown v. Board of Education traces the educational history of African Americans from segregation to desegregation to re-segregation. This course will review the legal cases before and after the Supreme Court's Brown decision, their aftermath, and the effects on educational policies and practices. (Cross-listed with BLST 8716, BLST 4710, PSCI 8136).

Prerequisite(s): Junior standing OR senior standing or permission of instructor.

Distribution: U.S. Diversity General Education course

PSCI 4140 CONSTITUTIONAL LAW: CIVIL RIGHTS (3 credits)

This course introduces students to the history, principles, and judicial interpretation of key constitutional provisions and federal statutes regarding civil rights in the United States. (Cross-listed with PSCI 8146)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4150 LAW AND THE COURTS: MOCK TRIAL (3 credits)

This course introduces students to the American legal system, including its courtroom aspects, through preparation of and participation in a mock trial case.

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor. Not open to non-degree graduate students.

PSCI 4160 LAW AND THE COURTS: MOCK TRIAL PRACTICUM (1-3 credits)

This course introduces students to the American legal system through participation in mock trial competition.

Prerequisite(s): PSCI 4150 or junior standing or permission of instructor. Not open to non-degree graduate students.

PSCI 4170 CONSTITUTIONAL LAW: FOUNDATIONS (3 credits)

This course introduces students to the principles, design and operation of the American constitutional system with emphasis on analysis of the Declaration of Independence, the Articles of Confederation, the proceedings of the Constitutional Convention, and the Federalist Papers. (Cross-listed with PSCI 8176)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor

PSCI 4180 CONSTITUTIONAL LAW: THE FEDERAL SYSTEM (3 credits)

This course introduces students to American constitutional law as it relates to issues of federalism, the relation of the nation and the states, and separation of powers, the relation of the three branches of the national government. (Cross-listed with PSCI 8186)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4190 CONSTITUTIONAL LAW: CIVIL LIBERTIES (3 credits)

This course introduces students to the philosophy, history, and development of the personal liberties guaranteed by the Constitution including freedom of speech, religion, assembly, petition, and the right of privacy, primarily through examination of Supreme Court decisions. (Cross-listed with PSCI 8196)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 4200 INTERNATIONAL RELATIONS OF EAST ASIA (3 credits)

This course introduces students to the international politics of East Asia with an emphasis on the contemporary relations among major East Asian states (China, Japan, the Korean peninsula) and the United States. (Cross-listed with PSCI 8206)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 4210 INTERNATIONAL RELATIONS OF THE MIDDLE EAST (3 credits)

This course focuses on the international politics of the Middle East region, specifically looking at conditions for peace and causes of war. It examines how the international system, domestic politics, ideologies, and leaders influence international politics in the Middle East. (Cross-listed with PSCI 8216)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 4240 INTERNATIONAL CONFLICT RESOLUTION (3 credits)

This course introduces students to different approaches to peace, their basic assumptions, and their application to current conflicts. (Cross-listed with PSCI 8246)

Prerequisite(s): PSCI 2210 or junior status or permission of instructor.

PSCI 4250 INTELLIGENCE AND NATIONAL SECURITY (3 credits)

This course introduces students to the United States intelligence services, and their relation to broader U.S. national security policy. (Cross-listed with PSCI 8256)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor

PSCI 4260 INTERNATIONAL LAW (3 credits)

The course introduces students to the general principles of international law, including the key actors, the creation and sources of international law, the interpretation of international law by courts and tribunals, and its enforcement. (Cross-listed with PSCI 8266)

Prerequisite(s): PSCI 2210 or junior status or permission of instructor.

PSCI 4270 GLOBAL ENVIRONMENTAL POLITICS (3 credits)

This course introduces students to issues of global environmental politics and policy, including the science behind issues such as climate change, how environmental policy is made at the national and international levels, and what role politics plays in determining environmental resource use. (Cross-listed with ENVN 4270, PSCI 8276)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor.

PSCI 4280 INTERNATIONAL RELATIONS OF LATIN AMERICA (3 credits)

Analysis of the role of Latin American states in the international political arena. Emphasis upon developing, applying and testing an explanatory theory of international politics through the study of the inter-American system: the regional, institutional and ideological environment, power relations, policies and contemporary problems. (This course fulfills the department's international politics requirement). (Cross-listed with PSCI 8286, LLS 4280, LLS 8286)

Prerequisite(s): PSCI 2500 or junior standing or permission of the instructor.

Distribution: Global Diversity General Education course

PSCI 4290 INTERNATIONAL DEVELOPMENT & SUSTAINABILITY (3 credits)

This course introduces students to different concepts of international development through the lens of sustainability. The course explores a broad range of activities related to international development, including international aid, trade, philanthropy, interventions in conflict, peacebuilding, public health, human rights, social justice, and the environment. (Cross-listed with PSCI 8296, CACT 8306)

Prerequisite(s): PSCI 2210 or junior standing or permission of instructor.

PSCI 4310 CLASSICAL POLITICAL THOUGHT (3 credits)

This course introduces students to key works representative of premodern political thought. Authors examined may include Plato, Aristotle, Xenophon, Cicero, Augustine, and Aquinas. (Cross-listed with PSCI 8316)

Prerequisite(s): PSCI 2310 or junior standing or permission of instructor.

PSCI 4320 EARLY MODERN POLITICAL THOUGHT (3 credits)

This course introduces students to key works of the 16th through mid-18th centuries. Authors examined may include Machiavelli, Hobbes, Hume, Smith and Montesquieu. (Cross-listed with PSCI 8326)

Prerequisite(s): PSCI 2310 or junior standing or permission of instructor

PSCI 4330 LATE MODERN POLITICAL THOUGHT (3 credits)

This course introduces students to key texts of the mid-18th through 19th centuries. Authors to be examined may include Rousseau, Burke, Mill, Tocqueville, Marx, and Nietzsche. (Cross-listed with PSCI 8336)

Prerequisite(s): PSCI 2310 or junior standing or permission of instructor.

PSCI 4340 CONTEMPORARY POLITICAL THOUGHT (3 credits)

This course introduces students to leading works of contemporary political thought, including Marx, Spencer, Dahl, Rawls, feminism, and rational choice. The theories, their interrelationships, the theorists, and the manifestations of these works will be discussed and analyzed. (Cross-listed with PSCI 8346)

Prerequisite(s): PSCI 2310 or junior standing or permission of instructor.

PSCI 4350 DEMOCRACY (3 credits)

A basic study of theory, practice and practitioners of political democracy, its roots, development, present application and problems and future. (Cross-listed with PSCI 8356)

Prerequisite(s): PSCI 2500 or junior standing or permission of instructor is required.

PSCI 4360 AUTHORITARIAN REGIMES (3 credits)

An analysis of various types of authoritarian regimes, their differences from democratic governments, and the causes of their establishment, maintenance, and failure. (Cross-listed with PSCI 8366).

Prerequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 4370 GENERALS AND POLITICIANS: CIVIL-MILITARY RELATIONS (3 credits)

This course introduces students to civil-military relations and military politics across the globe. (Cross-listed with PSCI 8376).

Prerequisite(s): PSCI 2500 or junior standing or permission of the instructor.

Distribution: Global Diversity General Education course

PSCI 4380 TOPICS IN POLITICAL THEORY (3 credits)

This course will conduct an in-depth exploration of an important issue, movement, thinker, or work in political theory. The particular subject matter will vary and will be chosen by the instructor.

Prerequisite(s): Junior, or permission of instructor. Junior, or permission of instructor. Not open to non-degree graduate students.

PSCI 4430 INDIAN GAMING (3 credits)

This course will be an in depth study of the history and development of Indian Gaming law and policy. (Cross-listed with NAMS 4140).

Prerequisite(s): PSCI 1100, or junior standing, or permission of instructor.

PSCI 4440 FEDERAL INDIAN LAW (3 credits)

This course provides an overview of tribal legal authority as it exists within federal law. It includes traditional North American tribal governance and leadership practices. Key topics include the federal-tribal trust relationship, Indian treaties, federal Indian policies and case law, and 20th Century establishment of modern tribal governments and courts. (Cross-listed with NAMS 4440).

Prerequisite(s): PSCI 1100, or junior standing, or permission of instructor.

PSCI 4450 CONTEMPORARY TRIBAL NATION BUILDING (3 credits)

This course applies traditional North American tribal governance and leadership beliefs and practices in a critical examination of contemporary tribal governments, tribal courts and programs, and tribal leaders. This course challenges students to assess present tribal governments and leaders concerning their effectiveness in meeting the needs of tribal people today. (Cross-listed with NAMS 4240).

Prerequisite(s): PSCI 1100, or junior standing, or permission of instructor.

PSCI 4470 SOUTH AFRICA & THE SOCIO POLITICS OF APARTHEID (3 credits)

South Africa and the Socio Politics of Apartheid examines the lived experiences of South African people under the Apartheid system, and their long struggle against European colonial oppression and racial segregation throughout the 20th century. Students will examine the laws, tools, and strategies that developed and sustained Apartheid, and the anti-Apartheid movements and international pressure that led to its repeal and South African democratic elections. (Cross-listed with BLST 8476, BLST 4470, PSCI 8476, SOC 8476, SOC 4470).

Prerequisite(s): Junior standing or permission of instructor

Distribution: Global Diversity General Education course

PSCI 4500 GOVERNMENT AND POLITICS OF GREAT BRITAIN (3 credits)

A comprehensive study of contemporary British politics and government. Emphasis will be focused on the formal institutions and informal customs and practices of the British political system. (Cross-listed with PSCI 8506).

Prerequisite(s): Junior

PSCI 4520 POLITICS OF FRANCE (3 credits)

This course introduces students to the political heritage of France, contemporary political institutions and problems, and political and policy responses to these problems. (Cross-listed with PSCI 8526)

Prerequisite(s): PSCI 2500 or junior standing or permission of instructor.

Distribution: Global Diversity General Education course

PSCI 4550 POLITICAL VIOLENCE, INSURGENCY, AND TERRORISM (3 credits)

This course is a survey on the types of violence used within a political context, focusing on its causes, forms and consequences. Specifically, this course details why and how violence occurs, and its impact on institutions and the people operating within that system. (Cross-listed with PSCI 8556).

Prerequisite(s): PSCI 2210 or PSCI 2500

PSCI 4620 ISLAM AND POLITICS (3 credits)

This course introduces students to the interaction between religion and politics in the Muslim world, covering various political ideologies in the Muslim world and different experiences of Muslim-majority countries such as Saudi Arabia, Pakistan, Iran, Turkey, Indonesia, and Egypt. It will also analyze mainstream and radical transnational Islamic movements. (Cross-listed with PSCI 8626)

Prerequisite(s): PSCI 2210 or 2500 is recommended.

Distribution: Global Diversity General Education course

PSCI 4630 ASIAN POLITICS (3 credits)

This course provides students with a broad understanding of Asian Politics with a focus on Northeast Asia (Mainland China, Japan, South Korea, North Korea, and Taiwan) and some emphasis on Southeast Asia (Singapore, Philippines, Thailand, and Vietnam). Students in this course will investigate these Asian societies and discuss their shared history as well as their common political themes, patterns, and connections. Students will explore state institutions, political parties, and state-society relations through the overarching themes of development, democracy, and nationalism. Specific themes include the economic rise of East Asian states, the emergence and development of democracy in the region, and the persistence of authoritarianism. By the end of the course, students will be able to describe, explain, and critically evaluate from a social science perspective the principal political features and processes of these Asian societies and develop their own research projects based on a topic discussed in the course. (Cross-listed with PSCI 8646).

Prerequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 4710 COMPARATIVE INTERNATIONAL DEVELOPMENT AND INNOVATION (3 credits)

Comparative International Development and Innovation will analyze the rise and fall of civilizations from a historical and theoretical perspective in a comparative manner. The course will address issues concerning political, social, economic, and environmental change in national, and international contexts. Among its major emphases are state institutions, economic growth, entrepreneurship, and the transformation of social structure and culture. (Cross-listed with PSCI 8716, ENTR 4710, ENTR 8716).

PSCI 4770 POLITICAL SOCIOLOGY (3 credits)

This course explores political sociology, focusing on political processes and power. Political sociologists investigate relationships between political institutions and various other institutions, including but not limited to the economy, education, media, and religion, and the impacts that these relationships have on society and the individuals that comprise the society. This course will explore the concepts, theories, and knowledge that comprise this field such as power, legitimacy, the state, networks, stratification, and collective action. (Cross-listed with PSCI 8776, SOC 4770, SOC 8776).

Prerequisite(s): SOC 1010, junior standing or permission of instructor

PSCI 4820 POLITICS AND FILM (3 credits)

This course introduces students to the analysis of politics and film, focusing on how politics is portrayed in film and the politics of film making. (Cross-listed with PSCI 8826)

PSCI 4900 READINGS IN POLITICAL SCIENCE (1-3 credits)

This course provides students an opportunity to study an advanced and specialized subject matter in the field of political science not covered in existing courses. The student must be capable of pursuing a highly independent course of study, which must be approved in consultation with the instructor in advance. This course may be repeated for different topics up to a maximum of six credit hours.

Prerequisite(s): Permission of instructor.

PSCI 4910 POLITICAL SCIENCE INTERNSHIP (1-6 credits)

This course offers students an opportunity to experience the resolution of public issues through direct involvement in career-oriented policy organizations. The host organization must be approved in advance in consultation with the internship coordinator. This course may be repeated for a maximum of six credit hours.

Prerequisite(s): Permission of instructor.

PSCI 4920 ADVANCED SPECIAL TOPICS IN POLITICAL SCIENCE (1-3 credits)

This course introduces students to an advanced and specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours. (Cross-listed with PSCI 8926)

Prerequisite(s): Junior standing or permission of instructor.

PSCI 4930 WARGAMING LAB (1 credit)

This 1-CR Lab will explore, develop, practice, and analyze a series of wargaming scenarios, ranging from traditional military security to business, emergency management, and cybersecurity. While the term wargaming might conjure your local D&D club, increasingly governments, businesses, and other organizations are applying wargames to test readiness, identify problems before they arise, and familiarize critical personnel with possible futures. In this Lab, students will participate in the development of three plausible, yet imaginative scenarios of near-future events featuring civilian and military topics (e.g., business, cybersecurity, emergency management, international diplomacy, and military conflict), analyze the results, and apply lessons learned to their future career fields.

Prerequisite(s): Students must have sophomore standing or above.

PSCI 4950 SENIOR ASSESSMENT IN POLITICAL SCIENCE (0 credits)

This zero-credit-hour course is used to assess the knowledge and skills that are imparted by the Political Science program to its students. Seniors must enroll in the class, take the major field test, and submit a writing assignment from one of their upper level political science courses. Because this is a 0 credit course, these items will not be graded, but they will be scored for purposes of program assessment.

Prerequisite(s): Senior standing. Permission of Department Chair required.

Distribution: Writing in the Discipline Single Course

Psychology (PSYC)

Psychology Undergraduate Courses

PSYC 1010 INTRODUCTION TO PSYCHOLOGY I (3 credits)

An overview of scientific understanding of the human mind and behavior. Theories and empirical tests of explanations for how we think, feel, and act. This course is a prerequisite to all subsequent, more specialized courses in Psychology.

Distribution: Social Science General Education course

PSYC 1020 INTRODUCTION TO PSYCHOLOGY II (3 credits)

Provides students who have completed a course in introductory psychology with an opportunity for in-depth study of selected areas of psychology along with related laboratory experiences. Research methodology is emphasized.

Prerequisite(s): PSYC 1010. The proposed course is designed to build upon the content knowledge gained in a first introductory psychology course.

PSYC 2000 CAREER PATHS IN PSYCHOLOGY (1 credit)

A course that introduces the student to the different career paths available to psychology majors, both within and outside of the psychology field and those including graduate or professional school as well as career paths for those with bachelor's degrees. Required of psychology majors. This is a one (1) hour credit course.

Prerequisite(s): PSYC 1010.

PSYC 2040 EXPLORATIONS IN THE SCIENCE OF PSYCHOLOGY (3 credits)

This course explores the scientific foundation of psychology representing several topic areas such as Learning, Developmental, Cognitive, and Physiological Psychology. Basic application of statistics and APA manuscript writing will build a solid background for upper-level courses in Psychology.

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 2100 LEARNING ASSISTANT SEMINAR (0 credits)

This course focuses on effective methods of college teaching and instructional strategies. Students participate in activities designed to increase their understanding of the role of a Learning Assistant.

Prerequisite(s): PSYC 1010 and permission of instructor. Not open to non-degree graduate students.

PSYC 2500 LIFESPAN PSYCHOLOGY (3 credits)

A life span approach to development focusing on the biological, cognitive, and social emotional changes in development occurring from infancy through old age. The impact of these changes on the individual's behavior and interactions with society will be emphasized.

Prerequisite(s): PSYC 1010.

PSYC 3130 STATISTICS FOR THE BEHAVIORAL SCIENCES (3 credits)

An introduction to statistics with particular emphasis on models and hypothesis testing covering analysis of variance, chi-square, F and t-tests, first-order regression and correlation.

Prerequisite(s): One from this list: MATH 1120, MATH 1300, MATH 1320, STAT 1530, MATH 1310 or MATH 1220. Psychology Majors Only: PSYC 2040 (prior to, or concurrent with).

PSYC 3140 RESEARCH METHODS IN PSYCHOLOGY (4 credits)

An introduction to the methods by which psychologists attempt to create, disseminate and integrate knowledge about behavior.

Prerequisite(s): Psychology majors require PSYC 2000, PSYC 3130 or STAT 3000, and ENGL 1160. Neuroscience majors require PSYC 3130 or STAT 3000, and ENGL 1160.

Distribution: Writing in the Discipline Single Course

PSYC 3150 SMALL-N RESEARCH METHODS (4 credits)

This course provides an introduction to small-n research methods including design, implementation, analysis, dissemination, and integration knowledge about behavior. Students also learn to use small-n designs to identify evidence-based practices to address clinical problems experienced by individuals across a variety of settings and how to critically evaluate research in psychology. The course differs from other research methods courses (e.g., those involving qualitative methods or group designs) with its focus on objective, repeated measurement and analysis of performance at the level of the individual. This course fulfills the Writing in the Discipline Requirement for Psychology.

Prerequisite(s): PSYC 3130 or STAT 3000 or Junior Status. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

PSYC 3250 RACE, PSYCHOLOGY & CULTURAL DIFFERENCE (3 credits)

Race, Psychology & Cultural Difference is an introductory course that teaches students the psychology behind prejudice, stereotyping, and implicit bias when encountering racial and cultural difference, with particular focus on African Americans. In this course, students will explore concepts of racial and cultural difference, examine fundamental psychological concepts relative to racial and cultural prejudice and stigmas, and discuss cognitive processes of categorization and stereotyping that shape perceptions of racial and cultural difference. Overall, students will explore a conceptual framework for understanding race, psychology, and cultural difference and will learn psychological well-being strategies and approaches for mindfulness, self-regulation, and self-affirmation as challenges to racial and cultural prejudice, stereotyping, and implicit bias. (Cross-listed with BLST 3250).

Prerequisite(s): Sophomore standing or permission of instructor

PSYC 3410 CLINICAL PSYCHOLOGY (3 credits)

A broad survey of problems and practices in the diagnosis and treatment of emotional and behavioral disorders.

Prerequisite(s): PSYC 1010.

PSYC 3430 PERSONALITY AND ADJUSTMENT (3 credits)

The study of persons in a social context and their resultant effective and ineffective behavior, with emphasis on types of adjustment.

Prerequisite(s): PSYC 1010.

PSYC 3450 SOCIAL PSYCHOLOGY (3 credits)

Social interaction studied in situations of (1) social influences on individuals, (2) dyads or face-to-face groups, and (3) larger social systems. The concepts, theories, data, research methods and applications of varied substantive topics are examined. (Cross-listed with SOC 3450)

Prerequisite(s): SOC 1010 or PSYC 1010

PSYC 3510 EDUCATIONAL PSYCHOLOGY (3 credits)

A study of the capacities and interests of children and their individual differences. Factors that influence learning and an evaluation of learning and classroom procedures are included.

Prerequisite(s): PSYC 1010.

PSYC 3520 CHILD PSYCHOLOGY (3 credits)

A study of the biological, social, emotional and cognitive development of the child emphasizing infancy and childhood.

Prerequisite(s): PSYC 1010.

PSYC 3540 ADOLESCENT PSYCHOLOGY (3 credits)

A review of theory and available evidence useful in understanding changes and problems in the physical, intellectual, social and emotional adjustment of individuals in adolescence.

Prerequisite(s): PSYC 1010.

PSYC 3650 PHILOSOPHY OF MIND (3 credits)

A discussion of various accounts of the nature of minds which focuses upon philosophical problems such as whether the mind is identical with the brain, the extent of similarities between human minds and computers, the nature of personal identity and the relationship of mental activity to behavior. (Cross-listed with PHIL 3650, PHIL 8655).

Prerequisite(s): No Prerequisites. Some prior coursework in Philosophy is recommended but not required.

PSYC 4010 HISTORY OF PSYCHOLOGY (3 credits)

A study of the origins, development and nature of psychology and its relation to external events; emphasis on the period since 1875. (Cross-listed with PSYC 8016)

Prerequisite(s): at least 15 hours of Psychology credits including PSYC 1010 or approval of instructor. Not open to non-degree students or students in other departments or programs.

PSYC 4020 LEARNING (3 credits)

A comprehensive coverage of the experimental literature and theories on human and animal learning.

Prerequisite(s): PSYC 1020

PSYC 4024 LABORATORY IN PSYCHOLOGY: LEARNING (3 credits)

Classical experiments and a service-learning research project designed to apply general learning principles. Systematic techniques used to assess behavior changes associated with the learning process, research design, and scientific report writing will be emphasized.

Prerequisite(s): PSYC 3140 and PSYC 4020. Not open to nondegree students.

PSYC 4030 CONCEPTUAL ANALYSIS OF BEHAVIOR (3 credits)

This course will provide students with an introduction to the theory and philosophy of behavior. Students will explore the history and foundations of behaviorism, alternative and contrasting perspectives of behavior, the shift from Behavior Modification to Behavior Analysis, the analysis of behavior within, and contemporary applications of Behavior Analysis. This course will emphasize and revisit how the theory and philosophy of behavior translate to real-world applications.

Prerequisite(s): At least 15 hours of Psychology including PSYC 1010. Not open to non-degree graduate students.

PSYC 4070 COGNITIVE PSYCHOLOGY (3 credits)

An exploration of historical and contemporary research and theory concerned with cognitive processes including attention, memory, problem solving and concept formation.

Prerequisite(s): PSYC 1020.

PSYC 4074 LABORATORY IN PSYCHOLOGY: COGNITION, SENSATION AND PERCEPTION (3 credits)

Laboratory work coordinated with PSYC 4070, emphasizing a presentation of methods of research assessing human attention, memory and problem-solving processes. Research design, data analysis and research report writing are also emphasized.

Prerequisite(s): PSYC 3140 and PSYC 4070 or PSYC 4090 or PSYC 4210.

PSYC 4090 COGNITIVE NEUROSCIENCE (3 credits)

This course is concerned with the relationship between cognition and the brain. Special attention will be devoted to the techniques used to study specific relationships and the theoretical perspectives that have guided research in the area. Topics for the course include history, neural mechanisms, methods, lateralization of function, sensation and perception, memory, language, action and movement, executive processes, computer models, and the social brain.

Prerequisite(s): PSYC 1020 or NEUR 1520 or NEUR 1540. Not open to non-degree graduate students.

PSYC 4110 POLITICAL PSYCHOLOGY (3 credits)

This course introduces students to the role of human thought, emotion, and behavior in politics through examination of the psychological factors that motivate political elites and the mass public. (Cross-listed with PSCI 4110, PSCI 8116, PSYC 8116)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSYC 4130 ADVANCED UNDERGRADUATE STATISTICS FOR THE BEHAVIORAL SCIENCES (3 credits)

Traditional undergraduate statistics courses cover a range of inferential approaches allowing students to begin engaging in social science research. Nevertheless, those pursuing a senior thesis, participating in a research lab and/or considering going to graduate school would benefit from additional statistical training. This course aims to expand on the material covered in traditional behavioral statistics classes and offers students the opportunity to develop expertise in additional approaches usually reserved for graduate students. Combining examples from developmental psychology, cross-cultural comparisons, adolescent peer relations and psycho-physiology, we will cover advanced statistical approaches with the goal of tackling questions that apply in the real world. This course focuses on learning both the mechanics of correlation and regression as well as an understanding of the statistical concepts underlying correlations and regression, the use of these statistics and interpretation of the results.

Prerequisite(s): PSYC 3130, MATH 1120, STAT 1530, MATH 1310 or MATH 1220.

PSYC 4150 AFRICAN AMERICAN PSYCHOLOGY (3 credits)

African American Psychology traces the psychological history of Africans and African Americans from self-attributes and identity, through race and racism, to cognition, learning, and language. This course will review concepts relevant to understanding the psychology of African Americans, methodological and research issues, and best practices. (Cross-listed with PSYC 8156, BLST 4150, BLST 8156).

Prerequisite(s): PSYC 1010 and Junior standing or Instructor permission
Distribution: U.S. Diversity General Education course

PSYC 4160 NEUROPHARMACOLOGY (3 credits)

Neuropharmacology will introduce students to ligand-receptor interactions and their effects on behavior, cognition, and development. This course will characterize the molecular structure of ligands and how these small molecules or biologics affect central nervous system receptors and transporters. Students will learn about structure-activity relationships and principles of pharmacology: distribution, metabolism, pharmacokinetics, and elimination) and explore the historical milestones in drug development. We'll also discuss the dynamic actions of drugs of abused drugs and the mechanisms of action. For undergraduate Neuroscience Majors, the course counts as a Neuroscience Block 1. (Cross-listed with PSYC 8166, NEUR 4160, NEUR 8166).

Prerequisite(s): Need at least one: NEUR 1520 or NEUR 1540 or PSYC 1020 or BIOL 1450. And need NEUR 3600 or PSYC 3140. PSYC 4230 recommended for students who have not taken NEUR 1520 or BIOL 1450.

PSYC 4210 SENSATION AND PERCEPTION (3 credits)

Reading and discussion concerning psychophysical methods, sensory physiology, phenomenology of various sensory systems and theories of the perceptual process.

Prerequisite(s): PSYC 1020 or NEUR 1520 or NEUR 1540.

PSYC 4230 BEHAVIORAL NEUROSCIENCE (3 credits)

A comprehensive study of the relationship of the nervous and other organ systems to behavior. Research on both human and other animal species is considered. (Cross-listed with NEUR 4230).

Prerequisite(s): PSYC 1010 OR BIOL 1450

PSYC 4234 LABORATORY IN PSYCHOLOGY: BEHAVIORAL NEUROSCIENCE (3 credits)

Laboratory course designed to introduce the students to the techniques and procedures of physiological psychology. Scientific report writing, problems of research design and data analysis also will be emphasized.

Prerequisite(s): PSYC 3140. Psych majors PSYC 4230; Neuroscience majors NEUR 1520 or NEUR 1540.

PSYC 4240 PHILOSOPHY OF EMOTION (3 credits)

In this class, we will aim to understand emotions, moods, attitudes, and other affective phenomena from a broad, empirically informed perspective while keeping practical issues in mind. We will ask questions such as:

What are emotions, moods, and the rest? How are these various affective phenomena related to one another? How do they provide information about our relationship to the world? Under what conditions are they appropriate or inappropriate? What role do they play in our reasoning and decision-making? What role do they play in our ethical lives? What role do they play in the arts (e.g., music, literature, film)? (Cross-listed with PHIL 4240).

Prerequisite(s): No prerequisites. Some prior philosophical coursework would be useful, but it is not required.

PSYC 4250 LIMITS OF CONSCIOUSNESS (3 credits)

Consciousness is often considered one of the last great mysteries of science. Despite our internal experience of pleasures, sights, sounds, and pains, it is a largely open question why we have these experiences and what makes them happen. This upper level seminar class examines the philosophy, psychology, and neuroscience of consciousness. Topics covered will include neuroscientific theories of consciousness, unconscious perception, the relationship between attention and consciousness, animal consciousness, and detecting consciousness in the persistent vegetative state. (Cross-listed with PSYC 8256, PHIL 4250, PHIL 8256)

Prerequisite(s): PSYC 1010; or 6 hours in Philosophy. Not open to non-degree graduate students.

PSYC 4260 MORAL PSYCHOLOGY (3 credits)

The growing interdisciplinary field of moral psychology studies our moral beliefs and decision-making processes using the tools of anthropology, psychology, philosophy, and neuroscience. Topics in the science of morality will include the moral-conventional distinction (the distinction between moral norms and non-moral norms such as etiquette), the role of reasons vs. emotions in moral judgment, the brain basis of moral decision-making, cultural differences in moral norms, psychopathy, and the development of morality in children. Psychology studies the nature of moral judgment using behavioral tasks. Neuroscience employs techniques such as functional magnetic resonance imaging (fMRI), transcranial magnetic stimulation (TMS), and other tools for monitoring and manipulating brain processes to study "where" in the brain moral decision making occurs and the nature of these decisions. Throughout the course, we will examine how these empirical findings intersect with the ethical choices that we ought to make. (Cross-listed with PHIL 4260).

Prerequisite(s): No prerequisites. Some prior course work in Philosophy is recommended, but not required.

PSYC 4270 ANIMAL BEHAVIOR (3 credits)

Behavior of diverse animals for the understanding of the relationships between nervous integration and the behavior manifested by the organism, as well as the evolution and adaptive significance of behavior as a functional unit. (Cross-listed with PSYC 8276, BIOL 4270, BIOL 8276)

Prerequisite(s): BIOL 1750 and PSYC 1010 or permission of instructor, junior-senior.

PSYC 4280 ANIMAL BEHAVIOR LABORATORY (3 credits)

Laboratory and field studies of animal behavior with an ethological emphasis. Classical laboratory experiences and independent studies will be conducted. (Cross-listed with PSYC 8286, BIOL 4280, BIOL 8286)

Prerequisite(s): PSYC 4270 or BIOL 4270 or PSYC 8276 or BIOL 8273. Not open to non-degree graduate students.

PSYC 4310 PSYCHOLOGICAL AND EDUCATIONAL TESTING (3 credits)

The use of standardized tests in psychology and education is considered with special regard to their construction, reliability and validity. (Cross-listed with PSYC 8316)

Prerequisite(s): PSYC 1010 and junior/senior. Not open to non-degree graduate students.

PSYC 4320 HORMONES & BEHAVIOR (3 credits)

In this course, students will examine the interaction between hormones, chemical messengers released from endocrine glands, and behavior in both human and animal systems. Methods for studying hormonal issues on behavior will be addressed. This course will provide students in psychology, biology, and related disciplines an understanding of how hormones affect sensory processing, motor activities, and processing of information in the central nervous system. (Cross-listed with PSYC 8326, BIOL 4320, BIOL 8326)

Prerequisite(s): PSYC 1010 and either BIOL 1020 or 1750. Not open to non-degree graduate students.

PSYC 4340 ADVANCED BEHAVIORAL NEUROSCIENCE (3 credits)

Building on content from Introductory Neuroscience courses, this course will deeply explore the fundamental link between behavior and biological processes. Prepare to unravel the mysteries of behavior, cognition, emotions, sensory systems, and disorders by exploring cutting-edge neuroscience methods to reveal the specific cells and neurobiological processes that give rise to human and animal behavior. PSYC 4230 should not be taken after the completion of this course. (Cross-listed with NEUR 8346, NEUR 4340).

Prerequisite(s): NEUR 1520 and NEUR 1540, or PSYC 4230

PSYC 4350 BASIC/EXPERIMENTAL BEHAVIOR ANALYSIS (3 credits)

This course provides an overview of essential concepts on basic and experimental behavior analysis. Students will learn to apply a theoretical framework of behavior change concepts to socially important behaviors.

Prerequisite(s): PSYC 1010; PSYC 4020. Not open to non-degree graduate students.

PSYC 4414 LABORATORY IN APPLIED BEHAVIOR ANALYSIS (3 credits)

Laboratory and field experience emphasizing practice and research used in behavior analysis. Emphasis will be placed on application of behavioral principles and tactics in community settings (e.g., clinic, home, school).

Prerequisite(s): PSYC 3140 or PSYC 3150; PSYC 4020; PSYC 4570 or instructor approval. Not open to non-degree graduate students.

PSYC 4440 ABNORMAL PSYCHOLOGY (3 credits)

A course designed to examine the aberrant behavior of individuals. Symptoms, dynamics, therapy and prognosis of syndromes are considered. (Cross-listed with PSYC 8446)

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 4444 CAPSTONE IN PSYCHOLOGY: MENTAL HEALTH (3 credits)

PSYC 4444 is a capstone course to apply and expand concepts learned in mental health coursework. Students will experience exposure to and practice utilizing mental health skills such as interviewing, screening, assessment, service coordination, family-centered care, report-writing, group intervention, basic observation and data collection, mental health documentation, and other skills needed in applied mental health settings within a multicultural perspective.

Prerequisite(s): PSYC 3130 and ONE of the following classes: PSYC 4440, PSYC 4470, PSYC 4510, PSYC 4570, PSYC 4590. PSYC 3140 or PSYC 3150 recommended but not required. Open to Juniors and Seniors. Not open to non-degree graduate students.

PSYC 4450 PERSONALITY THEORIES (3 credits)

A comparative approach to the understanding and appreciation of personality theories considering history, assertions, applications, validations and prospects. (Cross-listed with PSYC 8456)

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 4460 PSYCHOLOGY OF ADULT DEVELOPMENT AND AGING (3 credits)

The focus of this course is on the major social and psychological changes that occur as a function of aging. Both normal and abnormal patterns of developmental change are examined, along with their implications for behavior. (Cross-listed with GERO 4460, GERO 8466).

Prerequisite(s): Sophomore, Junior, or Senior.

PSYC 4470 MENTAL HEALTH AND AGING (3 credits)

The goal of this courses is to survey the mental health needs of older adults. Consideration is given to identifying both positive mental health and pathological conditions. Treatment interventions effective with older adults and their families are also discussed. (Cross-listed with PSYC 8476, GERO 4470, GERO 8476)

Prerequisite(s): Sophomore, Junior, or Senior

PSYC 4510 PSYCHOLOGY IN THE SCHOOLS (3 credits)

This course introduces students to the academic and mental health needs of children and youth in schools, as well as how those needs are addressed individually and systemically. A service learning experience enables students to work directly with school-age children.

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 4520 PSYCHOLOGY OF LANGUAGE (3 credits)

Language is what makes us human. It influences our thoughts and affects our lives in many ways. In this class, topics include the distinctive features of human language as a system of communication, the understanding and production of speech, reading and spelling, language development, bilingualism, language disorders, and how our social and cultural environment can influence how language is used. (Cross-listed with PSYC 8526)

Prerequisite(s): Senior or graduate or permission of instructor. Not open to non-degree graduate students.

PSYC 4530 CULTURAL PSYCHOLOGY (3 credits)

This course will provide an overview of the cultural, community and ecological factors that play a role in how people perceive their environments. The goal is to investigate the ways in which culture affects individual behaviors, attitudes and cognitions. It may be easy to tell that two cultures are different, but identifying exactly what is meant - and all that is encompassed - when speaking about "culture" can be much more difficult. Culture can include everything from gender constructs and race/ethnicity to the effects of new technologies. All of these aspects of culture affect individuals' psychological make-up and behavior. Although psychology has largely developed from a Western tradition, attention to research from non-Western perspectives will also be emphasized. This course supports the Cultural and Global Analysis concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 8536, CACT 8106).

Prerequisite(s): PSYC 1010.

PSYC 4544 LABORATORY IN DEVELOPMENTAL PSYCHOLOGY (3 credits)

Laboratory work coordinated with PSYC 3520 and PSYC 3540 emphasizing the methods of research and statistical analyses used in the study of human development. Emphasis will be placed on the development of skills involved in the design of experiments, data collection, data analysis, reasoning about results, and scientific report writing.

Prerequisite(s): PSYC 3140, PSYC 3520, and PSYC 3540 or permission of instructor. Not open to non-degree graduate students.

PSYC 4560 FORENSIC PSYCHOLOGY (3 credits)

The roles and functions of forensic psychologists, as participants in the legal system, are studied, with special emphasis on the relevance of theories and principles from social psychology. Psychological concepts, theories, data, research methods and applications to varied substantive topics are examined (e.g., forensic careers, police psychology, violence, criminal profiling, sociopathy and psychopathy, risk assessment, expert testimony, and corrections).

Prerequisite(s): PSYC 1010 or SOC 1010 and PSYC 3450 or SOC 3450.

PSYC 4570 BEHAVIOR ANALYSIS AND INTERVENTIONS (3 credits)

Introduction to experimental methodology, rationale and research literature of changing behavior through behavior modification techniques. Particular attention will be paid to methodological concerns regarding single subject design, ethical considerations and ramifications of behavior intervention with children and youth. (Cross-listed with PSYC 8576)

Prerequisite(s): PSYC 1010 and permission of instructor. Not open to non-degree graduate students.

PSYC 4590 PSYCHOLOGY OF EXCEPTIONAL CHILDREN (3 credits)

A study of exceptional children and adolescents with sensory or motor impairments, intellectual retardations or superiorities, talented or gifted abilities, language or speech discrepancies, emotional or behavioral maladjustments, social or cultural differences, or major specific learning disabilities.

Prerequisite(s): PSYC 1010 and junior/senior.

PSYC 4630 ORGANIZATIONAL PSYCHOLOGY (3 credits)

This is a survey course which will cover the major concepts, theories and empirical research related to organizational psychology. Specific topics will include: work motivation, leadership, decision making and job satisfaction as well as more recent trends such as cultural diversity, work teams, work-family and quality issues. (Cross-listed with PSYC 8636)

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 4640 PERSONNEL PSYCHOLOGY (3 credits)

A survey of psychological principles, theories and research related to personnel issues. Course includes discussion of personnel selection, performance appraisal, recruitment, training and health and safety. (Cross-listed with PSYC 8646)

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 4644 LABORATORY IN PSYCHOLOGY: SOCIAL/INDUSTRIAL-ORGANIZATIONAL (3 credits)

Laboratory work coordinated with PSYC 3450 and PSYC 4630 or PSYC 4640, emphasizing a presentation of methods of research assessing human social behavior and applied psychological processes. Research design, data analysis and research report writing are also emphasized.

Prerequisite(s): PSYC 3140, PSYC 3450 and PSYC 4630 or PSYC 4640.

PSYC 4650 CREATIVITY AND INNOVATION IN ORGANIZATIONS (3 credits)

To provide a discussion of the antecedents of individual and organizational creativity, including measurement, models, characteristics of the individual and the environment that facilitate creativity and innovation in an organizational setting. Students in this course will be able to understand the research literature related to creativity and innovation and apply the findings to improve critical and creative thinking, implementation of creative ideas, and development of creative teams and organizations. This course supports the Organizational Science and Leadership concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with PSYC 8656, CACT 8506)

PSYC 4680 POSITIVE PSYCHOLOGY, HEALTH, & WELL-BEING (3 credits)

Positive psychology is the scientific study of the "good life", or the positive aspects of the human experience that make life worth living. The discipline of positive psychology focuses on both individual and societal well-being. Students will learn the tenets of positive psychology and well-being research findings, including the various definitions and operationalizations of happiness and well-being.

Prerequisite(s): PSYC 1010

PSYC 4800 LAW & PSYCHOLOGY: ETHICS, RESEARCH & SERVICE (3 credits)

This course presents legal principles relevant to all psychological specialties, with special reference to mental health services. Ethical reasoning and the APA ethics code are considered. (Cross-listed with PSYC 8806)

Prerequisite(s): 15 hours of Psychology credits including PSYC 1010 or approval of the instructor. Not open to non-degree graduate students.

PSYC 4810 PRACTICE AND ETHICS IN BEHAVIOR ANALYSIS (3 credits)

This course presents ethical and legal issues relevant to research and practice in behavior analysis. This class will provide undergraduate students with knowledge of ethic codes and legal statutes that guide the field of applied behavior analysis and psychology more broadly. The primary emphasis will be the practical application of ethics to clinic, school, and community settings where children and adolescents are the recipients of services. Class topics related to ethics will be: principles, decision making, assessment and practice, supervision, research, responsibilities to the field of applied behavior analysis, and responsibility in public statements.

Prerequisite(s): PSYC 1010. Not open to non-degree graduate students.

PSYC 4890 SENIOR ASSESSMENT IN PSYCHOLOGY (0 credits)

This assessment tool is part of the Department's Student Outcomes effort. It is designed to monitor the Department's performance and to identify changes needed. Graduating seniors must register for and complete this course in the term in which they plan to graduate.

Prerequisite(s): Students must register for PSYC 4890 in the term in which they plan to graduate. Not open to non-degree graduate students.

PSYC 4910 SPECIAL TOPICS IN PSYCHOLOGY (1 credit)

One credit hour Special Topics courses allow for in-depth study of psychology topics not offered in our regular curriculum. When enrolling, see notes section on course listing for specific topic. May be repeated as topics change, but six hours of Special Topics courses (PSYC 4910, PSYC 4920, and PSYC 4930) is the maximum that may be applied toward a psychology major.

PSYC 4920 SPECIAL TOPICS IN PSYCHOLOGY (2 credits)

Two credit hour Special Topics courses allow for in-depth study of psychology topics not offered in our regular curriculum. When enrolling, see notes section on course listing for specific topic. May be repeated as topics change, but six hours of Special Topics courses (PSYC 4910, PSYC 4920, and PSYC 4930) is the maximum that may be applied toward a psychology major.

Prerequisite(s): Variable according to topic.

PSYC 4930 SPECIAL TOPICS IN PSYCHOLOGY (3 credits)

Three credit hour Special Topics courses allow for in-depth study of psychology topics not offered in our regular curriculum. When enrolling, see notes section on course listing for specific topic. May be repeated as topics change, but six hours of Special Topics courses (PSYC 4910, PSYC 4920, and PSYC 4930) is the maximum that may be applied toward a psychology major.

PSYC 4960 INDEPENDENT STUDY IN PSYCHOLOGY (1-6 credits)

A faculty-supervised special research project and or directed readings involving empirical research and appropriate oral and written reports arranged individually with students on topics not explored in other offerings. If students do not complete the work during the semester they enroll in the course, they must complete all the work within an academic year of their enrollment.

Prerequisite(s): A minimum of 10 hours of Psychology including PSYC 1010 & PSYC 1020 and 1 additional course. Completion of the Independent Study Form and permission from the Undergraduate Program Committee (UPC).

PSYC 4970 PRACTICUM IN PSYCHOLOGY (3 credits)

This course provides an opportunity for practical application and further development of knowledge and skills acquired in the undergraduate psychology major. The practicum will provide a practical and career-building placement in a work setting. Students will develop skills and knowledge important for new steps in careers and graduate programs.

Prerequisite(s): PSYC 1020; PSYC 3140; GPA requirement: 2.8; Permission of instructor, and Letter of agreement from industry mentor. Not open to non-degree graduate students.

PSYC 4980 FIELDWORK PRACTICUM IN BEHAVIOR ANALYSIS (3 credits)

This course provides an opportunity for practical application and further development of knowledge and skills acquired in the Applied Behavior Analysis concentration within the undergraduate psychology major. The practicum will provide a practical and career-building placement in a work setting. Students will develop knowledge and skills important for new steps in careers within behavior analysis and graduate programs. The experience will be consistent with the supervised fieldwork requirements for individuals pursuing certification as a Board Certified Assistant Behavior Analyst.

Prerequisite(s): PSYC 1020; PSYC 4570; GPA requirement: 2.8; OR Permission of instructor

PSYC 4990 SENIOR THESIS (3-6 credits)

The course is designed to provide the student with the opportunity to initiate, design, analyze, and write-up an original experimental study in an area of interest to the student. Although the course is intended primarily for students who need to satisfy the requirement of a second experimental/laboratory course in the Bachelor of Science degree program, all students interested in this course will be considered on an individual basis.

Prerequisite(s): PSYC 3140 ('B' or better), 'B' average in major; signed statement from faculty member of Psychology Department who is willing to serve as adviser; written approval from chair of undergraduate program committee. Must be a 2nd semester junior or later.

Public Administration (PA)

Public Administration Undergraduate Courses

PA 1010 INTRODUCTION TO URBAN STUDIES (3 credits)

Introduction to history, concepts, development and literature of urbanism. An interdisciplinary examination of issues confronting contemporary urban society and how various academic disciplines relate to those issues. (Cross-listed with UBNS 1010).

PA 2000 LEADERSHIP & ADMINISTRATION (3 credits)

This course is designed to offer students the opportunity to increase their leadership skills by providing them with a series of competency-based seminars/workshops on the characteristics and tasks in which leaders are engaged.

Distribution: Social Science General Education course

PA 2170 INTRODUCTION TO PUBLIC ADMINISTRATION (3 credits)

A study of governmental administration and its involvement in the social and economic problems of American democracy. It includes but is not limited to the organizational, financial, personnel and planning problems and administrative relations with legislatures, political parties, chief executives and the courts.

Distribution: Social Science General Education course

PA 3000 APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR (3 credits)

A course on the use of data and statistical methods to explore and make inferences about society, while critically considering the influence of context and the powers and limitations of quantitative evidence. (Cross-listed with CRCJ 3000, SOWK 3000).

Prerequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or MATH 1300 or MATH 1320 or an ACT of 19, or above or permission from the department.

PA 3200 PROGRAM PLANNING AND EVALUATION (3 credits)

Research, program design, and evaluation are critical functions in the non-profit sector. Leaders and managers of non-profit organizations are continually challenged to monitor community needs, select and develop services and programs that respond to those needs, and to evaluate and modify the services they provide. This recurrent process is the foundation of quality non-profit programs. This course prepares students to undertake the research, program design and evaluation process employed in non-profit organizations.

Prerequisite(s): PA 3000. Not open to non-degree graduate students.

PA 3500 NONPROFIT ORGANIZATIONS AND MANAGEMENT (3 credits)

Introduces students to the nonprofit sector, including several aspects of nonprofit management. Intended for any student who wishes to understand nonprofit organizations and/or who may wish to work in the nonprofit sector. Service learning in a nonprofit agency is an important aspect of the class.

Prerequisite(s): Junior standing or permission of instructor.

PA 3600 PERSONNEL AND VOLUNTEER MANAGEMENT IN NONPROFITS (3 credits)

This course examines the managerial practices and problems in recruiting, hiring and other staffing issues within nonprofit organizations. It also addresses issues of personnel leadership, accountability, and performance associated with working with volunteers.

Prerequisite(s): PA 2170 & PA 3500 or permission from the school. Not open to non-degree graduate students.

PA 3700 FINANCIAL MANAGEMENT FOR NONPROFITS (3 credits)

This course will prepare students to oversee the financial management of nonprofit organizations by focusing on four areas: key financial concepts, financial statements presentation, accounting and reporting, and operational issues - emphasizing the links between accounting staff, program staff, fundraising staff and board of directors.

Prerequisite(s): PA 2170 and PA 3500. Not open to non-degree graduate students.

PA 3800 CROSS-SECTOR COLLABORATIVE LEADERSHIP (3 credits)

The goal of PA 3800/MGMT 3800 is to prepare students to serve as collaborative leaders of cross-sector initiatives. Specifically, this course will prepare students for success in working collaboratively across private, nonprofit and public sector organizations while also enhancing their overall development as a leader. Examples of successful and unsuccessful cross-sector collaborations will be explored along with discussions of theories related to cross-sector collaboration. (Cross-listed with MGMT 3800).

Prerequisite(s): Permission from instructor or MGMT 3490 with a grade of C or higher or enrollment in the cross-sector collaborative leadership minor.

PA 3900 INTRODUCTION TO INTEGRATED LEADERSHIP (3 credits)

This seminar course provides a cornerstone to understanding and developing an integrative leadership practice by focusing on yourself, your life, and your leadership. Current challenges demand leadership that can integrate perspectives from a personal and collective level. The goal of the course is to identify concepts of integrated leadership, to develop frameworks for understanding the contexts of applying integrated leadership and help develop skills for practicing integrated leadership. This course will explore leading well by understanding and integrating meaning, purpose, and values within the organizations and communities you serve. Through both theory and practice, this course will cultivate self-awareness and introspection through questioning and reflective practice and applying practical leadership skills to solving problems. (Cross-listed with APLD 3900).

Prerequisite(s): ENGL 1150 (C- or better) or equivalency.

PA 4100 MARKETING IN PUBLIC, NON-PROFIT AND AVIATION ORGANIZATIONS (3 credits)

This course will focus on developing a working knowledge of marketing and its component parts as they may be applied to non-profit organizations. Emphasis will be placed on understanding the marketing process and applying marketing principles to real organizational settings. (Cross-listed with PA 8106).

PA 4210 INTRODUCTION TO HEALTH CARE SYSTEMS (3 credits)

This course is designed to familiarize students with the structure of the health services system in the United States. It addresses quality, access and cost of health services delivery, personnel and funding resources for providing health care, financing health care, traditional and alternative health services delivery settings, and forces that shape the current and future health care sector.

PA 4300 SEMINAR IN PUBLIC POLICY (3 credits)

A study of the economic, social and political determinants of public policy in terms of administration and decision-making and of measuring and evaluating policy impact. The course includes both study of general policy processes, and, to a lesser extent, particular policy topics.

Prerequisite(s): PA 2170

PA 4390 PUBLIC BUDGETING (3 credits)

A study of the processes, procedures and politics of public sector budgeting.

PA 4410 PUBLIC PERSONNEL MANAGEMENT (3 credits)

A study of the personnel process in American governmental administration. The processes and problems of recruiting, structuring and operating public bureaucracies are examined as well as problems in personnel leadership, neutrality, accountability and performance.

Prerequisite(s): PA 2170, junior.

PA 4430 MUNICIPAL ADMINISTRATION (3 credits)

The administrative structure and administrative practices of American cities covering such areas as finance, personnel, public works, public safety, health, utilities and planning. (Cross-listed with PA 8436).

Prerequisite(s): Junior. Not open to non-degree graduate students.

PA 4440 ORGANIZATIONAL DEVELOPMENT AND CHANGE (3 credits)

The ability to lead and manage organizational change is a required competency for individuals working public sector related fields. Civic leaders, public administrators and non-profit managers must diagnose and respond to the dynamic and interconnected environment in which they work. This course prepares students to conduct the forms of analysis that organizational development and change requires.

PA 4500 NONPROFIT FUNDRAISING (3 credits)

Introduces students to issues and techniques for resource development within nonprofit organizations, including fundraising, program planning and budgeting, and marketing. Intended for students who wish to understand resource development within nonprofit organizations. Service learning with a nonprofit agency is an important aspect of the class.

Prerequisite(s): PA 2170 and PA 3500

PA 4510 LONG-TERM CARE ADMINISTRATION (3 credits)

An investigation of the broad range of policy issues, theoretical concerns and practical management strategies influencing the design, organization and delivery of long-term care services. (Cross-listed with GERO 4510, GERO 8516 and PA 8516).

Prerequisite(s): PA 2170

PA 4530 STRATEGIC PLANNING (3 credits)

The ability to lead and manage a strategic planning process is a required competency for individuals working public sector related fields. Civic leaders, public administrators and non-profit managers must diagnose and respond to the dynamic and interconnected environment in which they work. This course prepares students to conduct the forms of analysis that strategic planning requires.

Prerequisite(s): Not open to non-degree graduate students.

PA 4560 INTERGOVERNMENTAL MANAGEMENT (3 credits)

This course is for students wanting to improve their knowledge and understanding of intergovernmental relations as they impact policy and administration in the United States. (Cross-listed with PA 8566).

PA 4590 TECHNIQUES TOPICS IN NONPROFIT MANAGEMENT (1-3 credits)

A variable content course emphasizing nonprofit management techniques and topics. Topics include nonprofit leadership, board executive staff roles and relationships, personnel and volunteer management, financial management, proposal and grant writing community resources, special events planning and administration, needs assessments and legal ethical aspects. (Cross-listed with PA 8596).

Prerequisite(s): Permission of instructor. Not open to non-degree graduate students.

PA 4820 INTRODUCTION TO ENVIRONMENTAL LAW & REGULATIONS (3 credits)

Seminar on environmental law and regulations. Addresses federal regulations, implementing instructions, legal principles, and requirements. The major federal environmental laws, air and water quality, solid and hazardous waste, and pollution prevention and remediation are discussed. Usually offered Fall semesters.

Prerequisite(s): Junior-senior and permission.

PA 4890 SPECIAL TOPICS PUBLIC ADMIN (3 credits)

A course with the purpose of acquainting the student with key issues and topics of special concern to public and non-profit management that they otherwise would not receive elsewhere. (Cross-listed with PA 8896).

PA 4900 SPECIAL TOPICS IN PUBLIC ADMINISTRATION (3 credits)

A variable content course with public administration and urban studies topics selected in accordance with student and faculty interests. Possible topics include urban homesteading, administrative federalism and economic development and the public sector.

Prerequisite(s): PA 2170 and permission of instructor.

PA 4950 INTERNSHIP (3 credits)

A course designed to link theoretical concepts learned in the classroom to the practical application of "real world" situations and to familiarize students with attitudes, operations and programs of governmental units.

Prerequisite(s): PA 2170 and permission of the School.

PA 4960 CROSS-SECTOR COLLABORATIVE LEADERSHIP CAPSTONE (3 credits)

This is a capstone course that prepares students to be effective leaders in the 21st century. This course is the final leadership course in the Cross-Sector Collaborative Leadership minor. This minor requires a capstone project that encompasses the student's knowledge and training. It is designed to provide an applied service-learning opportunity for students. (Cross-listed with MGMT 4960).

Prerequisite(s): Must be completing either the Cross-Sector Collaborative Leadership Minor or the Cross-Sector Collaborative Leadership Concentration. Must have completed PA 3800/MGMT 3800. Not open to non-degree graduate students.

Public Health & Behavior (PHHB)

Public Health & Behavior Undergraduate Courses

PHHB 1500 FOUNDATIONS IN PUBLIC HEALTH (3 credits)

An introductory course for public health majors and other interested students, that examines the foundations of public health. The course includes an orientation to the process and the professions of public health and a consideration of current trends, problems and issues and their implications for public health professionals. The course will help candidates develop the knowledge, skills, competencies, and attitudes necessary to orchestrate an environment for positive public health.

Distribution: Social Science General Education course

PHHB 2070 SUBSTANCE ABUSE AND MISUSE: PREVENTION AND MANAGEMENT (3 credits)

An introduction to the effects and rationales of drug use, misuse, and abuse. Included are the physiological, psychological, sociological, pharmacological, and legal aspects of drugs in a culturally diverse United States and abroad.

PHHB 2310 HEALTHFUL LIVING (3 credits)

A study of selected health problems and issues in our society as related to knowledge, attitudes, and behaviors necessary for healthful living in a culturally diverse society.

PHHB 2850 STRESS MANAGEMENT (3 credits)

The health-related aspects of stress will be the focus of this course. Selected techniques for the self-regulation of stress will be demonstrated, practiced, and analyzed. Pressures from the culturally diverse United States and implications of a global society will be analyzed. Students will develop skills and competencies necessary to create a learning environment conducive to reducing stress.

PHHB 3000 SPECIAL PROJECTS (1-3 credits)

This course is designed to provide an opportunity to study a topic in public health through short course, seminar, workshop, or special project.

Prerequisite(s): The prerequisite for the special project will be determined by the instructor.

PHHB 3030 FIRST AID (3 credits)

Designed to give students knowledge and skill in implementing immediate, temporary treatment in case of injury or sudden illness before the services of a physician. Upon successful completion of the course, a student will receive a standard first aid and cardiopulmonary resuscitation certificate.

PHHB 3060 PROMOTING POSITIVE HEALTH (3 credits)

The focus of this team taught, experiential course will be assisting individual students: a) determine what wellness and mindfulness changes they wish to make in their lives; b) assisting them in acquiring the skills and learning about theories of how to effectuate change, and c) assisting them in making the change.

Prerequisite(s): HPER 3090/HEKI 3090, HPER 2850/HEKI 2850, and Holistic Health - Eastern Perspectives. At least two of the following: PEA 111T, PEA 112I, PEA 112U, or PEA 112V One additional PEA course (may not be from the previous category or basketball or volleyball)

PHHB 3070 DEATH AND DYING (3 credits)

An interdisciplinary survey of literature in the field of thanatology, with an emphasis on working with the older patient and his or her family. (Cross-listed with GERO 3070).

PHHB 3080 HUMAN SEXUALITY (3 credits)

An examination of factors influencing sexual development. Emphasis is given to topics pertinent to healthful living in today's culturally diverse, global society. (Cross-listed with WGST 3080).

PHHB 3310 INJURY PREVENTION IN PUBLIC HEALTH (3 credits)

This course is designed to explore public health strategies for the development and maintenance of safe physical environments with a focus on prevention of intentional and unintentional injuries. It explores a multitude of safety programs for school, business, recreation, transportation, and the home.

PHHB 4000 METHODS AND MATERIALS IN HEALTH EDUCATION (3 credits)

This course will provide an opportunity to study, develop and use different materials and equipment in public health. Various methods of teaching health will be practiced and evaluated. Candidates will be able to gain classroom and field experience (service-learning) in planning lessons and presentations.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4040 EPIDEMIOLOGY & PREVENTION OF DISEASE (3 credits)

The course is designed for public health students and others who are interested in public health. The cause, prevention, treatment and control of prevalent communicable and non-communicable disease in a culturally diverse and global society will be emphasized. Special emphasis will be given to diseases and health problems that can be prevented or controlled through public health initiatives.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4050 INTRODUCTION TO RESEARCH IN PUBLIC HEALTH (3 credits)

This course will assist students to develop the basic skills to read and evaluate applied research to address contemporary problems in public health. The course will provide an introduction to proposal writing, data collection, research design, statistical analysis, and computer application. Unique problems associated with data collection in public health settings such as public health departments, neighborhood health centers, and community based organizations will be addressed.

PHHB 4060 SCHOOL HEALTH PROGRAMS (3 credits)

The purpose of this course is to provide information and strategies for planning, implementing, and evaluating Coordinated School Health Programs (CSHP) for diverse cultural groups. Content includes an overview of school health programs, the essential functions of each of the eight components, the role of national and state organizations in working with local agencies and school districts in promoting the development of comprehensive school health programs.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4130 COMMUNITY HEALTH (3 credits)

A survey course of community health issues. The basics of epidemiology/statistical sciences, environmental health, managerial/administrative sciences, and behavioral/social sciences for community health are examined. Public health candidates will gain skills needed to develop and manage community health programs.

PHHB 4200 A PUBLIC HEALTH APPROACH TO MENTAL HEALTH (3 credits)

This public health course will help students think critically about the prevention, identification, and treatment of mental illness in the United States. Students will be introduced to concepts from the disciplines of public health, psychology and sociology to understand mental health disorders and their impact on population health. Students will explore health disparities through the lens of cultural, social, behavioral, psychological, and economic factors. Students will recognize that mental health exists on a continuum and develop skills to address environmental influences on behavior. (Cross-listed with PHHB 8206).

PHHB 4280 SOCIAL MARKETING FOR PUBLIC HEALTH (3 credits)

This course will introduce students to current theory, practices and resources in the field of social marketing as it relates to public health. Students will analyze and implement social marketing techniques.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4400 HEALTH LITERACY (3 credits)

This course is designed to provide students with the competencies to reduce problems associated with low health literacy. The two primary foci will be strategies to help patients and other health consumers improve their health literacy, and strategies to help health providers and health educators communicate in a manner that can be understood by all persons regardless of their health literacy

PHHB 4420 PUBLIC HEALTH INFORMATICS (3 credits)

Students will learn the implementation, operation, and application of health information systems. Students will explore the legal and ethical issues surrounding health informatics and patient records, management and communication in health informatics, and social and organizational issues pertaining to health informatics.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4550 HEALTH ASPECTS OF AGING (3 credits)

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with GERO 4550 and GERO 8556 and PHHB 8556 and WGST 4550).

PHHB 4650 GLOBAL HEALTH (3 credits)

This course will explore contemporary health problems around the world with particular emphasis being placed on problems experienced by developing countries. The political, economic, social, geographical, biological aspects of the problems and possible solutions will be addressed.

Distribution: Global Diversity General Education course

PHHB 4700 WOMEN'S HEALTH AND ISSUES OF DIVERSITY (3 credits)

This course provides a critical understanding of the inter-relationship between socio-cultural, economic, and political factors and women's physical and mental health. The aim is to provide an overview of the experience with the health care system. Emphasis will be on critically examining recent scholarship from a sociological, behavioral, health policy perspective. (Cross-listed with PHHB 8706, SOC 4700, SOC 8706).

Distribution: U.S. Diversity General Education course

PHHB 4880 PUBLIC HEALTH POLICY (3 credits)

This course provides an overview of the U.S. health system, and an introduction to the skills necessary to address health policy issues. Students will develop a working knowledge of health services terminology, recognize basic health care concepts, distinguish between various components of the health care delivery system and be able to apply concepts learned in the analysis of a public health problem.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4950 PUBLIC HEALTH LEADERSHIP AND ADVOCACY (3 credits)

This course reviews public health leadership concepts and practices that prepare candidates to fulfill professional roles as advocates and leaders in the health field. Politics and power structure in communities and organizations are addressed. The processes through which changes in the political, economic, organizational, and physical environment related to health status and health behavior are brought about will be addressed. Media advocacy, the legislative process, community organization, and coalition development will be explored as means of environmental change.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4960 PUBLIC HEALTH - PLANNING AND ORGANIZATION (3 credits)

The course is designed to provide public health students an understanding of planning and organization in public health. The use of planning tools including social assessment methods, epidemiological methods, behavioral methods, organizational methods, administrative methods and evaluation procedures for public health initiatives will be included. Grant writing components will be emphasized.

Prerequisite(s): HED 1500 or PHHB 1500

PHHB 4970 PROBLEMS OF HEALTH EDUCATION (1-3 credits)

This course is designed to provide an opportunity for individuals or groups to study problems in health education.

Prerequisite(s): Permission of instructor.

PHHB 4990 INTERNSHIP IN PUBLIC HEALTH (3 credits)

This internship provides on-the-job training for public health students in a cooperative program with state and local health departments or other appropriate community and public health agencies. Direct field experience is completed by the student under the supervision of an experienced practitioner in an approved public health agency.

Prerequisite(s): H&K majors only. Completion of or current enrollment in core courses, GPA of 2.5 or above in required courses, and no grade below a C in required courses, and permission by instructor. Must attend Info Session as scheduled by Instructor.

Real Estate & Land Use Economics (RELU)

Real Estate & Land Use Economics Undergraduate Courses

RELU 2410 REAL ESTATE PRINCIPLES AND PRACTICES (3 credits)

An introductory survey of real estate principles and practices which introduces the terminology, concepts and basic practices in the fields of real estate law, real estate finance, real estate appraisal, real estate property taxation and miscellaneous topic areas. Note: Students cannot receive credit for both RELU 2410 and RELU 3410. (Fall, Spring)

RELU 2700 REAL PROPERTY RIGHTS AND OWNERSHIP: OVERCOMING BARRIERS (3 credits)

Real estate is ubiquitous and the ownership of property - and accompanying property rights - have shaped US history and enabled millions to build wealth. At the same time, property ownership has eluded many, especially those from underrepresented groups. This class will expose students to historical and current barriers to property ownership, assess efforts to address these disparities, explore remedies, and give students the practical tools they'll need to plan for, and eventually acquire, their first home or other real estate.

RELU 3410 REAL ESTATE PRINCIPLES AND PRACTICES (3 credits)

This is a survey course in real estate principles and practices, which is designed to familiarize students with industry terminology, current practices, and cover the following topics: Licensure, property rights, legal descriptions, real estate law and contracts, appraisal, financing, investments, Fair Housing, and related topic areas. This course provides foundational knowledge of the real estate field and will prepare students to successfully complete more advanced real estate coursework. NOTE: Students cannot receive credit for both RELU 2410 and RELU 3410. (Cross-listed with BSAD 8605).

RELU 3430 REAL ESTATE BROKERAGE AND SALES (3 credits)

Overview of real estate brokerage and sales principles, to include buying and selling, leasing, brokerage business operations, contracts, closings, legal requirements, Fair Housing, advertising, and career opportunities.

Prerequisite(s): RELU 2410 or RELU 3410.

RELU 3450 PROPERTY MANAGEMENT (3 credits)

This course focuses on commercial and residential property management concepts and their application to the operation, control, and oversight of real property. The course will study leasing, tenant selection and relations, maintenance, marketing, contract management, asset management principles, as well as Fair Housing Laws and the Americans With Disabilities Act as they pertain to property management. (Cross-listed with BSAD 8625).

Prerequisite(s): RELU 2410 or RELU 3410.

RELU 3460 REAL ESTATE LAW (3 credits)

Upper-level survey course in real estate law, which examines estates in land, conveyances, leases, mortgages, easements, zoning, environmental law, contracts, taxes, foreclosures, landlord-tenant relations, agency, Fair Housing, and Nebraska License Law. (Cross-listed with LAWS 3460)

Prerequisite(s): RELU 2410 or RELU 3410.

RELU 4390 REAL ESTATE INVESTMENTS (3 credits)

This course focuses on methods used to analyze existing and proposed commercial and residential real estate investments through dynamic programming models, and explores strategies to finance commercial real estate. The class ultimately prepares students to understand the risks and rewards associated with financing and investing in real estate. (Cross-listed with BSAD 8616).

Prerequisite(s): RELU 2410 or RELU 3410 or FNBK 3250

RELU 4400 RESIDENTIAL REAL ESTATE FINANCE (3 credits)

This course focuses on the methods of financing residential real estate through the examination of various mortgage instruments, mortgage lenders, and the risks associated with leveraging real property. Industry terminology, concepts, best practices, and financial calculations are also presented, as are the influences of governmental policies on the industry. (Fall)

Prerequisite(s): RELU 2410 or RELU 3410

RELU 4410 BASIC APPRAISAL PROCEDURES (3 credits)

Fundamentals of real estate valuation and appraising; factors affecting value; valuing land, valuing improvements and the valuation of special classes of residential property; appraisal practice, depreciation and obsolescence, appraising rules, the mathematics of appraising; an appraisal of a single family residence is required.

Prerequisite(s): RELU 2410 or RELU 3410 AND FNBK 3250 with a C or better

RELU 4420 INCOME PROPERTY APPRAISAL (3 credits)

Introduction to the theory and concepts of income capitalization approaches, methods and techniques to valuation of real estate income property. Characteristics of yield on investment real estate; future income projections; mortgage coefficients; purchase and leaseback reversions; Ellwood Tables; capitalization rates and investment yields; types of annuities; and condemnation appraisal. (Spring)

Prerequisite(s): RELU 2410 or RELU 3410; and FNBK 3250

RELU 4440 REAL ESTATE DEVELOPMENT (3 credits)

This course focuses on the procedures and complexities in developing and redeveloping various commercial property types and mixed-use real estate. Topics include an overview of the real estate development process, assembling a team, identifying project stakeholders, financial analysis, site selection, market analysis, and the regulatory environment. (Cross-listed with BSAD 8626).

Prerequisite(s): RELU 2410 or RELU 3410 with a grade of B or above, and a cumulative GPA of 3.0 or better, or permission of Real Estate Program Director.

RELU 4460 COMMERCIAL REAL ESTATE FINANCE (3 credits)

A foundation course in commercial real estate finance including legal, analytical, institutional and governmental aspects.

Prerequisite(s): RELU 2410 and FNBK 3250

RELU 4500 REAL ESTATE INDEPENDENT STUDY (1-3 credits)

Individual investigation of specific issues or problems in real estate.

Prerequisite(s): Permission of Real Estate Program Director.

RELU 4510 REAL ESTATE INTERNSHIP (1-3 credits)

Students will engage in an applied experience in their area of specialization to gain relevant industry experience and to practice the skills and concepts learned in the classroom. Student reports on the internship experience and an employer's evaluation of the student's performance are course requirements. RELU 4510 may be taken for a maximum of 3 credits. (Fall, Spring, Summer)

Prerequisite(s): Permission of Department Internship Coordinator.

Recreation-Leisure Study (RLS)

Recreation-Leisure Study Undergraduate Courses

RLS 2440 FOUNDATIONS OF RECREATION AND LEISURE (3 credits)

A survey approach to the recreation, leisure services, parks professional field to include the historical philosophical bases of the overall profession. Provides the necessary foundational knowledge for majors as well as candidates within other areas of study.

RLS 2500 OUTDOOR RECREATION (3 credits)

A survey of the dynamics of outdoor recreation in American life. Designed to guide candidates through a learning experience that results in an introduction to and a broad-based understanding and appreciation of outdoor recreation.

RLS 3100 SOCIAL ASPECTS OF SPORT AND LEISURE (3 credits)

A critical examination of the function and significance of sports within the overall leisure behavior patterns of Western society. Recreational sport, sport spectatorship, and competitive athletics are considered from the dominant theoretical perspectives within sociology.

Prerequisite(s): Six hours of social science or permission.

RLS 3500 FOUNDATIONS OF RECREATION THERAPY (3 credits)

An introduction to therapeutic recreation services as a specialized field within recreation. Course content touches on the majority of the special populations recognized within American society. An in-depth survey approach is utilized.

RLS 4070 CAMPUS RECREATION MANAGEMENT (3 credits)

A review of the knowledge, skills, and abilities required for the management of typical campus recreation programs and facilities. This course will prepare students for entry level positions managing campus recreation employees, programs, facilities and services. (Cross-listed with RLS 8076)

RLS 4100 FACILITY DESIGN AND MANAGEMENT (3 credits)

This course is designed to acquaint the recreation major or practitioner with the knowledge and certifications necessary to maintain and operate a recreation building including all major activity areas using the latest standards and technology. Attention will be devoted to the design and management process, including terminology, court specifications, handicapped accessibility, and swimming pool operation.

RLS 4240 RECREATION ADMINISTRATION (3 credits)

Designed to provide a background of information on public, private, and commercial recreation with special attention to organization, promotion, and development from the administrative aspect. (Cross-listed with RLS 8246)

Prerequisite(s): RLS Major and Senior status

RLS 4300 RECREATION PROGRAMMING AND LEADERSHIP (3 credits)

An advanced study of recreational programming and leadership through practical applications. Emphasis is placed upon understanding proven programming and leadership knowledge and skills; understanding participant leisure behavior; understanding participant leisure needs; and skill development in ways through which organization, agencies and businesses create services to respond to the leisure needs of the consumer. (Cross-listed with RLS 8306)

Prerequisite(s): Junior, Senior or Graduate Standing

RLS 4400 TRAVEL AND TOURISM (3 credits)

This course is designed to provide the recreation major or practitioner, and other interested candidates, with an awareness of the major components of the travel and tourism industry, including its costs and benefits to a resident community. (Cross-listed with RLS 8406)

Prerequisite(s): Junior Standing.

RLS 4420 RECREATION FOR THE AGING (3 credits)

Role of leisure services as related to understanding and working with elders. Emphasis on recreation programming as a mode of intervention. Analysis and study of the phases of aging, with reference to psychomotor, affective, and cognitive changes; introduction to the theories of aging and how they relate to the lifestyle of this population; recreational therapy intervention, activity adaptation and program design; leisure education and issues and trends. (Cross-listed with RLS 8426, GERO 4420, GERO 8426)

RLS 4550 PRACTICUM I (6 credits)

Practical learning experience in leisure service delivery under close University and agency supervision.

Prerequisite(s): Senior, 2.5 GPA and department consent.

RLS 4560 PRACTICUM II (6 credits)

Practical learning experience in leisure service delivery under close University and agency supervision.

Prerequisite(s): Senior, 2.5 GPA and department consent.

RLS 4970 PROBLEMS OF RECREATION (1-3 credits)

The purpose of this course is to provide an opportunity for candidates to participate in special conferences on problems in the field of recreation and to further professional improvement and growth beyond the normal four-year undergraduate program.

Prerequisite(s): Permission of instructor.

Religion (RELI)

Religion Undergraduate Courses

RELI 1000 TOPICS IN RELIGION AND SPIRITUALITY (1 credit)

As a first year topics course, the main purpose is to introduce students to some aspect of the academic study of religion and spirituality. The specific topics will vary considerably; however, the objectives include training students in study methods generally and how to study religion as a scholarly subject in particular.

RELI 1010 INTRODUCTION TO WORLD RELIGIONS (3 credits)

A introductory course in religious studies, designed both to introduce students to ways of understanding religion as a phenomenon in human culture and history and also to survey a wide variety of the religions of the world.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

RELI 1050 FIRST YEAR SEMINAR IN RELIGION (3 credits)

The purpose of this course is to introduce students to a particular topic in the study of religion. Although the topic for this course will vary from semester to semester, students will be expected to read, to write, and to discuss the assigned texts and the ideas they contain. Students will learn basic skills in reading academic literature, writing about significant issues, and speaking articulately about the questions and issues. These skills will be helpful in other university and professional work.

RELI 2000 ARCHAEOLOGY OF BIBLICAL LANDS (3 credits)

This course introduces students to the purpose and methods of biblical archaeology and includes a survey of the material culture of the land of the Bible from the Chalcolithic (5th - 4th millennia BCE) to the Persian periods (4th century BCE). Special emphasis will be placed on the relationship between biblical narratives and the archaeological reconstruction of ancient social and natural environments.

RELI 2010 RELIGION AND CRITICAL THOUGHT (3 credits)

This class introduces students to critical approaches to the study of religion. Students are exposed to a variety of social scientific, scientific, philosophical, indigenous, and critical literary approaches to the study of wide-ranging religious beliefs and practices. The course is required for majors and recommended for minors in Religion as well as others with high interest in the field of Religious Studies.

Prerequisite(s): 3 hours in Religion or permission of instructor.

RELI 2020 RELIGION AND HUMAN RIGHTS (3 credits)

This course introduces students to the intersection of religion and human rights. It takes human rights as a moral tradition and asks how it impacts and is impacted by religious moral thought.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

RELI 2060 THE RELIGION OF ANCIENT EGYPT AND MESOPOTAMIA (3 credits)

This course is designed to familiarize the student with the religions of ancient Egypt and Mesopotamia. The course will use archaeological discoveries together with ancient Egyptian and Mesopotamian texts to explore the religions of these two civilizations. It will deal with Mesopotamian and Egyptian beliefs surrounding issues such as creation, afterlife, ethics, morality and rituals.

Prerequisite(s): Intro to World Religion is recommended but not necessary.

RELI 2120 HINDU SCRIPTURES (3 credits)

An introduction to some of the foundational scriptures of Hinduism (Sanatana Dharma) from traditional and modern perspectives, including the Vedas, the Upanishads, and the Bhagavad-Gita.

Prerequisite(s): Not open to non-degree graduate students.

RELI 2150 HEBREW SCRIPTURES (3 credits)

A historical introduction to the study of the Hebrew Scriptures from the Biblical to Talmudic period in the light of recent scholarship.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

RELI 2160 NEW TESTAMENT: HISTORY, LITERATURE, AND SOCIETY (3 credits)

Who were Jesus, Peter, Mary, and Paul in the Roman empire of the early first century? How did these Jews of the Second Temple Period become the earliest generation of a 2,000 year history of Christianity? How did early Christian understandings of God and humanity shape or constrain their interpretations of and responses to affliction, healing, and death, both conceptually and in practice? Finding answers to these questions requires students to study the literature of the New Testament and other early Christian literature, along with scholarly analyses of key issues related to authorship, dating, textual analysis, literary genres, historical contexts, and varying interpretations. The purpose of the course is to train students in the content of the texts as well as critical tools related to documentary analysis, archaeological methods, and various literary and social scientific approaches, interdisciplinary tools which also enhance one's skills in a variety of careers and professions.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

RELI 2170 QUR'AN (3 credits)

This course provides an introduction to the academic study of the Qur'an, its uses, interpretations, and applications in society from its earliest appearance up to the present.

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

RELI 2190 THE MODERN MIDDLE EAST (3 credits)

An interdisciplinary study of the social, religious, and historical dimensions of contemporary issues and events which make the Middle East cultural and geographic region a center of global tensions. After providing a background of how Islam spread in and unified the region, students will study factors which have shaped the Middle East from the late Ottoman period to the present, analyzing the principal sociocultural and political economic developments in the Middle East from the early 19th century to the early 21st century. (Cross-listed with HIST 2190, SOC 2190).

Distribution: Humanities and Fine Arts General Education course and Global Diversity General Education course

RELI 2200 GLOBAL RELIGIOUS ETHICS: THE BASICS (3 credits)

An introduction to the main types of ethical thought in religious traditions worldwide. The course will consider both historical and contemporary approaches and will relate ideas and practices of religious ethics to contemporary moral problems.

RELI 2400 RELIGION IN AMERICA (3 credits)

The role of religion in American culture, seen in the interaction between the inherited religious traditions and the crucial events in American experience and how this affects American identity - past and present.

Prerequisite(s): Sophomore or permission of instructor.

RELI 2500 SPIRITUALITY AND WELLNESS (3 credits)

This course provides an introduction to the emerging field of spirituality and wellness. Utilizing perspectives from multiple disciplines and incorporating both third-person (research, theory) and first-person (experiential, reflective) approaches, students will explore topics such as: the nature of spirituality; mindfulness, meditation and wellness; spirituality and public health; spiritual wellness on campuses; and ecospirituality.

Prerequisite(s): Not open to non-degree graduate students.

RELI 2730 THE BLACK SPIRITUAL EXPERIENCE (3 credits)

The Black Spiritual Experience course examines the trajectory of early African religions and philosophies, and their syncretization with European settler religions in America that have been practiced and embraced by Blacks in the U.S. since slavery. Students will survey the historical development of the Black church in America, and the emergence of liberation and Black theologies to combat white supremacy, oppression, and exploitation. This course will explore the cultural importance of music, dance, and art in worship and Black spiritual expressions; the role of religion and theology in empowering and uplifting African Americans, particularly during the Black Power and Civil Rights movements; the political impact of Black religious institutions in the long fight against systemic racism, racial violence, police brutality, and voter suppression in America; and the challenges of inclusion, equity, and intersectionality within the Black church around issues of gender, class, and sexual orientation. (Cross-listed with BLST 2730).

Distribution: U.S. Diversity General Education course

RELI 3020 NATIVE AMERICAN RELIGIONS (3 credits)

This course examines the life-ways, oral narratives, ceremonies, and philosophies of selected Native American tribal nations and communities from the major cultural regions of North America, utilizing historical, anthropological, and literary approaches. No single Native spiritual tradition or culture represents all Native North American beliefs and customs. Thus, attention will be given both to similarities among different tribal groups, and also the great diversity among the hundreds of indigenous ways of life on the North American continent, both ancient and modern. Particular topics addressed include the following: healing traditions and maintaining personal and communal balance, pilgrimages to sacred sites, and, critically, Native American creation stories inform the manner in which Native communities approach the natural world, including plants and animals as "other-than-human" persons.

RELI 3030 SHAMANISM (3 credits)

Study of the forms and techniques of shamanic experience from its Paleolithic and Neolithic origins to its contemporary practice among Indigenous peoples worldwide, including its role in the development of human religious traditions and systems of healing.

RELI 3050 RELIGIONS OF THE EAST (3 credits)

A study of the major religions that originate in South, Southeast, and East Asia, considering their origins, foundational doctrines, practices, beliefs, rituals and contemporary expressions. Included are the religions of Hinduism, Buddhism, Jainism, Sikhism, Daoism, Confucianism and Shintoism. Knowledge of the religious and spiritual traditions of South, Southeast, and East Asia will help students who intend to travel or work in those regions or who may have friends and colleagues from those regions of the world. A broad grasp of these critical cultural traditions will enhance international, cross-cultural understanding for any career or professional track.

RELI 3060 RELIGIONS OF THE WEST (3 credits)

The stories and histories, practices, communities, and interactions among Jews, Christians, and Muslims are part of a larger history of inter-religious encounters and development. In addition to learning about the ideas and scriptures, the ritual and ethical practices, and the forms of social organization of these religious communities, students will analyze how each one of these major religious traditions not only impacts each other, but also play significant roles in the emerging global community. With this additional perspective, students will be able to understand and discuss Judaism, Christianity, and Islam as dynamic forces historically and in the twenty-first century.

RELI 3130 WOMEN AND THE BIBLE (3 credits)

This course explores the characterization of women in Hebrew and Christian scriptures as well as what we can learn about the lives of women in the ancient world from these and other sources. Attention is also given to the reception and use of these texts in later historical periods including contemporary religious contexts. (Cross-listed with WGST 3120).

RELI 3200 ISLAM AND MUSLIMS (3 credits)

What do Muslims believe? How do they practice their faith? What role does Islam and what roles do Muslims play in the 21st century? This course provides an introduction to the history, beliefs, and practices of Islam and Muslim communities, including both Sunni and Shi'i traditions, Sufis and Salafis, from the time of Muhammad ibn Abdullah to the 21st century. Students will examine the ways in which we come to 'know' about Islam and how to approach mediated sources with a critical lens. Thus, in addition to highlighting the many important cultural, scientific, medical, artistic, and architectural contributions of Muslim societies throughout the past millennium, critical contemporary issues will also be addressed, including the role of women in Islam, the meaning of jihad, the legal traditions (shari'a and fiqh), the relationship between religion and politics in Islam, and issues of law, gender, myth, violence, colonialism, modernity, and Islamophobia.

RELI 3330 ROMAN CATHOLIC THOUGHT AND PRACTICE (3 credits)

What does the Roman Catholic Church teach today? What are the major official documents outlining the theological concerns of the Holy See since the time of Vatican II? How do Roman Catholics themselves think about the official teachings? This course is an investigation of developments and differences in Roman Catholic thought and practice over the past century. Students will examine prominent official statements (e.g., papal encyclicals and episcopal pronouncements) and commentary about different points of view. Special consideration will be given to the theological ethical bases in the tradition for various progressive and conservative theological trends. Students will analyze documents and issues and articulate their own perspectives both orally and in writing. Topics to be examined include both moral issues (e.g., ends of life decisions, poverty and justice, climate and human responsibility) and questions about the priesthood and the diaconate, interfaith dialogue, and inter-religious relations.

RELI 3400 RELIGION AND FILM (3 credits)

This course will examine the various ways in which religion and film connect, including the representations of religious groups in films, ways in which films replicate or alter religious concepts, and ways in which film as an aspect of popular culture functions analogously to religions in society. Methods used will include the analysis of film technique, auteur criticism, and audience reception analysis.

Prerequisite(s): Not open to non-degree graduate students.

RELI 3500 TOPICS IN RELIGIOUS STUDIES (3 credits)

The content of this course varies from semester to semester, giving instructor and students an opportunity to investigate various subjects of interest in religious studies. Typically, students will learn through reading, viewing, discussing, and writing about the topic under study. Some sections may include service learning and other forms of experiential learning. (May be repeated for credit as long as the topic is different, up to 18 hours of credit.)

RELI 3960 READINGS IN RELIGION (1-6 credits)

Individual research in selected areas or particular questions in religious studies, which are not covered in other courses. Typically, a student proposes a topic to an instructor, and they agree upon a list of readings (or other resources) to read, analyze, and evaluate, as well as expectations for writing papers and presenting ideas orally. Students are welcome to propose topics of study!

Prerequisite(s): Permission of instructor.

RELI 4000 RELIGIOUS STUDIES INTERNSHIP (1-6 credits)

A supervised internship enabling students to develop and apply knowledge and gain expertise related to the field of Religious Studies while working at a non-profit, educational, non-governmental or related organization.

The host organization for the student must be approved in advance in consultation with the internship coordinator and the Chair of Religious Studies. This course may be repeated for a maximum of six credit hours.

Prerequisite(s): Junior or senior. Religious Studies major or minor.

Permission of internship coordinator. Not open to non-degree graduate students.

RELI 4010 SENIOR SEMINAR IN RELIGION (3 credits)

This course provides a capstone experience in religious studies. It serves as the third writing course and is required for Religious Studies majors. The readings will deepen students' understanding of the field of Religious Studies and how it relates to social concerns, as well as guide students through developing a research project. Students will present research both in writing and verbally, in ways that address scholarship in Religious Studies and that are accessible to a general audience. Student will also have opportunities to reflect on experiential learning and career goals.

Prerequisite(s): Five courses in Religion, or permission of instructor.

RELI 4020 BUDDHIST TRADITIONS (3 credits)

This course is an exploration of Buddhist history, thought and practices. It begins with the origins, cultural context, and development of Buddhism in South Asia and then traces the path of Buddhism through Southeast Asia, Tibet, China, Korea, Japan and North America.

Prerequisite(s): Junior or permission of instructor.

RELI 4030 AFRICANA RELIGIONS (3 credits)

An introduction to religions in Africa and the diaspora, including African Traditional Religions, Christianity, Islam, and Afro-Caribbean religious traditions, using anthropological, historical, and other academic approaches to the study of religious and spiritual traditions. In particular, students will learn about the role of spirits, ancestors, witches, and other invisible agents in ideas and practices regarding health and healing. Finally, the class will examine the complex inter-relationships between religious ideas and practices and contemporary post-colonial political-economic realities, including the consequences of genocide and other human rights violations and the role of religious communities in social and economic development. (Cross-listed with RELI 8036, BLST 8036, BLST 4030).

RELI 4050 RELIGION IN EARLY AMERICA (3 credits)

This course examines the history and nature of religion in North America to c. 1770 with an emphasis on the British colonies. (Cross-listed with HIST 4010; HIST 8016).

Prerequisite(s): Junior or senior standing. Not open to non-degree graduate students.

RELI 4060 FIRST NATIONS: SPIRIT IN ARTS AND CULTURES (3 credits)

First Nations: Spirit in Arts and Cultures explores how contemporary Indigenous/Native (First Nations, Metis and Inuit) artists in the lands now known as Canada express their cultures, especially beliefs, through the fine arts. While we will focus on visual culture (sculpture, painting, film, mixed media), literary works (a novel, poetry) and music will also be included. First Nations, Metis and Inuit artists often simultaneously express traditions, their own experiences, and reflections on the present and past through their work. By doing this, they share valuable perspectives on health and healing as well as the national process of Truth and Reconciliation. Trying, so much as possible, to let the artists speak for themselves, we will explore how spirituality manifests itself in contemporary cultures for these Indigenous artists north of the border. (Cross-listed with RELI 8066, NAMS 4060, NAMS 8066).

RELI 4150 JUDAISM IN THE MODERN AGE (3 credits)

A study of Jewish communities and movements since the Enlightenment emphasizing historical, intellectual, religious-legal, and socio-cultural developments. Pivotal movements (e.g., Hassidism, Reform, Historical Conservative Judaism, Modern Orthodoxy, Zionism) and major historical events (e.g., the American and French Revolutions, Tsarist oppression, the Holocaust/Shoah and the establishment of the State of Israel) will be analyzed for their ongoing impact on Jewish thought, practice, and social organization. (Cross-listed with RELI 8156)

Prerequisite(s): Junior, three hours in religion, or permission of instructor.

RELI 4160 THE HOLOCAUST (3 credits)

An interdisciplinary approach in a seminar oriented format discussing various aspects of the most notorious genocide in modern times. The course will explore the history of anti-Semitism, the rise of Nazi Germany and the road to the 'final solution.' It will further explore psychological, sociological and intellectual aspects of the dark side of humanity. (Cross-listed with RELI 8166, HIST 4720, HIST 8726)

Prerequisite(s): Junior or instructor permission.

RELI 4170 HISTORY OF CHRISTIANITY I (3 credits)

The development of Christian theological, ritual, and social practice from the beginnings of Christianity through the Reformation. History of Christianity from its origins in the first century through the sixteenth century movements for reform. (Cross-listed with RELI 8176).

RELI 4180 HISTORY OF CHRISTIANITY II (3 credits)

This course will focus on the historical development of Christian ideas, practices, and institutions from the reformations of the sixteenth century CE through the early twenty-first century CE. In addition to the theological claims, students will examine the history of ritual practice and organizational development of the principal varieties of Christianity - Roman Catholic, Eastern Orthodox and other eastern churches, Protestant, and Pentecostal. (Cross-listed with RELI 8186).

RELI 4200 COMPARATIVE RELIGIOUS ETHICS (3 credits)

An introduction to historical and contemporary approaches to comparative religious ethics, with special focus on specific case studies as encountered in societies and religious communities across the globe. In addition to reading authors from a variety of perspectives (Aristotelians, natural law theorists, philosophers of law, pragmatists, theologians, and historians of religion), students will be introduced to special topics in the field, e.g., religion and public life, religion and law, syncretism, the secular/non-secular divide, etc. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 8206, CACT 8206)

RELI 4210 PUBLIC HEALTH, RELIGION, AND HUMAN RIGHTS (3 credits)

This course examines the intersections among public health, religion, and human rights. It considers how human rights impact public health and vice versa; how human rights and religious thought impact each other; how religious communities approach issues of public health; and how religious thought and practice affects people's health. Topics include infectious diseases such as HIV and COVID-19; issues of stigma and discrimination in public health; social determinants of health such as poverty and environmental quality; and women's and LGBTQ+ health. Students will gain skills of textual analysis, dialogue, and argumentative reasoning in both written and verbal form. (Cross-listed with RELI 8216, CACT 8216)

Prerequisite(s): Prerequisites: junior standing OR prior completion of either RELI 1010 or MEDH 1000.

RELI 4220 VIOLENT CONFLICTS, PEACEBUILDING, AND THE ETHICS OF INTERVENTION (3 credits)

This course is designed to familiarize the student with the nature of violent conflict, including terrorism, and a variety of the mechanisms for peacebuilding. The course will also explore human rights and the ethics of intervention. This course supports the Ethics and Values concentration in the Master of Arts in Critical and Creative Thinking. (Cross-listed with RELI 8226, CACT 8226)

RELI 4250 WAR, RELIGION, AND HUMAN RIGHTS (3 credits)

What is the connection between human rights, religion, conflict, and peacebuilding? Does religion cause war or help to stop it? How can human rights violations be prevented or stopped, and can religious actors be engaged in this work? Is the use of force ever appropriate to protect human rights? This course engages all of these questions by examining the ethical thought of multiple religious traditions; the work of human rights organizations; the just war tradition; and questions about sovereignty, peacebuilding, and the use of force worldwide. It includes discussion of historical issues and contemporary case studies. (Cross-listed with RELI 8256).

RELI 4260 THE END OF THE WORLD: RELIGION AND APOCALYPSE (3 credits)

This course introduces students to sacred texts and their interpretation by "end of the world" groups across world history. Several ancient, medieval, and contemporary groups are discussed. Special attention is paid to the connections between apocalyptic and political movements, as well as religion and violence. (Cross-listed with RELI 8266).

RELI 4400 WOMEN IN ISLAM (3 credits)

This course examines the religious, political and cultural assignments ascribed to Muslim women. Starting with the Qur'an, social, legal, and scriptural norms will be explored through the voices of Muslim women around the world. Passages of the Qur'an, hadiths and the commentaries that lead to the elevation and/ or demise of Muslim women and their rights are studied. Examining the role of the female body, sexuality and seclusion within a historical context will lead to an understanding of the gendering of women in Islam. (Cross-listed with RELI 8406)

Prerequisite(s): RELI 3200

RELI 4420 MUSLIMS IN AMERICA (3 credits)

This course is designed to familiarize the student with the multiplicity of Muslim voices in the United States and to examine the myths created through stereotyping and orienting. The course will also investigate how Muslims in America form identities as hybrids and transnationals and follows the chronological development of American Muslims including their identity construction, religious issues, and politics. (Cross-listed with RELI 8426)

Prerequisite(s): RELI 3200 or permission.

RELI 4450 HOLY TERROR: RELIGION AND HORROR (3 credits)

Examining the genre of horror in books, films, and television, students will explore the ways in which horror in its many forms illuminates upon an array of religious ideas. Some of the major subjects and themes examined in this class include: various cultural interpretations of sleep paralysis, the fear of death and dying badly, Hell and Satan, nature horror, body horror, and the breakdown of the established order of reality and its replacement with one that is alien and hostile to it. In addition to these themes, we will also explore horror in Native American and Eastern social and cultural contexts. Emphasis is placed on the genre's ability to portray complex religious, philosophical, sociological, and anthropological subject matter. (Cross-listed with RELI 8456).

RELI 4500 ANCIENT ISRAEL (3 credits)

Who were the Israelites? Where did they come from? This is one of the most debated topics in biblical studies. This course examines biblical texts, historical documents, archaeological discoveries, and sociological studies.

RELI 4520 JESUS AND ARCHAEOLOGY (3 credits)

Jesus and Archaeology is a course surveying the material culture of Judea and Galilee in the time of Jesus. Studying materials is a new approach to the long study of the Historical Jesus Quest. By providing a large amount of archaeological data, this method contributes a critical mass on old debated questions such as the society in Judea and Galilee, rural versus urban, Hellenism versus Judaism, size, population and language of Galilee in the time of Jesus and much more. (Cross-listed with RELI 8526).

RELI 4550 JESUS IN FILM (3 credits)

This course is a study of how the life of Jesus of Nazareth has been portrayed in cinema over the past century. Emphasis will be placed upon the ways in which the biblical sources are adapted for films, how Jesus films reflected and influenced the values and beliefs of the times in which they were made, and the reception by audiences of the diverse film representations of Jesus. (Cross-listed with RELI 8556).

RELI 4600 WOMEN AND RELIGION (3 credits)

This course on women and religion will focus on the intersections of power and oppression that women experience in four of the major world religions - Judaism, Christianity, Buddhism, and Islam. Students will examine the historical, cultural and religious contexts that highlight women's involvement or exclusion from activity and power within each religion. Students will research case studies from around the world to examine tensions within and between religious and secular societies through the lens of gender. (Cross-listed with RELI 8606).

RELI 4700 RELIGION, FILM, AND VIOLENCE (3 credits)

A study of the ways in which films represent violence and how these representations intersect with religious concepts. Topics will include how films express the justification or "sanctification" of violence as legitimate, redemptive violence, notions of sacrifice, and the nonviolent critique of violence. We will examine a variety of genres including action films, crime stories, horror, and religious films, noting their societal influence and how they express diverse values regarding violence and its legitimization. (Cross-listed with RELI 8756).

RELI 4830 ANCIENT GREEK MYTH, RELIGION & MAGIC (3 credits)

Students will examine the impact of ancient Greek myth and belief on actual religious practice: e.g., "lived" religion. Areas covered include formal civic sacrifice, wartime religion, family and personal devotions, mystery cults, oracles and seers, plus the popular pursuit of magic. (Cross-listed with HIST 8836, HIST 4830, RELI 8836).

RELI 4850 ROME AND THE EARLY CHURCH (3 credits)

Students will cover Roman-Christian-Jewish interactions from just before the birth of Jesus of Nazareth to c. 450 CE, with an emphasis on social and political history. We catalogue Christianity's transformation from its origins as a Jewish movement and an illegal "superstition" to the dominant religion of the Roman empire. (Cross-listed with HIST 8856, HIST 4850, RELI 8856).

Prerequisite(s): Junior standing.

Science, Tech, Engr, and Math (STEM)

Science, Technology, Engineering, and Mathematics Undergraduate Courses

STEM 1120 INTRODUCTION TO MATHEMATICAL AND COMPUTATIONAL THINKING (3 credits)

This course embraces the visual arts to introduce students to the foundational elements of mathematical and computational thinking. Visual patterns form the basis for explorations in arithmetic and geometric sequences, from which algebraic functions and corresponding functions in computer programs are reasoned.

Distribution: Math

STEM 2800 SCIENCE EXPERIMENTATION AND ENGINEERING DESIGN (4 credits)

Scientific Experimentation & Engineering Design (SEED) is a general education science course that introduces integrative STEM (Science, Technology, Engineering, and Mathematics) concepts and their applications. The course fosters 21st Century Learning through study and work in active, team-based experiential learning environments through all phases of near-space experiments using high-altitude balloon platforms. Near-space experiments require research question development, experiment hardware fabrication, experiment software integration, payload launch and recovery, data analysis, and formal experiments' results reporting. Science and Engineering Practices are central to students' experiences and work in this course, as the course models the interdisciplinary connectedness of academic fields, industry, and the community to encourage collaboration and discovery to effectively implement STEM concepts, practices, and innovation. (Cross-listed with TED 2800).

Distribution: Natural/Physical Sci General Education lecture&lab

Social Sciences (SSCI)

Social Sciences Undergraduate Courses

SSCI 2000 SOCIAL SCIENCE ISSUES I (3-5 credits)

An interdisciplinary course which explores the nature and scope of social science, and seeks an integrated understanding of selected social science topics within the context of contemporary issues. Course topics will vary, but will typically include a multidisciplinary approach.

SSCI 4900 GLOBAL CAREER INTERNSHIP (3-6 credits)

This internship is specifically designed for students participating in UNO's Global Career Accelerator Program. Students will be paired with UNO's Global Career Accelerator corporate partners to gain experience in high-demand careers such as web development, digital marketing, data analytics, coding for data, or web analytics/social media.

Prerequisite(s): Participation in the Global Career Acceleration Program or permission of director.

Social Work (SOWK)

Social Work Undergraduate Courses

SOWK 1000 SOCIAL WORK AND SOCIAL WELFARE (3 credits)

This course is designed for the student who wants to learn about social welfare and to explore a possible major in social work. The student examines historical and current issues in social welfare, social services, and the social work profession. The course focuses on values, beliefs, and goals of social services and social work, and provides a historical perspective for present activities.

Distribution: Social Science General Education course and U.S. Diversity General Education course

SOWK 1500 SOCIAL WORK AND CIVIC ENGAGEMENT (3 credits)

This course is designed to acquaint the student with the social work profession, professional roles and functions, and social services delivery systems. Students will have an opportunity to observe and participate in social services activities within Nebraska and Iowa communities incorporated with didactic experiences. Students will also have an opportunity to explore their vocational aptitude for social work practice via interactive encounters with clients and helping professionals.

Prerequisite(s): Not open to non-degree graduate students.

SOWK 2120 RACE, CLASS AND GENDER IN THE UNITED STATES (3 credits)

This course examines the effects of race, class, and gender on social policy and social injustice. The focus is on how institutional oppression of racism, classism, and sexism are interconnected and are mutually reinforcing. The consequences of institutionalized oppression are examined at the individual, family, group, organization, community, and societal levels.

Distribution: U.S. Diversity General Education course

SOWK 3000 APPLIED STATISTICS AND DATA PROCESSING IN PUBLIC SECTOR (3 credits)

A course on the use of data and statistical methods to explore and make inferences about society, while critically considering the influence of context and the powers and limitations of quantitative evidence. (Cross-listed with CRCJ 3000, PA 3000).

Prerequisite(s): MATH 1120 or MATH 1130 or MATH 1220 or MATH 1300 or MATH 1320 or an ACT of 19, or above or permission from the department.

SOWK 3010 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT I (3 credits)

This course is the first part of a two-semester sequence within the MSW required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan, within the social environment at the micro- and macro-level (e.g., individuals, families, groups, organizations, institutions, and communities), as they relate to effective social work generalist practice.

Prerequisite(s): Admission to BSSW Program. Not open to non-degree graduate students.

SOWK 3020 HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT II (3 credits)

This course is the second part of a two-semester sequence within the BSSW required curriculum. It focuses on major contributions of theories from the biological, social, and behavioral sciences that help to understand human functioning across the lifespan, emphasizing functioning at the mezzo and macro levels of practice. This class is designed to build upon the theories of lifespan development presented in the initial course of the sequence.

Prerequisite(s): SOWK 3010, SOWK 3320, SOWK 3890. Not open to non-degree graduate students.

SOWK 3110 SOCIAL WELFARE POLICY (3 credits)

This course is an introduction to social welfare policy analysis. It informs the BSSW student about the history of professional social work, the development of social services in the United States, and the values, beliefs, ethics and social welfare theories that frame professional policy practice. The course examines U.S. social welfare policy, taking into account historical social, racial, cultural, economic, organizational, environmental, and global influences that affect social policy.

Prerequisite(s): SOWK 3010, SOWK 3320, SOWK 3890. Not open to non-degree graduate students.

SOWK 3320 GENERALIST PRACTICE WITH INDIVIDUALS AND FAMILIES (3 credits)

This course introduces students to the values, ethics, knowledge, and skills of generalist social work practice. Using constructs from the Generalist Intervention Model, systems theory, and the strengths-based perspective, students learn about engagement, assessment, planning and contracting, intervention, evaluation, and termination. Diversity and case management are emphasized as part of bringing planned change to client systems, including individuals, families, and groups.

Prerequisite(s): Admission to BSSW Program. Not open to non-degree graduate students.

SOWK 3350 GENERALIST PRACTICE WITH GROUPS, ORGANIZATIONS, AND COMMUNITIES (3 credits)

This course reinforces the values, ethics, knowledge, and skills of generalist social work practice with groups. Students gain specific knowledge and skills in group assessment, intervention, and termination. Students will learn about the process of group development and facilitation. This course looks at the various types of groups social workers may facilitate.

Prerequisite(s): SOWK 3010, SOWK 3320, SOWK 3890. Not open to non-degree graduate students.

SOWK 3890 WRITING FOR SOCIAL WORK (3 credits)

This course emphasizes the process of critical thinking and analysis and the process of effective professional writing as required for generalist social work practice. Students will apply selected generalist social work concepts to prepare writing samples such as research/term papers, client progress/psychosocial reports, analytical reviews, professional development papers, business communications, and grant proposals. Research and writing skills emphasized are: conducting electronic literature searches, outlining, paragraph and sentence structure, revising, using APA format, and proofreading for correct grammar, word usage, and punctuation.

Prerequisite(s): Admission to BSSW Program. Not open to non-degree graduate students.

SOWK 4010 SOCIAL WORK WITH AMERICAN INDIANS (3 credits)

This course provides the student with a broad study of the historical origins, influences and issues of American Indians in relation to social work practice. The application of generalist social work methods are explored, including anti-racism, diversity, equity, and inclusion (ADEI) framework. The student will learn and understand the political identities of American Indians, which are unique to this population. Methods of intervention applicable to American Indian populations and communities are reviewed, giving special attention to practice across the lifespan. (Cross-listed with SOWK 8016).

Prerequisite(s): Admission to the BSSW Program. Not open to non-degree graduate students.

SOWK 4020 SOCIAL WORK WITH BLACK FAMILIES (3 credits)

This course seeks to develop in students an awareness and understanding of some of the social and psychological/cognitive realities influencing the behavior of African American youth and families across the lifespan. The content draws upon theories, research and social work practice skills relevant to African American youth and families, as well as the cognitive process and social systems which impact African youth and families. (Cross-listed with SOWK 8026)

Prerequisite(s): Admission to the BSSW program

SOWK 4030 SOCIAL WORK WITH LATINOS (3 credits)

The purpose of this course is to study and analyze cross-cultural social work practice with Latino populations. Students will learn what factors impact Latino communities and what skill sets are essential for diverse social work practice. (Cross-listed with SOWK 8036).

Prerequisite(s): Admission to the BSSW Program

SOWK 4040 WORKING WITH MINORITY ELDERLY (3 credits)

This course is designed to provide the student with knowledge of the differing status, attitudes, and experiences of older adults who identify as members of minority groups in the U.S. This course examines various social policies, service systems, and practice models in terms of their relevance and effectiveness in meeting the needs of an increasing and diverse aging population. (Cross-listed with GERO 4690, GERO 8696, SOWK 8046).

Prerequisite(s): Admitted to the BSSW program or [SOWK 1000, junior or senior standing, and permission of the School

SOWK 4050 ETHNIC DIVERSITY AND SOCIAL WORK PRACTICE (3 credits)

This course focuses on effective social work practice with ethnic diversity. Students critically examine different theoretical frameworks to understand ethnic diversity. Current major ethnic groups in American society are explored regarding demographics, history, worldviews, cultural traditions, and social welfare. The goal is to deepen student's basic knowledge, skills, and values of ethnic diversity in relation to family structure, gender roles, care giving, and help-seeking behaviors. In addition, attention is given to immigrants, refugees, and persons who identify as multi-ethnic. (Cross-listed with SOWK 8056)

Prerequisite(s): Admission to the BSSW Program

SOWK 4060 MEDICAL SOCIAL WORK (3 credits)

This course is an introduction to medical social work. BSSW and MSW students will focus on the knowledge base and practice skills needed to assess the holistic care of patients and their families. This course prepares students to 1) understand healthcare disparities and needs of individuals and their family, 2) apply theory and models of patient-centered care delivery, 3) develop skills for working on interprofessional teams, 4) formulate ideas for addressing barriers and improving health care access. (Cross-listed with SOWK 8066).

Prerequisite(s): SOWK 3320 prior to or concurrent

SOWK 4360 APPLIED SOCIAL WORK PRACTICE: CASE MANAGEMENT, RESOURCES, AND INTERVENTION (3 credits)

This course is an introduction to a goal-oriented planned change process with an emphasis on task groups, organizations, and communities.

Prerequisite(s): SOWK 3320, SOWK 3110, SOWK 3020

SOWK 4400 RESEARCH METHODS IN SOCIAL WORK PRACTICE (3 credits)

The focus of the course will be to define research methods as they are applied in social work, using ethical, culturally informed, anti-racist, and anti-oppressive approaches. Students will use research to inform their practice decision-making. Values and ethical issues are infused throughout the content of the course as they relate to research processes and methods.

Prerequisite(s): Prior or concurrent STAT 1530, CRCJ 3000, PA 3000, PSYC 3130, SOWK 3000, or STAT 3000

SOWK 4410 GENERALIST SOCIAL WORK FIELD PRACTICUM I (5-6 credits)

This course is designed to provide supervised, individual, and experiential learning offered within the setting of a selected social service agency. The student is introduced to a variety of social work practice roles, develop professional relationships with client systems and learn to apply different interventions to effect change across the life span. In order to facilitate integration of classroom theory with practice, students will attend a seven-week field practicum lab/seminar (2 hours every other week in spring/fall; every week in summer).

Prerequisite(s): SOWK 4360 prior or concurrent

SOWK 4420 GENERALIST SOCIAL WORK FIELD PRACTICUM II (5-6 credits)

This course is designed to provide supervised, individual, and experiential learning offered within the setting of a social service agency, typically the same agency as in SOWK 4410. This course builds upon opportunities provided and competence achieved in Generalist Social Work Practicum I.

Prerequisite(s): SOWK 4410 prior or concurrent

SOWK 4450 SOCIAL WORK CAREER PREP (1 credit)

This course is an integrative senior seminar designed to be taken concurrently with practicum. This course facilitates the transition from BSSW student to professional social worker. To achieve this, students will reflect on the following: how to prepare for a job interview, personal financial planning, continuing education, licensure, and social work competencies.

Prerequisite(s): SOWK 4410 prior or concurrent

SOWK 4510 TREATMENT ISSUES IN CHEMICAL DEPENDENCY (3 credits)

This course addresses chemical dependency treatment issues including denial, minimization, relapse and its prevention, resistance, family dynamics, poly-substance abuse, co-occurring disorders, spirituality and the influence of self-help groups. The education will include the clinical treatment needs of individuals suffering from chemical dependency, taking into consideration diversity, gender, culture and lifestyle. (Cross-listed with COUN 4510, COUN 8516, SOWK 8516).

Prerequisite(s): Admission to counseling program or social work programs or permission of instructor. Not open to non-degree graduate students.

SOWK 4530 SCHOOL SOCIAL WORK (3 credits)

This course explores the field of social work practice in school settings. Major topics include: history of social work practice in schools; the school environment; roles of school social workers; mandated foundations for school social work services; eligibility for special education and 504 plans; theories of practice that include school and community based models; and interventions for target populations in schools. (Cross-listed with SOWK 8536).

Prerequisite(s): Admission to the BSSW Program

SOWK 4620 TRAUMA AND RESILIENCE (3 credits)

This course provides an overview of issues related to trauma including: the factors related to development of trauma, definitions of trauma, the impact of trauma on individuals, families and communities, and the programs and practices that are most effective and appropriate regarding the social work role in responding to trauma. (Cross-listed with SOWK 8626)

Prerequisite(s): Admission to the BSSW Program

SOWK 4640 PERMANENCE FOR CHILDREN (3 credits)

This course examines the history, challenges, and issues of governmental intervention in families to protect at-risk children. The course concentrates on the effects of social policies, like the 1980 federal legislation (PL 96-272) on child welfare delivery systems and practices. It provides a comprehensive overview of child welfare services, including child protective services, in-home services, foster care, group care, intergenerational childcare, and adoption. It also provides an overview of the juvenile justice system and its impact on children and their families. (Cross-listed with SOWK 8646).

Prerequisite(s): Admission to the BSSW Program

SOWK 4650 SOCIAL WORK IN MENTAL HEALTH (3 credits)

This is an undergraduate introductory social work course on mental health. The aim of the course is to acquire basic knowledge and skills for effective and culturally appropriate interventions. Students examine the history of psychiatric care to inform a social work perspective on mental health/illness, human rights, social justice, stigma, ethical/legal issues, and a continuum of care for families, communities, and service providers. Mental health/illness is taught from a distinct social work perspective using historical-critical analysis and case studies.

Prerequisite(s): Admission to the BSSW Program

SOWK 4660 SOCIAL WORK WITH INDIVIDUALS WITH DISABILITIES (3 credits)

This is an introductory course to explore contemporary social work practices pertaining to the experiences of individuals with intellectual and developmental disability (I/DD) across the lifespan. Law and policy trends will be examined through the lens of disability rights, advocacy, and ethics. The course will assess the impact of intersectionality and diversity on the health and well-being of individuals with I/DD.

Prerequisite(s): Admission to the BSSW Program

SOWK 4680 MEDICAL AND PSYCHOSOCIAL ASPECTS OF SUBSTANCE USE DISORDERS (3 credits)

This course introduces students to substance use disorders and their impact on the individual, family, and society. It covers psychopharmacology, alcohol and drug interactions, drug classifications, theories of substance use disorders, various models of treatment, vulnerable populations, and ethical and legal issues. (Cross-listed with SOWK 8686, COUN 4680, COUN 8686).

SOWK 4690 ASSESSMENT AND CASE MANAGEMENT IN SUBSTANCE USE DISORDERS (3 credits)

This course focuses on assessment of clients and their environment, and diagnosis and referral for substance use disorder treatment. Emphasis is given to assessment instruments, treatment levels, treatment planning, case management, and social justice. (Cross-listed with COUN 4690, COUN 8696, SOWK 8696).

Prerequisite(s): Admission to the BSSW Program

SOWK 4800 SOCIAL WORK AND THE LAW (3 credits)

This course presents the fundamental principles of criminal and civil law that have relevance to the practice of social work. Topics include the legal system; legal research methods; professional ethical/legal responsibilities and liabilities; family law; elder law; criminal law; juvenile law; personal injury law; employment discrimination law; capacity to make contracts and wills; rights of institutionalized patients; and rights of children with disabilities to an education. (Cross-listed with SOWK 8806).

Prerequisite(s): Admission to BSSW Program

SOWK 4810 SPIRITUALITY AND SOCIAL WORK PRACTICE (3 credits)

This course examines major issues and basic concepts pertaining to spirituality and social work practice. This course applies critical thinking to deepen understanding of spirituality in relation to clients of diverse religious and secular perspectives. The goal is to develop students' professional use of self and spirituality as the human striving for meaning, purpose, and wellbeing. Classroom time is organized around lectures, field trips, and reflective assignments. (Cross-listed with SOWK 8816)

Prerequisite(s): Admission to the BSSW Program

SOWK 4820 GLOBAL ENGAGEMENT: A SOCIAL WORK PERSPECTIVE (3 credits)

This course prepares students to work in a global setting. Students examine theories, concepts, and skills related to social development, cross-cultural engagement, and issues related to particular countries. The course is designed with two elements: 1) On-campus classroom learning focused on global social work knowledge, and, 2) Field-based labs that involve direct engagement with an international population. Students select one lab: i) faculty-led trip to China for two-weeks, ii) refugee resettlement service-learning project in Omaha. (Cross-listed with SOWK 8826).

Prerequisite(s): Admission to the BSSW Program

SOWK 4830 CRISIS INTERVENTION (3 credits)

Students will study Robert's 7-Stage Model of Crisis Intervention and how to ethically practice with diverse and vulnerable populations. Students will apply crisis intervention theory and models of intervention to various concern areas including but not limited to suicide, sexual assault, domestic violence, substance abuse, grief and loss, and violence. A systems, strengths, and cultural emphasis will be applied to the various crisis situations covered. (Cross-listed with SOWK 8836)

Prerequisite(s): Admission to the BSSW Program

SOWK 4850 HOSPICE & OTHER SERVICES FOR THE DYING PATIENT/FAMILY (3 credits)

This course examines the hospice concept and other related services available in the community. The student will learn that hospice is an alternative to the traditional medical model. (Cross-listed with GERO 4850, GERO 8856, SOWK 8856.)

Prerequisite(s): Admission to BSSW or permission of the school

SOWK 4880 TOPICAL SEMINAR IN SOCIAL WORK (3 credits)

Specific seminar topics will focus on advanced content in social work theory and practice. The course description will be announced when a specific topical seminar is proposed. The topics selected will be consistent with the Grace Abbott School of Social Work program objectives, faculty expertise, and student needs. (Cross-listed with SOWK 8886)

Prerequisite(s): Admission to the BSSW Program

SOWK 4890 SPECIAL STUDIES IN SOCIAL WORK (1-4 credits)

This independent study course allows students to pursue a special selected area or topic within social welfare in order to deepen knowledge and/or skills in that particular area.

Prerequisite(s): Admission to the BSSW Program

SOWK 4980 SENIOR HONORS PROJECT/THESIS (3-6 credits)

An independent research project supervised by an approved faculty member. The senior honors project must be approved by the CPACS Honors Coordinator.

Prerequisite(s): Senior in Honors Program and permission of the School.

Sociology (SOC)

Sociology Undergraduate Courses

SOC 1010 INTRODUCTORY SOCIOLOGY (3 credits)

An introduction to the study of human societies. The course presents the fundamental concepts and theories that make up the sociological perspective. These serve as tools for the analysis of social inequality, social institutions and social change.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

SOC 2100 SOCIAL PROBLEMS (3 credits)

An analysis of the origins of social problems in American society. Attention is given to the nature, consequences and solutions of selected social problems.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

SOC 2120 SOCIOLOGICAL THEORY (3 credits)

SOC 2120 is an intellectual history of sociology as an academic discipline surveying outstanding contributions to its body of theory. The social contexts in which a variety of classical and contemporary theoretical traditions have arisen will be considered. Stress is placed on understanding and applying different approaches to sociological analysis through detailed textual interpretation of theoretical writings.

Prerequisite(s): SOC 1010 and Sociology major or permission of instructor. Not open to non-degree graduate students.

SOC 2130 SOCIAL STATISTICS (3 credits)

An introduction to the fundamental statistical techniques used in the analysis of social data, including descriptive and inferential statistics. The focus is on the production and interpretation of statistical information in the study of social life.

Prerequisite(s): MATH 1120, MATH 1130, MATH 1220, MATH 1310, or MATH 1530 or permission of instructor.

SOC 2134 SOCIAL STATISTICS LAB (1 credit)

A computer-based laboratory course to be taken in conjunction with SOC 2130. The focus is on using computer software to produce and interpret statistical information in the study of social life.

Prerequisite(s): MATH 1120, MATH 1130, MATH 1220, MATH 1310, or MATH 1530 and SOC 2130 (taken previously or concurrently) or permission of instructor. Not open to non-degree graduate students.

SOC 2150 SOCIOLOGY OF FAMILIES (3 credits)

This course provides a description and analysis of contemporary families from a sociological perspective. A life course perspective traces the development of family life, with special attention to change, choice, and diversity. Topics such as family structure, the functions of the family as an institution, family comparisons across culture and time, and difficulties faced by families in contemporary society will also be explored.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course and U.S. Diversity General Education course

SOC 2190 THE MODERN MIDDLE EAST (3 credits)

An interdisciplinary study of the social, religious, and historical dimensions of contemporary issues and events which make the Middle East cultural and geographic region a center of global tensions. After providing a background of how Islam spread in and unified the region, students will study factors which have shaped the Middle East from the late Ottoman period to the present, analyzing the principal sociocultural and political economic developments in the Middle East from the early 19th century to the early 21st century. (Cross-listed with RELI 2190, HIST 2190).

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

SOC 2300 SPORT & SOCIETY (3 credits)

This course provides a sociological examination of the contemporary sports world and the ways that the institution of sport both reflects and shapes society. The importance of sports to culture and socialization, the interaction between sports and other social institutions, and the unique role that sports plays in both perpetuating and contesting inequalities of race, gender, class, identity, and ability will be explored.

Distribution: Social Science General Education course

SOC 2400 SOCIOLOGY ON FILM (3 credits)

This course applies the sociological perspective to feature and documentary movies to critically explore social issues presented on film. Students will develop their sociological imaginations as they are introduced to essential sociological concepts such as culture, society, the social construction of reality, socialization, power and inequality, social institutions, and social problems as depicted in classic, contemporary, and foreign film. As social issues are serious and often controversial, the films examined may also be controversial and contain mature themes.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course

SOC 2800 MAJOR SOCIAL ISSUES (3 credits)

The course examines a major social issue from a sociological perspective with content and materials designed for non-majors. The topics will vary from semester to semester, so the course can be taken more than once.

SOC 3300 SOCIOLOGY OF GENDER (3 credits)

This course critically examines the meaning, purpose, and consequences of gender, by using sociological methods and theories to explore the institutions that structure gender relationships and identities, and form the contexts that shape social life in the United States. Particular attention will be given to how social institutions like the state, the economy, family and the mass media shape the definitions of femininity and masculinity, as well as how the gender system intersects with other structures of inequality - race, class, and sexual orientation.

Prerequisite(s): SOC 1010 and sophomore standing; or permission of instructor. Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

SOC 3450 SOCIAL PSYCHOLOGY (3 credits)

Social interaction studied in situations of (1) social influences on individuals, (2) dyads or face-to-face groups, and (3) larger social systems. The concepts, theories, data, research methods and applications of varied substantive topics are examined. (Cross-listed with PSYC 3450).

Prerequisite(s): SOC 1010 or PSYC 1010

SOC 3510 RESEARCH METHODS (3 credits)

This course is a basic introduction to the principles, methods and techniques of empirical social research. The common methods used by sociologists and anthropologists are addressed such as surveys, interviews, and observation.

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor

SOC 3514 RESEARCH METHODS LAB (1 credit)

This is a laboratory course to be taken in conjunction with SOC 3510.

The focus is on applying methodology and basic data analysis learned in SOC 3510 and the development of a sociological research proposal.

Prerequisite(s): SOC 1010, junior standing, and SOC 3510 (taken previously or concurrently); or permission of instructor.

SOC 3610 APPLIED ORGANIZATIONAL SOCIOLOGY (3 credits)

A foundational applied organizational sociology course that focuses on the understanding, analysis, and applications of basic knowledge of organizational structures and systems for solving organizational problems, enhancing organizational performance, and preparing students for leadership roles in organizations.

Prerequisite(s): SOC 1010 and sophomore standing; or permission of instructor.

SOC 3690 SOCIAL INEQUALITY (3 credits)

Considers social inequality from a sociological vantage point, introducing students to the structure of inequality, power, and privilege. Attention is paid to the intersections of various forms of inequality, including an examination of class, race, ethnicity, gender, sexuality and sexual orientation, immigration, age, ability, etc. The consequences of social inequality for life chances and social mobility are examined.

Prerequisite(s): SOC 1010 and sophomore standing; or permission of instructor.

SOC 3700 INTRODUCTION TO LGBTQ STUDIES (3 credits)

Introduces key themes and critical frameworks in Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) Studies. This course examines scholarly contributions from a range of academic disciplines and traces some of the ways that LGBT Studies has influenced cultural and social theory more broadly. Topics include LGBTQ histories and social movements; forms of oppression including heterosexism, homophobia, and transphobia; resistance to oppression; queer activism; intersecting identities; and representations in literature, art, and popular media.

Prerequisite(s): SOC 1010 or WGST 2010 or WGST 2020; or permission of the instructor. Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

SOC 3800 WORK AND SOCIETY (3 credits)

This course explores the social organization of work in the United States, from pre-industrial times to the present. It addresses how and why current work structures and practices emerged historically within a global context, and the social implications of these structures for various groups (based on race/ethnicity, immigration status, sexuality, and social class). The course grapples with the big questions: "How work is organized the way it is right now, how did we get here, and what might it look like in the future?"

Prerequisite(s): SOC 1010 and sophomore standing; or permission of instructor.

SOC 3820 MEDICAL SOCIOLOGY (3 credits)

The study of the social patterning of health and illness, including inequalities in health by stratifying elements such as race, class, and gender. Examines the social definition of health, illness, and the social position of being a sick person in society. Also examines the interaction individuals have with health care providers and the structure of medicine in the U.S. and around the world. Offers a critical examination of the social institution of medicine.

Prerequisite(s): SOC 1010 and sophomore standing; or permission of instructor. Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

SOC 3840 WORLD POPULATION AND SOCIAL ISSUES (3 credits)

This course introduces students to the scientific study of populations across the world and the social issues derived from population change. It includes basic training on demographic methods and the use of data sources. It covers concepts and theories that connect population dynamics to world economic development, global inequality, refugee and immigration issues, the status of women, intergenerational competition, and population pressure on food and the environment.

Prerequisite(s): SOC 1010 and sophomore standing, or permission of instructor. Six hours of social science, or permission of instructor.

Distribution: Global Diversity General Education course

SOC 3900 RACE AND ETHNIC RELATIONS IN THE U.S. (3 credits)

The course explores historical and contemporary meanings of race and ethnicity and introduces students to the ways sociologists think about 'race,' race relations and racism. It views current theoretical issues, and focuses on the recent histories and the current position of several major racial-ethnic populations in the U.S.: African Americans, Latino/a Americans, Native Americans, Asian Americans, and white/European ethnics. Emphasis is on how race/ethnicity has structured groups' experiences in relation to social institutions like health, education, culture and media, the legal system, and the economy.

Prerequisite(s): SOC 1010 and sophomore standing; or permission of instructor. Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

SOC 4130 SOCIOLOGY OF DEVIANCE (3 credits)

This course introduces students to the sociological study of behaviors that have been labeled as "deviant" because they presumably violate social norms. The course takes a constructionist approach, critically analyzing how deviance is socially defined, organized, and managed. Students will be challenged to see the diversity and pervasiveness of deviance in society and to question the labelling of behaviors, individuals, and powerless groups as deviant. We will explore the social processes, powerful actors, and social institutions that create deviance as well as efforts to resist definitions of deviance. (Cross-listed with SOC 8136).

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor.

SOC 4140 URBAN SOCIOLOGY (3 credits)

This course examines classical and contemporary sociological theories on city formation, the urbanization process, and the interaction of society and the built environment. Topics covered include suburbanization, gentrification, residential segregation, social networks, crime, housing, city culture, and public policy. The focus is on U.S. cities with selected comparisons to other world regions. Students will also get basic knowledge and exposure to research methods to study urban areas locally. (Cross-listed with SOC 8146).

Prerequisite(s): SOC 1010 and junior standing, or permission from the instructor.

SOC 4150 AMERICAN FAMILY PROBLEMS (3 credits)

This course explores the problems and issues faced by contemporary American families, such as racism and sexism; the challenges of childhood and adolescence; divorce and remarriage; work and family conflict; and family violence. The difficulty of defining both "family" and "problems" is addressed throughout the course. (Cross-listed with SOC 8156)

Prerequisite(s): SOC 1010 and Junior standing, or permission of instructor. Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

SOC 4170 SOCIOLOGY OF FATHERHOOD (3 credits)

This course examines the existing social science research on fatherhood, exploring topics such as the evolution, history, demography, and politics of fatherhood; father involvement and its relationship to both children's and men's well-being; the effects of diversity and family structure on fatherhood; and public policy surrounding fatherhood. (Cross-listed with SOC 8176)

Prerequisite(s): SOC 1010 and junior standing, or permission of instructor. Not open to non-degree graduate students.

SOC 4180 OCCUPATIONS & CAREERS: FULFILLMENT AND CHALLENGES AT WORK (3 credits)

This course examines what makes individuals and groups happy and satisfied with their jobs, and the factors that can turn "a dead-end job" into a meaningful pursuit that lasts decades. The course utilizes a life course approach and covers early socialization experiences to retirement transitions. It also employs a sociological lens to explore how individual experiences in the work realm are affected by stratification (such as race/ethnicity, gender, sexuality, social class, and parental status) and as well as by occupational norms and structures, workplace relationships, and culture and practices at the organizational and societal levels. (Cross-listed with SOC 8186).

Prerequisite(s): SOC 1010 and junior standing, or permission of instructor

SOC 4200 SOCIOLOGY OF THE BODY (3 credits)

This course offers an overview of contemporary sociological theories of the body and uses these theories to explore substantive issues pertaining to the discourses, practices, and politics of the body in modern societies.

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor. Not open to non-degree graduate students.

SOC 4210 DISABILITY AND SOCIETY (3 credits)

This course takes a sociologically grounded but interdisciplinary look at the past, present, and potential future of disability. Along the way, competing models and theories of disability are critically explored and substantive issues pertaining to the social experiences and social responses to people with disabilities are discussed. (Cross-listed with SOC 8216)

Prerequisite(s): SOC 1010 and junior or senior standing; or permission of instructor. Not open to non-degree graduate students.

SOC 4240 SOCIAL TRANSFORMATIONS IN LATIN AMERICA (3 credits)

The course reviews the main social, economic, and political forces that have shaped Latin American societies, and the sociological theories used to understand Latin American development and underdevelopment. Race, ethnicity, gender and class in Latin America, as well as the region's position in the global economy are examined. (Cross-listed with SOC 8246, LLS 4240, LLS 8246).

Prerequisite(s): SOC 1010 and junior standing or permission of instructor
Distribution: Global Diversity General Education course

SOC 4250 RESEARCHING LATIN AMERICAN MIGRATIONS (3 credits)

In this course we will use an interdisciplinary lens to study the changes and continuities of migration in the Americas. The course starts with an overview of immigration to the Americas during the first era of mass migration (1850-1920) to explore the relevance of European migrations for national and identity constructions in the Southern Cone of America. Students then will be introduced to the impacts of social and political change on emigration flows, both regionally and beyond the region. They will also explore migration related policies at the national and regional level. We will also study the changes and continuities in the migration system of the Americas. Lastly, we will analyze the new North-South migration, as well as immigration to Latin America from Asia (recent and historical), Europe, and Africa. (Cross-listed with SOC 8256, LLS 4250, LLS 8256).

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor.

Distribution: Global Diversity General Education course

SOC 4300 SOCIOLOGY OF AGING (3 credits)

This course will introduce students to important theories and concepts in the sociological study of aging and give deeper understanding of the experiences that people encounter as they grow older, including retirement, disease and disability, and long-term care. In addition to exploring the challenges faced by older adults, this course will focus on factors that contribute to successful aging. (Cross-listed with GERO 4440, GERO 8446, SOC 8306).

SOC 4310 SOCIOLOGY OF SEXUALITIES (3 credits)

This class focuses on the social construction of sexualities - especially heterosexual sexualities, bisexual sexualities, and homosexual sexualities. A primary focus of the class will be LGBT/Queer Studies. The class examines how sexual desires/identities/orientations vary or remain the same in different places and times, and how they interact with other social and cultural phenomenon such as government, family, popular culture, scientific inquiry, and race, gender, and class. (Cross-listed with SOC 8316)

Prerequisite(s): SOC 1010 and Junior standing; or permission of the instructor. Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

SOC 4350 WORK & FAMILY (3 credits)

This course examines the contemporary problems that individuals, families and communities in the U.S. have in integrating work and family/personal life. (Cross-listed with SOC 8356)

Prerequisite(s): SOC 1010 and junior or senior standing; or permission of instructor.

SOC 4410 QUALITATIVE METHODS (3 credits)

This course familiarizes students with contemporary qualitative methodologies and techniques by which the social sciences explore social and cultural relations in natural settings. Students will conduct individual and/or group field projects. (Cross-listed with SOC 8416)

Prerequisite(s): SOC 3510 and junior standing, or permission of instructor.

SOC 4440 HUMAN CONNECTION, LONELINESS, & HEALTH (3 credits)

This course examines the "loneliness epidemic" through a sociological perspective and is based on the premise that loneliness is a public health issue, as research consistently shows it is associated with a vast array of physical and mental health outcomes. After discussing the extent of loneliness and how to define it by distinguishing it from other types of social pain, the course covers: 1) the extent and nature of loneliness and its cultural/social sources; 2) the pathways from loneliness to health outcomes; and 3) possible interventions to reduce loneliness and improve public health. (Cross-listed with SOC 8446).

Prerequisite(s): SOC 1010 and junior standing; or permission of the instructor.

SOC 4470 SOUTH AFRICA & THE SOCIO POLITICS OF APARTHEID (3 credits)

South Africa and the Socio Politics of Apartheid examines the lived experiences of South African people under the Apartheid system, and their long struggle against European colonial oppression and racial segregation throughout the 20th century. Students will examine the laws, tools, and strategies that developed and sustained Apartheid, and the anti-Apartheid movements and international pressure that led to its repeal and South African democratic elections. (Cross-listed with BLST 8476, BLST 4470, PSCI 8476, PSCI 4470, SOC 8476).

Prerequisite(s): Junior standing or permission of instructor

Distribution: Global Diversity General Education course

SOC 4550 ORGANIZATIONAL DIVERSITY AND INCLUSION (3 credits)

This course provides advanced-level knowledge of the structural understanding, assessment, analysis, and management of social diversity as well as successful inclusion strategies in the workplace. Concepts and theories dealing with structural basis of the creation of difference, consequences of difference, inclusion, affirmative action, and diversity consulting skills are fully examined in this course. This course will prepare students for successful leadership in diverse organizational environments. (Cross-listed with SOC 8556)

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor.

SOC 4620 APPLIED FORMAL ORGANIZATIONS (3 credits)

An advanced-level applied organizational sociology course that uses organizational theory, concepts, research, and practice to examine the structural bases of organizational effectiveness, efficiency, survival, and actions of organizational members. The course is designed to prepare students for organizational leadership using advanced knowledge and skills of organizational sociology. (Cross-listed with SOC 8626).

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor.

SOC 4700 WOMEN'S HEALTH AND ISSUES OF DIVERSITY (3 credits)

This course provides a critical understanding of the inter-relationship between socio-cultural, economic, and political factors and women's physical and mental health. The aim is to provide an overview of the experience with the health care system. Emphasis will be on critically examining recent scholarship from a sociological, behavioral, health policy perspective. (Cross-listed with SOC 8706, PHHB 4700, PHHB 8706)

Distribution: U.S. Diversity General Education course

SOC 4740 SOCIAL JUSTICE AND SOCIAL CHANGE (3 credits)

This course investigates the economic, political and social constraints on equality present in local, national and global arrangements. Students will gain a theoretical understanding of these conditions as well as those that lead to social change, spanning from day-to-day resistance techniques to large scale social movements. Students will participate in a service learning or applied project as they explore contemporary social justice issues and learn both theoretical and practical tools needed to become successful change makers, activists, or community organizers. Examples of social justice movements or campaigns form the basis for understanding injustice at a local, national, and global level. (Cross-listed with SOC 8746)

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor.

SOC 4760 ENVIRONMENTAL SOCIOLOGY (3 credits)

This course is an introduction to environmental sociology, a field of sociology that explores the interaction between the environment and society. Environmental sociologists consider how political, social, and economic factors have come to shape our patterns of interaction with the natural and built environment. Students will be expected to use the sociological perspective to understand the landscape of environmental problems, focusing on such issues as environment and health, disaster, environmental policy, climate change, environmental risk, human and animal interactions, sustainability, environmental justice and social movements. (Cross-listed with SOC 8766).

Prerequisite(s): SOC 1010 and junior standing or permission of instructor

SOC 4770 POLITICAL SOCIOLOGY (3 credits)

This course explores political sociology, focusing on political processes and power. Political sociologists investigate relationships between political institutions and various other institutions, including but not limited to the economy, education, media, and religion, and the impacts that these relationships have on society and the individuals that comprise the society. This course will explore the concepts, theories, and knowledge that comprise this field such as power, legitimacy, the state, networks, stratification, and collective action. (Cross-listed with PSCI 4770, PSCI 8776, SOC 8776).

Prerequisite(s): SOC 1010, junior standing or permission from instructor

SOC 4780 URBAN LATIN AMERICA (3 credits)

This course examines the experience of Latin American urbanization, attending to its contributions to urban sociology, social movements, and policymaking. Topics include urban transitions (e.g. pre-Hispanic to colonial, post-colonial to industrial, and the neoliberal turn), socio-spatial configurations (e.g. plazas, squatter settlements), urban marginality debates, urban politics, and planning as well as governance innovations (e.g. bus rapid transit systems, participatory budgeting). Students will compare city case studies across the region and to urban life in the United States. (Cross-listed with SOC 8786, LLS 4780, LLS 8786, CACT 8186).

Prerequisite(s): SOC 1010 and junior standing or permission of instructor

Distribution: Global Diversity General Education course

SOC 4800 CONTEMPORARY TOPICS IN SOCIOLOGY (3 credits)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 8806)

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor.

SOC 4830 SOCIOLOGY OF MENTAL HEALTH & ILLNESS (3 credits)

This course will apply the sociological perspective to various topics regarding mental health and illness. The course will cover topics such as the social construction of mental illness, the social epidemiology of mental illness, labeling and stigma of those with a mental illness, and mental health policy/treatment. (Cross-listed with SOC 8836)

Prerequisite(s): SOC 1010, and junior standing; or permission of the instructor.

SOC 4850 SOCIOLOGY OF RELIGION (3 credits)

This course looks at religion as a social and cultural phenomenon, examining how religious beliefs, practices, institutions and movements shape and are shaped by their social context. Topics include: sociological theories and explanations of religion and spirituality; definitions of religion and the distinction between religion and other ideologies or worldviews; the measurement of religiosity and the scientific study of religion; trends in religiosity, spirituality, and the religious landscape historically and globally; sociological insights gained from the study of new religions, secularization, fundamentalism, and other issues related to contemporary religious experience. (Cross-listed with SOC 8856)

Prerequisite(s): SOC 1010 or permission of instructor.

SOC 4880 CONTEMPORARY TOPICS IN SOCIOLOGY (1 credit)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 8886).

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor.

SOC 4890 CONTEMPORARY TOPICS IN SOCIOLOGY (2 credits)

This course reviews research and writing in an area of current interest in the field of sociology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with SOC 8896).

Prerequisite(s): SOC 1010 and junior standing; or permission of instructor.

SOC 4900 SENIOR THESIS (4 credits)

This is a capstone research and writing course designed for Sociology majors who are in their senior year. The major purpose of the course is to produce an original thesis of 20-25 pages, which will be developed through a series of assignments. Students will choose their own thesis topics with the purpose of reflecting on and synthesizing knowledge about sociological concepts, theories, and research methods. This course meets the University requirement of a third writing course.

Prerequisite(s): SOC 1010, 2120, 2130, 2134, 3510, 3514, Sociology major, and senior standing; or permission of instructor. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

SOC 4910 INTERNSHIP IN SOCIOLOGY (1-3 credits)

This course offers students an opportunity to experience sociology and/or anthropology through direct involvement in non-profit, for profit, government, or other organization. The host organization must be approved in advance in consultation with the internship coordinator. This course may be repeated for a maximum of six credit hours.

Prerequisite(s): Senior standing and permission of instructor.

SOC 4990 INDEPENDENT STUDY IN SOCIOLOGY (1-3 credits)

Guided readings and/or independent research in a special sociological topic under the supervision of a Sociology faculty member. A formal contract specifying the nature of the work to be completed must be signed before enrolling in the course. May be taken for a maximum of six hours.

Prerequisite(s): Permission of instructor. Not open to non-degree graduate students.

Spanish (SPAN)

Spanish Undergraduate Courses

SPAN 1010 LINGUISTIC DIVERSITY IN US MEDIA (3 credits)

Delivered in English, this course introduces students to diversity in the US using language in context as points of departure. In this course, we analyze the intersection between language and ideological constructions (e.g., the objectification of Latino women, discrimination and stereotypes toward Asian peoples) and examine nodes of social meaning through visual and audio representations of language, as consumed in music, tv series, art (e.g., street art, installations) and social media. Departing from a US-centric and an assimilative approach, the course provides a historical and geographic lens through which these languages exist in the United States. (Cross-listed with WLL 1000, FREN 1010, JAPN 1020, GERM 1010).

Distribution: U.S. Diversity General Education course and Humanities and Fine Arts General Education course

SPAN 1100 ELEMENTARY SPANISH I FOR HEALTHCARE PROFESSIONALS (5 credits)

Spanish 1100 presents an introduction to the Spanish language and fosters the mastery of all linguistic skills; i.e., speaking, listening, reading, and writing, via a communicative approach. It also promotes an understanding of the target language's culture with an emphasis on sociocultural issues relevant to healthcare services.

SPAN 1110 ELEMENTARY SPANISH I (5 credits)

Elementary Spanish I emphasizes the mastery of all four language skills (speaking, listening, reading, and writing) and introduces cultural topics from across the Spanish-speaking world.

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

SPAN 1120 ELEMENTARY SPANISH II (5 credits)

Spanish 1120 is the second course in the 16-hour Arts and Sciences Foreign Language requirement. It is communicative in approach and emphasizes the mastery of all language skills including speaking, listening, reading, and writing.

Prerequisite(s): SPAN 1110 with a grade of C- or better, or placement by department diagnostic exam. Department permission is needed for transfer credit.

SPAN 1140 INTRODUCTION TO SPANISH FOR HEALTH SCIENCES (1 credit)

This course introduces students in the Spanish for Health Sciences concentration to fundamental topics that emerge from the intersection between healthcare and the Spanish language. These topics include: language diversity; language policy in the US; and historical and sociocultural factors that prevent access to care.

SPAN 1200 ELEMENTARY SPANISH 2 HEALTHCARE PROFESSIONALS (5 credits)

Spanish 1200 is built on the content introduced in Spanish 1100 and presents to students more complex communicative tasks that are typical of the interactions between patient/client and healthcare providers. The course fosters the mastery of all linguistic skills; i.e., speaking, listening, reading, and writing, via a communicative approach. It also promotes an understanding of the target language's culture with an emphasis on sociocultural issues relevant to healthcare services.

Prerequisite(s): SPAN 1110 or SPAN 1100 with a grade of C- or better, or placement by department diagnostic exam. Department permission is needed for transfer credit.

SPAN 1210 SPANISH FOR BEGINNERS I (3 credits)

Spanish 1210 helps you prepare for the moments when Google Translate fails and your Spanish-speaking friend is talking way too fast! In this course, you'll learn to handle real-life situations - like ordering tacos, getting lost in a new city, or finally understanding what your favorite song lyrics actually mean from a new cultural perspective. Because life doesn't come with subtitles, we'll focus on building all language skills, including speaking, listening, reading, and writing skills so you can confidently dive into the Spanish-speaking world. Get ready to mispronounce words, laugh at yourself, and walk away knowing a whole lot more than just "hola."

Distribution: Global Diversity General Education course and Humanities and Fine Arts General Education course

SPAN 2110 INTERMEDIATE SPANISH I (3 credits)

Spanish 2110 is the third course in the 16-hour Arts and Sciences Foreign Language requirement. It is communicative in approach and emphasizes the mastery of all language skills including speaking, listening, reading, and writing.

Prerequisite(s): SPAN 1120 with a grade of C- or better, or placement by department diagnostic exam. Department permission is needed for transfer credit.

SPAN 2120 INTERMEDIATE SPANISH II (3 credits)

Spanish 2120 is the fourth course in the 16-hour Arts and Sciences Foreign Language requirement. It is communicative in approach and emphasizes the mastery of all language skills including speaking, listening, reading, and writing.

Prerequisite(s): SPAN 2110 with a grade of C- or better, or placement by department diagnostic exam. Department permission is needed for transfer credit.

SPAN 2130 ACCELERATED SECOND-YEAR SPANISH (6 credits)

This accelerated course combines the content of Intermediate Spanish I and Intermediate Spanish II. It is communicative in approach and emphasizes the mastery of all language skills including speaking, listening, reading, and writing. Successful completion of this course fulfills the College of Arts and Sciences foreign language requirement. The entire course must be completed to receive credit.

Prerequisite(s): SPAN 1120 or placement by Department of Foreign Languages diagnostic examination. Department permission is needed for transfer credit.

SPAN 2150 INTRODUCTION TO HISPANIC LITERATURES AND CULTURES (3 credits)

In this course, students become acquainted with canonical texts within the Spanish and Spanish American literary traditions. The course focuses on developing reading and writing skills, and on helping students distinguish between literal and metaphorical meanings, which serves as a preparation for the development of more advanced interpretive skills.

Prerequisite(s): Placement exam results or advisor permission

SPAN 2300 INTERMEDIATE SPANISH I FOR HEALTHCARE PROFESSIONALS (3 credits)

The course integrates and refines learners' Spanish competencies, and allows students to apply them to real-life situations in the healthcare field. As such, this course enhances all linguistic skills, with a focus on the issues of register, dialect, and culturally appropriate vocabulary in the healthcare context. Also, the course fosters control and ease of speaking and listening; reading and writing are approached within the context of health literacy.

Prerequisite(s): SPAN 1110 & SPAN 1120 or SPAN 1100 & SPAN 1200; or enrollment via placement exam

SPAN 3010 SPANISH FOR HERITAGE SPEAKERS I (3 credits)

This course is designed to offer Spanish-speaking students an opportunity to study Spanish in an academic setting. Students will acquire Spanish literacy skills, develop their academic language skills in Spanish, and learn more about the Spanish language and their cultural heritage.

Prerequisite(s): Placement exam results or adviser permission

SPAN 3020 SPANISH FOR HERITAGE SPEAKERS II (3 credits)

This course will continue to build upon the Spanish language skills students have covered in Spanish for Heritage Speakers I. Students will develop strategic academic vocabulary, learn to critically analyze a text, produce a variety of written texts, and acquire new information in different academic content areas.

Prerequisite(s): SPAN 3010 or adviser permission

SPAN 3030 SPANISH CONVERSATION (3 credits)

Practice in a variety of conversational situations and levels.

Prerequisite(s): SPAN 2120 or SPAN 2130 or placement by Department of Foreign Languages diagnostic examination, or departmental permission. The course is for second-language learners. Heritage and native students should not enroll.

SPAN 3040 SPANISH GRAMMAR AND COMPOSITION (3 credits)

Review of grammatical principles and practice in written composition.

Prerequisite(s): SPAN 2120 or SPAN 2130 or placement by Department of Foreign Languages diagnostic examination, or departmental permission. The course is for second-language learners. Heritage and native students should not enroll.

SPAN 3050 LATIN AMERICA IN CONTEXT: HEALTH, BUSINESS, ENVIRONMENT, AND SOCIETY THROUGH ORAL PRACTICE (3 credits)

This course focuses on the development and intensive practice of oral expression in Spanish, and is intended for students interested in the fields of business, health, education, environmental sciences, social work, and cultural studies, who are either heritage speakers of Spanish or who are completing a major/minor in Spanish. The class provides a broad context of current relevant issues in Latin America, including politics and society; the state of the economy after decades of neoliberalism; racism; indigenous and Afro-descendant identities; domestic and gender violence; health and disabilities; adult, youth, & child immigration; and ecology and the environment. (Cross-listed with LLS 3050).

Prerequisite(s): SPAN 3010 or SPAN 3030

SPAN 3060 READINGS IN SPANISH (3 credits)

This course aims to increase students' fluency in reading and to develop comprehension skills that will help them in advanced language studies. The course will also enrich students' vocabulary through the use of a variety of primary sources; many genres will be sampled.

Prerequisite(s): SPAN 2120 or SPAN 2130. Not open to non-degree graduate students.

SPAN 3070 SPECIAL TOPICS IN SPANISH (3 credits)

This seminar-style course offers an in-depth exploration of selected themes in Spanish language and culture. The course content will vary each semester, focusing on a specific area of study, e.g., food and identity; music and politics; tourism and hospitality. Students will engage with primary texts, critical discussions, and multimedia resources to develop analytical skills and a deeper appreciation of the cultural and linguistic richness of the Spanish-speaking world. The course is taught in Spanish.

Prerequisite(s): SPAN 3010 or SPAN 3030

SPAN 3170 SURVEY OF SPANISH LITERATURE I (3 credits)

Introduction to the principal authors and works of Spanish literature from El Cid to the 17th century.

Prerequisite(s): SPAN 3030, SPAN 3040, or departmental permission. Not open to non-degree graduate students.

SPAN 3180 INTRODUCTION TO SPANISH LITERATURE (3 credits)

Spanish 3180, Introduction to Spanish Literature, aims to familiarize students with the most important writers and literary movements from the 18th to the 21st centuries, giving an overview of the history, society and culture of these times. This course will also focus on the continued development of students' listening, speaking, reading, and essay skills. In pursuit of these goals, students will have the opportunity to read not only the specific texts but critical and introductory articles that will help them situate themselves within this particular historical and literary context. Students will also have to write essays, take tests, and develop their critical skills.

Prerequisite(s): SPAN 3010 or SPAN 3030 and SPAN 3060 or departmental permission.

SPAN 3310 SUSTAINABILITY AND THE ENVIRONMENT IN THE SPANISH-SPEAKING WORLD (3 credits)

This course presents a broad, interdisciplinary introduction to some of the most pressing environmental and ecological problems in various parts of the Spanish-speaking world, as well as some of the ways in which such problems are being addressed at different levels to promote social and ecological sustainability (locally, nationally, regionally, and globally). The Spanish-speaking world, also known as the Hispanosphere, encompasses the following geographical areas: Spain, Hispanic America, Equatorial Guinea, and portions of the United States. In addition, the course explores some of the ways in which these topics have been represented through a variety of genres, such as documentaries, fiction films, comics, narrative texts, poetry, and essays. Finally, the course also focuses on the continued development of Spanish language skills, such as the acquisition of specialized vocabulary, formal and informal essay writing, presentational speaking skills, advanced reading, and the analysis of film and other media. (Cross-listed with ENVN 3310).

Prerequisite(s): SPAN 3030 or SPAN 3010, SPAN 3040 or SPAN 3020, and SPAN 3060.

SPAN 3350 STORYTELLING IN SHORT STORIES (3 credits)

The aim of this course is for students to get acquainted with storytelling, cultures, and traditions of different Hispanic nations through the reading and listening of short stories. Through short stories, the course will present a broad and interdisciplinary approach to the most important authors and issues concerning today's world, including education, the environment, law, the workplace, gender and race relations, and political and military conflicts in Spanish-speaking countries. Besides learning about current Hispanic and Latino/a literary authors, students will focus on the development of oral skills in Spanish. They will understand and explore ways to communicate clearly and in an informed manner about current issues, while also developing an understanding of the way of thinking of a variety of people from a multidisciplinary perspective.

Prerequisite(s): SPAN 3030 or SPAN 3010 and SPAN 3060

SPAN 3410 SPANISH CIVILIZATION (3 credits)

History, geography, national economy, politics, society, education, art, music and literature of Spain.

Prerequisite(s): SPAN 3030 or SPAN 3010, SPAN 3040 or SPAN 3020, and SPAN 3060.

SPAN 3420 LATIN AMERICAN CIVILIZATION (3 credits)

What do we know about Latin American culture, geography, politics and languages? How has Latin America been imagined from the United States? Does it make sense to think of Latin America as one space brought together by a similar history or is it better to imagine it as twenty particular countries with intersecting pasts and futures? This course will attempt to answer these questions by introducing you to a number of key topics and debates common to contemporary Latin American culture, including issues such as democracy, class, race/ethnicity, gender/sexuality, religion, family and globalization. (Cross-listed with LLS 3420).

Prerequisite(s): SPAN 3030 or SPAN 3010

SPAN 3510 SPANISH PHONETICS AND PHONOLOGY (3 credits)

Introduction to basic concepts in phonetics and phonology, and intensive practice in Spanish pronunciation.

Prerequisite(s): SPAN 3030 or SPAN 3040. Not open to non-degree graduate students.

SPAN 3570 SPANISH FOR HEALTHCARE PROFESSIONALS (3 credits)

Spanish for Healthcare Professionals provides an introduction of specialized communication in the healthcare context. Course objectives include the development of essential informal and formal vocabulary and expressions, and sociocultural competencies necessary for successful interaction with patients and other healthcare providers.

Prerequisite(s): SPAN 3030 or SPAN 3010

SPAN 3580 BUSINESS SPANISH (3 credits)

An introduction to the Spanish business world. Students will acquire the necessary skills and strategies to understand the differences in business practices and cultures between the US and Spanish-speaking countries. No prior business knowledge is required.

Prerequisite(s): SPAN 3030 and SPAN 3040 or SPAN 3010 and SPAN 3020, or permission from a Spanish advisor.

SPAN 4020 LANGUAGE ENHANCEMENT THROUGH VOCABULARY LEARNING (3 credits)

This class aims to expand students' vocabulary in Spanish. This will be achieved through doing an overview of current research that investigates how vocabulary is learned; identifying effective vocabulary learning strategies; and exploring topics not commonly encountered in Spanish classes such as commerce and science. The course also includes points of contact with the Spanish-speaking community in Omaha, where students can participate in interactions that connect what has been learned in the classroom to language use in real life. (Cross-listed with SPAN 8026).

Prerequisite(s): SPAN 3030, SPAN 3040, and SPAN 3060 OR SPAN 3010, SPAN 3020, and SPAN 3060

SPAN 4030 ADVANCED SPANISH CONVERSATION (3 credits)

This course targets the development of oral skills in Spanish through the incorporation of complex and sophisticated conversational structures and nuanced lexicon. In particular, the course focuses on presentational (i.e., expressing or exposing ideas or opinions), and interpersonal speaking (i.e., engaging in conversation where learners narrate and describe in the major time frames of past, present, and future in paragraph-length discourse with control of aspect). (Cross-listed with SPAN 8036)

Prerequisite(s): SPAN 3030 or SPAN 3010 or departmental permission

SPAN 4040 ADVANCED COMPOSITION AND STYLISTICS (3 credits)

In this capstone course, required for the completion of the major, learners will explore and practice advanced grammatical structures, write compositions in a variety of genres, and familiarize themselves with advanced stylistics. (Cross-listed with SPAN 8046).

Prerequisite(s): SPAN 3030 or SPAN 3010, SPAN 3040 or SPAN 3020 and SPAN 3060; Majors only, senior standing. Not open to non-degree graduate students.

Distribution: Writing in the Discipline Single Course

SPAN 4060 INTRODUCTION TO TRANSLATION AND INTERPRETATION (3 credits)

This course offers an introduction to the translation and interpretation field. Course objectives include (a) understanding translation theory; (b) comprehending the role of communication in translation and interpretation; (c) targeting common grammatical and pragmatic errors; (d) increasing vocabulary knowledge in a variety of fields; and (e) gaining an increased awareness of the rigor and demands innate to the translation and interpretation fields. (Cross-listed with SPAN 8066).

Prerequisite(s): SPAN 3030 or SPAN 3010 or SPAN 3570 and declared minor in Spanish for Health Sciences or SPAN 3050 and declared minor in Spanish for Health Sciences

SPAN 4070 HISPANIC BILINGUALISM (3 credits)

This course explores bilingualism among Spanish speaking populations. Topics include societal bilingualism, the history of Spanish and language policy in Spain, Latin America, and the U.S., psychological aspects of bilingualism, monolingual vs. bilingual acquisition, first vs second language acquisition, and Spanish as a heritage language in the U.S. (Cross-listed with SPAN 8076).

Prerequisite(s): SPAN 3030, SPAN 3040, SPAN 3060 or SPAN 3010, SPAN 3020, SPAN 3060 and SPAN 4080 or instructor permission

SPAN 4080 INTRODUCTION TO HISPANIC LINGUISTICS (3 credits)

This course introduces students to the field of linguistics by exploring the following areas: phonetics and phonology (sound systems), morphology (word formation), historical linguistics (language development over time), and sociolinguistics and pragmatics (language in society and context), among others, as framed within the study of the Spanish language. (Cross-listed with SPAN 8086).

Prerequisite(s): SPAN 3030 and SPAN 3040 OR SPAN 3010 and SPAN 3020

SPAN 4120 HISPANIC SOCIOLINGUISTICS (3 credits)

This course introduces sociolinguistics, the study of the relationship between language and society, with an emphasis on the Spanish language. Its focus will be on correlational linguistics (how social factors such as age, gender and socioeconomic status affect language) and language and society (the role language plays in human conduct and social organization). Course topics will include the concept of speech communities, sociolinguistic variables, phonological and syntactic variation as well as languages in contact, bilingualism, Spanish in the U.S., Spanish as a heritage language, and language attitudes and ideologies. (Cross-listed with SPAN 8126).

Prerequisite(s): SPAN 3030 or SPAN 3010, SPAN 3040 or SPAN 3020, SPAN 3060 and SPAN 4080 or instructor permission

SPAN 4130 SPANISH IN THE UNITED STATES (3 credits)

This course looks at Spanish in the U.S. from a sociolinguistic perspective. Course topics include: Dialectal/regional differences, dialect contact, Spanish- English bilingualism and code-switching, "Spanglish", language maintenance, language ideologies surrounding Spanish in the U.S., and Spanish in public spheres (e.g., TV, movies, radio, music, stand-up comedy). (Cross-listed with SPAN 8136).

Prerequisite(s): SPAN 3030 or SPAN 3010 or instructor permission or SPAN 3570 and declared minor in Spanish for Health Sciences or SPAN 3050 and declared minor in Spanish for Health Sciences

SPAN 4140 INTRODUCTION TO LATIN AMERICAN FILM (3 credits)

The course will be a thematic study of significant Latin American films emphasizing and further investigating their relationship to history, culture, society and political issues that have often given rise to social movements. Films from a variety of Spanish-speaking countries including Mexico, Argentina, Chile, Cuba, Bolivia, etc. will be studied in their socio-political context. At the 8146 level, students will be introduced to theoretical approaches such as early film theory, montage theory, feminist theory, race theory, and phenomenological film theory in order to deepen their understanding these themes. (Cross-listed with SPAN 8146, LLS 4140).

Prerequisite(s): SPAN 3030 or SPAN 3010, SPAN 3040 or SPAN 3020, SPAN 3060

SPAN 4150 LITERATURE/CULTURE: CENTRAL AMERICA AND THE CARIBBEAN 1898-2000 (3 credits)

"Literature/ Culture: Central America and the Caribbean 1898- 2000" studies major historical and socio-cultural events in Latin American history in the 20th century, through their articulation in literary texts, film, and other cultural expressions from Central America and the Hispanic Caribbean. (Cross-listed with SPAN 8156, CACT 8416)

Prerequisite(s): SPAN 3030, SPAN 3040 and SPAN 3060 or permission of instructor

SPAN 4170 INTRODUCTION TO LATIN AMERICAN LITERATURES (3 credits)

The course is intended as an introduction to the study of canonical and non-canonical texts in Latin American literatures, from the 16th to 21st centuries. It seeks to acquaint students with the rich literary traditions of a large region, from South America to Central America and Mexico, as well as with the historical challenges posed by the salient heterogeneity of texts included in the Latin American corpus, from the standpoint of ethnicity, gender, social class, and literary genre. The course also focuses on continuing to develop Spanish language skills, specifically reading for comprehension and interpretation of metaphorical meaning, writing, and presentational speaking skills in Spanish. (Cross-listed with SPAN 8176, LLS 4170).

Prerequisite(s): SPAN 3030, SPAN 3040, or SPAN 3010, SPAN 3020; SPAN 3060.

SPAN 4190 REPRESENTATIONS OF THE SPANISH CIVIL WAR IN FILM AND POPULAR CULTURE (3 credits)

This course explores the principal social, economic, political, and cultural implications of the Spanish Civil War, including its antecedents and consequences, in order to critically analyze the ways in which such historical matters have been represented over time through film, as well as through other media. The course also focuses on the continued development of Spanish language skills, such as formal and informal essay writing, presentational speaking skills in Spanish, advanced reading, and interpretation of film theory and criticism. (Cross-listed with SPAN 8196).

Prerequisite(s): SPAN 3030, SPAN 3040, and SPAN 3060

SPAN 4220 THE STRUCTURE OF SPANISH (3 credits)

This course introduces students to the structure of the Spanish language with a focus on its morphology and syntax as seen in the study of constituents of a sentence, lexical categories, content and function words, the pronominal system, the structure of simple and complex sentences, and the verbal system, among others. It reviews frequent syntactical errors in Spanish L2 and Heritage learners with the purpose of advancing their linguistic competence. (Cross-listed with SPAN 8226).

Prerequisite(s): SPAN 3030 and 3040 or SPAN 3010 and SPAN 3020

SPAN 4330 LINGUISTIC JUSTICE AND LATINO HEALTH (3 credits)

Language barriers compromise the quality of health care for millions of Spanish-speaking patients each year. Spanish-speaking patients, for example, have disease (e.g., musculoskeletal diseases, pesticide poisoning, cervical cancer, HIV/AIDS), mortality, and pain burdens at least twice as high as English-speaking patients. At the same time, they have been disproportionately affected by infectious diseases such as the tuberculosis outbreaks or the COVID-19 pandemic. These facts make language a crucial concern for the improvement of health among Latinos in the US. Students in this course examine the relationship between language, health care, and health among Spanish speakers in the US through the dual lens of sociolinguistics and public health. We consider the effect of linguistic and discursive practices on access to health information and examine some of the measures currently in place to improve the transmission of health information across language boundaries. (Cross-listed with SPAN 8336).

Prerequisite(s): Instructor permission

SPAN 4510 ILLNESS AND DISEASE IN SOUTHERN CONE LATIN AMERICAN LITERATURES AND CULTURES (3 credits)

The course will examine representations of illness, disease, and affections in literary and cultural texts from the Latin American Southern Cone, focusing in Argentina, Uruguay, and Chile. It will explore notions of health and disease, as embedded in literary and cultural texts from the late 19th to the 21st centuries. We will examine the ways in which physical ailments, mental health symptoms, and other conditions or disorders have been conceptualized and portrayed, co-relating the individual "disruptions" caused by unwellness with a host of social and cultural factors. The course will also explore current treatments and therapies for the illnesses discussed in the texts, taking into account the integration of western and alternative medicine and practices. (Cross-listed with SPAN 8516, LLS 4510, LLS 8516). **Prerequisite(s):** SPAN 3010 and SPAN 3020 or SPAN 3030 and SPAN 3040 or SPAN 3050 and declared minor in Spanish for Health Sciences or SPAN 3570 and declared minor in Spanish for Health Sciences or special permission from instructor.

SPAN 4530 DIALECTS OF THE SPANISH-SPEAKING WORLD (3 credits)

This course explores the diversity and variation of the various dialects within the Spanish-speaking world. Special attention will be devoted to understanding phonetic and phonological processes that make up these dialects. Students will increase their familiarity with the diversity of the Spanish-speaking world and the complexity of the relationship between languages and dialects. Through the course, students will employ data-collection skills and methods commonly used in the field of linguistics. Course will be conducted in Spanish. (Cross-listed with SPAN 8536).

Prerequisite(s): SPAN 3030 or SPAN 3010, SPAN 3040 or SPAN 3020, SPAN 3060 and SPAN 4080 or instructor permission

SPAN 4540 THE LANGUAGE OF REGGAETÓN: RACE, GENDER & CARIBBEAN FLOWS (3 credits)

This course applies theories and methods from the field of linguistics to the analysis of reggaetón and its surrounding cultural practices. It explores ties between language, race, gender, sexuality, and latinidad as connected to this musical form. This course involves a deep-dive into this Afro-Latino genre, which has evolved from its origins in Puerto Rico and Panamá - including its roots in West Africa, Jamaica, and other locals within the Black diaspora - to a global musical phenomenon. Students will analyze "El Movimiento" through various levels of linguistic and social analysis: structural linguistics (phonetics, phonology, morphosyntax, lexicography, etc.), discourse analysis, sociocultural and linguistic anthropology, critical race theory, and feminist & queer theory. (Cross-listed with SPAN 8546).

Prerequisite(s): SPAN 3030 or SPAN 3010, SPAN 3040 or SPAN 3020, SPAN 3060 or instructor permission

SPAN 4760 FORENSIC LINGUISTICS (3 credits)

This course will present an overview of forensic linguistics with an emphasis on the areas where linguistics (i.e., the study of language and its structures) and the law intersect. We will especially focus on these items: the nature of legal language, linguistic methods for determining the meaning of laws and statutes, types of linguistic analysis used for investigating deception and fraud, language used for profiling and identifying suspects in criminal cases, the relationship between language proficiency and defendants' ability to understand their rights, the legal and linguistic complexities of invoking one's rights, the language-related factors that lead to false confessions, the role of linguistic analysis in civil cases, and the challenges faced by court interpreters and other linguistic complexities of the courtroom. (Cross-listed with SPAN 8766).

SPAN 4800 INTERNSHIP FOR LANGUAGE IN CONTEXT (3 credits)

This course provides students with practical, hands-on experience in a professional setting related to their language studies. This course offers an opportunity for students to apply their language skills in real-world contexts while gaining valuable insights into various industries, organizations, or institutions. (Cross-listed with WLL 4800).

Prerequisite(s): Instructor permission. Not open to non-degree graduate students.

SPAN 4900 INDEPENDENT STUDY (1-3 credits)

Specially planned readings in a well-defined field of literature or linguistics carried out under the supervision of a member of the foreign language faculty. As independent study courses are intended to enrich a student's regular academic program, they may not be taken as substitutes for scheduled classroom courses of the same nature, nor should they be taken by majors or minors in the department prior to fulfilling required course work..

Prerequisite(s): Senior status, no incompletes outstanding, and departmental permission.

SPAN 4950 PRO-SEMINAR: LITERATURE AND/OR FILM (3 credits)

This course is dedicated to the study of a narrower field of the literature and/or cinema of the Spanish-speaking world. (Cross-listed with SPAN 8956)

Prerequisite(s): SPAN 3030, SPAN 3040, and SPAN 3060

SPAN 4960 PRO-SEMINAR: CULTURE AND SOCIETY (3 credits)

This course will address a narrow field of study of the civilization, history, film, contemporary culture, art, politics, and/or cultural studies of the Spanish-speaking world. (Cross-listed with SPAN 8966)

Prerequisite(s): SPAN 3030 or SPAN 3010 or SPAN 3570 and enrolled in Spanish for Health Sciences minor or SPAN 3050 and enrolled in Spanish for Health Sciences minor

SPAN 4970 PRO-SEMINAR: LINGUISTICS AND LANGUAGE FOR THE PROFESSIONS (3 credits)

This course addresses a narrow field of study in linguistics or the professional language of the Spanish-speaking world. (Cross-listed with SPAN 8976)

Prerequisite(s): SPAN 3030 or SPAN 3010 or SPAN 3570 and enrolled in Spanish for Health Sciences minor or SPAN 3050 and enrolled in Spanish for Health Sciences minor

Special Education & Communication Disorders (SPED)

Special Education & Communication Disorders Undergraduate Courses

SPED 1110 AMERICAN SIGN LANGUAGE I (3 credits)

This is the introductory course in a five-course series teaching American Sign Language. The focus will be on conversational skills and a basic understanding of the Deaf community within a cultural context. Expressive and receptive vocabulary and grammar skills will be fostered through interactive class activities.

Prerequisite(s): co-requisite SPED 1114 ASL Lab

SPED 1114 AMERICAN SIGN LANGUAGE I LAB (1 credit)

This is the co-requisite lab course for SPED 1110, American Sign Language I. Students will meet weekly in the ASL Lab interacting in a small group setting with a Deaf mentor.

Prerequisite(s): Co-requisite: SPED 1110

SPED 1120 AMERICAN SIGN LANGUAGE II (3 credits)

This is the second course in a five course series teaching American Sign Language. Candidates will continue to develop the use of body language/ mime, basic sentence types, manual alphabet, manual numbers/number systems, and intermediate vocabulary.

Prerequisite(s): SPED 1110 and SPED 1114 with a grade of C or higher; 2.5 minimum GPA; Co-requisite: SPED 1124

SPED 1124 AMERICAN SIGN LANGUAGE II LAB (1 credit)

This is the co-requisite lab course for SPED 1120, American Sign Language II. Students will meet weekly in the ASL Lab interacting in a small group setting with a Deaf mentor.

Prerequisite(s): Minimum 2.5 GPA; SPED 1110 and SPED 1114 with a grade of C or higher; Co-requisite: SPED 1120.

SPED 1500 INTRODUCTION TO SPECIAL EDUCATION (3 credits)

This course is designed to help students explore issues and perspectives related to children, adolescents, and young adults with a variety of ability and disability experiences. It provides an introduction to the historical factors, legislation, terminology, etiology, characteristics that are commonly encountered when addressing the needs of diverse students with disabilities ranging from mild, moderate to severe.

Prerequisite(s): Not open to non-degree graduate students.

Distribution: Social Science General Education course and U.S. Diversity General Education course

SPED 2100 PROFESSIONALISM & ETHICS OF INTERPRETING (3 credits)

This survey course provides an introduction to the profession and ethics of sign language interpreting. The student learns what is expected of an interpreter (roles, functions, responsibilities) and applies this knowledge to a variety of settings. Information about the history of the profession, professional organizations, and settings where interpreters work is presented. Students will be introduced to Demand/Control Schema as a foundation for assessment ethical scenarios.

Prerequisite(s): Minimum 2.75 GPA and/or special permission from the instructor.

SPED 2110 AMERICAN SIGN LANGUAGE III (3 credits)

This course is a continuation and elaboration on ASL I and ASL II. Proper ASL vocabulary, syntax, semantics, and pragmatics will be expanded both receptively and expressively. This course provides exposure to idiomatic language through conversation, narration, and storytelling.

Prerequisite(s): Minimum 2.5 GPA; SPED 1120 and SPED 1124 with a grade of C or higher; co-requisite: SPED 2114.

SPED 2114 AMERICAN SIGN LANGUAGE III LAB (1 credit)

This is the co-requisite lab course for SPED 2110, American Sign Language III. Students will meet weekly in the ASL Lab interacting in a small group setting with a Deaf mentor.

Prerequisite(s): Minimum 2.5 GPA; SPED 1120 and SPED 1124 with a grade of C or higher; co-requisite: SPED 2110.

SPED 2120 AMERICAN SIGN LANGUAGE IV (3 credits)

This is the fourth course in the five-course series of American Sign Language. Proper ASL vocabulary, syntax, semantics, and pragmatics will be expanded both receptively and expressively. This course will increase students' competence using ASL through conversation, narration, and storytelling with additional awareness of cultural behaviors, rules of discourse and dialectal variations in ASL.

Prerequisite(s): Minimum 2.5 GPA; SPED 2110 and SPED 2114 with a grade of C or higher; co-requisite: SPED 2124.

SPED 2124 AMERICAN SIGN LANGUAGE IV LAB (1 credit)

This is the co-requisite lab course for SPED 2120, American Sign Language IV. Students will meet weekly in the ASL Lab interacting in a small group setting with a Deaf mentor.

Prerequisite(s): Prerequisites: minimum 2.5 GPA; SPED 2110 and SPED 2114 with a grade of C or higher. Corequisite: SPED 2120

SPED 2200 DEAF STUDIES (3 credits)

This is an introductory course which surveys historical, psychological, and sociological aspects of deafness. This course introduces students to aspects of Deaf Culture and the Deaf Community. It will also examine current issues and trends and future directions in the education of children who are deaf or hard of hearing. Basic concepts, theories, research, and philosophical debates are explored through assigned readings, independent work, and classroom activities.

Prerequisite(s): Minimum 2.75 GPA.

Distribution: U.S. Diversity General Education course

SPED 2300 SPECIAL EDUCATION LAW & INDIVIDUAL EDUCATION PROGRAMS (3 credits)

This course provides an overview of special education policy and law with an emphasis on components of individual education programs (IEPs), the special education referral process, and preparing for IEP meetings. Content knowledge will include IEP components and their function. Students will apply this knowledge to IEP component writing and development practice.

Prerequisite(s): SPED 1500

SPED 2550 HEALTH AND WELL-BEING OF INFANTS AND TODDLERS (3 credits)

This course is designed to help students gain knowledge and skills that will enable them to design curricula, create supportive environments, and provide effective learning opportunities to promote the healthy development of infants and young children. There will be an emphasis on effective and culturally responsive collaboration with families and caregivers. This course includes a field experience in programs that serve infants/toddlers and their families.

Prerequisite(s): Admission to Teacher Preparation Program and TED 2250. Not open to non-degree graduate students.

SPED 3000 SPECIAL STUDIES (1-3 credits)

This course is designed to allow candidates to pursue independent study of a topic under the direction and guidance of a faculty member. Topics studied and the nature of the learning activities is mutually agreed upon by the candidate and instructor.

Prerequisite(s): Permission by instructor

SPED 3020 EFFECTIVE DATA COLLECTION FOR INSTRUCTIONAL DECISIONS IN SPECIAL EDUCATION (3 credits)

This is a course on formal and informal assessment for Special Education. Candidates will learn how to collect assessment data to be used for data based decision making.

Prerequisite(s): SPED 1500 and TED 2400, Co-requisite SPED 4640 & SPED 4000 and 2.75 NU GPA.

SPED 3100 ENGLISH/ASL COMPARATIVE LINGUISTICS (3 credits)

This course offers a study of the fundamental concepts of linguistics and its application to the study of American Sign Language. Candidates will compare and contrasting English and American Sign Language structure. Focus will be on the fundamental areas of linguistic inquiry, which include phonology, morphology, syntax, semantics, and the use of language. Using current research, candidates will begin to think critically about the structure of ASL and its recognition as a language. Candidates will be expected to translate between English and signed languages to deepen understanding the study of linguistics. A video will supplement the textbook by providing examples of signs/concepts discussed in the course.

Prerequisite(s): Minimum 2.75 GPA; SPED 3110 ASL V; SPED 3114 ASL V Lab; or demonstrated proficiency.

SPED 3110 AMERICAN SIGN LANGUAGE V (3 credits)

As the fifth course in ASL, students will be able to communicate fluently with native ASL users. Additional linguistic principles will be presented at an advanced level and complex grammatical structures will be utilized in presentations. This course will continue to explore issues of linguistic code-switching, and regional variations in ASL.

Prerequisite(s): Minimum 2.75 GPA; SPED 2120 and SPED 2124 with a grade of B- or higher; co-requisite: SPED 3114.

SPED 3114 AMERICAN SIGN LANGUAGE V LAB (1 credit)

This is the co-requisite lab course for SPED 3110, American Sign Language V. Students will meet weekly in the ASL Lab interacting in a small group setting with a Deaf mentor.

Prerequisite(s): Minimum 2.75 GPA; SPED 2120 and SPED 2124 with a grade of B- or higher; co-requisite: SPED 3110. Not open to non-degree graduate students.

SPED 3120 ACADEMIC INTERPRETING (3 credits)

In this course candidates will focus on skills required for interpreting in a variety of academic settings. Candidates will learn to produce appropriate and equivalent interpreted messages between signed and spoken communication. Candidates will observe and analyze spoken and signed language used in the classroom and in extracurricular activities. Candidates will understand the interpreter's role as part of the educational team and how that impacts their work with students. Also included will be review and deeper exploration of communication styles, modes and language used by children.

Prerequisite(s): GPA 2.75 or better. SPED 3110 and SPED 3114 with B- or higher or special permission from the instructor. Score of intermediate or higher on the ASL Proficiency Interview or Sign Language Proficiency Interview. Not open to non-degree graduate students.

SPED 3130 COMMUNITY INTERPRETING (3 credits)

In this course students will learn skills in producing equivalent ASL and/or English messages in both consecutive and simultaneous interpreting. Students will interpret for adults and children moving from monologues to dialogues developing fluency, speed and accuracy. Students will continue to develop their English vocabulary, ASL vocabulary, interpreting analysis skills and strategies for team interpreting within the genres of medical and mental health, employment and vocational settings, social services, business and insurance.

Prerequisite(s): GPA 2.75 or better. SPED 3110 and SPED 3114 or special permission from the instructor. Score of intermediate or higher on the ASL Proficiency Interview or Sign Language Proficiency Interview.

SPED 3140 DISCOURSE ANALYSIS AND SOCIOLINGUISTICS FOR INTERPRETERS (3 credits)

During the course students will analyze language use in spoken English and American Sign Language (ASL) so that features of language use rise to the level of explicit awareness. Students collect, transcribe, and analyze various speech activities while reading and discussing theoretical notions underlying language use.

Prerequisite(s): Minimum 2.75 GPA; SPED 2110 and SPED 2114 with a grade of B- or higher; or special permission from the instructor. Not open to non-degree graduate students.

SPED 3150 COGNITIVE PROCESSING IN ASL AND ENGLISH (3 credits)

This course presents practice of cognitive skills used in the process of interpreting from English and the process of interpreting from ASL. Skills include visualization, prediction, listening, memory, abstracting, closure, dual tasking, and processing time. Integration and application of these skills will lead to a self-monitoring process that will allow for self-assessment and commentaries on work performed.

Prerequisite(s): Minimum cumulative 2.75 GPA, and SPED 2120 and SPED 2124 with a grade of B- or higher; or instructor permission. Not open to non-degree graduate students.

SPED 3250 SOCIAL, EMOTIONAL, AND BEHAVIORAL NEEDS OF CHILDREN WITH AUTISM AND DEVELOPMENTAL DISABILITIES (3 credits)

This course will address the social, emotional, and behavioral needs of children with Autism and Developmental Disabilities. The course will cover topics related to etiology, assessment, prevention, and intervention strategies to support the social, emotional, and behavioral needs of students with Autism and Developmental Disabilities in inclusive settings.

Prerequisite(s): SPED 1500 and TED 2400

SPED 3800 DIFFERENTIATION AND INCLUSIVE PRACTICES (3 credits)

This course is designed to examine characteristics of students with various learning needs and how to apply principles of Universal Design for Learning (UDL) to meet their needs in an inclusive environment. This course will expand the special education content knowledge of general education teachers so they can meet the needs of all students by planning lessons using the UDL framework. The purpose of this course is for general education teacher candidates to gain content knowledge about special education policies and procedures to utilize various educational, emotional, and social accommodations necessary to provide unique and effective educational or alternative responses for students with various learning needs.

Prerequisite(s): TED 2400 prior or concurrent or MUS 3600; Minimum 2.75 GPA. Not open to non-degree graduate students.

SPED 4000 PRACTICUM IN SPECIAL EDUCATION (3 credits)

This practicum will examine special education methods, techniques and strategies used with children and youth with disabilities in a variety of K-12 school settings. Classroom practice and application of instructional planning and implementation, assessment techniques and behavior management will be emphasized. Collaboration and consultation models will also be included in this experience.

Prerequisite(s): SPED 1500 & TED 2400; GPA 2.75 or higher. Co-requisites: SPED 3020 & SPED 4640. Not open to non-degree graduate students.

SPED 4010 MENTAL HEALTH IN SCHOOLS: RISK FACTORS AND INTERVENTIONS (3 credits)

This course explores the role that educators and school mental health professionals play in identifying the risk factors and warning signs of children and youth with mental health concerns. Students will understand the risk and protective factors at the individual, family, school, and community level as related to children and youth's mental health. The course will provide an overview of externalizing and internalizing disorders as well as school-based and community-based treatments and interventions. (Cross-listed with COUN 4010, COUN 8016, SPED 8016).

Prerequisite(s): SPED 1500 or SPED 3800, TED 2300 prior to or concurrent, Minimum 2.75 GPA. Not open to non-degree graduate students.

SPED 4040 WORKSHOP IN SPECIAL EDUCATION OR SPEECH-LANGUAGE PATHOLOGY (1-6 credits)

The purpose of this course is to provide workshops or special seminars in the area of special education and communication disorders. This course will prepare graduate candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. (Cross-listed with SPED 8046).

SPED 4110 SIGNED ENGLISH AND OTHER SYSTEMS (3 credits)

This course examines the communication methods and modes used in some educational settings with people who are deaf or hard of hearing. Candidates will gain understanding and specific skills in Simultaneous Communication, Total Communication, Signing Exact English, and Conceptually Accurate Signed English. Information will be shared about the latest technology and resources available to aid communication in the classroom.

Prerequisite(s): Minimum 2.75 GPA; SPED 3110 and SPED 3114 with a grade of B- or higher; or special permission from the instructor.

SPED 4150 READING AND WRITING INSTRUCTION FOR STUDENTS WITH DISABILITIES (3 credits)

This course is designed to provide preservice teacher candidates skills and strategies for instructing students with high incidence disabilities that struggle to acquire literacy skills. Emphasis is placed on the science of reading, reading development and diagnosis and assessment of specific reading and writing difficulties to determine effective instructional strategies. Instructional strategies will address modifications directed at teaching oral language, reading, writing, and spelling skills.

Prerequisite(s): SPED 1500 and TED 2400 and 2.75 NU GPA. Not open to non-degree graduate students.

SPED 4180 INTERPRETING IN SPECIALIZED SETTINGS (3 credits)

This course focuses on interpreting/transliterating for special populations in a variety of specialized settings. Video relay, Deaf-Blind, Mental Health, Legal, Religious, Multi-cultural and Theatrical settings are among the specialized settings in which interpreting students will participate in additional training.

Prerequisite(s): GPA 2.75 or better. SPED 3110 and SPED 3114 with B- or higher or special permission from the instructor. Score of intermediate or higher on the ASL Proficiency Interview or Sign Language Proficiency Interview. Not open to non-degree graduate students.

SPED 4230 LANGUAGE DEVELOPMENT AND DISORDERS FOR TEACHERS (3 credits)

This course is designed to introduce the candidate to the nature and structure of language, current theories of language, normal first and second language development, language disorders, multicultural issues in language assessment, and contemporary classroom management of language deficits. The topics will be examined from an educational perspective to enhance the teachers knowledge of language and to facilitate classroom management of language deficits exhibited by exceptional children in grades pre-K through 12. (Cross-listed with SPED 8236).

Prerequisite(s): Minimum 2.75 GPA; SPED 1500 or ECI major; TED 2300 or TED 2380 or permission of the instructor

SPED 4240 TEACHING/INTERPRETING LANGUAGE TO DEAF/HARD OF HEARING (5 credits)

This course will examine specific programs, methods, and techniques employed in teaching and developing language with deaf and hard of hearing children from primary through secondary levels. Current theories and practices in reading and language arts instruction will be examined. This course will also present methods for assessing reading and language problems in deaf/hard of hearing children, making adaptations and modifications in curriculum, integrating technology, and including parents in the instructional process. The sign language interpreter plays a vital role to a student who is deaf or hard of hearing because interaction is so important. When an interpreter is fluent in the use of language(s), the interpreter facilitates the student's ability to learn the language. An experienced interpreter uses knowledge of language development to make modifications to his/her interpreting approach.

Prerequisite(s): GPA 2.75 or better and SPED 3110 and SPED 3114 with a grade of B- or higher, or special permission from the instructor. Background check using UNO vendor.

SPED 4280 TEACHING AMERICAN SIGN LANGUAGE AS A WORLD LANGUAGE (3 credits)

This course provides a hands-on experience in the design and implementation of ASL instruction and curriculum. The course will address methods, materials, program evaluation, and teaching approaches for preparing professional instructors of ASL.

Prerequisite(s): Min 2.75 GPA & proficiency in ASL. Prof shown by one of the following: complete ASL I-V courses, personal interview w/instructor, or a min level of 3 on ASL Proficiency Interview or Sign Comm Proficiency Interview. Not open to non-degree grad students.

SPED 4310 VOICE-TO-SIGN (3 credits)

This course begins consecutively interpreting monologues from the source language (English) to the target language (ASL). Students will listen to entire English monologues, process them, analyze them, and then choose appropriate ASL to match the message. The course provides instruction on refining and enhancing voice-to-sign skills, specifically simultaneously producing equivalent ASL messages from spoken English source messages. Students will learn to sign simultaneously and consecutively when viewing video or listening to audio of native English speakers from a variety of settings.

Prerequisite(s): GPA 2.75 or better and SPED 3110 and SPED 3114 with a grade of B- or higher, or special permission from the instructor. Score of intermediate or higher on either the ASL Proficiency Interview or the Sign Language Proficiency Interview.

SPED 4320 SIGN-TO-VOICE (3 credits)

This course provides instruction on refining and enhancing sign-to-voice skills, specifically simultaneous sign-to-voice transliterating and interpreting. Students will learn to voice simultaneously and consecutively when viewing video of native signers who use a variety of signing modalities to communicate. Students will develop the ability to produce an equivalent English message from ASL source messages.

Prerequisite(s): GPA 2.75 or better and SPED 3110 and SPED 3114 with a grade of B- or higher, or special permission from the instructor. Score of intermediate or higher on either the ASL Proficiency Interview or the Sign Language Proficiency Interview.

SPED 4350 TEACHING CONTENT SUBJECTS TO DEAF/HARD OF HEARING (4 credits)

This course will describe, investigate, and put into practice instructional strategies employed in developing knowledge and concepts in social studies, science, and mathematics. The scope of the course will be preschool through high school. Curricula and materials used with K-12 students who are deaf or hard of hearing will be reviewed and evaluated.

Prerequisite(s): Minimum 2.75 GPA; EDUC 2510 or SPED 1500; TED 2400 or permission of the instructor.

SPED 4640 METHODS AND MATERIALS IN SPECIAL EDUCATION (3 credits)

This course is designed to describe the various instructional methods that have been used successfully in supporting students with disabilities in a variety of settings. This course is also intended to provide pre-service and in-service candidates with knowledge and evidence-based teaching strategies essential for modifying the learning environment and individualizing instruction for students with disabilities. In addition, teaching methods will focus on academic curriculum lesson planning, development of IEPs, selection of instructional methods and materials, and universal design for learning (UDL).

Prerequisite(s): SPED 1500, TED 2400 and 2.75 NU GPA and passing Praxis Core scores (Math, Reading and Writing); Co-requisite courses SPED 3020 & SPED 4000. Not open to non-degree graduate students.

SPED 4650 TRANSITION PLANNING (3 credits)

Curriculum oriented for teachers and related professionals to work with the career development and transition of individuals with disabilities within a multicultural and global society. Includes information for elementary through adulthood with emphasis on transition from high school to community living. (Cross-listed with SPED 8656)

Prerequisite(s): SPED 1500. Not open to non-degree graduate students.

SPED 4700 CLINICAL PRACTICE IN SPECIAL EDUCATION (6 credits)

This course provides candidates with experience teaching students with exceptionalities. Observation, participation, and actual teaching in an individually selected placement will be a part of the candidate's involvement in this course. This course is intended for candidates who are completing a dual endorsement program (special education and another endorsement).

Prerequisite(s): GPA minimum of 2.75 and completion of all required coursework in special education. Co-Requisite: TED 4650. Not open to non-degree graduate students.

SPED 4710 INTERACTIONS AND COLLABORATION (3 credits)

This course is offered to investigate the building blocks of collaboration. Effective interpersonal communication and collaboration skills are presented as the foundation necessary to build relationships among school personnel, families and community members.

Prerequisite(s): SPED 1500 and TED 2400 and 2.75 NU GPA

SPED 4720 CLINICAL PRACTICE IN SPECIAL EDUCATION (12 credits)

This course provides candidates with a practical experience teaching students with disabilities. Observation, participation, and actual teaching in an individually selected placement will be a part of the candidate's involvement in this course.

Prerequisite(s): GPA minimum of 2.75, Completion of all required course work in special education.

SPED 4724 SPECIAL EDUCATION CLINICAL TEACHING ORIENTATION (0 credits)

This course is the special education clinical teaching orientation that is paired with the Clinical Teaching in Special Education course.

Prerequisite(s): GPA = 2.75 or better, Completion of all required course work in special education. Co-requisite SPED 4720 or SPED 4730

SPED 4730 ADVANCED CLINICAL PRACTICE IN SPECIAL EDUCATION (3 credits)

A second semester of special education clinical practice experience in a placement working with exceptional children. Observation, participation and actual teaching will be part of the candidate's experience.

Prerequisite(s): GPA minimum of 2.75; SPED 4720 and permission

SPED 4740 EDUCATIONAL INTERPRETING PRACTICUM AND SEMINAR (6 credits)

The practicum candidate will work with a mentor to begin developing professional relationships while developing the ability to interpret simultaneously signed and spoken messages. Candidates will also share experiences in seminars with an instructor where discussion will focus on linguistic issues in interpretation, ethical dilemmas, and situational concerns.

Prerequisite(s): GPA minimum of 2.75, Completion of SPED 3120, SPED 3130, SPED 4180, SPED 4240, SPED 4310, and SPED 4320 with grades of B- or higher.

SPED 4760 COMMUNITY INTERPRETING PRACTICUM AND SEMINAR (6 credits)

The practicum candidate will work with a mentor in various community settings to begin developing professional relationships while developing the ability to interpret simultaneously signed and spoken messages. Candidates will also share experiences in seminars with an instructor where discussion will focus on linguistic issues in interpretation, ethical dilemmas, and situational concerns.

Prerequisite(s): GPA minimum of 2.75, Completion of SPED 3120, SPED 3130, SPED 4180, SPED 4240, SPED 4310, and SPED 4320 with grades of B- or higher. Not open to non-degree graduate students.

SPED 4800 SOCIAL AND EMOTIONAL DEVELOPMENT OF CHILDREN AND YOUTH (3 credits)

This course is designed to prepare teacher candidates and graduate candidates with the understanding of the psychological, biological and environmental factors that affect the social-emotional development of children and adolescents. Emphasis is placed on the interaction of these factors for children with exceptional learning needs and the implications for the learning environment. (Cross-listed with SPED 8806).

Prerequisite(s): SPED 1500 or EDUC 2510, TED 2300, Minimum 2.75 GPA

SPED 4810 BEHAVIOR INTERVENTIONS AND SUPPORTS (3 credits)

This course introduces a variety of practical interventions that teachers may use to support the positive classroom behavior of all students within a tiered model. Universal, targeted, and individualized strategies are presented. (Cross-listed with SPED 8816).

Prerequisite(s): SPED 1500 or SPED 3800 and TED 2400 prior to or concurrent and 2.75 NU GPA

SPED 4820 EARLY CHILDHOOD INCLUSIVE EDUCATION SYSTEMS, POLICY, AND ADVOCACY (1 credit)

The purpose of this course is to provide an overview of the history and perspectives of key developmental theories, laws, and policies related to inclusive early childhood education. Particular attention will be paid to culturally responsive approaches to ECIE, local, state, federal, and global policy, professional roles, ethics, and advocacy. Emphasis is on current research, theory, and evidence-based practice.

Prerequisite(s): TED 2250. Not open to non-degree graduate students.

SPED 4830 ASSESSMENT IN EARLY CHILDHOOD INCLUSIVE EDUCATION (3 credits)

This course is designed to help students develop skills for effective and culturally responsive assessment and evaluation of infants, toddlers, and young children. Such assessment is vital for understanding developmental needs of young children, planning appropriate curriculum and interventions, identifying children's special needs, evaluating early childhood programs, and providing accountability information to funders and stakeholders.

Prerequisite(s): Admission to Educator Preparation program, TED 2250. Not open to non-degree graduate students.

SPED 4860 RESPONSIVE AND REFLECTIVE TEACHING IN EARLY CHILDHOOD (3 credits)

This course will prepare early childhood inclusive education majors to plan and deliver supports to a diverse array of young children (birth to age 8) and their families. Candidates will be trained in evidence-based practices used for promoting language, problem-solving, motor skills, adaptive behavior, play, and social/emotional growth in young children. There is an emphasis on anti-bias approaches to education, as well as educators' reflections upon their practices.

Prerequisite(s): Admission to the Educator Preparation program, TED 2250. Not open to non-degree graduate students.

SPED 4870 PRACTICUM WITH INFANTS AND TODDLERS (3 credits)

This advanced practicum is a guided experience for candidates pursuing an emphasis in the area of Early Childhood Inclusive Education (ECIE) birth through age 3. Candidates will be required to demonstrate competencies related to promoting the development of infants and toddlers, and the skills and confidence of their families/caregivers. This is the last practicum course prior to the clinical practice semester.

Prerequisite(s): Completion of ECIE undergraduate courses: TED 2250, TED 2350, SPED 4230, TED 4250, SPED 4830, SPED 4860; GPA 2.75 or higher. Co-requisites: TED 4210 and SPED 4850. Not open to non-degree graduate students.

Statistics (STAT)

Statistics Undergraduate Courses

STAT 1100 DATA LITERACY AND VISUALIZATION (3 credits)

Designed to help students become familiar with different types of data that are available in business, non-profit and governmental organizations. Students will learn basic data organization and manipulation as well as appropriate visualization techniques including charts, maps, and dashboards using cutting edge software tools. Students will apply this knowledge and skills to real-world data and develop skills in presentation of research results, strategic decision making and forecasting analysis.

Distribution: Math

STAT 1530 ELEMENTARY STATISTICS (3 credits)

An elementary introduction to the basic concepts of probability, descriptive statistics, and statistical inference, including point estimation, confidence intervals, and hypotheses testing.

Prerequisite(s): One of the following within the last two years: ALEKS score of at least 3, ACT Math sub score at least 19, Math SAT at least 500, Accuplacer score at least 3, or MATH 1000 or MATH 1210 (each with a C- or better)

Distribution: Math

STAT 3000 STATISTICAL METHODS I (3 credits)

An introduction to descriptive statistics, measures of central value and dispersion, probability and distributions, population and sample, simple linear regression, statistical inference: point estimation, confidence intervals, hypotheses testing, two population comparison, goodness-of-fit tests, analysis of variance. Statistical software like Minitab or Excel will be utilized in the course. (Cross-listed with STAT 8005).

Prerequisite(s): MATH 1220 or MATH 1300 or MATH 1320 or equivalent with a grade of C- or better, or permission of instructor

STAT 3800 APPLIED ENGINEERING PROBABILITY AND STATISTICS (3 credits)

An introduction to the application of probability and statistics to engineering problems. Topics include: probability and probability distributions, mathematical expectation, distribution of random variables, binomial, Poisson, hypergeometric, gamma, normal, and t-distributions, Central Limit Theorem, confidence intervals, hypothesis testing. If time allows, some linear regression and contingency tables. Credit for both MATH 4740 and STAT 3800 will not be given. (Cross-listed with STAT 8805)

Prerequisite(s): MATH 1970

STAT 4410 INTRODUCTION TO DATA SCIENCE (3 credits)

Topics covered in this course include Data Technology, Methods of gathering and cleaning structured or unstructured data, Exploratory data analysis & Dynamic and interactive data visualization, Modeling data for prediction, forecasting or classification. (Cross-listed with STAT 8416)

Prerequisite(s): MATH 4740 with at least C- or concurrent or STAT 3800 with at least C- or permission of instructor. Students enrolling in this course should be comfortable with computer programming & have knowledge of data structures & preliminary statistical methods.

STAT 4420 EXPLORATORY DATA VISUALIZATION AND QUANTIFICATION (3 credits)

Topics covered in this course include Exploratory Data Visualization for categorical/qualitative single/multivariate data, Grammar of Graphics, Organizing Data for Visualization, Methods of Displaying Data that include dynamic and interactive visualization, Visual Diagnostics of Statistical Models and Visual Statistical Inference. Students planning to enroll in this course should be comfortable with computer programming and have knowledge of data structures and preliminary statistical methods. (Cross-listed with STAT 8426)

Prerequisite(s): STAT 3800 or STAT 8805 or MATH 4740 or MATH 8746 with a grade of C- or better or another introductory probability/statistics course with a grade of C- or better, and MATH 3200 or CSCI 1620 with a grade of C- or better, or permission of instructor.

STAT 4430 LINEAR MODELS (3 credits)

This course introduces students to linear statistical models. Topics will include: simple linear regression models, multiple linear regression models, ANOVA models including one way ANOVA, randomized block design, other designs, logistic regression models, Poisson regression models, bootstrapping/resampling models, and survival analysis. The course may also include mixed models and/or survival models. Some necessary linear algebra and mathematical statistics ideas will be reviewed at the beginning of the course. Computer software will be extensively used. (Cross-listed with STAT 8436)

Prerequisite(s): MATH 4750 or MATH 8756 w/ a C- or better or STAT 3800 or STAT 8805 w/ a C- or better or instructor permission based on students' having taken a basic statistics course w/ a grade of C- or better & having at least a basic knowledge of calculus.

STAT 4440 TIME SERIES ANALYSIS (3 credits)

The objective of this course is to learn and apply statistical methods for the analysis of data that have been observed over time. Topics covered include: Models for Stationary and Non-Stationary Time Series, Model Specification, Parameter Estimation, Model Diagnostics, Forecasting, Seasonal Models, Time Series Regression, and Spectral Analysis. Statistical software will be used. (Cross-listed with STAT 8446)

Prerequisite(s): MATH 4750 or MATH 8756 w/ a grade of C- or better or STAT 3800 or STAT 8805 w/ a C- or better or another introductory probability/statistics course w/ a C- or better, or permission of instructor.

STAT 4450 INTRODUCTION TO MACHINE LEARNING AND DATA MINING (3 credits)

This is an introduction to machine learning and data mining which covers the following topics with an emphasis on mathematical and statistical analysis in supervised learning. Topics include machine learning workflow, evaluation metrics, validation approaches, classification models including logistic regression, decision tree, boosting, random forest, support vector machines, neural networks, Bayesian methods, etc. If time allows, text mining and unsupervised learning topics will also be introduced in the course. Statistical software will be used. (Cross-listed with MATH 4450, MATH 8456, STAT 8456)

Prerequisite(s): MATH 4740/8746 with a C- or better or STAT 3800/8805 with a C- or better or permission of instructor.

Supply Chain Management (SCMT)

Supply Chain Management Undergraduate Courses

SCMT 3000 MANAGERIAL ACCOUNTING FOR SUPPLY CHAIN MANAGEMENT (3 credits)

This course highlights the important role of a managerial accountant in managing a global supply chain and covers the key accounting techniques for supply chain management. (Cross-listed with ACCT 3000)

Prerequisite(s): ACCT 2020 with a grade of C (2.0) or better or ACCT 2000 with a grade of C (2.0) or better and cumulative GPA of 2.5 or higher. ENGL 1160 with a grade of 'C' (2.0) or better or concurrent enrollment in ENGL 1160. Not open to non-degree graduate students.

SCMT 3410 INTRODUCTION TO SUPPLY CHAIN MANAGEMENT (3 credits)

Supply chain management is the design and management of business processes needed to turn raw materials from suppliers into products and services that meet the needs of the final customer. The goals of this course center around providing students with the foundations of supply chain management and effectively managing the flow of goods, information, and services to obtain sustainable competitive advantage within an industry. Students will develop critical thinking skills focused on business process analysis and the use of key performance indicators to determine operational efficiencies for all organization levels. (Cross-listed with MGMT 3410, MKT 3410).

Prerequisite(s): Sophomore standing; GPA of 2.0 or better; or by permission of instructor. Not open to non-degree graduate students.

SCMT 3500 MANAGING OPERATIONS IN THE SUPPLY CHAIN (3 credits)

The course is designed to introduce students to strategic decisions in manufacturing and service operations. Students will learn how operations integrate all other business processes for competitive advantage. The course covers current applications of quality concepts, business process reengineering, supply-chain management, lean systems, and ERP systems for business operations efficiency and effectiveness.

Prerequisite(s): BSAD 2130 or 3160, ENGL 1160/ENGL 1164 or concurrent enrollment in ENGL 1160/1164 each with "C" or better and 2.5 GPA

SCMT 4060 HEALTHCARE ANALYTICS FOR BUSINESS (3 credits)

This course will focus on the mixing of analytics and technology to develop key performance indicators that integrate and evaluate clinical, administrative, and financial performance. Concepts in this course explore the intersection of information management, performance metrics, data visualization, and result communication spanning across the healthcare ecosystem. Topics covering health outcome analysis, financial performance, developing analytic strategies, data quality and governance, and the four stages of actionable intelligence are all used to educate the advantages of leveraging analytics. (Cross-listed with BSAD 8066, HLSC 8066, MGMT 8066, MGMT 4060, SCMT 8066).

Prerequisite(s): MGMT 3490 or SCMT 3410; GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

SCMT 4070 INTERNATIONAL LOGISTICS MANAGEMENT (3 credits)

This course will focus on the logistics of international trade and how managers facilitate the flow of goods and services in import and export environments. Students will learn about infrastructure and business practices needed to manage international transportation, communications, services, and regulatory requirements. Students will develop an understanding of international terms of trade, transaction risk management, and location decisions for placement of warehouses and distribution centers. (Cross-listed with BSAD 8076, HLSC 8076, SCMT 8076).

Prerequisite(s): SCMT 3410; GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

SCMT 4090 MANAGING COLLABORATIVE ENGAGEMENT (3 credits)

This course will provide students with the opportunity to develop knowledge and strategies for leading teams, enhancing collaboration, building consensus, problem solving in teams, facilitating group processes, and designing collaborative workspaces. (Cross-listed with ACMP 4090, BSAD 8096, MGMT 4090, MGMT 8096).

Prerequisite(s): Junior standing or permission of instructor. Not open to non-degree graduate students.

SCMT 4160 ENTERPRISE RESOURCE PLANNING SOFTWARE CONSULTING (3 credits)

Enterprise Resource Planning (ERP) consulting is designed to provide students foundational knowledge required to become a consultant working with enterprise systems. ERP systems are used by most organizations to manage and integrate the core functions of a business. Students will be exposed to a broad range of consulting skills that spans package selection to the implementation process. Students will work with a live instance of an ERP system focusing on the cross-functional integration of core business processes primarily in a manufacturing environment including finance, operations/supply chain, procurement, and fulfillment. The goal of the course is to provide students a foundation for careers in the area of ERP systems and consulting. (Cross-listed with ISQA 4160, ISQA 8166)

SCMT 4170 EMERGING TRENDS IN SUPPLY CHAIN MANAGEMENT (3 credits)

This course will focus on trends influencing supply chain management and design in the 21st century. Key concepts in this course will include contemporary opportunities and challenges in creating customer value via the supply chain with a focus on globalization and risk management. Specific topics will include the influence of the empowered customer on supply chain design, global supply chain trends, and the need for integration of technology and talent to create a competitive advantage. (Cross-listed with BSAD 8176, HLSC 8176, SCMT 8176).

Prerequisite(s): SCMT 3410/MKT 3410/MGMT 3410 Sustainable Supply Chain Management; Cumulative GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

SCMT 4330 PROJECT MANAGEMENT (3 credits)

This course focuses on the systemic exploration of planning and executing complex projects to create organizational success. Using a comprehensive understanding of principles, methodologies, and tools within project management, students will learn how to initiate critical processes, plan objectives and constraints, execute management and leadership, monitor budgets and development, and close outcomes of complex projects. Skills obtained from this course enhance individuals' ability to recognize, identify, and prioritize organizations' culture and structure to lead projects across various industries efficiently. (Cross-listed with BSAD 8336, HLSC 8336, MGMT 8336, MGMT 4330, SCMT 8336)

Prerequisite(s): MGMT3490 with a C or better and a 2.5 GPA; or permission of the instructor. Not open to non-degree graduate students.

SCMT 4350 GLOBAL SOURCING AND INNOVATION (3 credits)

This course focuses on global suppliers as partners in the development and commercialization of new products. Students will learn about open innovation and the integration of internal and external business systems in new product innovation. Students will develop an understanding of regulatory policies related to information sharing and the intellectual property rights of buyers and suppliers. (Cross-listed with BSAD 8356, HLSC 8356, SCMT 8356).

Prerequisite(s): SCMT 3410; GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

SCMT 4370 SUPPLY CHAIN ANALYTICS (3 credits)

This course focuses on integrating supply chain management through the use of key performance indicators. Key concepts in this course include data visualization, supplier performance metrics, service-dominant logic, and the supply chain for data. Specific topics include the influence of the empowered customer on supply chain metrics, using metrics to develop a competitive advantage, data-driven decision making, and the four stages of actionable intelligence. (Cross-listed with BSAD 8376, HLSC 8376, SCMT 8376).

Prerequisite(s): SCMT 3410 with a grade of C or above, at least a cumulative GPA of 2.5, or permission of instructor. Not open to non-degree graduate students.

SCMT 4380 INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT (3 credits)

This course will focus on the strategic procurement of products and services in order to gain a competitive advantage through integrated supply management. Students will learn about strategic supply management, contract negotiation, and supplier quality management. Students will develop an understanding of supplier performance management through the use of supply chain information systems. (Cross-listed with BSAD 8386, HLSC 8386, MKT 4380, SCMT 4380, SCMT 8386).

Prerequisite(s): SCMT 3410; GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

SCMT 4440 QUALITY MANAGEMENT (3 credits)

This course approaches Quality Management from a practical quantitative-oriented point of view. Throughout this course, students will be introduced to all five steps of the six sigma continuous process improvement (Define, Measure, Analyze, Implement, and Control). The assignments are designed in project-based formats, in which students will initiate their own process improvement project and follow through with each step for a final grade. Upon the completion of this course, students will understand the ever-evolving nature of quality and quality management. They will also have practical experience in initiating and managing process improvement project at small scale and apply six sigma in their future work. (Cross-listed with BSAD 8446, MGMT 4440).

Prerequisite(s): MGMT 3490 with a C or better and a 2.5 GPA; or permission of instructor.

SCMT 4450 MANAGERIAL NEGOTIATION STRATEGIES (3 credits)

This course introduces students to the theory and practice of negotiation across various organizational settings. The ability to successfully negotiate an outcome is an important aspect of management and leadership. Negotiation can be used to determine multiparty relationships, manage conflict resolution, and improve organizational outcomes. Using a combination of conceptual frameworks, roleplaying exercises, and debriefing opportunities, the design of this course is structured to help students understand the power and influence negotiation has over the successful outcomes of managers, leaders, and organizations. (Cross-listed with BSAD 8456, HLSC 8456, MGMT 4450, MGMT 8456, SCMT 8456).

Prerequisite(s): MGMT 3490 with a grade of C or above, at least a cumulative GPA of 2.5, or permission of instructor.

SCMT 4460 SUPPLY CHAIN INTEGRATION (3 credits)

This course will focus on the integration of internal and external systems designed to maximize the efficiency and effectiveness of supply chain networks developed by industrial organizations, government agencies, and not-for-profit organizations. Key concepts will include supply chain design, trends in technology, and cross-functional collaboration, coordination, and communication along the value chain. Specific topics will include the influence of empowered customers on supply chain integration, global supply chain trends, closed-loop supply chains, and the challenges and benefits of integrating technology and talent in the workplace.

Prerequisite(s): SCMT 3410/MKT 3410/MGMT 3410 Sustainable Supply Chain Management; Cumulative GPA of 2.5 or better; or by permission of instructor. Not open to non-degree graduate students.

SCMT 4540 SUPPLY CHAIN MANAGEMENT INTERNSHIP (1-3 credits)

Students engage in part-time employment in supply chain management to gain relevant business experience and to practice the skills and concepts learned in the classroom. Work assignment must encompass duties related to the field of supply chain management (i.e., purchasing, scheduling, supplier relations, materials management, or logistics). (Cross-listed with MKT 4540).

Prerequisite(s): SCMT 3410, GPA of 2.5 or better, AND permission of instructor. Not open to non-degree graduate students.

SCMT 4550 COOPERATIVE EDUCATION IN BUSINESS ADMINISTRATION (3 credits)

Students participate in discipline-specific experiential learning activities designed to integrate academic concepts with real-world workplace experiences. The course is focused on the development and application of observation and critical thinking skills to make informed contributions to their organization. Students will create a body of work that will be assessed through self-reflection of the student, feedback from the employer, and evaluation by the instructor. The overall goal is to create a portfolio of work that demonstrates student achievements during the cooperative education experience. (Cross-listed with MGMT 4550).

Prerequisite(s): Full-time (Summer-only) 3 Credit Hours, Maximum COOP Credit Hours 15, MKT/SCMT/MGMT 3410 Introduction to Supply Chain Management and GPA of 2.5 or better; AND by permission of the instructor.

SCMT 4560 COOPERATIVE EDUCATION IN BUSINESS ADMINISTRATION (6-12 credits)

Students participate in discipline-specific experiential learning activities designed to integrate academic concepts with real-world workplace experiences. The course is focused on the development and application of observation and critical thinking skills to make informed contributions to their organization. Students will create a body of work that will be assessed through self-reflection of the student, feedback from the employer, and evaluation by the instructor. The overall goal is to create a portfolio of work that demonstrates student achievements during the cooperative education experience. (Cross-listed with MGMT 4560).

Prerequisite(s): Full-time (Fall and Spring Semesters only) 6-12 Credit Hours, Maximum COOP Credit Hours 15, MKT 3410/SCMT 3410/MGMT 3410 and GPA of 2.5 or better; AND by permission of the instructor.

Sustainability (SUST)

Sustainability Undergraduate Courses

SUST 1000 INTRODUCTION TO SUSTAINABILITY (3 credits)

Introduction to Sustainability explores from multiple perspectives the interconnectedness of earth's physical, ecological, and human systems, and how to maintain and improve earth's resources and systems for current and future generations.

Distribution: Global Diversity General Education course and Social Science General Education course

SUST 4090 SPECIAL TOPICS IN SUSTAINABILITY (3 credits)

This is a lecture and/or laboratory course pertaining to a specific topic in sustainability and not available in the regular curriculum. May be repeated as topics change.

Prerequisite(s): Junior or senior standing or permission of instructor. Other pre-requisites may apply: please consult with instructor of course.

SUST 4390 THE NATURE OF THE PAST: AMERICAN ENVIRONMENTAL HISTORY, PRE-HISTORY TO THE PRESENT (3 credits)

This course will introduce students to the field of American Environmental History. Students will engage with literature produced by scholars who, broadly speaking, research and write about the many ways in which humans have shaped nature and, conversely, how nature has shaped humans over time. We will focus on the myriad peoples and cultures that have thrived in what is presently the United States and how these peoples have interacted with their physical environments in a multitude of contexts, from the transformation of ecosystems for economic purposes, to the cultural and scientific ideas that have shaped human notions of the natural world, to the ways in which people have mobilized governments to transform the environment. (Cross-listed with HIST 4390, HIST 8196, ENVN 4390).

SUST 4800 SUSTAINABILITY INTERNSHIP (1-6 credits)

This course offers students an opportunity to experience sustainability studies through direct involvement in career-oriented sustainability organizations. The host organization must be approved in advance in consultation with the internship coordinator. This course may be repeated for a maximum of six credit hours.

Prerequisite(s): Permission of instructor.

SUST 4900 INDEPENDENT STUDY (1-3 credits)

Specially planned readings or independent research in a well-defined field within sustainability carried out under the supervision of a faculty member. As independent study courses are intended to enrich a student's regular academic program, they may not normally be taken as substitutes for scheduled classroom courses of the same nature. May be repeated, for credit, up to six hours, under a different topic.

Prerequisite(s): Permission of instructor required.

Teacher Education (TED)

Teacher Education Undergraduate Courses

TED 1010 INTRODUCTION TO EDUCATION (3 credits)

The course will provide an introduction to the education profession through career exploration and initial exposure to the dynamics of PK-12 classroom teaching. The course will provide an overview of ethics and professionalism, pre-service preparation, societal influences, classroom practices, and the governance structures which impact teachers and schools. The course has a required field experience.

Prerequisite(s): Not open to non-degree graduate students.

TED 2050 INTRODUCTION TO TEACHING ENGLISH AS A SECOND LANGUAGE (3 credits)

This course offers teacher candidates an introduction to the linguistic, social, political, and cultural factors that impact the teaching of Multilingual Learners (MLs) entering the United States school system. As dedicated practitioners, reflective scholars, and responsible citizens, undergraduate students will study best practices for MLs in the mainstream classroom that promotes language and cultural understanding among students and teachers.

Prerequisite(s): Not open to non-degree graduate students.

TED 2060 EQUITY, LANGUAGE, AND CULTURAL LITERACY (3 credits)

This course explores the relationship among equity, language, and cultural literacy and its implications for programming and advocacy within school and community contexts. As dedicated practitioners, reflective scholars, and responsible citizens, undergraduate students study the impact these relationships have for historically underrepresented groups in the United States.

Prerequisite(s): Not open to non-degree graduate students.

TED 2100 EDUCATIONAL FOUNDATIONS (3 credits)

The course will provide prospective teacher candidates with the philosophical, ethical, historical, and social foundations that will enable them to understand their role as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their profession in a changing world. Also, the prospective teacher candidates will study and understand the national and state standards relevant to P-12 education and to teacher preparation in the USA. Each prospective candidate will acquire competency in using educational technologies such as Internet based course delivery systems, database software, and digital portfolios.

Prerequisite(s): 2.0 GPA

Distribution: Writing in the Discipline Single Course

TED 2160 INTRODUCTION TO LIBRARY SERVICES (3 credits)

This course introduces students to the discipline and profession of library and information science and to the wide array of information organizations whose purpose is to gather, organize, and transfer information to patrons in a diverse society.

TED 2200 HUMAN RELATIONS FOR BIAS-FREE CLASSROOMS (3 credits)

This course is designed to increase multicultural knowledge and positively impact the diversity disposition of prospective teacher candidates. It is also designed to help them become more aware of ways to motivate and positively impact the youths they will encounter in their future classrooms. Prospective teacher candidates will examine existing attitudes toward various groups by race, ethnicity, age, gender, disability, and social class with the goal of becoming dedicated practitioners, reflective scholars, and responsible citizens who can meet their professional responsibilities.

Prerequisite(s): 2.0 GPA

Distribution: U.S. Diversity General Education course

TED 2210 FOUNDATIONS OF EDUCATION AND LEARNER DEVELOPMENT (3 credits)

The course will provide teacher candidates with foundational knowledge on the philosophical, ethical, historical, and social foundations of education in society along with foundational knowledge on the current educational practices and theories on how children develop and learn within different educational environments. This course will also examine how these foundational aspects of education and child development impact and influence each other so that teacher candidates understand their role as dedicated practitioners, reflective scholars, and responsible citizens who can meet the needs of their students in the context of the profession in our changing world.

TED 2250 INTRODUCTION TO EARLY CHILDHOOD EDUCATION (3 credits)

This course provides an overview of early childhood education from theoretical, historical, and contemporary perspectives. Particular emphasis in the course is placed on key approaches to early childhood education, research on how children learn, and developmentally appropriate practice for children in the birth-to-age-five range. Observations are required as part of the course and will be conducted outside of class time.

TED 2300 HUMAN GROWTH AND LEARNING (3 credits)

This course will examine human growth and learning from conception through adolescence. It will focus on how current educational practices and theories of development and learning impact and influence each other. The course includes field-based and laboratory experiences for the students.

Prerequisite(s): Admission to Teacher Preparation. Permit number required to register. Not open to non-degree graduate students.

TED 2310 FAMILY-CENTERED PARTNERSHIPS (3 credits)

This course will examine the purposes and methods for developing family-centered partnerships for young children. Candidates will develop the skills necessary for the planning, designing, implementing, and evaluating effective family engagement in early childhood settings. Candidates will also explore characteristics of diverse families by engaging in service learning and exploring diverse settings in the community.

Prerequisite(s): TED 2250

TED 2350 PLAY IN EARLY CHILDHOOD INCLUSIVE EDUCATION (3 credits)

The purpose of this course is to provide theoretical and empirical bases for observing and understanding children in play; an understanding of cognitive, social, and communicative stages related to developmental theory through play; and opportunity to consider biological, cultural, and environmental influences on children's play and development, as well as, plan play experiences for young children. This course is designed primarily to prepare early childhood inclusive education teachers to develop the knowledge, skills, and dispositions to understand and use play as part of early childhood education and care programming for all young children.

Prerequisite(s): Not open to non-degree graduate students.

TED 2360 CHILDREN'S LITERATURE (3 credits)

This course focuses on children's literature as a significant component of a 21st Century learning environment through the use of multiple literacies, e.g., cultural, information, visual, and digital literacy strategies. An emphasis will be based on research-based literacy strategies and literature that supports culturally relevant teaching and librarianship.

Prerequisite(s): Admission to Teacher Preparation Program or Library Science.

TED 2370 THE CREATIVE ARTS IN EARLY CHILDHOOD EDUCATION (3 credits)

This course prepares the early childhood teacher candidate to implement and use the creative and expressive arts in the classroom and to develop and assess conceptual understanding and building the vocabulary of children.

Prerequisite(s): TED 2250. Not open to non-degree graduate students.

TED 2380 DEVELOPMENT AND LEARNING IN ADOLESCENCE (3 credits)

This course will examine human growth and learning from early through late adolescence, to help students gain an understanding of the biological, social, and cultural influences on the developing child in the second decade of life. The class will focus on how current educational practices and theories of development and learning impact and influence each other. The course will include field-based experiences.

Prerequisite(s): Prerequisites of TED 2100 and TED 2200. Not open to non-degree graduate students.

TED 2390 SOCIOCULTURAL UNDERSTANDINGS OF INFANTS AND TODDLERS (3 credits)

This course will examine socio-cultural conceptions of infant and toddler-aged children. The influences of culture and social context on parental and center-based goals, beliefs and practices will also be covered.

Prerequisite(s): TED 2250. Not open to non-degree graduate students.

TED 2400 PLANNING FOR EFFECTIVE TEACHING (6 credits)

The course provides an initial overview of lesson planning through an introduction to the concepts of standards, objectives, anticipatory sets, instructional strategies, assessments, and closure. The course also introduces culturally responsive teaching practices which are intentionally supportive of English Language Learners, students with disabilities, and students who live in poverty or other difficult circumstances. A practicum completed outside of scheduled class time is required. The practicum includes coaching support for the candidates.

Prerequisite(s): ELED, ELED SPED and ECI majors have a prerequisite of TED 2300. SED majors will be permitted only with TED 2380 as a corequisite. Not open to non-degree graduate students.

TED 2410 FOUNDATIONS OF PLANNING FOR EFFECTIVE TEACHING (3 credits)

The course provides an initial overview of lesson planning through an introduction to the concepts of standards, objectives, anticipatory sets, instructional strategies, assessments, and closure. The course also introduces topics and issues essential to teachers' ability to plan for effective teaching including culturally responsive teaching practices and strategies for serving Multilingual Learners, students with disabilities, and students who live in poverty or other difficult circumstances.

Prerequisite(s): Prerequisites: TED 2100 & TED 2200 or TED 2060. Not open to non-degree graduate students.

TED 2420 INTERMEDIATE FIELD EXPERIENCE (3 credits)

This seminar course is designed to support teacher candidates as they begin to gain content knowledge, skills, and procedures that will be addressed in educator preparation content courses. Additionally, this course provides students with guided opportunities to reflect upon and discuss their field experience. This course will be held throughout the semester that will provide an overview of the field experience, an explanation of the InTASC model core teaching standards related to content knowledge, and assist students in applying the skills/knowledge presented in the content area courses.

Prerequisite(s): Prerequisites: TED 2100 and (TED 2200 or TED 2060). Corequisite with Intermediate Course (TED 2410 Foundations of Effective Planning). Not open to non-degree graduate students.

TED 2500 DIGITAL CITIZENSHIP (3 credits)

The course is an introduction to the basic tenets of digital citizenship including legalities, ethics, privacy and security. The course fosters an awareness of digital citizenship as a topic that impacts pedagogy and programming and reflects best practice in all types of learning communities.

TED 2800 SCIENCE EXPERIMENTATION AND ENGINEERING DESIGN (4 credits)

Scientific Experimentation & Engineering Design (SEED) is a general education science course that introduces integrative STEM (Science, Technology, Engineering, and Mathematics) concepts and their applications. The course fosters 21st Century Learning through study and work in active, team-based experiential learning environments through all phases of near-space experiments using high-altitude balloon platforms. Near-space experiments require research question development, experiment hardware fabrication, experiment software integration, payload launch and recovery, data analysis, and formal experiments' results reporting. Science and Engineering Practices are central to students' experiences and work in this course, as the course models the interdisciplinary connectedness of academic fields, industry, and the community to encourage collaboration and discovery to effectively implement STEM concepts, practices, and innovation. (Cross-listed with STEM 2800).

Distribution: Natural/Physical Sci General Education lecture&lab

TED 3000 SPECIAL PROJECTS (1-3 credits)

This course allows offerings with a broad (PK-12) multigrade application. Study is often field-based and is conducted as a short course, seminar, or special project.

TED 3050 FOUNDATIONS OF TEACHING ENGLISH AS A SECOND LANGUAGE (ESL) (3 credits)

This course is designed to enhance candidates' understanding of the historical, political, and theoretical perspectives of K-12 English as a Second Language (ESL) education for English Learners (ELs) in the U.S. context. As dedicated practitioners, reflective scholars, and responsible citizens, students will have knowledge of factors that contribute to an effective multicultural and multilingual learning environment. TED 3050 includes an in school, guided practicum. Candidates must demonstrate competencies related to teaching English Learners (ELs) in K-12 classrooms. This is the first of two practicum experiences to complete the field experience requirements for Nebraska Department of Education.

Prerequisite(s): TED 2050, TED 2300 or TED 2380, and TED 2400.

TED 3100 COMMUNITY EDUCATION: TEACHING & PRACTICE IN INFORMAL ENVIRONMENTS (3 credits)

Informal education environments, such as museums, zoos, special-interest clubs, as well as summer camps, and after-school programs, offer expansive possibilities for learning outside of formal schooling. In this course, we will examine educational theory, practice, research, and evaluation associated with learning in informal contexts. Students will have the opportunity to work on collaborative service-learning projects with community partners who offer informal learning programs.

Prerequisite(s): Not open to non-degree graduate students.

TED 3350 TEACHING AND ASSESSING READING IN ELEMENTARY SCHOOLS (6 credits)

This course provides an introduction to reading theories, foundational principles such as phonemic awareness, phonics, vocabulary, comprehension, fluency, effective instructional practices, and reading assessment and evaluation as they relate to improving K-6 student learning. It includes consideration of emergent and content area literacy, and students' learning needs and cultures.

Prerequisite(s): EDUC 2510 or EDUC 2520 or TED 2400; co-requisite of TED 4330, 2.75 NU GPA.

TED 3550 SECONDARY CLASSROOM MANAGEMENT (3 credits)

This is a general methods course required of all candidates preparing to teach at the secondary level. Candidates will apply educational sequence competencies in understanding the characteristics of effective teachers by learning how to apply the three components of effective pedagogy: 1) use of instructional strategies, 2) use of classroom management strategies, and 3) effective classroom curriculum design. Candidates will also examine the changing role of the secondary school and selected professional issues in secondary education and be able to apply key ideas of classroom management. Candidates must demonstrate competencies related to performance in 7-12 classrooms. This is the third in a series of four required practicum experiences prior to the clinical practice semester.

Prerequisite(s): EDUC 2510 or EDUC 2520 or TED 2400; co-requisite TED 3690, 2.75 NU GPA.

TED 3690 LITERACY AND LEARNING (3 credits)

This course examines ways in which reading and writing can facilitate student learning in content areas studies (e.g., science, social studies, physical education, art, music, and math). The main focus is on teaching practices that engage students and contribute to their learning, integrating their background knowledge and cultural experiences with content area literacy. (Cross-listed with TED 8695).

Prerequisite(s): EDUC 2510 or EDUC 2520 or TED 2400; co-requisite TED 3550. 2.75 NU GPA and scores showing Praxis attempt (Math, Reading, and Writing)

TED 3750 TEACHING GRAMMAR IN CONTEXT (3 credits)

This course is an analysis of the integration of grammar throughout the writing process and the most effective contexts for and means for teaching grammar. The emphasis is on the application in the secondary school English classroom, on the development of teaching materials for the classroom, and on appropriate methodology for grammar instruction.

Prerequisite(s): EDUC 2510 or EDUC 2520 or TED 2400.

TED 3760 ADULT SERVICES, PROGRAMMING, AND OUTREACH IN LIBRARIES (3 credits)

This course examines best practices related to serving adult populations in 21st Century libraries and information agencies. Candidates will examine the characteristics of diverse adult populations and design resources, programming, and services to meet their personal and professional needs.

Prerequisite(s): Not open to non-degree graduate students.

TED 4000 SPECIAL METHODS IN THE CONTENT AREA (3 credits)

This course is designed to develop knowledge, skills, and dispositions requisite of teachers. Course content is determined by the discipline area. For some content areas a field experience will be required. This is an in-school, guided practicum completed in conjunction with TED 4000 math, science, language arts, world languages, Business, Information Technology, ESL and social studies sections. Candidates must demonstrate competencies related to performance in 7-12 classrooms. This is the final practicum experience prior to the clinical practice semester. (Cross-listed with TED 8006).

Prerequisite(s): TED 3690 and TED 3550. 2.75 NU GPA.

TED 4120 READING & WRITING IN ELEMENTARY CONTENT AREAS (3 credits)

This course is designed to enhance candidates' knowledge of best practices in teaching reading and writing in the content areas (science, social studies, math, art, music). Candidates will learn about teaching practices that engage elementary students and contribute to their learning, integrating their background knowledge and cultural experiences with content area literacy. This course will inform candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

Prerequisite(s): EDUC 2510 or EDUC 2520 or TED 2400.

TED 4220 FINAL PRACTICUM IN EARLY CHILDHOOD EDUCATION (3 credits)

TED 4220 is an in-school guided practicum taken at the end of ECE program coursework. Candidates must demonstrate competencies related to performance in pre-kindergarten education. This is the last practicum course prior to the clinical practice semester.

Prerequisite(s): Completion of ELEM/ECE undergraduate courses: TED 2250, TED 2310, TED 4250, TED 4260, TED 2370, TED 4290. 2.75 NU GPA. Not open to non-degree graduate students.

TED 4250 GUIDANCE OF YOUNG CHILDREN (3 credits)

This course will provide an overview of social and emotional development of the young child and an investigation of effective and appropriate guidance techniques as they relate to ages three to eight. Candidates will explore relationship-based approaches to guiding children and building caring and trusting classroom communities.

Prerequisite(s): TED 2250 and TED 2300 (EDUC 2010), 2.75 NU GPA.

TED 4260 LANGUAGE AND LITERACY IN EARLY CHILDHOOD EDUCATION (3 credits)

This course is designed for teacher candidates who are preparing to teach children from three to eight years of age, with particular emphasis on the language and literacy development of the young child and appropriate curriculum. Particular attention will be given to the role of the teacher as a dedicated practitioner in the early learning environment.

Prerequisite(s): TED 2250 and TED 2300 or EDUC 2010. 2.75 NU GPA. Not open to non-degree graduate students.

TED 4290 INQUIRY IN EARLY CHILDHOOD SCIENCE AND MATHEMATICS EDUCATION (3 credits)

This course is designed to educate teacher candidates about developing early mathematics and science foundations in young children (ages 3-8) with emphasis on inquiry-based teaching, learning, and assessing strategies.

Prerequisite(s): TED 2400, 2.75 NU GPA. Not open to non-degree graduate students.

TED 4310 ASSESSMENT AND CLASSROOM MANAGEMENT FOR THE ELEMENTARY TEACHER (3 credits)

TED 4310 studies assessment and classroom management principles, effective practices, and assessment and classroom management processes through the elementary curriculum. A practicum completed outside of scheduled class time is required.

Prerequisite(s): TED 3350, TED 4330 and TED 4340; Co-requisites: TED 4320 and TED 4350. 2.75 NU GPA. Not open to non-degree graduate students.

TED 4320 TEACHING OF SOCIAL STUDIES: ELEMENTARY (3 credits)

This course is designed to prepare elementary teacher candidates with an introduction to the issues and methods related to teaching social studies to elementary students. An in-school guided practicum is associated with this course. Candidates must demonstrate instructional and professional competencies related to performance in PK-6 classrooms. This is the final practicum experience prior to the clinical practice semester.

Prerequisite(s): TED 3350, TED 4330 and TED 4340; co-requisite TED 4350, 2.75 NU GPA.

TED 4330 TEACHING OF MATHEMATICS: ELEMENTARY (3 credits)

This course is designed to prepare elementary teacher candidates as mathematics education professionals at the elementary level. The course utilizes "hands-on" discussion and laboratory oriented activities where participants actively practice instructional topics and techniques related to the learning of mathematics at the elementary level. The course will further prepare pre-service elementary teachers to be dedicated practitioners, reflective scholars, and responsible citizens, who can meet the instructional challenges of their profession, as it relates to the student learning of mathematics in a modern and changing world.

Prerequisite(s): MTCH 2000; Co-requisite TED 3350; 2.75 NU GPA.

TED 4340 TEACHING OF SCIENCE: ELEMENTARY (3 credits)

This course is designed to give the undergraduate elementary education candidate a survey of the content of science in the elementary and middle school and a study of the methods and techniques of teaching science.

Prerequisite(s): EDUC 2510 or EDUC 2520 or TED 2400; 2.75 NU GPA.

TED 4350 TEACHING OF READING AND LANGUAGE ARTS (6 credits)

This course is designed to prepare elementary teacher candidates as educators of reading and the other language arts. Teacher candidates will implement appropriate strategies and assessments in a practicum experience that demonstrate knowledge and dispositions appropriate for teaching reading and language arts to all students. This course will prepare pre-service elementary teacher candidates as dedicated practitioners, reflective scholars, and responsible citizens who can meet the challenges of their professions in a changing world.

Prerequisite(s): TED 3350, TED 4330 and TED 4340; co-requisite of TED 4320, 2.75 NU GPA.

TED 4370 TEACHING AT THE MIDDLE LEVEL (3 credits)

This course will provide candidates with a variety of middle level teaching techniques and strategies in their classrooms that have been identified in current research literature as appropriate for the middle level. This course is designed to introduce candidates to the unique characteristics of the middle student, school, curriculum, history, and philosophy. (Cross-listed with TED 8376).

Prerequisite(s): TED 2300 or EDUC 2010 or TED 2380.

TED 4570 LIBRARY SCIENCE CAPSTONE (3 credits)

Candidates will gain direct experience and an understanding of the theories, concepts and activities integral to public services, technical services, and the administration in a 21st Century library and information agency at an assigned field site or through an in-depth research project. Candidates will demonstrate the ability to plan, develop, and implement programming and services for patrons and diverse learners in their public, academic and special libraries.

Prerequisite(s): There are no specific course prerequisites for the Capstone Practicum but students must be in the final two semesters of their Library Science Education Program.

TED 4590 TEACHING AND LEARNING IN DIGITAL ENVIRONMENTS (3 credits)

This course provides foundational knowledge about tools and technologies for use with all types of educational scenarios. Course content will include information about many different types of learners and literacies and will explore instructional tools and strategies that enhance dissemination of digital information and digital instruction.

TED 4600 CLINICAL PRACTICE AND SEMINAR: ELEMENTARY OR SECONDARY LEVEL (12 credits)

A supervised teaching experience under the direction of university faculty/supervisor and a classroom teacher in the candidate's teaching area.

Prerequisite(s): Candidates must complete all coursework, have a minimum cumulative GPA of 2.75, and be accepted into Clinical Practice.

TED 4610 TEACHING OF WRITING THROUGHOUT THE CURRICULUM (3 credits)

This course is designed to enhance teacher candidates' knowledge of teaching writing. Candidates will learn about research-supported writing instruction strategies and assessments. Candidates will be writing extensively throughout the course as they examine the varied ways people communicate through writing. They will explore a variety of modes, genres, and digital tools to write and encourage students to write for authentic purposes and audiences.

Prerequisite(s): TED 2400.

TED 4630 INSERVICE STUDENT TEACHING: ELEMENTARY AND SECONDARY (3 credits)

Designed as an additional student teaching experience for in service teachers and students seeking certain additional certificates. Candidates must successfully complete an intermediate level field experience prior to student teaching.

Prerequisite(s): Permission. Application is made in the Office of Student Services.

TED 4640 K-12 CLINICAL PRACTICE AND SEMINAR ELEMENTARY/SECONDARY (12 credits)

A supervised teaching experience designed for students seeking certification in art, music, physical education, and library media in the K-12 preparatory program.

Prerequisite(s): Candidates must complete all course work and obtain a minimum overall (cumulative) consistent GPA of 2.75, and be accepted into student teaching.

TED 4644 CLINICAL PRACTICE ORIENTATION (0 credits)

This experience provides an introduction to clinical practice.

Prerequisite(s): Candidates must have complete all course work, obtained a minimum overall (cumulative) consistent GPA of 2.75, and been accepted into Clinical Practice.

TED 4650 CLINICAL PRACTICE AND SEMINAR: ELEMENTARY OR SECONDARY LEVEL (6 credits)

A supervised teaching experience under the direction of university faculty/supervisor and a cooperating teacher in the candidate's teaching area.

Prerequisite(s): Candidates must complete all course work, have a minimum cumulative GPA of 2.75, passing Praxis Core scores (Math, Reading, and Writing) and be accepted into Clinical Practice. Co-requisite of the course SPED 4700.

TED 4660 YOUNG ADULT LITERATURE (3 credits)

This course extends candidates' knowledge of literature for young adults. The course addresses current trends in the genre and engages candidates in activities that support pedagogies in basic, visual, information and cultural literacies.

TED 4700 EDUCATION CAPSTONE (3-6 credits)

This course is designed to provide individual and experiential learning in a supervised setting of a selected educational environment outside of the traditional P-12 classroom setting. The candidate will be introduced to the educational practices and roles in an environment that allows for integration of educational theory and practice.

Prerequisite(s): Completion of, or current enrollment in, Professional Education Core courses, GPA of 2.5, no grade below a C in required courses, and permission of Teacher Education Department Chair.

TED 4710 RESEARCH AND INQUIRY (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to reference resources and services in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of effective search strategies and efficient use of both print and digital resources, design and promote information literacy instruction that is developmentally appropriate, and understand the legal and ethical responsibilities integral to positive and proactive reference services for patrons and diverse learners.

TED 4720 SPECIAL LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the major types of 21st Century special libraries and information agencies. Candidates will demonstrate an understanding of social and political environments, clientele, services, collections, physical settings, financing and staffing, and future trends in the special libraries and information agencies. (Cross-listed with TED 8726).

TED 4740 MANAGEMENT OF INFORMATION RESOURCES IN LIBRARIES (3 credits)

This course addresses basic theory and best practice in collection management, descriptive and subject cataloging, and classification of information resources using national standards and resources. Course will address the theories, concepts and activities integral to proactive collection development in 21st Century libraries. Candidates will demonstrate understanding of the legal and ethical aspects of the collection and organization of information resources by appropriately applying the standards of their discipline to ensure access to information and ideas for all patrons.

Prerequisite(s): Not open to non-degree graduate students.

TED 4760 MANAGING COLLECTIONS IN LIBRARIES AND INFORMATION AGENCIES (3 credits)

Candidates will demonstrate an understanding of the theories, concepts and activities integral to proactive collection management in 21st Century libraries and information agencies. Candidates will demonstrate an understanding of community analysis, collection analysis, and the ability to conduct critical evaluations of a diverse array of information resources.

TED 4800 LEADERSHIP AND MANAGEMENT IN LIBRARIES (3 credits)

The course introduces concepts for effective leadership and management for 21st Century libraries of all kinds (special, public, academic, and school). Candidates will be introduced to vocabulary, philosophies, and processes involved in administration of libraries in support of ensuring quality service to all library patrons. Candidates will be introduced to professional ethics and principles and will be made aware of best practices in management of library services and facilities.

Distribution: Writing in the Discipline Single Course

TED 4810 PRINCIPLES AND PHILOSOPHY OF INTEGRATING CAREER AND ACADEMIC EDUCATION (3 credits)

This course presents the philosophies and principles/practices underlying how schools can better prepare students for the workplaces of the future with emphasis on the integration of career education within broader academic preparation. The roles and responsibilities of teachers, counselors, and administrators in implementing integrated approaches will be examined. (Cross-listed with TED 8816).

TED 4850 COORDINATION TECHNIQUES IN WORK-BASED LEARNING (3 credits)

This course reviews responsibilities and techniques of coordination for the work-based learning teacher-coordinator and/or work-based learning coordinator, with special emphasis on administration of the part-time cooperative program and analysis of the laws and regulations governing this program. (Cross-listed with TED 8856).

Theatre (THEA)

Theatre Undergraduate Courses

THEA 1000 THEATRE PRACTICUM (1 credit)

Lecture, discussion, and experience in theatre production concepts and techniques. One hour formal meeting each week and an average of two-four hours per week in an assigned technical production area based on your interests and skills. Required of Theatre majors and may be taken by all other students. May be repeated eight times.

THEA 1010 THEATRE APPRECIATION (3 credits)

A survey course designed to introduce students to all areas of theatre practice and study. Several major periods of theatre art and practice will be explored and, depending on the instructor, emphasis may include acting, playwriting, design and theatre technology, and or theatre literature.

Prerequisite(s): None. Not recommended for Theatre Majors

Distribution: Humanities and Fine Arts General Education course

THEA 1020 SUMMER MUSICAL THEATRE ACADEMY (0-1 credits)

Intensive supervised workshops and experiential learning opportunities involving significant contribution(s) to the summer musical theatre academy or other departmentally approved arts organizations and programs.

Prerequisite(s): Permission of Instructor

THEA 1050 FILM HISTORY AND APPRECIATION (3 credits)

A journey through one of many different possible worlds of film. Students will learn about various dimensions of filmmaking—historical development, cinematography, editing, screenwriting, and so much more. Exposure to critical perspectives on the genre(s) under consideration. Includes regular viewing of excerpts and full-length films. (Cross-listed with JMC 1050).

Distribution: Humanities and Fine Arts General Education course

THEA 1060 HISTORY OF THE BROADWAY MUSICAL (3 credits)

This course develops knowledge of America's Broadway musical tradition as an artistic and cultural phenomenon. It explores the evolving art form from its earliest ethnic expressions to the golden age of song, the classic book musical, innovations in form, and ending with the most recent embrace of inclusiveness and the diversity of our American identity.

Distribution: Humanities and Fine Arts General Education course

THEA 1070 SUPER HERO CINEMA (3 credits)

A senses-shattering survey of the cinema of superheroes! Students will study the history and evolution of the superhero genre on the big (and small) screens, reviewing selected excerpts and full-length films, recorded lectures, and curated readings. Featuring a pulse-pounding parade of profound and provocative motion pictures!

THEA 1080 TAYLOR SWIFT & FRIENDS: THE DRAMA OF STORYTELLING, STAGE AND SPECTACLE (3 credits)

Songwriters tell stories through lyrics. Pop icons take this storytelling to new heights with lighting, costumes, visual images, and other spectacles of theatre. In this course we will discover the connections between Taylor Swift, Beyoncé, Madonna and Prince as we explore their art through the marriage of life, storytelling, music, film, and the impact they have had on popular culture.

THEA 1200 SINGING TECHNIQUE FOR ACTORS (1 credit)

THEA 1200 Singing Technique for Actors provides instruction in singing technique. It is designed for non-music majors to practice the concepts of vocal health, resonance, breath support, elements of good musicianship and song interpretation. It is focused on Contemporary Commercial Music (CCM)/non-classical styles of singing and uses different criteria than the School of Music to meet more diverse musical backgrounds.

THEA 1300 ACTING I (3 credits)

The basic acting class, for majors and non-majors. Emphasis on freeing oneself as a preparation for basic character and scene work using exercises for relaxation, energy generation, concentration and group interaction. Three relationships basic to the actor are explored: to oneself, to another actor, to the ensemble.

Distribution: Humanities and Fine Arts General Education course

THEA 1500 FOUNDATIONS OF PRODUCTION DESIGN (3 credits)

An introductory course introducing students to the omnipresence and role of design in contemporary society; and to fundamental elements and principles of analysis, conceptualization, and visual interpretation, as they apply to the production design process.

THEA 1600 FOUNDATIONS OF SCENIC PRODUCTION (3 credits)

An introduction to scenic production class designed to develop the skills, knowledge, theories and materials of professional designers and craftspersons, as well as developing a working knowledge of the practices in the business of technical theatre.

THEA 1604 FOUNDATIONS OF SCENIC PRODUCTION LAB (0 credits)

Foundations of Scenic Production Lab covers topics in theatre safety, rigging, lighting and construction, to be taken concurrently with THEA 1600. Instruction and practice in industry standards is also an emphasis of the course.

Prerequisite(s): Enrolled concurrently with THEA 1600, Foundations of Scenic Production

THEA 1650 STAGE COSTUME (3 credits)

An introductory course covering foundational vocabulary, skills, materials, tools, and processes used for costume construction specifically for the theatre.

Prerequisite(s): THEA 1654 to be taken concurrently.

THEA 1654 STAGE COSTUME LAB (0 credits)

Topics in Stage Costume Lab include foundational vocabulary, skills, materials, tools, and processes used for costume construction specifically for the theatre.

Prerequisite(s): THEA 1650 to be taken concurrently.

THEA 1660 STAGE MAKEUP (3 credits)

This course will introduce students to the complexities of stage makeup. Utilizing a hands on approach, the course is specially designed to facilitate active learning while exploring basic makeup procedures and complex prosthetic makeup application.

THEA 1700 SCRIPT ANALYSIS (3 credits)

This course introduces a variety of approaches for analyzing plays and other dramatic works, especially as they are employed by actors, directors, designers, dramaturgs, and other theatre artists. There will be multiple opportunities to apply these methods of analysis through class discussion and written work. Script analysis will be explored with an eye toward theatrical production, recognizing each playscript as the blueprint for a potential production. Particular attention will be paid to genre, structure, style, character, theme, language, imagery, and dramatic action. The focus will be on traditional dramatic structure, though some attention/discussion will be given to less traditional/non-linear works.

THEA 2000 THEATRE PRACTICUM II (2 credits)

Lecture, discussion, and experience in theatre production concepts and techniques. One hour formal meeting each week with Instructor, and an average of two-four Lab hours per week (or more) in an assigned technical production area based on your interests and skills. Lab hours will be established with the lab supervisor. Required of Theatre majors and may be taken by all other students. May be repeated for credit.

Prerequisite(s): Four semesters of THEA 1000.

THEA 2020 THEATRE FOR YOUNG AUDIENCES (3 credits)

A course that introduces the theories and practices of using theatre and drama as an educational and social tool, as well as creating theatre for and with youth. Includes opportunities to create and utilize techniques in both performance and the learning environment.

Prerequisite(s): THEA 1010 Theatre Appreciation or THEA 1300 Acting I or THEA 1600 Foundation: Scenic Production

THEA 2030 INTERNSHIP I (1-6 credits)

This course provides an opportunity for the student to participate in a professional theatre company and receive course credit. The course will involve practical application. Areas of study might include artistic direction, direction, dramaturgy, arts management, production management, design and technology, or performance. Assignments are made according to the individual interests and skills of the student as they match available opportunities and needs in the industry.

Prerequisite(s): THEA 1000 Theatre Practicum (2 credits). Permission of instructor.

THEA 2280 DANCE FOR THE THEATRE I (1 credit)

In this course, students will explore a wide array of dance styles, each carefully selected to enhance their understanding and appreciation of the role dance plays in musical theatre.

THEA 2290 DANCE FOR THE THEATRE II (1 credit)

Dance for Theatre II will serve as an Intermediate course that will build on students' foundational dance skills and vocabulary. Students will explore a wide array of dance styles, each carefully selected to enhance their understanding and appreciation of the role dance plays in musical theatre.

Prerequisite(s): THEA 2280 or permission of instructor

THEA 2300 MOVEMENT FOR THE ACTOR (3 credits)

Discovery and training of the human body as a technical instrument and as one of the key expressive elements of any performance-oriented medium.

Prerequisite(s): THEA 1300 Acting I

THEA 2400 STAGE MANAGEMENT (3 credits)

This fundamental course investigates theater-making from the point of view of a stage manager. Through the exploration of a theatre production process, students learn the artistic and organizational techniques needed to professionally stage-manage traditional and non-traditional productions. Integrated management theory allows each student to identify how their practice can be informed by theory and to begin cultivating their individual stage management style.

Prerequisite(s): Permission of instructor

THEA 2500 DRAWING FOR THE THEATRE (3 credits)

Drawing for the Theatre is a course that introduces students to the visual language of drawing through observation, exercises and most importantly, evaluations and critiques. In addition to traditional drawing techniques, this course will cover color theory and figure drawing. The course develops insights into the mechanisms of visual perception, how the individual components of the drawing relate to the whole and compositional organization. Each student develops observational skills rooted in traditional drawing media while striving to develop critical thinking and research skills.

Prerequisite(s): THEA 1500 or THEA 1510 Foundations of Production Design, THEA 1700 Script Analysis

THEA 2600 COSTUME PATTERNING AND DRAPING (3 credits)

Exploration of the creation of patterns for theatrical costumes. Techniques include flat patterning, draping and development of historical patterns. Specific attention is given to period silhouette and detail and theatrical costume production conventions.

Prerequisite(s): THEA 1650 or THEA 1550 or permission of instructor.

THEA 3000 SPECIAL TOPICS IN THEATRE (3 credits)

This course utilizes a topical approach that explores various aspects of theatre that are outside the set Theatre curriculum. Topics and disciplines will vary from term to term. Course description will be announced in advance. It is repeatable for credit if content differs.

THEA 3010 ADVANCED PROJECTS IN THEATRE: INDEPENDENT STUDY (1-3 credits)

Special projects in theatre supplementing regular courses; individual research projects; combined study and practicum.

Prerequisite(s): THEA 1000 Theatre Practicum, THEA 1700 Script Analysis

THEA 3200 MUSICAL THEATRE ENSEMBLE (1 credit)

THEA 3200 Musical Theatre Ensemble is offered during spring semester and uses the study of selected musical theatre repertoire, rehearsal, individual coaching, and group exercise to provide instruction in ensemble singing, solo singing, musicianship, movement and acting. It is designed for students pursuing musical theatre study and develops the skill sets that are needed for musical theatre performance.

Prerequisite(s): THEA 1200, or Permission of the Instructor.

THEA 3210 ADVANCED SINGING TECHNIQUE FOR ACTORS (1 credit)

THEA 3210 Advanced Singing Technique for Actors provides instruction in advanced singing technique. It is designed for students to develop and practice the concepts of vocal health, resonance, breath support, elements of good musicianship and song interpretation. It is focused on CCM/non-classical styles of singing and uses different criteria than the School of Music to meet more diverse musical backgrounds. This course advances to higher levels of instruction in singing technique from the perspective of the actor and musical theatre repertoire.

Prerequisite(s): THEA 1200

THEA 3230 AMERICAN MUSICAL THEATRE REPERTOIRE HISTORY (3 credits)

THEA 3230 American Musical Theatre Repertoire History is a lecture-based course that surveys important songwriters and significant shows from present day Broadway back in time to the 1927 Showboat. It is designed to give students from the avid musical theatre enthusiast to those pursuing career paths in musical theatre a foundation in the innovations, history, musical styles, major breakthroughs, and growth of the art form from Showboat and Oklahoma to Hamilton and Hadestown.

THEA 3260 MUSICAL THEATRE AND OPERA WORKSHOP (1 credit)

THEA 3260/MUS 3260 Musical Theatre and Opera Workshop is an ensemble offered during fall semester that integrates singing, movement and acting through rehearsal, private musical coaching and group exercise. It is designed for students in opera and musical theatre and develops the skill sets that are needed for performance. (Cross-listed with MUS 3260).

THEA 3300 ACTING II (3 credits)

Incorporating skills and awareness developed in Acting I, this class moves toward examining various tools for character development by oneself, in large group improvisations and with written scripts. Specific scene work leads to a final scene presented both for the class and for all interested persons.

Prerequisite(s): THEA 1300 Acting I

THEA 3310 VOICE FOR THE ACTOR (3 credits)

This course is a comprehensive exploration of the actor's voice and speech. The student gains a detailed understanding of breath, tension and relaxation, resonance, articulation, textual interpretation, and learns to combine movement and voice, enhancing creativity in vocal expression. The focus is freeing the unique vocal potential of each student, and on training the voice for performance.

Prerequisite(s): THEA 1300 Acting I. Not open to non-degree graduate students.

Distribution: Humanities and Fine Arts General Education course

THEA 3400 DIRECTING I (3 credits)

Directing I examines the development of the role of director in Western Theatre; provides practice in the directing process including script analysis, dramaturgical research, staging visual composition, collaboration with designers and performers; considers alternative approaches to directing and encourages students to begin to develop a personal directing style.

Prerequisite(s): THEA 1300, THEA 1500, THEA 1600, THEA 1700, THEA 3300

THEA 3410 HUMAN DYNAMICS IN THE ARTS (3 credits)

Human Dynamics in Arts is a practical course for students who aspire to become effective leaders, managers and directors of arts-based organizations in, non-profit, education, and business sectors. Students will gain a deeper understanding of how to strengthen organizations by recognizing the complex interplay of individual motivation, personal growth, effective communication, and organizational goals. Students will learn to apply specific communication techniques that will enable them to recognize patterns of behavior that reflect underlying emotional needs critical to motivation and workplace productivity. They will use these techniques to build trust, foster positive working relationships, maximize talents, and develop more effective, productive, and dynamic organizations. Students will also gain an understanding of the importance of developing an entrepreneurial mindset critical to success in a rapidly changing workplace. They will learn to recognize opportunities, identify solutions, and develop clear, effective strategies for moving their arts organizations forward.

Prerequisite(s): CMST 1110 and Junior Standing

THEA 3420 GLOBAL CITIZENSHIP IN THE ARTS (3 credits)

This course is about artistic excellence married to ethical practices and responsible world citizenship. Students will analyze and evaluate how to use art to address community issues and discover a road map that allows for authentic, consistent, and sustainable commitment to the community and its needs.

Prerequisite(s): ENGL 1160 and Junior Standing

THEA 3440 EXPLORING ART THERAPY (3 credits)

This course provides an overview of the field of art therapy and the use of therapeutic art. Topics covered include: The historical use of art as healing across cultures, the contemporary use of art therapy with various populations and settings; an introduction to the theories, techniques; and the profession of art therapy. Students participate in representative art therapy activities, but previous art experience is neither required nor expected. This course does not qualify participants to practice art therapy but will provide information on its safe and effective utilization by health professionals. (Cross-listed with ART 3440, MEDH 3440, WRWS 3440).

THEA 3500 COLLABORATIVE DESIGN STUDIES (3 credits)

Collaborative Design Studies explores the integration and process of theatrical production including scenery, lighting, costume, projection and sound. It chronicles their individual and collective impact on storytelling. While developing the skills of the Scenographer, students will work collaboratively as they foster their individual artistic design talents, and recognize the impact of design on society through storytelling.

Prerequisite(s): THEA 1500/THEA 1510, THEA 1600/THEA 1630, THEA 1700

THEA 3660 STAGE AND TV LIGHTING (3 credits)

Characteristics and control of light and color and their application to the theatre and television; elementary electricity; lens systems; reflectors; lamps; control systems; automation. (Cross-listed with THEA 8665).

Prerequisite(s): THEA 1630 or permission of instructor.

THEA 3700 THEATRE HISTORY AND LITERATURE: 1960-PRESENT (3 credits)

This course offers a brief survey of European and world theatre from the emergence of post-modernism to the present time. It also focuses especially on theatre for social change, community development, and the community-based theatre movement. It will include a service-learning component with one or more regional social-service or similar agencies.

Prerequisite(s): ENGL 1160, THEA 1700

THEA 3710 THEATRE HISTORY AND LITERATURE: MODERN / 1800-1960 (3 credits)

This course is a survey of both western European and world theatre from the emergence of modernism to 1980, about the time of the emergence of post-modernism.

Prerequisite(s): ENGL 1160, THEA 1700

THEA 3720 THEATRE AND SOCIAL JUSTICE (3 credits)

This service-learning course will combine both research and practice in theatre that involves social change. Students will study the history of such theatre, with special focus on developments in the 20th century. All research will be accompanied by several community-based projects whereby students will create theatre with specific populations (schools, community centers, health centers, senior homes, etc.).

Prerequisite(s): ENGL 1160, THEA 1700

THEA 4000 SUMMER THEATRE WORKSHOP (3 credits)

Intensive supervised workshop experience involving significant overall contribution(s) to the summer theatre program.

THEA 4020 ADVANCED PROJECTS IN THEATRE (1-3 credits)

Completion of a undergraduate project relevant to the student's major area of study under the supervision of an advisor. The project must demonstrate competency in writing and research/creative activity as it pertains to appropriate aspects of theatre.

Prerequisite(s): 9 hours of theatre in the general area to be studied and permission of the instructor.

THEA 4030 INTERNSHIP II (1-6 credits)

This course provides an opportunity for the student to participate in a professional theatre company and receive course credit. The course will involve practical application. Areas of study might include artistic direction, direction, dramaturgy, arts management, production management, design and technology, or performance. Assignments are made according to the individual interests and skills of the student as they match available opportunities and needs in the industry.

Prerequisite(s): THEA 1000 Practicum, THEA 2000 Practicum II or Permission of Instructor

THEA 4050 SHAKESPEARE ON FILM: THE ART OF INTERPRETATION (3 credits)

Study how Shakespeare's plays are interpreted for performance. Explore how production shapes our understanding of the text. Understand how the change of medium from page to stage to screen reveals meaning in unique ways. Experience a dynamic way of making the most extraordinary plays your own. Classes will feature readings, lecture, class discussion, and film screenings of different cinematic interpretations of several of Shakespeare's plays. Previous study of Shakespeare is helpful but not required.

Prerequisite(s): Junior standing or permission of instructor.

Distribution: Humanities and Fine Arts General Education course

THEA 4310 ADVANCED ACTING: POST REALISM (3 credits)

Advanced work in the technical skills of voice, speech, movement and textual analysis needed for post-realist material.

Prerequisite(s): THEA 1700, THEA 2300, THEA 1300, THEA 3300 or graduate with an undergraduate major or minor in theatre or permission of instructor.

THEA 4320 ADVANCED ACTING: GREEKS TO RESTORATION (3 credits)

The fundamental theories and practices of major styles of acting from ancient Greece to the Restoration, including interpretation of outstanding dramatic literature.

Prerequisite(s): THEA 1700, THEA 2300, THEA 1300, THEA 3300 or graduate with an undergraduate major or minor in theatre or permission of instructor.

THEA 4330 ADVANCED ACTING: ENSEMBLE PLAY PRODUCTION (3 credits)

In-depth exploration of a play or playwright's work to connect acting class with performance. Special emphasis on creating a working process that allows the ensemble to emerge. The class will culminate in public performance.

Prerequisite(s): THEA 1700, THEA 2300, THEA 1300, THEA 3300 or graduate with an undergraduate major or minor in theatre or permission of instructor.

THEA 4340 ADVANCED ACTING: AUDITIONING (3 credits)

An acting class designed to develop auditioning skills and material as well as cultivate a working knowledge of the business of acting.

Prerequisite(s): THEA 2310 or THEA 1300 and THEA 2320 or THEA 3300 and Junior standing. Graduate with an undergraduate major or minor in theatre or permission of the instructor.

THEA 4400 DIRECTING II (3 credits)

A practicum in play selection, analysis, casting, rehearsing and performing.

Prerequisite(s): THEA 1300/THEA 2310, THEA 1500/THEA 1510, THEA 1600/THEA 1630, THEA 1700, THEA 3300/THEA 2320, THEA 3400/THEA 4430

THEA 4500 CHALLENGES IN PRODUCTION DESIGN (3 credits)

Evaluation and exploration of the world of theatrical storytelling using line, texture, contrast, theme, metaphor and symbolism. Students will work collaboratively as they foster their individual artistic talents, and recognize the impact of design on society through storytelling. (Cross-listed with THEA 8506).

Prerequisite(s): THEA 1500/THEA 1510 and THEA 1700 or permission of instructor.

THEA 4550 PERIOD STYLES IN DRESS AND DECOR (3 credits)

An historical survey course introducing students to the major periods and iconic styles and trends in western architecture, dress and interior decor of the past 2000 years; and to the social, cultural and technological influences on those trends, particularly as they relate to theatrical and production design.

Prerequisite(s): THEA 1700 and THEA 3700/THEA 3770, THEA 3710/THEA 3760, THEA 4710 or THEA 4720 or by permission of instructor.

THEA 4610 SCENE DESIGN (3 credits)

Scene Design is an advanced level course intended for aspiring scene designers or those that want to learn about the specific requirements of the scene design process. The focus of this course will be the study of techniques of communicating a scenic design. Topics of class will include, script analysis, sketching, research, floor plans, wall elevations, sketch models, paint elevations, and presentations models.

Prerequisite(s): THEA 1600 and THEA 1700 and Junior standing.

THEA 4780 THEATRE HISTORY AND LITERATURE: CLASSICAL TO 1500 (3 credits)

This course is a survey of both western European and early Asian theatre and the related theatre literature in ancient Greece and Rome, India, and medieval Europe from the fifth century BCE to the beginning of the European renaissance.

Prerequisite(s): ENGL1160 and Junior standing

THEA 4790 THEATRE HISTORY AND DRAMATIC LITERATURE: 1500 TO 1800 (3 credits)

This course is a survey of primarily western European theatre and the related theatre literature from the Renaissance until the English sentimental comedy.

Prerequisite(s): ENGL 1160 and Junior standing or Permission of the Instructor.

THEA 4900 ADVANCED PROJECTS - CAPSTONE (3 credits)

Demonstration of mastery in a specific area of theatre through an advanced project in acting, musical theatre, directing, design/technical theatre, playwriting, or dramaturgy. This will serve as an end of career course designed to evaluate the student's competency and knowledge of theatre practice.

Prerequisite(s): THEA 1000 Practicum, THEA 2000 Practicum, and permission of the instructor

University Seminar (US)

University Seminar Undergraduate Courses

US 1000 BRIDGE PROGRAM (0 credits)

The Bridge Program within the Thompson Learning Community provides additional support to students enrolled in English as a Second Language courses (ESL I and ESL II). Curriculum and supplemental activities are designed to help these students better navigate the University of Nebraska at Omaha campus.

Prerequisite(s): Be a member of the Thompson Learning Community, enrolled in ENGL 1090 or ENGL 1100. Not open to non-degree graduate students.

US 1010 CRITICAL THINKING AND PROBLEM SOLVING FOR THE MODERN DAY STUDENT (1 credit)

Students will use critical thinking and reasoning to analyze themes, perspectives, and concepts drawn from academic works, career development theory, and Positive Psychology to inform academic, personal and professional lives.

Prerequisite(s): Limited to students who have earned 15 or fewer credit hours and have not taken an equivalent course. Students should not register for US 1010 and US 1020. Not open to non-degree graduate students.

US 1020 TLC ACADEMIC SUCCESS SEMINAR (0 credits)

This course is intended to enhance first-year students' potential for success in college. This course will provide students the opportunity to learn about academic strategies, network with other TLC community members and staff, and become familiar with UNO resources and programs.

Prerequisite(s): Thompson Learning Community members only. Freshman only or permission. Not open to non-degree graduate students.

US 1030 LEADING YOUR MONEY (0 credits)

Personal finance for the collegiate leader.

US 2020 TLC SOPHOMORE SEMINAR (0 credits)

TLC Sophomore Seminar is a course designed to assist students in exploring university and academic identity, build leadership competency, introduce students to resources that will lead to major and career exploration, and build networking relationships at UNO and in the community.

Prerequisite(s): Second-year Thompson Learning Community Students. Not open to non-degree graduate students.

US 2800 CAREER COMPETENCIES FOR PROFESSIONAL SUCCESS (3 credits)

This course facilitates the development of 21st century skills to enable professional success in a variety of fields. Topics include aligning occupational information with self-awareness, professional communication, critical thinking and self-advocacy for lifelong career management.

US 3030 TLC MENTOR INTERNSHIP (0-1 credits)

Students serve as peer mentors who help first-year students to transition into college and connect them to necessary resources for academic and personal success.

Prerequisite(s): Current Thompson Learning Community (TLC) student with a 2.5 GPA. Not open to non-degree graduate students.

Urban Studies (UBNS)

Urban Studies Undergraduate Courses

UBNS 1010 INTRODUCTION TO URBAN STUDIES (3 credits)

Introduction to history, concepts, development and literature of urbanism. An interdisciplinary examination of issues confronting contemporary urban society and how various academic disciplines relate to those issues. (Cross-listed with PA 1010).

UBNS 2500 CITIES: PLANNING, POLICIES, & CONTEMPORARY ISSUES (3 credits)

Course on urban policies, policymaking, and planning. Attention is given to various current urban issues and the policy options surrounding them. Policy processes and the institutions of policymaking in cities are covered. Topics of focus include policies related to policing, economic development, land use, transportation, education, poverty, housing, and ordinances. Additionally, issues in city planning and design are covered as they apply to the city policymaking processes and politics.

Distribution: Social Science General Education course

UBNS 3200 SUMMER IN THE CITY: EXPLORING THE URBAN ENVIRONMENT (3 credits)

This experiential course explores the urban fabric of Omaha, Nebraska, bringing students to a new location in the city every week. Students will interact with local communities, neighborhoods, festivals and events, institutions, and the urban landscape of businesses, people, historical and cultural sites, and one another. As true participant/observers, we will reflect on how the city functions as an interactive metropolitan environment both supporting and placing demands on its residents and visitors. We will consider Omaha's current role in Nebraska and the Great Plains, as well as its internal functionality for its many constituents as we envision the futures of interactive urban, metropolitan areas.

Women's and Gender Studies (WGST)

Women's and Gender Studies Undergraduate Courses

WGST 1950 BLACK WOMEN IN AMERICA (3 credits)

This course will examine how Black women in America have evolved politically, economically, and socially under oppressive conditions of slavery, the Reconstruction Era, Jim Crow, and through the Civil Rights, Black Lives Matter, and "Me Too" Movements. The underlying themes of this course are the impact of gender and race on Black women, with an emphasis of how gender and race are fueled by white supremacy, patriarchy, colonialism, capitalism, and imperialism. (Cross-listed with BLST 1950)

Distribution: U.S. Diversity General Education course

WGST 2000 SPECIAL TOPICS: GENDER AND SEXUALITY IN ENGLISH STUDIES (3 credits)

A variety of topics primarily for the non-major. (For example, this course might study the image of businesswomen in American literature.) One or two such topics may be offered each term, depending upon student interest and available faculty. Students should consult each term's class schedule in order to determine the specific topics for that term.

Prerequisite(s): None. ENGL 1160 recommended

WGST 2010 INTRODUCTION TO WOMEN'S AND GENDER STUDIES: SOCIAL AND BEHAVIORAL SCIENCE (3 credits)

A survey course which explores social science perspectives on women, men, and gender, including the biological contribution to human behavior and the impact of science as an institution. Examines challenges to traditional definitions of women's place and movements for change. Includes historical and multicultural materials.

Prerequisite(s): ENGL 1150 is recommended.

Distribution: Social Science General Education course and U.S. Diversity General Education course

WGST 2020 INTRODUCTION TO WOMEN'S AND GENDER STUDIES: HUMANITIES (3 credits)

An introduction to women's and gender studies in the humanities (literature, art, dance, music, theatre, philosophy). Explores both historical and contemporary images of women in these fields; discusses the context in which these images developed. Introduces the basic concepts and terminology of women's and gender studies.

Prerequisite(s): ENGL 1150 is recommended.

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

WGST 3000 SPECIAL TOPICS: GENDER AND SEXUALITY IN ENGLISH STUDIES (3 credits)

A study of designated specific topics related to gender and sexuality studies within the disciplines of English (May be repeated for credit as long as the topic is not the same.)

Prerequisite(s): Variable according to topic.

WGST 3020 PERSPECTIVES ON LEADERSHIP (3 credits)

This course studies scholarship on and the practices of gender and leadership for undergraduate students. It is a service-learning course.

Prerequisite(s): WGST 2010 or WGST 2020

WGST 3080 HUMAN SEXUALITY (3 credits)

An examination of factors influencing sexual development. Emphasis is given to topics pertinent to healthful living in today's culturally diverse, global society. (Cross-listed with PHHB 3080).

WGST 3100 LGBT POLITICS (3 credits)

This course introduces students to the political struggle for Lesbian, Gay, Bisexual, and Transgender (LGBT) equal rights in the United States using a model of political empowerment, which may be applied for all minority or identity groups and social movements, generating operationalized measures of progress toward the loci of political power. (Cross-listed with PSCI 8105, PSCI 3100, WGST 8105)

Prerequisite(s): PSCI 1100 is recommended.

Distribution: U.S. Diversity General Education course

WGST 3120 WOMEN AND THE BIBLE (3 credits)

This course explores the characterization of women in Hebrew and Christian scriptures as well as what we can learn about the lives of women in the ancient world from these and other sources. Attention is also given to the reception and use of these texts in later historical periods including contemporary religious contexts. (Cross-listed with RELI 3130).

WGST 3130 WOMEN AND POLITICS (3 credits)

This course introduces students to women's political participation, including holding elective office, socialization, the feminist movement and its opposition, and public policies with particular impact on women. The focus is on contemporary perspectives on women in American political ideas and behavior. (Cross-listed with PSCI 3130, PSCI 8135, WGST 8135)

Prerequisite(s): PSCI 1100 is recommended.

Distribution: U.S. Diversity General Education course

WGST 3160 QUEER AMERICAN WESTS (3 credits)

A survey of queer literatures about the American West. The course will explore a variety of genres, including poetry, short stories, plays, novels, creative nonfiction, and, depending on time, film/television. "Queer" will be construed as including any "non-normative" sexualities and sexual identities (e.g., genderqueer, winkle, two-spirit, 3rd/4th gender). Non-western writers (e.g., Walt Whitman) imagining the West queerly may also be included. (Cross-listed with ENGL 4280, ENGL 8286).

Prerequisite(s): ENGL 1160; completion of writing in the major course recommended.

WGST 3180 GENDER IDENTITY IN PERSONAL WRITING (3 credits)

Students will read a variety of memoirs and personal essays by both emerging and established LGBTQIA+ creative nonfiction writers and allies, with a focus on trans writers; analyze the craft choices each author makes; analyze textual and theoretical explorations of gender identity and gender performativity; and explore their gender identities, and gender experiences in the essays that they compose. (Cross-listed with ENGL 3180).

Prerequisite(s): ENGL 1150 and ENGL 1160 or equivalents required.

WGST 3230 GENDER AND GLOBAL POLITICS (3 credits)

This seminar introduces students to gender politics in comparative and international politics. (Cross-listed with PSCI 3230, PSCI 8235, WGST 8235)

Prerequisite(s): PSCI 2500 is recommended.

Distribution: Global Diversity General Education course

WGST 3390 WOMEN, CRIME AND JUSTICE (3 credits)

This course focuses on women's experiences in the criminal justice system. The course will examine women's experiences as victims of crime, as offenders, as prisoners, and as criminal justice professionals. (Cross-listed with CRCJ 3390)

Prerequisite(s): Sophomore standing or instructor permission.

Distribution: U.S. Diversity General Education course

WGST 3490 GENDER AND PHILOSOPHY (3 credits)

This course examines philosophical arguments concerning gender and sexual difference, gender issues and women in the history of philosophy, and major views in feminist theory. Using arguments derived from feminist theory, we will undertake a critical inquiry into the ways in which gender, geography, and power inform political institutions and, in particular, medical research and health disparities. Taking the perspective of women's lives from across the globe through case studies, we will interrogate feminist theory in relation to non-US perspectives on gender and sexuality. (Cross-listed with PHIL 3490).

Prerequisite(s): Sophomore status OR 6 hours of PHIL OR 6 hours of WGST.

Distribution: Global Diversity General Education course

WGST 3750 GENDER AND COMMUNICATION (3 credits)

This course provides a survey of literature on communication about, by, and between women, men, and trans people in society, personal relationships, and organizations. Students develop an understanding of how cultural meanings of gender both shape and are shaped by communication. (Cross-listed with CMST 3750).

Prerequisite(s): Not open to non-degree graduate students.

Distribution: U.S. Diversity General Education course

WGST 4000 SPECIAL TOPICS: GENDER & SEXUALITY IN ENGLISH STUDIES (3 credits)

A study of designated specific topics related to gender and sexuality studies at the Senior level within the disciplines of English (May be repeated for credit as long as the topic is not the same.)

Prerequisite(s): Variable according to topic

WGST 4030 PERSONAL LEADERSHIP (3 credits)

In addition to a survey of leadership styles and theories, this course provides historical and contemporary perspectives of gender and leadership, barriers to women's leadership, bias, and discrimination. Individual leadership is examined within the context of being a change agent. This is a service learning course.

Prerequisite(s): WGST 2010 or WGST 2020

WGST 4060 HISTORY OF WOMEN IN AMERICA FROM 1875 - 1922 (3 credits)

This course examines the history of women in the United States from 1875 to 1922. Topics include law, work, sexuality and reproduction, immigration, civil rights, political participation and party politics, and changes to the American gender system, including family structure and employment. (Cross-listed with HIST 4060, WGST 8066, and HIST 8066).

Prerequisite(s): Junior or permission of instructor.

WGST 4070 GENDER AND LEADERSHIP CAPSTONE: COMMUNITY ACTION PROJECT (3 credits)

This course is designed for students in the final stage of the Gender and Leadership Certificate. Activities focus on practical experience in an organization that will allow students to exercise, observe, and later share lessons with classmates about leadership qualities and skills.

Prerequisite(s): WGST 2010 or WGST 2020 and either WGST 3020 or WGST 4030

WGST 4120 BLACK WOMEN LEADERS IN LIBERATION MOVEMENTS (3 credits)

This course studies scholarship on race, gender, and leadership with a specific focus on African and African descended women's roles in liberation movements in the U.S. and worldwide. Especial focus will be on the use of their personal narratives to analyze the wide range of ideas in the conception and execution of leadership. (Cross-listed with BLST 4120, BLST 8126).

Prerequisite(s): Junior standing or permission of instructor.

WGST 4130 GENDER & LEADING SOCIAL CHANGE (3 credits)

This course will cover theories, philosophies, movements, and concepts related to social change as a process and outcome. It is a service-learning course.

Prerequisite(s): WGST 2010 or 2020. Junior standing or permission.

WGST 4150 GEOGRAPHY, GENDER AND ENTREPRENEURSHIP (3 credits)

An advanced seminar focused on links among geography, gender and work, emphasizing leadership and entrepreneurship. The course considers theory and method in addition to empirical work. The nature of space, of gender, and of work, are examined. Topics include the gendering of work, the geography of entrepreneurship, gender and leadership. (Cross-listed with ENTR 4150, ENTR 8156, GEOG 4150, GEOG 8156 and WGST 8156).

Prerequisite(s): Junior, senior, or graduate standing, or permission of instructor.

WGST 4210 GEOGRAPHIES OF SEXUALITIES (3 credits)

How are geography and sexuality related? What have cities got to do with sexual identities? Can rural spaces foster diverse sexual communities? These and related questions are the focus of this upper-level undergraduate and graduate-level course. Students read scholarly work by and about LGBTQ+ (Lesbian, Gay, Bisexual, Transgender, Queer, and +), and cisgender people, and their lived experiences creating and inhabiting different geographies. Students gain an appreciation for the social construction of diverse sexualized spaces and considers questions about equity and policy through case studies in a variety of countries. Each student also researches a course-relevant topic they choose. (Cross-listed with GEOG 8216, GEOG 4210, WGST 8216).

Prerequisite(s): GEOG 1000, GEOG 1020, WGST 2010, or WGST 2020, or junior standing, or permission of the instructor.

WGST 4250 WOMEN'S STUDIES IN LITERATURE (3 credits)

A critical study of literature by and/or about women in which students learn about contributions of women to literature, ask what literature reveals about the identity and roles of women in various contexts, and evaluates standard interpretations from the perspectives of current research and individual experience. (Cross-listed with ENGL 4250, ENGL 8256).

Prerequisite(s): ENGL 1160 and one additional course in literature or permission.

WGST 4270 WOMEN WRITERS OF THE NORTH AMERICAN WEST (3 credits)

A survey of U.S. and Canadian women writers (18th century to the present) enabling students to examine issues of gender and sexuality across a wide thematic range, including settlement, land use, cultural displacement, and survival in western territories, states, and provinces of North America. (Cross-listed with ENGL 8276, ENGL 4270).

Prerequisite(s): ENGL 1150 and ENGL 1160 or equivalent; completion of ENGL 2410 or other writing in the major course recommended.

WGST 4550 HEALTH ASPECTS OF AGING (3 credits)

This course emphasizes health promotion for older adults. Special health needs of older Americans are compared and contrasted with health needs for other age groups. Prevention or delaying of chronic diseases and disorders are emphasized. (Cross-listed with PHHB 4550, PHHB 8556, GERO 4550, GERO 8556)

WGST 4560 FRANCOPHONE WOMEN WRITERS: EXILES, MADWOMEN, AND WITCHES (3 credits)

This course is an introduction in English to the rich variety of writing produced by women during the twentieth and twenty-first centuries from across the French-speaking world. We will focus on a selection of contemporary works by French and francophone women writers who lived and/or wrote in Canada, France, Guadeloupe, Haiti, North Africa, Senegal, and Quebec. The texts lend themselves to an exploration of many topical critical issues, including the construction of identity, the (re)presentation of history, the reliability of memory, and the effects of colonialism on different societies. In addition to our discussions of narrative motifs and technique, we will also look at the geopolitical and cultural contexts of these literary works, giving special attention to representations of gender, race, and class. (Cross-listed with FREN 8566, ENGL 4560, FREN 4560).

Prerequisite(s): Prereq: ENGL 1160 and one additional course in literature at the 2000 level or higher or permission.

WGST 4910 TOPICS IN WOMEN'S HISTORY (3 credits)

A course on selected topics offered on a one-time or occasional basis. Course may be repeated as long as the topic is different each time. Cross listed with WGST 4910/WGST 8916 when topics are appropriate to Women's and Gender Studies.

Prerequisite(s): Junior

WGST 4930 SPECIAL TOPICS IN GENDER AND ART HISTORY (1-3 credits)

An illustrated lecture course dealing with a limited topic in the field of art history. The course may be coordinated with an external event such as an exhibition, publication or study trip.

Prerequisite(s): To be determined by the instructor based upon the preparation required for an adequate understanding of the material of the course. Lab fee required.

World Languages and Literature (WLL)

World Languages and Literature Undergraduate Courses

WLL 1000 LINGUISTIC DIVERSITY IN US MEDIA (3 credits)

Delivered in English, this course introduces students to diversity in the US using language in context as points of departure. In this course, we analyze the intersection between language and ideological constructions (e.g., the objectification of Latino women, discrimination and stereotypes toward Asian peoples) and examine nodes of social meaning through visual and audio representations of language, as consumed in music, tv series, art (e.g., street art, installations) and social media. Departing from a US-centric and an assimilative approach, the course provides a historical and geographic lens through which these languages exist in the United States. (Cross-listed with FREN 1010, GERM 1010, JAPN 1020, SPAN 1010).

Distribution: Humanities and Fine Arts General Education course and U.S. Diversity General Education course

WLL 2520 SPECIAL TOPICS IN WORLD LANGUAGE AND CULTURE I (2 credits)

WLL 2520 is a language-open special topics course, primarily for non-majors. Students in this course will study linguistic and cultural topics not usually included in the curriculum. This could include development in linguistic and cultural proficiency in target languages not normally offered or in the study of specialized topics related to language, culture, literature or film studies.

WLL 2530 SPECIAL TOPICS IN LANGUAGE AND CULTURE I (3 credits)

WLL 2530 is a language-open special topics course, primarily for non-majors. Students in this course will study linguistic and cultural topics not usually included in the curriculum.

WLL 3520 SPECIAL TOPICS IN WORLD LANGUAGE AND CULTURE II (2 credits)

WLL 3520 is a language-open special topics course, primarily for non-majors. Students in this course will study advanced linguistic and cultural topics not usually included in the curriculum. This could include development in linguistic and cultural proficiency in target languages not normally offered or in the study of specialized topics related to language, culture, literature or film studies.

WLL 3530 SPECIAL TOPICS IN LANGUAGE AND CULTURE II (3 credits)

WLL 3530 is a language-open special topics course, primarily for non-majors. Students in this course will study advanced linguistic and cultural topics not usually included in the curriculum.

WLL 4010 MULTIDISCIPLINARY APPROACHES TO THE STUDY OF LANGUAGE, CULTURE, AND SOCIETY (3 credits)

This interdisciplinary course examines the dynamic connections between language, culture, and society by drawing from multiple fields of study including linguistics, cultural studies, and literature. Through various lenses, students explore topics such as cultural norms, social structures, individual identities, and intercultural communication. (Cross-listed with WLL 8016).

WLL 4800 INTERNSHIP FOR LANGUAGE IN CONTEXT (3 credits)

This course provides students with practical, hands-on experience in a professional setting related to their language studies. This course offers an opportunity for students to apply their language skills in real-world contexts while gaining valuable insights into various industries, organizations, or institutions. (Cross-listed with SPAN 4800).

Prerequisite(s): Instructor permission. Not open to non-degree graduate students.

Writer's Workshop (WRWS)

Writer's Workshop Undergraduate Courses

WRWS 1010 CONTEMPORARY WRITERS: IN PERSON IN PRINT (3 credits)

An introduction to reading contemporary literature by studying the ways in which a writer shapes a poem or tale to communicate with an audience. Emphasizes the most contemporary prose and poetry and includes a series of readings and classroom visits by guest writers whose books are the texts for the class.

Prerequisite(s): ENGL1160 or equivalent. Not open to non-degree graduate students.

WRWS 1500 INTRODUCTION TO CREATIVE WRITING (3 credits)

An introduction for non-majors in creative writing to the art and craft of writing fiction, poetry, and creative nonfiction. Follows a workshop format based on individual and group critique of students' writing, discussion of principles and techniques of the craft, and reading and analysis of instructive literary examples.

Prerequisite(s): ENGL1160

Distribution: Humanities and Fine Arts General Education course

WRWS 2000 SPECIAL STUDIES IN WRITING (3 credits)

Offers varying subjects in writing and reading for the basic study of special forms, structures and techniques of imaginative literature. Consult the current class schedule for the semester's subject. May be repeated for credit with change of subject.

Prerequisite(s): ENGL 1160. Not open to non-degree graduate students.

WRWS 2050 FUNDAMENTALS OF FICTION WRITING (3 credits)

A study of the ways in which writers confront the technical choices of their craft, this course introduces students to the major elements of fiction in order to increase their critical awareness both as readers and writers and to prepare them for work in succeeding fiction studios.

Prerequisite(s): Prerequisite(s)/Corequisite(s): ENGL1160 or equivalent.

WRWS 2060 FUNDAMENTALS OF POETRY WRITING (3 credits)

This beginning writing course in poetry emphasizes the manner in which poets meet and deal with the technical choices confronting them in the making of a poem. Written work introduces students to a number of established forms in order to increase an understanding of the elements of a successful poem.

Prerequisite(s): ENGL1160 or equivalent. Not open to non-degree graduate students.

WRWS 2100 BASIC FICTION STUDIO (4 credits)

A basic workshop course in fiction writing, studying the shapes and techniques of composing complete fictions. This is the first of four fiction studios.

Prerequisite(s): WRWS2050

WRWS 2200 BASIC POETRY STUDIO (4 credits)

This beginning level studio explores different poetic forms and encourages the development of the writer's voice.

Prerequisite(s): WRWS 2060

WRWS 2300 BASIC CREATIVE NONFICTION STUDIO (4 credits)

A beginning studio in various forms and craft techniques of creative nonfiction. Students study and practice writing such forms as the personal essay, the memoir, the adventure narrative, the essay of issues, etc.

Prerequisite(s): WRWS 2050 or 2060. Not open to non-degree graduate students.

WRWS 2400 FOUNDATIONS OF SCREENWRITING (3 credits)

This course introduces the student to the foundational elements of screenwriting. The student will learn and practice the techniques of conveying a story in images and sound, creating characters with human motives and conflicts, editing for economy and thematic significance. Proper script formatting will be taught and expected.

Prerequisite(s): English 1160 or equivalent.

Distribution: Humanities and Fine Arts General Education course

WRWS 2600 BASIC SCREENWRITING AND TELEVISION WRITING STUDIO (4 credits)

This studio introduces the fundamentals of screenwriting. The student will produce a pitch, outline and completed industry-standard screenplay that conveys a story, creates characters, and is edited for economy and theme. Proper script formatting will be taught and expected.

Prerequisite(s): WRWS 2050, or WRWS 2060. Not open to non-degree graduate students.

WRWS 3000 SELECTED TOPICS IN WRITING (1-3 credits)

This course presents selected theoretical and practical approaches to crafting one or more the following genres: poetry, fiction, creative nonfiction, screenwriting, young adult literature, the video game narrative, or the graphic novel. Specific topics for the course will vary from semester to semester. Consult current class scheduled for the semester's topic(s). This course may be repeated for credit as a different course under a new topic

Prerequisite(s): Vary according to specific topics being offered

WRWS 3010 LITERARY MAGAZINE: STAFF & RESEARCH (3 credits)

This course provides hands-on experience to staff members of UNO's literary journal, 13th Floor. Staff will read and assess submitted manuscripts, assisting appointed genre editors to produce the annual spring issue. In addition to learning editorial procedures, publication processes, and jargon, students at this level will become familiar with national literary journals through research and analysis. May be repeated up to six hours.

WRWS 3020 THE BUSINESS OF WRITING & PUBLISHING (3 credits)

This class will teach students to navigate the literary landscape as publishing writers and as editors. Students will research literary niches, diverse digital and print publications, editing and publishing practices, terminology, and relevant applications. In preparation for roles in editing and publishing, students will identify and refine individual creative and editorial goals to be conveyed in professional settings and documents, such as CV/resume, cover letter, prepared submission, biographical note.

Prerequisite(s): WRWS 3010. Not open to non-degree graduate students.

WRWS 3030 ADVANCED CONTEMPORARY WRITERS (3 credits)

This advanced course explores contemporary literature by studying the ways in which writers in multiple genres shape their work to communicate with an audience. It emphasizes the most contemporary prose and poetry and includes a series of readings and classroom visits by guest writers whose books are the texts for the class.

Prerequisite(s): ENGL 1160 or equivalent.

WRWS 3100 INTERMEDIATE FICTION STUDIO (4 credits)

An intermediate course in fiction writing. Emphasis on developing complete short stories or constructing a novel.

Prerequisite(s): WRWS 2100 or permission of instructor. Not open to non-degree graduate students.

WRWS 3200 INTERMEDIATE POETRY STUDIO (4 credits)

An intermediate course in the making of poetry, this class will focus on the study of traditional and contemporary models, as well as crafting original poems.

Prerequisite(s): WRWS 2200. Not open to non-degree graduate students.

WRWS 3300 INTERMEDIATE CREATIVE NONFICTION STUDIO (4 credits)

An intermediate-level studio course in forms and crafting techniques of creative nonfiction. Students study and practice writing within such forms as the literary essay, the essay of issues, historical nonfiction, the nonfiction novel, etc.

Prerequisite(s): WRWS 2300 or permission of instructor. Not open to non-degree graduate students.

WRWS 3440 EXPLORING ART THERAPY (3 credits)

This course provides an overview of the field of art therapy and the use of therapeutic art. Topics covered include: The historical use of art as healing across cultures, the contemporary use of art therapy with various populations and settings; an introduction to the theories, techniques; and the profession of art therapy. Students participate in representative art therapy activities, but previous art experience is neither required nor expected. This course does not qualify participants to practice art therapy but will provide information on its safe and effective utilization by health professionals. (Cross-listed with ART 3440, MEDH 3440, THEA 3440).

WRWS 3500 CREATIVE WRITING FOR THE ARTS (3 credits)

An introduction to the art and craft of writing fiction, poetry, creative nonfiction, and analyses of works in art, music, and journalism/political rhetoric. Intended for non-majors in creative writing, and tailored to the needs of other arts disciplines, notably those in CFAM, the course will follow a workshop format based on individual and group critique of students' writing, discussion of principles and techniques of craft and selected literary readings. Students will also experience and analyze other arts forms, which may include exhibits of visual and performance art, journalistic essays and/or political speeches.

Prerequisite(s): ENGL 1160 or equivalent.

Distribution: Writing in the Discipline Single Course and Humanities and Fine Arts General Education course

WRWS 3600 INTERMEDIATE SCREENWRITING STUDIO (4 credits)

This course will build on the foundation established in the Beginning Screenwriting Studio (2600). The student will complete and revise the first draft of a feature-length screenplay. The student will also pitch, note-card, and begin writing a speculation script for television. The class will attend Film Streams once a month to view the current independent offering. There will be lectures and assigned reading. The course will culminate in the student beginning work on a second feature-length screenplay.

Prerequisite(s): WRWS 2600. Not open to non-degree graduate students.

WRWS 3800 THE WRITER'S VOICE: AUTHORS ON THE PAGE AND AT THE PODIUM (3 credits)

This course will serve as an introduction to the art and craft of fiction, poetry, and creative nonfiction, as well as to analyses of written and publicly performed works of creative writing. This course is open to students who are not creative writing majors, and it is tailored to the needs of other arts disciplines, notably those in CFAM. WRWS 3800 will involve students crafting reflective, analytical, and creative writing based on the texts and video recorded public readings of visiting authors.

Prerequisite(s): ENGL 1160 or equivalent

Distribution: Writing in the Discipline Single Course

WRWS 3990 INDEPENDENT STUDIES (3-6 credits)

For the writing major who has need of work not currently available in program offerings and who has demonstrated a capacity for working independently. Emphasis on in-depth study in some specific aspect of writing.

Prerequisite(s): Permission of instructor. Not open to non-degree graduate students.

WRWS 4000 FORM AND THEORY (3 credits)

Advanced study of varying forms, structures, and techniques in creative writing. Specific topics of study may change each semester, and students may repeat the course under a new topic. Consult current class schedule.

Prerequisite(s): Completion of WRWS 2100 or 2200 or 2300, varies according to specific topics offered.

WRWS 4010 LITERARY MAGAZINE: EDITING & PRODUCTION (3 credits)

Students in this class will serve on the editorial team of UNO's literary journal, 13th Floor, in one of the following positions: Editor-in-Chief, Creative Nonfiction Editor, Fiction Editor, Poetry Editor, Screenwriting Editor, Layout & Design Editor, Managing & Promotions Editor, or Assistant Editor. Editors will be selected by the faculty advisor/instructor through an application process prior to spring semester. Student editors will oversee respective genre teams to select final submissions for inclusion in the annual issue of 13th Floor and will work as an editorial team to bring the journal from submission to print. Course offered in spring semester only.

Prerequisite(s): WRWS 3010 or by permission of instructor/faculty advisor.

WRWS 4100 ADVANCED FICTION STUDIO II (4 credits)

An advanced course in fiction in which students write and edit the most fully-developed short stories and/or novel sections of their college career, as well as read, analyze, and discuss assigned texts. Students examine the techniques of fiction writing, use the vocabulary and perspective they have gained so far to discuss their and others' work. They draw upon aspects of the self, the senses, imagination and memory to produce texts unique to their own voice and experience. (Cross-listed with WRWS 4110, WRWS 8116)

Prerequisite(s): WRWS 3100 or permission of instructor. Not open to non-degree graduate students.

WRWS 4110 ADVANCED FICTION STUDIO II (4 credits)

An advanced course in fiction in which students write and edit the most fully-developed short stories and/or novel sections of their college career, as well as read, analyze, and discuss assigned texts. Students examine the techniques of fiction writing, use the vocabulary and perspective they have gained so far to discuss their and others' work. They draw upon aspects of the self, the senses, imagination and memory to produce texts unique to their own voice and experience. (Cross-listed with WRWS 4100, WRWS 8116)

Prerequisite(s): WRWS 3100 or permission of instructor. Not open to non-degree graduate students.

WRWS 4200 ADVANCED POETRY STUDIO I (4 credits)

An advanced course in poetry writing. Emphasis on refining poetic technique. (Cross-listed with WRWS 8206)

Prerequisite(s): WRWS 3200 or WRWS 4210 or permission of instructor. Not open to non-degree graduate students.

WRWS 4210 ADVANCED POETRY STUDIO II (4 credits)

An advanced course in poetry writing with an emphasis on refining poetic technique and expression.

Prerequisite(s): WRWS 3200 or WRWS 4200 or permission of instructor. Not open to non-degree graduate students.

WRWS 4300 ADVANCED CREATIVE NONFICTION STUDIO (4 credits)

An advanced studio course in writing creative nonfiction. The course provides a context in which the student continues to practice techniques of literary nonfiction through the process of writing and rewriting.

Prerequisite(s): WRWS 3300 or permission of instructor. Not open to non-degree graduate students.

WRWS 4310 ADVANCED CREATIVE NONFICTION STUDIO II (4 credits)

An advanced studio course in writing creative nonfiction. The course provides a context in which the student continues to practice techniques of literary nonfiction through the process of writing and rewriting.

Prerequisite(s): WRWS 2300 and WRWS 3300, or permission of instructor. Not open to non-degree graduate students.

WRWS 4600 ADVANCED SCREENWRITING STUDIO I (4 credits)

This class will focus on the craft of screenwriting: plot, format, substance, style, scene development, film structure (both independent and main stream), three dimensional characters, and precise, professional dialogue. The student will complete a feature-length screenplay over course of the semester. There will be lectures and assigned reading. Once a month the student will view the current independent offering at Film Streams. This class will guide the student in completing a work portfolio, querying agents, applying to internships, and preparing for a career in film and television. (Cross-listed with WRWS 8606).

Prerequisite(s): WRWS 2600 and WRWS 3600.

WRWS 4610 ADVANCED SCREENWRITING STUDIO II (4 credits)

This class will build on the knowledge gained in Beginning Screenwriting Studio (WRWS 2600) and Intermediate Screenwriting Studio (WRWS 3600). The student will complete a second feature-length screenplay and an original pilot for television. There will be lectures and assigned reading. Once a month the student will view the current independent offering at Film Streams. This class will guide the student in completing a work portfolio, querying agents, applying to internships, and preparing for a career in film and television after graduation.

Prerequisite(s): WRWS 2600 and WRWS 3600. Not open to non-degree graduate students.

WRWS 4990 SENIOR THESIS (3-6 credits)

An option for the writing majors in their last year of study to enable them to prepare a body of original work in their areas of concentration for judging by a committee of faculty.

Prerequisite(s): Permission of department chair and thesis advisor. Not open to non-degree graduate students.

Catalog Introduction

Welcome to the 2025-2026 graduate catalog for the University of Nebraska at Omaha (UNO).

For over 100 years, UNO has helped professionals advance their careers through a wide array of award-winning affordable graduate programs. We focus our attention, expertise, and resources on our most important responsibility—our students.

We offer over 90 graduate programs at master's, EdS, PhD and certificate levels, providing you advanced education opportunities, to explore in this catalog. UNO is recognized as a Carnegie Doctoral Research University. Our graduate faculty represents the very best in their fields, earning national teaching awards, and they are dedicated to individual student instruction and mentoring.

Utilize this catalog as a resource to help you prepare and develop new professional skills through a graduate degree. If you have any questions or need advice, please contact the Office of Graduate Studies.

Juan F. Casas, PhD
Dean for Graduate Studies

Graduate College

University of Nebraska Graduate College Organization

In 1971, at the direction of the Board of Regents, the Graduate College of the University of Nebraska (UNL and UNMC) and the Graduate College of the University of Nebraska at Omaha were merged to form one University-wide Graduate College with one Graduate Faculty. The ultimate academic authority for all graduate programs within the University is vested in the approximately 1700 members of the Graduate Faculty.

The Bylaws of the Board of Regents state that the Executive Vice President and Provost of the University of Nebraska shall serve as Dean of the University-wide Graduate College and as presiding officer of the Graduate Faculty and councils thereof. The legislative and academic authority of the Graduate Faculty is vested in the Executive Graduate Council, comprised of eight members elected by the graduate faculty. Specific responsibilities of the Dean and of the Executive Graduate Council can be found in the University of Nebraska Graduate College Governance document.

On each campus of the university in which graduate programs are housed, there is a campus Dean for Graduate Studies, a campus graduate faculty, and a campus graduate council. The UNO Dean for Graduate Studies administers graduate programs and policies on that campus; serves as presiding officer of the UNO graduate faculty and the UNO graduate council; and forwards to the Dean of the Graduate College matters which are of university-wide concern. The UNO graduate faculty consists of those members of the university-wide graduate faculty administratively assigned to UNO. The UNO graduate council acts as an advisory body to the UNO Dean for Graduate Studies, coordinates the graduate studies on the UNO campus, and recommends to the executive graduate council actions affecting students and programs on more than one campus. This council consists of 22 elected or appointed faculty members and two graduate student members. Specific responsibilities of the Dean for Graduate Studies and of the UNO graduate council may be found in the document "Organization of Graduate Studies: University of Nebraska at Omaha."

University of Nebraska at Omaha Graduate Studies

As a graduate student, you will partner your ambition with a world-class education at UNO. Our office partners with you on this journey from start to finish. Once you have applied, your application will be sent to the appropriate graduate admission committee for review. Upon review, we will notify you of an admission decision.

Once admitted and enrolled in courses, we continue the journey with you. You will have the opportunity to apply for graduate assistantships, scholarships, travel awards, attend workshops, and have access to professional development opportunities. In addition, we provide academic support by monitoring your degree plan, grades, and quality of work. As you near completion of your degree, we provide guidance and support as you prepare for graduation.

UNO's six academic colleges provide rigorous graduate academic programs, taught by faculty who are national and international experts in their fields. All of UNO's colleges offer unique opportunities in research and hands-on experiences that are critical to gaining an edge in a competitive global workforce.

If you need to contact us at any point of your journey at UNO we can be contacted by phone, email, and in person to assist you with any graduate studies needs you may have.

Graduate Student Learning Outcomes

Preamble: The following student learning outcomes for master's level graduate programs were synthesized from the breadth of existing graduate student learning outcomes and represent commonalities in most programs.

Students shall demonstrate at the graduate level:

1. Mastery of discipline content
2. Proficiency in analyzing, evaluating, and synthesizing information
3. Effective oral and written communication
4. Demonstrate knowledge of discipline's ethics and standards

Admissions

Prospective Applicants

An online Application for Graduate Admission must be filed with Graduate Studies for students who:

- Desire a graduate degree or graduate certificate
- Desire graduate credit for renewal of a teaching certificate or professional development
- Desire to transfer graduate credit to another university
- Desire to fulfill prerequisites for a future degree-seeking program
- Students who wish to change programs must complete a new graduate application and submit a non-refundable graduate application fee and other required documents. Admission to a new program is not automatically granted.
- Students applying for a second master's degree, graduate certificate, or taking additional graduate courses must complete a new graduate application and submit a non-refundable application fee and other required documents.
 - While it is possible to receive master's degrees in various disciplines, individuals cannot apply or be admitted into a program for which a degree has already been awarded. UNO is unable to confer a degree for the same program multiple times. Additionally, federal financial aid regulations prohibit a student from receiving aid if they are in a program that does not lead to a degree.

Special Note:

- All students must complete a graduate application in order to receive graduate credit for any graduate-level courses taken at UNO. Special permission is required for UNO junior-or senior-level undergraduate students to register for graduate courses. Additionally, students admitted to graduate programs at other University of Nebraska campuses may complete the intercampus registration form. For additional information, please see Enrollment (p. 975).

Application Process

- The Application for Graduate Admission must be completed online. The online application will specify all of the required documentation for the specific program prior to the program application deadline.
- A non-refundable application fee is required for all applications. This includes undergraduates within the University of Nebraska system, and students who have been previously admitted as graduate students at the University of Nebraska-Lincoln, the University of Nebraska at Kearney, or the University of Nebraska Medical Center.
 - The application fee will be waived for:
 - McNair Scholars who provide the McNair Certification of Participation form
 - Undergraduate Pell Grant recipients who provide their current Student Aid Report (SAR)
 - AmeriCorps with Certification of Service Letter if service is completed, or official documentation of current service start date and expected end date
 - Military and Veteran Applicants: The application fee is waived for all military and veteran applicants and dependents with proof of military status. Please provide one of the following documents as proof of military status:
 - Military orders
 - Notice of Basic Eligibility (NOBE)
 - DD214
 - All military includes: Active Duty, Guard, Reserve, and Veterans

Transcripts

- To expedite the processing of the graduate application, unofficial transcripts/course-by-course transcript evaluations and exam scores can be uploaded to the application. If offered admission, official transcripts/course-by-course transcript evaluations and exam scores are **required** prior to enrolling in courses.
 - **International transcripts:** More information available here (<https://www.unomaha.edu/office-of-graduate-studies/admissions/how-to-apply-international.php>).

Readmission to Graduate Studies

A student who has not been enrolled as a graduate student at UNO for four years or more must apply as a new graduate student and submit the graduate application, the required non-refundable application fee, and all other required credentials. Applicants cannot apply to the same degree/certificate program once the degree/certificate has been awarded.

Choice of Catalog Policy

The catalog year (requirement term) is what ties a student to the curriculum they are required to follow and determines the contract of degree requirements a student must fulfill to graduate. The catalog year defaults to the semester the student is admitted to their degree program; however, students are eligible to change to a more recent catalog year if it is to their benefit and approved by their graduate program chair. By changing catalogs, a student is responsible for fulfilling all of the graduation requirements in their newly chosen catalog year. A student may request a change in their catalog year by contacting the graduate program chair and/or advisor. If the request is supported, the graduate program chair and/or advisor must notify the Office of Graduate Studies via the degree audit system.

If a student's program has become discontinued due to non-enrollment, they will complete requirements based upon the academic year they are readmitted.

Simultaneous Matriculation

Normally, no graduate student may be a degree-seeking student in more than one graduate program at the University of Nebraska, unless enrolled in an approved dual-degree program. Any exceptions must have prior

approval of every graduate program committee and every campus dean for Graduate Studies through which the programs are administratively assigned. When there is approved simultaneous matriculation, the same course credit will not be accepted for more than one degree without prior approval of every graduate program committee and every campus dean for Graduate Studies through which the programs are administratively assigned.

Admission Criteria

Applicants who have earned, or will have earned, a bachelor's or master's degree at a regionally accredited college or university in the United States, or the equivalent of such degrees in another country, will be considered for admission. Prospective students may apply for admission during or after the final year of undergraduate study, but must submit the official baccalaureate degree transcript/course-by-course transcript evaluation to the Office of Graduate Studies before the end of the first year of enrollment.

Special Note: International students with a three-year degree are referred to the program in which they wish to pursue graduate studies to determine possible additional coursework. They can be considered for graduate admission, but admission is at the discretion of the individual departments/schools.

The decision to admit an applicant to a program is based primarily on a combination of the following criteria according to the requirements of the specific program:

- *Quality of previous undergraduate and graduate work.* The Graduate College requires a minimum "B" average (3.0 on a 4.0 scale) in a program of study resulting in the award of a baccalaureate degree from a regionally accredited college or university. Applicants who have earned a minimum cumulative GPA of 2.7 on a 4.0 scale can be considered for provisional admission. If an applicant has studied at the graduate level and performed satisfactorily, less weight may, but not necessarily, be placed on the quality of the undergraduate academic record. Some programs require a higher minimum grade point average for admission.
- *Strength of letters of recommendation* from persons competent to judge the applicant's probable success in graduate school. These letters are usually from the applicant's former professors who are able to give an in-depth evaluation of the applicant's strengths and weaknesses with respect to academic work. Additional recommendations may come from employers or supervisors who are familiar with the applicant's work experience.
- *Official scores on required aptitude or advanced knowledge examination(s).*
 - All applicants to Graduate Studies at UNO whose language of nurture is not English must present a score on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), the Pearson Test of English (PTE), or Duolingo.
 - Automatic waivers from this policy are granted for persons who have received a baccalaureate or other advanced degree from an institution in the United States.
 - The TOEFL/IELTS/PTE/Duolingo requirement will also be waived for applicants who have received or will be receiving a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>).
 - The UNO Graduate Council has set a minimum score for admission to graduate studies, which can be found on our Entrance Exams (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>) webpage. Individual programs may require higher scores as noted on their program page.
- *Statement by the applicant* of academic career objectives and their relation to the intended program of study. These statements help the

department/school identify students whose goals are consistent with its objectives.

- *Other evidence of graduate potential.* Some programs require other evidence of graduate potential, such as a portfolio of creative work, completion of specialized examinations, or personal interviews.

Special Note:

- If a currently enrolled graduate student is admitted to a graduate program prior to receipt of their final grades for the current semester, the program may re-evaluate its admission decision if the student receives a grade of "C-" or lower in any coursework (undergraduate or graduate) for that semester.
- Notification of acceptance by a department/school graduate program committee or faculty member is **advisory only**. Admission is granted solely by the dean for Graduate Studies.

Record Maintenance and Disposition

All records, including academic records from other institutions, become part of the official file and can neither be returned nor duplicated for any purpose. Students may wish to obtain an additional copy of their official credentials to keep in their possession for advisory purposes or for other personal requirements. Transcripts provided to the university in support of a graduate application will be maintained for two years if the student does not enroll into the program to which they applied.

Admission to the Graduate College

Responsibility for admitting applicants to graduate programs rests with the dean for Graduate Studies. Academic departments/schools review admission applications and credentials and make admission recommendations to the dean. The standards maintained by the Graduate College and individual departments/schools are applied to ensure that applicants admitted to the university are well qualified for graduate study and have a reasonable expectation of successfully completing a graduate program. Standards for admission to doctoral degree programs are generally higher than those for admission to master's degree programs. In many degree programs, the number of applications received from qualified applicants for graduate study exceeds the number of applicants who can be accommodated. In such cases, only the most highly qualified are offered admission. The number of spaces available in various departments/schools is limited according to the availability of faculty and resources.

Categories of Admission

Unconditional Admission status may be granted to applicants considered fully qualified to undertake the program to which they were admitted. An applicant must have a baccalaureate degree from a regionally accredited institution with a minimum "B" average (3.0 on a 4.0 scale). Other qualifications might include, but are not limited to academic foundation requirements, an interview, area of subject tests, advanced tests, a portfolio or performance, grade point average, and/or letters of recommendation.

Provisional Admission status may be granted to applicants who have not met all of the conditions for unconditional admission. Departments/schools and/or the dean for Graduate Studies may impose certain requirements which must be fulfilled by the student in order to maintain this status.

- Provisional admission may be granted to an applicant who has less than a "B" average (3.0 on a 4.0 scale) in the undergraduate work in the proposed graduate major and minor (but in no case less than a 2.7 GPA). This admission may be granted for reasons of maturity, experience, or other circumstances under which the student may be deemed capable of high quality graduate study.
 - Provisional admission remains in effect until the student has earned at least a grade of "B" (3.0 on a 4.0 scale) in each course involved in

the first 12 hours of graduate study. The provisions are noted in the degree audit system for reference.

- Provisional admission may occasionally be granted to an applicant who has graduated from an unaccredited institution. Unconditional status may be attained upon completion of 12 hours of graduate courses with a "B" (3.0 on a 4.0 scale) average, providing all other requirements are met.
- Provisional admission may occasionally be granted to seniors at UNO needing no more than nine hours of undergraduate credit to complete their baccalaureate degree and wishing to register for graduate credit, subject to their receiving a baccalaureate degree within the 12-month period immediately following such registration. They must, however, apply for admission to graduate studies and, if admitted, they should register as graduate students. Graduate coursework taken prior to receipt of the baccalaureate degree may not always be accepted for transfer to other institutions, as graduate work, or for completion of degree requirements at UNO.

Provisional status will continue until provisions of admission are fulfilled or changed by the recommendation of the graduate program committee and approved by the dean for Graduate Studies.

Graduate Certificate Programs

- Students must be enrolled in a graduate degree-seeking program in addition to a graduate certificate in order to be eligible for financial aid. Being enrolled in only a graduate certificate program does not make you eligible for financial aid.

Unclassified Admission

Unclassified admission is available in limited departments/schools for students who:

- Are taking courses for professional growth or personal interest, but do not intend to pursue an advanced degree.
- Are enrolled in a graduate degree program at another institution and wish to transfer credits earned at UNO.
- Are working toward certification, additional endorsement, or renewal of certification in professional education.

Applicants applying for the unclassified category are not automatically entitled to this status upon application. The department/school reviews applications and the applicant may be turned down for this category, as with other categories of admission. International students on F1 visas, except graduate visiting students, are not eligible to enroll as unclassified students. **Applicants admitted as unclassified are not eligible for financial aid.**

Special Note: Successful completion of graduate courses as an unclassified student does not obligate a department/school to accept those courses for credit toward the fulfillment of degree requirements. Students who enroll under the unclassified designation and subsequently decide they wish to pursue a graduate degree must submit a new application, non-refundable application fee, and other required documents. Students must also consult with their advisor and the chair of the graduate program committee. If admission to the degree program is recommended, the department/school will advise the Office of Graduate Studies of the decision and the credits to be accepted toward the degree.

Non-Degree Admission

Verified Non-Degree Admission Status

Verified non-degree admission status may be available for an individual with an undergraduate or graduate degree from a regionally accredited institution who is not seeking a graduate degree from UNO. Applicants applying for the verified non-degree admission status need only submit an application for admission, the required application fee, and official degree transcript. A cumulative GPA of at least a 2.7 is also required.

Limited Express Non-Degree Admission Status

Limited express non-degree admission status allows students to register for classes without waiting for the Office of Graduate Studies to receive official transcripts. Applicants applying for the limited express non-degree admission status need only submit an application for admission and the required application fee. Applicants requesting limited express non-degree admission will be eligible to register for one term only. The admission may be extended beyond one term only upon receipt of an official degree transcript with a cumulative GPA of at least a 2.7 on a 4.0 scale.

- UNO does not allow intercampus registration for non-degree students who are admitted under the Limited Express category. **Non-degree students are not eligible for financial aid.** Advisors are not assigned to non-degree students.

Non-Degree students are advised to consult with the appropriate department/school concerning class availability and prerequisites before attempting to register. Because of limited class size and resources, certain academic units may limit the enrollment of non-degree students. To determine whether a non-degree student is allowed to enroll in a graduate course, please check the course descriptions listed on the Class Search (<https://www.unomaha.edu/registrar/students/before-you-enroll/class-search/>).

Admission to a degree program, or to unclassified admission from non-degree status is not guaranteed. Graduate-level hours taken as a non-degree graduate student prior to admission into a master's degree program may be included in the program of study at the discretion of the major department/school and the graduate dean. Students changing from non-degree status may also be required to take certain prerequisite courses by the major department/school and the dean for Graduate Studies.

International students on F1 visas, except graduate visiting students, are not eligible to enroll under non-degree status. Non-degree students must maintain the same academic standards as degree-seeking students or unclassified students.

Students dismissed from a graduate program who then re-apply as non-degree students may only do so if they request and receive permission in accordance with departmental/school graduate program policy to enroll as a non-degree student.

Enrollment

- **Enrollment (p. 975)**
- **Course Information (p. 976)**

Enrollment

Enrollment

All persons who attend classes at the University must be admitted to the University; they are required to register and pay the established tuition and fees. The dates, times, and procedures for registration are listed each semester on the Office of the University Registrar website (<https://www.unomaha.edu/registrar/students/>).

Learn more about enrollment here (p. 30).

Immunization Requirements

Students born on or after January 1, 1957, must show official proof of receiving two (2) MMR shots (measles, mumps, and rubella). Future registration may be withheld if this requirement is not met. Domestic high school graduates who attended a high school in the United States are excused.

For additional information regarding health requirements, visit the Pre-Enrollment Health Requirements website (<https://www.unomaha.edu/nebraska-medicine-uno-health-center/new-student-health/>).

Registration Requirements

Prior to the start of classes each session, students must register for courses according to instructions published on the University of Nebraska at Omaha (UNO) website. To be eligible to register, a new or re-admitted student must have completed all admission requirements. Prior to registering, a student should seek assistance from an academic advisor within their department/school. Some colleges and departments require advising prior to registering. Every student is encouraged to review the requirements for their intended degree with an assigned academic advisor. This review should be scheduled in preparation for and prior to each registration period.

Students who have outstanding debts or fees owed to the University will not be permitted to register until these obligations have been met. Due to limited facilities and staff, the University cannot guarantee all students will be able to enroll for every course they wish in each semester.

Designation of Full-Time Status

Full-time graduate students at the University of Nebraska shall be defined as those students enrolled for at least nine credit hours during an academic semester, whether or not the student holds a graduate assistantship.

Students enrolling for more than 12 hours must have the approval of the Dean for Graduate Studies. In some programs special permission may be granted to take more than 12 hours as a regular load. Students should consult with the department/school for provisions.

Dropping a Course

Students cannot drop courses after the date identified in the academic calendar for that semester. Exceptions may be made when there are extenuating circumstances. Students requesting an exception must obtain the instructor's certification that work in progress was at the "B" (3.0 on a 4.0 scale) level or higher. Approval of the request must be obtained from the Dean for Graduate Studies before the request to drop is submitted to the Office of the Registrar.

Intercampus Enrollment

Graduate students within the Nebraska University system who have been admitted to a graduate program of study at another NU campus may register for graduate courses at UNO by using an Intercampus Registration Form, which can be found online (https://csprdn.unomaha.edu/psc/csprdn/NBX/SA/s/WEBLIB_PTBR.ISCRIPT1.FieldFormula.IScript_StartPage/?ghcmd=saml).

Change of Program

Except for non-degree students, students are admitted to specified programs for specified objectives. Therefore, students who wish to transfer to another program or department/school must complete a new graduate application and submit the required non-refundable application fee and other required documents. The decision as to whether students will be accepted shall be left to the graduate program committee of the department/school in which they are seeking admission and to the Dean for Graduate Studies. Admission to a new program is not automatically granted.

If a currently enrolled graduate student is admitted to another graduate program prior to receipt of their final grades for the current semester, the program may re-evaluate its admission decision if the student receives a grade of C- or lower in any coursework (undergraduate or graduate) for that semester.

Course Information

Learn more about course information here (p. 35).

Credit/No Credit Option for Courses Offered for Graduate Credit

The UNO graduate faculty does not, in general, allow the Credit/No Credit option for courses offered for graduate credit. However, each graduate program committee shall have the right to designate courses such as practica, independent studies or research courses on which this option could apply. Inquire in the Office of Graduate Studies about the availability of this option for specific courses.

The grade of "Credit" is interpreted to mean the equivalent of a grade of "B" (3.0 on a 4.0 scale) or better and is not considered in the calculation of grade point averages.

Academic Program Requirements

- **Master's, EdS, Certificates, Dual Degrees, and Second Master's Degree Programs (p. 976)**
- **Doctoral Programs (p. 978)**

Master's, EdS, and Certificate Programs

Plan of Study for Master's, EdS, and Certificate Programs

At the time of admission to a degree and/or certificate program, an individual plan of study, also called a degree audit, will be made available to the student via MavLINK. This individual plan of study will list all requirements for completion of the degree program. These requirements may include deficiency courses and other provisions of admission, as well as exit requirements.

Any deviations to this plan of study, including transfer credit, must be approved by the student's advisor, graduate program committee chair, and dean for Graduate Studies. Any changes must be submitted by the graduate program chair to the Office of Graduate Studies only via the degree audit system. Upon approval, the student will be able to see the changes on their degree audit in MavLINK (<https://mavlink.nebraska.edu/psp/mavlink/NBO/HRMS/?cmd=login&languageCd=ENG&>).

A master's degree requires a minimum of 30 semester hours, however, additional credits may be required dependent on your degree program and exit requirement.

The EdS degree requires a minimum of 69 semester hours, however, additional credits may be required dependent on your degree program and exit requirement.

A graduate certificate requires a minimum of 12 semester hours, however, additional credits may be required dependent on your certificate program and exit requirement.

Policies Applicable to the Plan of Study

- **Grade point average:** Students must maintain an overall GPA of "B" (3.0 on a scale of 4.0) in all graduate coursework taken as part of their degree. Some departments/schools have higher grade requirements as noted in this catalog and the degree audit system. Grades of "C-" or below result in dismissal from Graduate Studies and may not be used on a graduate plan of study. If a student re-registers for a course to improve their grade, they must work with the Office of the University Registrar to note this on their transcript.
- **Graduate course requirement:** At least one-half of the graduate coursework required for the degree program must be restricted to graduate students only (8-0 or 9-0). No more than two 8-5 courses are allowed on a plan of study. This is applicable to master's and EdS programs.
- **Time limit:** The degree program must be completed within 10 consecutive calendar years. Coursework that is over 10 years old (30 consecutive terms) at the completion of the degree program (as defined by the plan of study and including any exit requirements) cannot be used toward the degree. Departments/schools may require completion of the degree program in less than 10 years; this will be noted in the catalog and the degree audit system.

Transfer of Graduate Credit

Approval of the transfer of graduate credit for coursework taken at another regionally-accredited university (including extension credit but not including correspondence courses) must be recommended by the appropriate advisor and graduate program chair, and submitted to the Office of Graduate Studies via the degree audit system for final approval by the dean for Graduate Studies. **In order for transfer credits to be applied, an official transcript showing completion of the course(s) must be on file with the Office of Graduate Studies.** Grades received in courses for transfer of credit must be the equivalent of "B" (3.0 on a scale of 4.0) or higher. Transfer of graduate credits from a course taken with a pass/fail option must be recommended by the relevant graduate program committee, supported by a written evaluation from the instructor, and approved by the dean for Graduate Studies. All work accepted for transfer of credit must have been taken within the prescribed time limits for graduate degrees and is subject to restriction if previously used to satisfy requirements for another graduate degree.

The only coursework from other institutions posted on the UNO transcript will be those recommended by the appropriate graduate program chair and approved by the dean for Graduate Studies.

Transfer of Credits Taken Outside the University of Nebraska

Up to one-third of the coursework required for a graduate degree program may be accepted from an accredited institution other than a unit of the University of Nebraska when the transfer is supported by the student's advisor and the appropriate graduate program committee. Final approval will be made by the UNO dean for Graduate Studies. All other policies regarding graduate programs will apply.

Transfer of Credits Taken at the University of Nebraska

There are no a priori limits on the transfer and applicability of credits earned in one program of the University of Nebraska toward meeting degree requirements in another such program, except as they are used to earn distinct degrees. However, such credits must be individually evaluated and approved by the appropriate graduate program committee and campus dean for Graduate Studies before they can actually be transferred. UNO students who wish to take courses at the University of Nebraska-Lincoln, the University of Nebraska Medical Center, or the University of

Nebraska at Kearney for transfer of credit should complete the online intercampus application (https://csprdn.unbrask.edu/psc/csprdn/NBX/SA/s/WECLIB_PTBR.ISCRIP1.FieldFormula.IScript_StartPage/?ghcmd=saml).

Second Master's Degree

Use of graduate credit earned for the first degree will be treated in the same manner as transfer credit from another institution if applied to the requirements for the second degree. Up to one-third of the coursework required for the second master's degree may consist of courses from a previous graduate degree. All other policies regarding graduate programs apply.

Minor Field

A student must be in a degree-seeking graduate program at UNO in order to add a graduate minor. Students are not required by the graduate faculty to have a minor; however, a student may elect to complete a minor with the permission of both the major department/school and the minor department/school. In order to add a minor, the Change in Plan of Study (<https://www.unomaha.edu/office-of-graduate-studies/forms-and-resources/forms-documents.php>) form must be completed. This form must include the coursework applicable to the minor.

The minor requires a minimum of nine (9) graduate hours. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Exit Requirements

All master's and EdS degrees require a culminating experience. This may include a thesis, project, capstone, comprehensive examination, etc. If a certificate program has an exit requirement it will be noted in the catalog and degree audit system.

- Comprehensive examination results must be reported to the Office of Graduate Studies by the department/school via the degree audit system.

Thesis, Thesis-Equivalent Project, and EdS Field Project

Students must file a Proposed Supervisory Committee (<https://www.unomaha.edu/office-of-graduate-studies/forms-and-resources/forms-documents.php>) form and a Thesis Proposal Approval (<https://www.unomaha.edu/office-of-graduate-studies/forms-and-resources/forms-documents.php>) form with the Office of Graduate Studies before initiating the thesis or EdS field project. This paperwork must be filed with the Office of Graduate Studies **at least one semester prior to the student's anticipated graduation date**. Students completing a thesis-equivalent project should consult with their department/school.

The supervisory committee consists of at least three graduate faculty members, one of whom must be from outside the student's academic department/school in which the degree is to be granted. The chair of the supervisory committee must be a member of the graduate faculty. The outside representative must hold graduate faculty status within the NU system. In addition to the minimum requirement of three graduate faculty members, other eligible persons may be recommended by the graduate program committee for appointment by the dean, to the supervisory committee, provided at least two-thirds of the membership of each committee is graduate faculty. Any changes to the supervisory committee after initial approval must be submitted via a new supervisory

committee form to the Office of Graduate Studies for approval by the dean for Graduate Studies.

A master's thesis, thesis-equivalent project, or EdS field project provides the opportunity for students to acquire first-hand experience in research or creative activities with the supervision of experienced faculty. A thesis or thesis-equivalent project is equivalent to six (6) semester hours of credit. The EdS field project is equivalent to three (3) semester hours of credit. Required course hours must be indicated on each student's plan of study. Grades for a thesis, thesis-equivalent project, or EdS field project are recorded on the permanent record after completion and approval by the department/school and the Office of Graduate Studies. For a thesis or thesis-equivalent project, grades will be either "S" for Satisfactory or "U" for Unsatisfactory. A letter grade will be recorded for the EdS field project.

The thesis, thesis-equivalent project, or EdS field project is not considered to be a publication; thus, it may be published, in whole or in part, and either quoted or paraphrased by giving appropriate credit to the relevant department/school, the Graduate College, and the University of Nebraska at Omaha.

The Supervisory Committee guides the student in the conduct and development of the thesis, thesis-equivalent project, or EdS field project and approves the final product. Typically, final recommendations from the supervisory committee or the supervisory committee chair are provided to the student at the time of the final oral examination, although details vary among departments/schools and individual faculty.

Procedures

When the final version of the thesis/EdS field project has been approved by the supervisory committee, the student must submit the following to the Office of Graduate Studies for the final administrative steps in the approval process: Report on Completion of Degree (<https://www.unomaha.edu/office-of-graduate-studies/forms-and-resources/forms-documents.php>) form signed by the supervisory committee, and upload the thesis/field project to ProQuest (<https://www.unomaha.edu/office-of-graduate-studies/current-students/thesis-dissertation-support.php>). Final approval of the thesis/field project is contingent upon approval by the supervisory committee and the Office of Graduate Studies.

NOTE: If the thesis/EdS field project is to be held pending patent issuance, etc., the student must specify this at the time the PDF file is submitted to ProQuest (UMI).

An electronic version of the thesis or EdS field project (collectively referred to as ETDs) is required. An ETD is a document expressed in a format simultaneously suitable for machine archives and worldwide retrieval. Preparation of the ETD may be done using most word processor or document preparation systems that incorporate relevant multimedia objects.

As part of the ETD submission, students' abstracts are published in UMI's Master's Theses Abstracts publications. Upon submission, the student authorizes ProQuest to produce copies of their work on demand for a fee. However, the student may request that UMI not distribute (or embargo) their ETD until further notice (up to two years). Some reasons for this include patent pending, the student's employer requires a review of the work, or a publishing agreement requires initial publication.

PLEASE NOTE: There may be a fee to submit the ETD through ProQuest; the amounts are noted on their website.

After successfully uploading the thesis/EdS field project, the Office of Graduate Studies will be notified electronically by ProQuest of the submission and asked to provide final approval. Final approval of the thesis/EdS field project will not be granted if the Report on Completion of Degree form is not completed and on file in the Office of Graduate Studies.

Formatting and Submission Instructions (<https://www.unomaha.edu/office-of-graduate-studies/current-students/thesis-dissertation-support.php>)

Doctoral Programs

Doctoral Program Committee and Course Plan

A Doctoral Program Committee and Course Plan (<https://www.unomaha.edu/graduate-studies/current-students/graduate-forms-and-resources.php>) must be submitted to the Office of Graduate Studies no later than the end of your second semester in the doctoral program. This must include any language or research tool requirements (if applicable).

Generally, courses taken before admission to the doctoral program cannot be included in the Doctoral Requirements section of the program of study form. Please note that foundation courses and courses taken outside of the University of Nebraska Graduate College cannot be used to fulfill doctoral requirements. The program committee must include at least two members of graduate faculty from the student's program; this typically consists of the doctoral program chair and advisor. Any subsequent change in the program must be approved by the committee and the dean for Graduate Studies.

The minimum amount of graduate credit for the PhD is 90 semester hours, including a dissertation. Some programs require more hours. Please refer to the degree requirements for your individual degree.

The minimum amount of graduate credit for the EdD is 96 semester hours, including a dissertation. Please refer to the degree requirements for your individual degree.

Admission to Candidacy

When the doctoral student has passed the comprehensive examination and established residency, according to the established policies of the doctoral program, the examination committee will recommend to the Office of Graduate Studies their admission to candidacy for the doctoral degree, noting in that recommendation the date(s) upon which the comprehensive examination was completed. As soon as possible after passing the examination, the examination committee convenes and reports to the Office of Graduate Studies the results of the examination by submitting the Application for Admission to Candidacy (<https://www.unomaha.edu/office-of-graduate-studies/forms-and-resources/forms-documents.php>) form. This form must be filed with the Office of Graduate Studies at least seven months prior to the final oral examination. If the term of candidacy is extended beyond three years (excluding summer terms), the candidate must pass another comprehensive examination. Following admission to candidacy, the student must register during each academic year semester (fall and spring) until they receive the PhD or EdD degree. Students not in residence may register for a minimum of one semester credit in dissertation. Failure to register during each academic year semester will result in termination of candidacy.

Comprehensive Examination PhD

When a student has substantially completed studies in the program, they must pass a written comprehensive examination. The written comprehensive examination is not a repetition of course examinations; rather, it is an investigation of the student's breadth of understanding in the field of knowledge of which their special subject is a part. The student will also be required to pass an oral comprehensive examination.

The examination committee arranges for written or oral examinations. Should the student fail the comprehensive examination or a part thereof, they may be allowed to re-take it during the following academic term upon specific recommendation by the graduate program committee.

EdD

When the applicant's program of study is substantially completed, comprehensive examinations that cover the appropriate field of study and related subjects will be administered. These examinations will thoroughly test for an understanding of the field of knowledge designated by the student. If an applicant fails the comprehensive examination, another attempt to pass such examination may not be made in the same academic term.

Residency Requirement

A residency requirement has been established for the purpose of ensuring that the doctoral program be reasonably compact, continuous, and coherent; and that a substantial portion be done at and under the close supervision of the university. The residency requirement is part of the student's approved program.

In exceptional circumstances, where it is clear that the purpose of residency is being fulfilled but the formal conditions are not met, the student's examination committee and/or doctoral program chair may, with the approval of the dean for Graduate Studies, designate an alternative procedure for satisfying the residency requirement.

Requirements for the PhD in Biomechanics and Kinesiology, PhD in Biomedical Informatics, PhD in Criminology and Criminal Justice, PhD in Gerontology, PhD in Computing & Information Science, and PhD in Psychology

- For a student beginning a doctoral program in the University of Nebraska system with a bachelor's degree, the residency requirement for the PhD is 27 hours of graduate work within a consecutive 18-month period or less, with the further provision that 15 of these hours must be taken after receiving the master's degree or equivalent.
- For a student who transfers to the University of Nebraska system with a master's degree from another institution, or who takes a break in their graduate work between the time the master's degree is awarded and the time they start work on a doctoral program, the residency requirement for the PhD is 27 hours of graduate work in a consecutive 18-month period or less.
- For a member of the university staff who is engaged at least half-time in instruction or research in their major area, or a person employed in their major field, the residency requirement is 24 hours of graduate work within a consecutive two-year period with the further provision they take at least 12 of these hours after receiving the master's degree or its equivalent.
- Not more than one-third of the work for residency, or nine credit hours, may be taken during the summer sessions.

Requirements for the PhD in Public Administration and EdD degree

- The residency requirement for doctoral students in Educational Administration and Public Administration is 24 hours in 24 consecutive months. The student's examination committee and/or doctoral program chair may determine how many of the required residency hours may be taken during the summer sessions.

Dissertation Committee

In order to assure that students are under careful advisement and mentoring, a dissertation committee must be established no later than the end of the semester that a student has completed their comprehensive examination.

The student must submit the Appointment of Dissertation Committee (<https://www.unomaha.edu/graduate-studies/current-students/graduate-forms-and-resources.php>) form consisting of at least four University of Nebraska graduate faculty members, one of whom must be from outside the student's academic department/school in which the doctorate is to be

granted. The chair of the dissertation committee must be a member of the graduate faculty. The outside representative must hold graduate faculty status within the NU system. In addition to the minimum requirement of four University of Nebraska graduate faculty members, other eligible persons may be recommended by the graduate program committee for appointment by the dean to the dissertation committee, provided at least two-thirds of the membership of each committee is graduate faculty. The establishment of a dissertation committee is based on the student's demonstrated ability in the fundamental subject matter of the student's major field and professional promise.

Changes to the Dissertation Committee

Any changes to the dissertation committee after initial approval must be submitted via a new Appointment of Dissertation Committee (<https://www.unomaha.edu/graduate-studies/current-students/graduate-forms-and-resources.php>) form to the Office of Graduate Studies for approval by the dean for Graduate Studies.

If the chair of a dissertation committee leaves the employ of the university, or retires, the Office of Graduate Studies must be notified immediately and a change in the committee must be made as follows:

- If the student has already achieved candidacy, the former chair who has left the employ of the university may be permitted to continue as co-chair of the dissertation committee, with the agreement of the departmental/school graduate program committee and the dean for Graduate Studies. A second co-chair must be appointed who is a resident graduate faculty member.
- If the student has not yet achieved candidacy, a new chair of the dissertation committee who is a resident graduate faculty member must be appointed immediately, with the agreement of the departmental/school graduate program committee and the dean for Graduate Studies.
- If a member of the dissertation committee, other than the chair, leaves the employ of the university, or retires, a replacement should normally be appointed who is a resident graduate faculty member. In certain circumstances where a special and needed continuing expertise is involved and the staff member is willing to continue serving, they may continue as a member of the dissertation committee, with the approval of the departmental/school graduate program committee and the dean for Graduate Studies.

Leave of Absence

Doctoral students who are forced to interrupt their studies may request a leave of absence from the University for up to one year. In consultation with their department/school and their doctoral program chair, students should define the program modifications the leave of absence requires. Requests should indicate a reason for leaving and the expected date of return to the University. If approval is granted, the time limits on the granting of the doctoral degree will be frozen for the time specified (up to one year). Students should file a request with their chair who will forward it to the dean for Graduate Studies. Approval of the dean for Graduate Studies is required prior to taking the leave of absence.

Time Limit for Completion of Degree

A minimum of three full years of graduate study is normally required to complete a program for the degrees Doctor of Philosophy and Doctor of Education. The time limit on granting the PhD or EdD degree is 10 years from the beginning of the doctoral coursework. Individual programs may have other deadlines for completion. Neither the courses taken nor the time spent in study determines the granting of the degree.

Final Examination

The final examination is oral. It is given by the dissertation committee after the candidate's studies have been completed and the dissertation has been accepted for examination. The committee also determines its character and length. The examination may be devoted to the special field of the dissertation or to the candidate's general knowledge, or it may be designed to test judgment and critical powers.

The final oral examination will not be scheduled unless the chair of the dissertation committee and at least two other members of the committee are available for the examination. Exceptions may be made only by permission of the dean for Graduate Studies. In any event, the chair/co-chair and readers of the dissertation must have seen and approved the completed dissertation before the final oral examination will be scheduled. The first and second readers are two dissertation committee members, excluding the committee chair/co-chair. Upon approval by the chair/co-chair and readers, the Application for Final Examination (<https://www.unomaha.edu/graduate-studies/current-students/graduate-forms-and-resources.php>) must be submitted to the Office of Graduate Studies prior to your examination date.

The final oral examination over the dissertation may be waived only with the unanimous consent of the dissertation committee and only in extremely unusual circumstances. The committee reports the results of the final oral examination or the reason for its waiver to the Office of Graduate Studies by using the Report on Completion of Degree (<https://www.unomaha.edu/graduate-studies/current-students/graduate-forms-and-resources.php>).

In the event that members of an oral examining committee are not unanimous regarding the passing of a candidate, the student is to be approved for the degree only if one examiner dissents. However, in each case, the dissenting member of the committee will be expected to file a letter of explanation to the Office of Graduate Studies.

Exit Requirement

The doctoral dissertation should make a creative contribution to knowledge in your field while also demonstrating mastery of relevant resources and methods. It is expected the dissertation will have a single topic, however broadly defined, and all parts of the dissertation will be interrelated. This, however, does not prevent sections of the dissertation from being discrete units.

The dissertation should also demonstrate your potential to make future, original contributions to knowledge, understanding, or methodologies in your discipline. For example, the originality of a dissertation may involve the discovery of significant new information or principles of organization, the achievement of a new synthesis, the development of new methods or theories, or the application of established methods to new materials or procedures.

Given the diverse nature of the fields in which dissertations are written and the wide variety of topics that are explored, it is impossible to designate an ideal length for the dissertation. A long dissertation is not necessarily better than a shorter one since the value and scale of the dissertation topic ultimately depends on the quality of its thought and the clarity of its exposition. Your dissertation committee will determine the appropriateness of these and other issues.

Grades for a doctoral dissertation are recorded on the permanent record after completion and approval by the department/school and the Office of Graduate Studies. Grades will be either "S" for Satisfactory or "U" for Unsatisfactory.

The dissertation is not considered to be a publication; thus it may be published, in whole or in part, and either quoted or paraphrased by giving appropriate credit to the relevant department/school, the Graduate College, and the University of Nebraska at Omaha.

NOTE: The doctoral dissertation committee guides your progress toward the completion of the dissertation, but it is your responsibility to follow instructions on the preparation of the document and to observe filing deadlines.

Dissertation Submission Procedures

The doctoral dissertation committee guides the student in the conduct and development of the dissertation and approves the final product. Typically, final recommendations from the dissertation committee, or dissertation committee chair, are provided to the student at the time of the final oral examination, although details vary among department/schools and individual faculty. Final approval of the dissertation is contingent upon approval by the dissertation committee and the Office of Graduate Studies.

Procedures:

At least three weeks prior to the last published date for holding oral exams, submit the Application for Final Examination (<https://www.unomaha.edu/office-of-graduate-studies/forms-and-resources/forms-documents.php>) form to the Office of Graduate Studies. If the final examination is waived, the dissertation committee must attach a statement of justification to the Application for Final Oral Examination or Waiver of Examination form; all members of the dissertation committee must indicate their approval of the waiver.

When the final dissertation has been approved by the dissertation committee, the student must submit the following to the Office of Graduate Studies for the final administrative steps in the approval process: Report on Completion of Degree (<https://www.unomaha.edu/graduate-studies/current-students/graduate-forms-and-resources.php>) form signed by the dissertation committee, upload your document to ProQuest (<https://www.unomaha.edu/office-of-graduate-studies/current-students/thesis-dissertation-support.php>), and complete the Survey of Earned Doctorates (<https://sed-ncses.org/login.aspx>) if you are a PhD student.

NOTE: If the dissertation is to be held pending patent issuance, etc., the student must specify this at the time the PDF file is submitted to ProQuest (UMI).

An electronic version of the dissertation (collectively referred to as ETDs) is required. An ETD is a document expressed in a format simultaneously suitable for machine archives and worldwide retrieval. Preparation of the ETD may be done using most word processor or document preparation systems that incorporate relevant multimedia objects.

As part of the ETD submission, students' abstracts are published in UMI's Dissertations Abstracts publications. Upon submission, the student authorizes ProQuest to produce copies of their work on demand for a fee. However, the student may request that UMI not distribute (or embargo) their ETD until further notice (up to two years). Some reasons for this include patent pending, the student's employer requires a review of the work, or a publishing agreement requires initial publication.

Please note: There may be a fee to submit the ETD through ProQuest; the amounts are noted on their website.

After successfully uploading the dissertation, the Office of Graduate Studies will be notified electronically by ProQuest of the submission and asked to provide final approval. Final approval of the dissertation will not be granted if the Report on Completion of Degree form is not on file with the Office of Graduate Studies.

Formatting and Submission Instructions (<https://www.unomaha.edu/office-of-graduate-studies/current-students/thesis-dissertation-support.php>)

Grades & Quality of Work Standards

- **Grades (p. 980)**
- **Quality of Work Standards (p. 981)**

Grades

Learn more about the following here (p. 37).

- Grading Scale
- How to View Official Grades
- Official Academic Transcripts

Incomplete Grades

The grade "Incomplete" ("I") is to be used by an instructor at the end of a term to designate incomplete work in a course. It should only be used when a student, due to extenuating circumstances (such as illness, military service, hardship or death in the immediate family), is unable to complete the requirements of the course in the term in which the student is registered for credit. An Incomplete should only be given if the student has already substantially completed the major requirements of the course. Each instructor must judge each situation as to whether an "I" is appropriate.

To receive an Incomplete, students must contact their professor prior to the end of the semester, request a grade of incomplete, and make arrangements to complete the work. The rules which govern the issuance of the incomplete are as follows:

1. The grade "I" is used by an instructor at the end of a semester or summer session to designate incomplete work in a course. It is given when a student, due to circumstances such as illness, military service, hardship or death in the immediate family, is unable to complete the requirements of the course in the term in which the student is registered for credit. Incomplete grades will only be given if the student has already substantially completed the major requirements of the course.
2. Each instructor will judge each situation. The instructor will also indicate by a departmental record, with a copy to the student, how the incomplete is to be removed, and if the instructor is at the university at the time of removal, supervise the makeup work and report the permanent grade.
3. In the event the instructor is not available at the time of the student's application for removal of an incomplete, the department chairperson will supervise the removal of the incomplete and turn in the permanent grade for the student.

Removal

The instructor does have the option of determining the requirements for completing the course and requisite date for removal of an incomplete. These requirements are in writing with the department to ensure there is no miscommunication between the instructor and student.

Repeating a Graduate Course

A student, upon the consent of his or her advisor, may repeat a course in which he/she has previously received a grade of "C+" (2.33 on a 4.0 scale) or below. Both grades will appear on the transcript, but only the second grade will be counted in determining the grade point average.

Quality of Work Standards

A "B" (3.0 on a 4.0 scale) average must be maintained in all graduate work taken as part of the degree or certificate program.

Automatic Dismissal

Graduate students are expected to do work of high caliber. Failure to do so will result in dismissal. In particular, the following will result in automatic dismissal from the degree or certificate program:

- Receiving a grade of "C-" (1.67 on a 4.0 scale) or below in any course taken in the student's major field of study or in any course included in the plan of study/program of study.
- Departments/schools may have additional and more stringent criteria for evaluating a student's performance and progress and may demand a higher level of performance than that demanded by the Graduate College. A department/school or program unit may, under some circumstances, recommend dismissal of a student from a graduate program even though quality of work standards have been maintained. Grounds for dismissal could include, but are not limited to:
 - Failure to be accepted by an appropriate thesis or dissertation advisor within stipulated time limitations;
 - Failure to make timely progress toward the degree or certificate; and
 - Failure to perform in coursework, qualifying examination or research at an acceptable level in the respective department/school or program unit.

Probation or Dismissal

A department/school will recommend that the dean for Graduate Studies either dismiss a student or place him or her on probation (with conditions for reinstatement as a student in good standing), in the following cases:

- A grade of "C+" (2.33 on a 4.0 scale) or below in any course in the first 12 hours of graduate study for provisionally admitted students;
- Receiving at least nine (9) hours of graduate credit with the grade of "C+" (2.33 on a 4.0 scale) or below in any courses taken in the student's major field of study or in any courses included in the plan of study for master's degrees, specialist's degrees or graduate certificates, regardless of the average;
- Receiving at least six (6) hours of graduate credit with the grade of "C+" (2.33 on a 4.0 scale) or below in any courses taken in the student's major field of study or in any courses included in the program of study for doctoral degrees, regardless of the average;
- Failure to maintain a "B" (3.00 on a 4.0 scale) average in all graduate work taken as part of the degree or certificate program.

Unclassified and Non-Degree Students

- For students with unclassified or non-degree admission, the above quality of work standards apply to coursework taken, as if all such courses were included in a graduate plan of study.
- A student will be automatically dismissed from all graduate standing or placed on probation should any of the above conditions occur.

Additional Requirements

Some departments/schools apply additional criteria for satisfactory performance beyond the requirements of the Graduate College.

Monitoring

- The graduate program committees or the supervisory committees in their respective departments/schools shall be responsible for

monitoring quality of work in degree, certificate and unclassified programs, and for recommending action.

- Graduate Studies will send a report to each department/school at the start of each semester with the names of master's, specialist, and certificate students who have received at least nine (9) hours of graduate credit with a grade of "C+" (2.33 on a 4.0 scale) or below as of the end of the previous semester.
- Graduate Studies will send a report to each department/school at the start of each semester with the names of doctoral students who have received at least six (6) hours of graduate credit with a grade of "C+" (2.33 on a 4.0 scale) or below as of the end of the previous semester.
- Graduate Studies shall be responsible for monitoring quality of work in non-degree programs.
- The dean for Graduate Studies will make the final decision and notify graduate students of their status.

Student Responsibilities

- Students should be aware of the Quality of Work Standards of the Graduate College, as well as any additional criteria of satisfactory performance in their respective graduate programs.
- It is the student's responsibility to know when his or her previous coursework has failed to meet those standards.
- Students who are attending classes are still subject to dismissal if their department/school recommends dismissal based on its review of their previous performance.

Automatic Dismissal for a Grade of "U" (Unsatisfactory) or "Fail"

A grade of "U" or "Fail" in any graduate course taken by a graduate student shall be treated the same as a grade of "C-" or below and shall result in automatic dismissal from the graduate program.

The Plan of Study and Grades Which Result in Automatic Dismissal

Grades which result in automatic dismissal from a program (e.g., grade of "C-" or below, "U", "Fail") may not be applied towards a graduate plan of study.

Students Dismissed from a Graduate Program Who then Re-apply as Non-Degree Students

If a student is currently registered, he/she will be disenrolled from their coursework. A hold will be placed preventing enrollment in future semesters, unless they request and receive permission in accordance with departmental/school graduate program policy to enroll as a non-degree student in that program.

Policy on Petitioning for Reinstatement into a Graduate Program

The process for petitioning and evaluating petitions for reinstatement into a graduate program is the responsibility of each department's/school's graduate program committee. For a current copy of procedures, please contact your department/school graduate program committee chair.

Academic Appeals

Appeal of Grades in Graduate-Level Courses

An appeal of grades in graduate-level courses shall be made through the graduate student grade appeal procedures for the campus through which the grade was awarded. Students who believe their evaluation in a course has been prejudiced or capricious must first attempt to resolve the matter with the course instructor and then the department through which the course was offered.

The initiation of the appeal in writing by the student must be filed within six weeks following receipt of the grade from the Office of the University Registrar.

In cases where a grade lower than a "C" will result in dismissal from the graduate student's program, the dean for Graduate Studies will notify the graduate program committee chair and student that the student will be automatically dismissed from their graduate program. The student will have a two-week grace period from the date of the dismissal notification to the date of the request to the Registrar for dis-enrollment in all graduate coursework. This two-week period allows the student an opportunity to present his/her case informally to the course instructor and, if necessary, to the chair of the graduate program committee before being terminated from the program and disenrolled from courses. A student who has been dismissed from a graduate program and disenrolled from coursework is prohibited from taking graduate courses.

If the matter is not resolved, the student may file an appeal in writing to the campus dean for Graduate Studies, who shall inform the student of the grade appeal procedures approved by the graduate faculty or by their duly elected representative graduate council for that campus, and shall forward the appeal to the student-faculty committee or council that has been designated to hear graduate-level course grade appeals on that campus. Since awarding grades in courses occurs at the individual campus level, the decision of the campus committee or council designated to hear the case on behalf of the campus graduate faculty shall be final and is not subject to further appeal (Graduate College Policy Handbook 2011-2012).

Grade Appeal Policy for UNO Graduate College Courses

I. Overview

1. **Purpose.** A grade appeal policy seeks to articulate and protect both the rights of students to fair and impartial evaluation of their academic performance and the responsibilities of faculty members as those who determine student grades. A course grade assigned in a manner consistent with university policy can be changed only by the instructor. University administrators can direct a grade to be changed only when it is determined through the procedure established by this policy that the faculty member assigned the course grade in an arbitrary or capricious manner. An "arbitrary and capricious action" is an action taken without regard for the facts or circumstances of the appeal, without some basis which would lead a reasonable, informed, and honest person to the same conclusion. Allegations that sexual harassment was the reason a final course grade was arbitrarily or capriciously assigned by the instructor must be addressed according to procedures set forth in the UNO Prohibited Discrimination policy (<https://www.unomaha.edu/office-of-equity-access-and-diversity/policies-plans-forms/ead-statement.php>) rather than from the following procedures.
2. **Faculty Responsibility.** It is a fundamental principle of higher education that faculty members are expected to:
 - Exercise their professional judgment in evaluating student performance.

- Specify in each of their courses at the beginning of the academic term:
 - Course requirements and expectations for academic performance; and
 - Procedures for evaluating performance (method(s) of evaluation and grading scales).
 - Communicate clearly to all students in the course any subsequent additions to or changes in these requirements, standards, and procedures.
 - Apply the specified grading criteria equitably to the academic performance of all students in the course regardless of their age, color, creed, disability, gender, national origin, race, religion, sexual orientation, or other personal characteristics.
 - Departing faculty must document their last semester's grades and leave a copy with their Graduate Program Chair. Documentation should include course syllabi and any other information distributed to their students concerning grading policies.
3. **Student Responsibility.** Students have the responsibility to know and adhere to the University policies and standards pertaining to them. As students willingly accept the benefits of membership in the University of Nebraska at Omaha (UNO) academic community, they are obligated to uphold and observe the principles and standards articulated in the UNO student code of conduct.

II. Course Grades that Are Eligible for Appeal

1. **A grade appeal policy applies to final course grades.** Course grades which result from alleged violations of the Code of Student Academic Integrity may also be appealed under this policy.
2. A course grade is deemed to have been assigned in an arbitrary or capricious manner if, by a preponderance of the evidence, a student establishes that:
3. The course grade was based upon the student's age, color, creed, disability, gender, national origin, race, religion, sexual orientation, other personal characteristic, or for some other arbitrary or personal reason unrelated to the instructor's exercise of his or her professional academic judgment in the evaluation of the academic performance of the student; or
4. The course grade was assigned in a manner not consistent with the standards and procedures for evaluation established by the instructor, usually at the beginning of the course in the course outline, commonly called the course syllabus (a course outline is primarily the information provided by the instructor at the beginning of the course, and not necessarily the master syllabus generated by the department which may be applied to multiple offerings of a course in time or place), but supplemented on occasion during the semester in other written or oral communications directed to the class as a whole; or
5. The course grade assigned by the instructor was the result of a clear and material mistake in calculating or recording grades. Individual **elements** (e.g., assignments, tests, activities, projects) which contribute to a course grade are generally NOT subject to appeal or subsequent review during a grade appeals procedure. However, individual elements may be appealed under these procedures providing the following conditions are met:
 - The student presents compelling evidence that one or more individual **elements** were graded on arbitrary or capricious grounds (defined above);
 - Grounds can be established for determining a professionally sound grade for the appealed element(s); and
 - The ensuing grade for each appealed element would have resulted in a different course grade than that assigned by the faculty member.

III. Grade Appeal Procedures

Each department or program will establish its own grade appeal procedures. These procedures must:

1. Articulate and protect both the rights of students for fair and impartial evaluation of their academic performance and the responsibilities of faculty members as those who determine student grades.
2. Include timelines.
3. Be made readily available to all students.
4. Be documented in the Office of Graduate Studies.

Appeal of General Academic Matters Related to Student Programs

1. Graduate students holding admission with unclassified status in the Graduate College, admission with a master's objective or admission with a doctoral objective (but prior to the appointment of a doctoral dissertation committee) should appeal as follows:
 - a. The student should first submit the appeal to the student's faculty advisor.
 - b. If denied, the student may submit the appeal to the department/area graduate program committee that is administratively responsible for the student's graduate program.
 - c. If denied, student may submit the appeal to the graduate council for the campus administratively responsible for the student's graduate program. Normally, this is the final appeals body (for exceptions, see the last part of this section).
2. Graduate students holding admission with a doctoral objective in the Graduate College and for whom a doctoral dissertation committee has been appointed should appeal as follows:
 - a. The student should first submit the to the student's faculty advisor.
 - b. If denied, the student may submit the appeal to the student's supervisory committee.
 - c. If denied, the student may submit the appeal to the department/school graduate program committee that is administratively responsible for the student's graduate program.
 - d. If denied, the student may submit an appeal to the graduate council for the campus administratively responsible for the student's graduate program. Normally, this is the final appeals body (for exceptions, see the last part of this section).
3. When a student's graduate program consists of registrations essentially or entirely on one campus, the graduate council of the campus administratively responsible for the program will constitute the appeal board. When a student's graduate program includes substantial registrations on a campus other than the one administratively responsible for the program, three members of the graduate council for the other campus will be designated by the dean for Graduate Studies on that campus to augment the graduate council on the campus administratively responsible for the program. In this case, the augmented council will constitute the appeal board. The decision concerning augmentation of a campus graduate council for a specific appeal involving registrations on a campus other than the one administratively responsible for the student's program will be made by the deans for Graduate Studies on the campuses involved.
4. In all cases, appeals should be made in writing to the appropriate advisor, committee or council. In those cases where the appeal concerns graduate-level qualifying exams, comprehensive exams or final oral exams, the following deadlines must be observed.
 - a. It is the responsibility of the student to make reasonable efforts to ascertain the results of the examination within 30 days after its completion.
 - b. The student must file the initial appeal, in writing, within 30 days following the student's receipt of the evaluation results.

- c. In those cases involving an appeal of termination of program, the student must file an initiation of the appeal, in writing, within 30 days following the student's receipt of the official written notification by the Office of Graduate Studies.

Graduate Student Academic Appeal Policy

Introduction

This document outlines the UNO graduate council policies and procedures for student academic appeals in situations such as comprehensive exams, plagiarism, and reinstatements. For grade appeals, see the Grade Appeal Policy at the Graduate College Level for Graduate-Level Courses.

This document is divided into three sections:

1. Documentation from Student and Faculty Representative (or Department);
2. A description of the initial review of the appeal case by the graduate student academic appeals committee; and
3. Details of the operating guidelines for the UNO graduate council to follow in conducting a full appeal.

1.0 Documentation from Student and from Faculty Representative

1.1 Student Documentation

The student shall provide documentation that proves the student's appeal.

In addition to the documentation deemed relevant by the student to prove the student's appeal and provided by the student, the student shall complete a single-page cover sheet for the appeal. That cover sheet shall be designed by the dean for Graduate Studies and provided to the student. On that cover sheet, in less than 2,000 characters (e.g., including spaces), the student shall specifically identify in three separate paragraphs:

1. the procedural error(s) being appealed;
2. the substantive error(s) being appealed; and
3. the remedy requested.

The student's appeal is not submitted until the dean for Graduate Studies determines that the student's cover sheet has been completed as required.

1.2 Faculty Representative Documentation

The dean for Graduate Studies shall deliver the student's section 1.1 cover sheet, along with other notice of the student's appeal, to the decision maker whose decision is being appealed. The decision maker shall promptly notify the dean for Graduate Studies of the decision maker's appointment of a faculty representative.

Ordinarily the student's appeal is necessarily limited to an appeal of the decision of a single decision maker (e.g., graduate program committee). However, if the student is appealing decisions of more than one decision maker, then there might be more than one faculty representative. The faculty representative of a committee may be, but is not necessarily, a member of that committee. If no such notice of appointment is delivered to the dean for Graduate Studies, then the faculty representative of an individual decision maker shall be that individual, and for a committee the current chair of that committee.

The faculty representative shall provide documentation relevant to the student's appeal as defined in the student's section 1.1 cover sheet in a timely manner. After the student has submitted an appeal, and after the faculty representative has replied by providing relevant documentation, the dean for Graduate Studies shall review that documentation for completeness. Prior to the dean for Graduate Studies delivering that documentation to the graduate student academic appeals committee, the dean for Graduate Studies, in the interest of completeness, may request the faculty representative(s) to provide specific additional documentation that

the dean for Graduate Studies reasonably believes is readily available to the decision maker whose decision is being appealed.

2.0 Graduate Student Academic Appeals Committee

2.1 Function of the Committee

The dean for Graduate Studies shall appoint a committee which will review student academic appeals that are filed in Graduate Studies. The task of the graduate student academic appeals committee will be to determine whether the appeal merits a hearing by the graduate council.

2.2 Composition of the Committee

The dean for Graduate Studies shall appoint two faculty members from each of the two standing committees of the graduate council, and one of the student representatives on the graduate council, to serve on the committee. The duration of appointment to the committee shall be for one year. (In cases where a student from the home department of one of the members of the committee has initiated an appeal, the dean shall appoint a replacement for that committee member from the graduate council to hear that specific appeal. All other cases of potential conflict of interest shall be treated in a similar fashion).

2.3 Procedures for the Committee

The committee is charged with the responsibility of determining the merits of the student academic appeal, based on the letter of appeal and any other documentation requested and received by either the dean for Graduate Studies or the graduate student academic appeals committee. The committee shall vote on whether the appeal merits a hearing by the graduate council. Affirmative vote of the majority of the members is required to bring the appeal before the graduate council for a full hearing. The decision of the committee will be communicated to the Office of Graduate Studies for appropriate action.

3.0 UNO Graduate Council and Graduate Student Academic Appeals

3.1 Purpose and Limitation of Scope

The graduate council will hear only those appeals forwarded by the graduate student academic appeals committee. The purpose of the hearing shall be to decide the merit of a student's request for redress of the academic issue being appealed. The appealing student bears the burden of proof to prove: (1) by clear and convincing evidence that the faculty member's decision being appealed was prejudicial or capricious; and 2) by the preponderance of the evidence that the graduate program committee's decision being appealed was prejudicial or capricious.

3.2 Composition of the Council for Hearing Student Appeals

The full membership of the graduate council (quorum required) shall hear academic appeals of graduate students.

3.3 Possible Conflicts of Interest by Graduate Council Members

Graduate council members who feel a conflict of interest might result from their participation in an academic appeal hearing shall exercise the necessary professional steps to avoid influencing the vote of the council.

3.4 Timeliness of Council Decision

The graduate council shall hear appeals forwarded by the graduate student academic appeals committee at its next scheduled meeting unless a delay is approved.

3.5 Student and Faculty Freedom to Present Arguments

The student and the faculty representative shall have freedom to present their viewpoints, limited only to the requirement that facts and opinions presented shall pertain to the academic issue being appealed.

3.6 Guidelines for Hearing Procedures

The following shall be made known to persons present at the hearing:

The time: _____ The date: _____ The place: _____.

This hearing will be conducted in compliance with the UNO graduate student academic appeal policy. The student, _____, has filed an appeal in conformity with the policies of the graduate council pertaining to the findings of a graduate program committee. The graduate program committee or other designated committee consisted of Professor _____, Chair; and Professors _____ and _____ as members. That committee heard the appeal on _____ and denied the appeal. The student disagreed with the decision of the departmental appeals committee and continued the appeal process by submitting a letter detailing supporting reasons to the dean for later consideration by the graduate student academic appeals committee. That committee reviewed the student's request on _____ and, under conformity with its guidelines, has forwarded the student's appeal to the graduate council for action. The graduate council members present at this hearing have had an opportunity to review the documents provided by the person(s) involved. The agenda for the UNO graduate student academic appeal is:

Student's presentation: 10 minutes

Faculty Representative's presentation: 10 minutes

Council members' questions to Student and Faculty Representative: up to 20 minutes

Student's concluding remarks: 5 minutes

Faculty member's concluding remarks: 5 minutes

The participants of this appeal shall leave following the above hearing and the council will deliberate the issue(s) involved. The council's decision will be determined by secret ballot of those members who were present and voted. As soon as the votes are counted by the dean for Graduate Studies, the ballots shall be destroyed and the final decision announced to the council by the dean. In no case shall the number of votes cast on either side of the issue be disclosed.

3.7 Administration of the Council's Decision:

The dean for Graduate Studies shall provide the parties of an appeal a written statement of the graduate council's decision within three working days.

Guidelines for the Appeals to the Executive Graduate Council

1. There is no absolute right of appeal to the executive graduate council. The executive graduate council will accept appeals only in those cases where, in the exercise of its sole discretion, it shall first find that one or more of the following grounds for accepting the appeal exist:
 - a. The campus graduate council has violated some element of fair procedure (example: has failed to allow the parties concerned to present their cases fully to their campus graduate council).
 - b. That the campus graduate council has failed to examine or give adequate weight to important evidence relevant to one party's position.
 - c. The campus graduate council has given undue weight to evidence not pertinent to the case.
 - d. That some gross miscarriage of justice would be perpetrated if the decision of the campus graduate council is allowed to stand. A decision by the executive graduate council not to accept jurisdiction of an appeal shall be final and is not subject to further appeal.
2. A student appeals to the executive graduate council must be made in writing and must specifically outline the grounds for appeal. Appeals must be made within 20 working days of the day on which the decision of the campus council is received (working days shall not include those days the university is not in session).

3. The executive graduate council must make a decision to hear the appeal or not to hear the appeal within 30 working days after receipt of the appeal. Acceptance or denial of jurisdiction over the appeal will be made in writing.
4. The decision of the executive graduate council on the merits of the case will be made and transmitted to the concerned parties within 40 working days after the decision to hear the appeal.
5. No person who was a member of the department or campus graduate council involved in the case will be eligible to participate in the decisions of the executive graduate council, either to decide whether the case should be heard or to decide the merits of the case. The dean for Graduate Studies may replace members of the executive graduate council not eligible for participation in the decision to hear the appeal or in the appeal itself.

- Report on Completion of Degree is to be submitted to the Office of Graduate Studies in person or by email to graduate@unomaha.edu.
- The thesis, EdS field project, or dissertation is to be submitted electronically through ProQuest. Visit the Thesis & Dissertation Support (<https://www.unomaha.edu/office-of-graduate-studies/current-students/thesis-dissertation-support.php>) website for additional information on account set-up and document submission.

For specific deadlines related to filing an application for degree, submitting comprehensive examination results, Incomplete (I) and In Progress (IP) grades from previous terms, and final copies of theses, EdS field projects, and dissertations, view the Graduation Checklist (<https://www.unomaha.edu/office-of-graduate-studies/current-students/graduation-checklist.php>).

In order to remain eligible for graduation, you must maintain enrollment for all currently enrolled courses that are part of your plan of study. A grade for any current enrollment(s) must be received by the Registrar's Office no later than the close of business on the 15th working day following the date of commencement (or the final day of the semester in the case of August graduation). Diplomas will be mailed as soon as possible after the 15 working days have passed.

Your graduation file must be **in complete order** with the exception of grades for current enrollments. Final responsibility rests with you, the graduate student, to check with your advisor and the Office of Graduate Studies to be sure all requirements are met.

Note: If requirements are not complete by the published deadlines, students will be cancelled from graduation and will NOT be allowed to participate in the commencement ceremony.

Please be sure all holds are cleared and that the address listed on the degree application is correct, as this is the address to which diplomas are mailed. Diplomas or official transcripts will not be released for students who have outstanding debts or fees owed to the University. The student is responsible for contacting the Office of Cashiering and Student Accounts to make arrangements to clear their account.

Financing your Education

- **Office of Financial Support and Scholarships (p. 43)**
- **Federal Financial Aid Policies (p. 43)**
- **Graduate Assistantships (p. 985)**

Graduate Assistantships

Graduate Assistantships

Academic Standards

A graduate assistantship is intended to award students who have demonstrated high academic performance and potential either at the graduate or undergraduate level. As a graduate assistant you will be considered a UNO employee with a tuition waiver, monthly salary, and subsidized health insurance.

- Graduate assistants must be students in good standing in a degree or certificate program in the UNO Graduate College.

Graduation

Graduation Process

As students prepare to graduate from UNO, there are several things they should know. Please review the following information, and be aware of all relevant deadlines for the semester that you intend to graduate.

UNO students have the opportunity to graduate in May, August, or December. Students graduating in May are eligible to participate in the May commencement ceremony, while students graduating in August and December are eligible to participate in the December commencement ceremony. Participation in a commencement ceremony is not required in order to graduate from any degree program or to receive a diploma.

- Students must complete an Application for Degree during the semester in which they plan to graduate.
 - Deadlines to apply for graduation are included in the academic calendar (<https://www.unomaha.edu/registrar/academic-calendar.php>).
 - Log into MavLINK and fill out the application for degree on or before the deadline. Information on how to apply can be found on the Registrar's website (<http://www.unomaha.edu/registrar/students/graduation-and-diplomas/graduation-general-information.php>).
 - There is an application for degree fee, payable at the time the application is submitted.
 - Please contact the Registrar's Office at 402.554.2314 with any questions.

Note: If you apply for graduation and will not complete all of the requirements for the degree, please notify the Office of Graduate Studies. You must REAPPLY to graduate in a future term; no additional fee is charged.

- After applying for the degree, students should visit The Maverick Store (<https://www.unobookstore.com/>) as soon as possible to purchase their academic regalia. Please contact The Maverick Store at 402.554.2336 with any questions.
- The following requirements must be on file with the Office of Graduate Studies 12 working days prior to commencement (or 12 working days prior to the final day of the summer semester in the case of August graduation):
 - Comprehensive examination results (contact individual departments/schools for procedures to take the exams).
 - All Incomplete (I) and In Progress (IP) grades from previous terms must be completed and the grades submitted to the Office of Graduate Studies.
 - Submit the Report on Completion of Degree (<https://www.unomaha.edu/office-of-graduate-studies/forms-and-resources/forms-documents.php>) along with the thesis, EdS field project, or dissertation.

- Dismissal from a graduate program for any reason shall result in simultaneous dismissal from any graduate assistantship position. The student will not be eligible for an assistantship thereafter until fully reinstated in a graduate degree or certificate program.

Apply, Recruitment, Selection, and Renewal of Graduate Assistants

- Each graduate department/school or other unit, as appropriate, shall establish its own procedure for graduate assistantship recruitment and selection in accordance with university policy on affirmative action/equal opportunity. Graduate Assistantship positions are subject to a background check.
- Assistantships are not automatically renewable and are dependent upon assessment of work and classroom performance. The student is reminded that, whether or not outside work commitments are involved, graduate assistantships may not be renewed if either graduate class work or assistantship duties are not carried out in a satisfactory manner.

Workload

- The workload for a graduate assistant should average 20 hours per week for the duration of the appointment and shall be construed to be the equivalent of .33 FTE.
- The department/school or unit in which the graduate assistant is employed should make arrangements with its assistants regarding vacation periods.
- The graduate faculty considers a student who is pursuing graduate study and holding a graduate assistantship to be carrying the equivalent of a full-time workload (see course load below) and, therefore, discourages the practice of holding additional jobs which may interfere with satisfactory performance of assigned duties.

Course Load

- Graduate assistants must carry a minimum of six graduate credit hours in each of the fall and spring semesters this is in addition to any undergraduate deficiency courses. Graduate assistants working in the summer are not required to be concurrently enrolled.
- This requirement may only be waived if the student is in their last semester of the assistantship and needs less than the minimum six graduate credit hours to complete their requirements for graduation. For doctoral candidates, the six graduate credit hour minimum may also be waived with the approval of their advisor and the Office of Graduate Studies, if all required coursework has been completed except for dissertation credits. In either case students still must be registered for one course that is required to complete the degree requirements.
- Graduate assistants may not register for more than twelve semester hours without the approval of both their supervisor and the Office of Graduate Studies. The graduate assistantship will not pay for more than twelve semester hours in a semester.

Duties

Duties assigned to graduate assistants should be directly related to and in support of graduate studies in their chosen field of study. In general, other duties which involve direct knowledge and application of knowledge related to the student's field of study would be acceptable. Graduate assistants should not be utilized solely for clerical duties.

It shall be the responsibility of each graduate program committee, in consultation with the cognizant department chairperson or program director, to draw up an agreement with each graduate assistant at the time of the appointment which shall specify the stipend, duration and method of payment, the assistant's duties, and the general conditions of employment. The agreement shall be reviewed by the graduate assistant before it is signed by him/her and the chairperson of the graduate program committee. The graduate program committee, upon the recommendation of the graduate assistant's faculty supervisor and/or the department

chairperson/school director or unit director, shall have the responsibility to review the assistant's performance and to terminate the appointment for failure to discharge satisfactorily the duties specified in the agreement.

Lengths of Appointments

Assistantships may be awarded on an academic, calendar-year or semester-by-semester basis. Students working towards a master's degree may not hold an assistantship for more than four (4) semesters: Educational Specialist students are limited to four (4) semesters beyond their master's degree; doctoral students are limited to six (6) semesters beyond their master's degree. These appointments exclude summer sessions. An assistantship may be extended on an individual basis upon the recommendation of the Graduate Program Committee of the department and the approval of the Dean for Graduate Studies.

Graduate Assistantship Frequently Asked Questions

What is a graduate assistantship?

A graduate assistantship is based on academic and/or professional excellence. Recipients receive tuition remission, a monthly salary, and subsidized health insurance to work approximately 20 hours per week on assigned professional responsibilities. Graduate assistants are assigned responsibilities that provide supervised educational experiences at the graduate level.

How do I apply for an assistantship?

Contact the department/school/office you are interested in for any available positions and their application procedures. Also, check with Maverick Student Employment (<https://www.unomaha.edu/maverick-student-employment/>), they may have a list of the current open assistantships. One must be admitted to a UNO graduate degree or certificate program to be a graduate assistant; non-degree & unclassified students are ineligible. Graduate Assistants must be in good standing in a UNO degree or certificate program to receive or continue with an assistantship.

What do I receive monetary compensation for and when do I get paid?

Graduate Assistants typically work 20 hours per week. On the last working day of the month, your paycheck will be electronically deposited directly into your bank.

How many graduate hours do I need to take during the fall and spring semesters?

Graduate Assistants are required to carry a minimum of six (6) graduate hours in the fall and spring semesters (**please note that undergraduate deficiencies do not count toward this minimum requirement**). You must be aware that nine (9) graduate hours is a full-time course load for graduate students.

The minimum of six (6) graduate credit hours may be waived if you are in your last semester & need less than six (6) graduate credit hours to complete the requirements for graduation. The Office of Graduate Studies will review your plan of study and contact you to complete the "Student Social Security Tax Exemption State-Last Semester."

The minimum of six (6) graduate credit hours also may be waived for doctoral candidates, with the approval of their adviser & the Graduate Dean, if all required courses except dissertation have been completed and the student will not be employed for more than 20 hours per week. The Office of Graduate Studies will review your plan of study and contact you to complete the "Student Social Security Tax Exemption Statement-Certification of Full-Time Graduate Status."

What is the maximum number of graduate hours I can take each semester?

Your Assistantship will pay for a maximum of twelve (12) graduate credit hours a semester.

Can I register for an undergraduate course and have the tuition paid?

Yes, if the undergraduate course is required to fulfill a deficiency that is listed on your original plan of study. This can be accessed in MavLINK (<https://mavlink.nebraska.edu/psp/mavlink/NBO/HRMS/?cmd=login>) AND you are also enrolled in a minimum of **six graduate credit hours**.

If the undergraduate course is not listed as a deficiency on your original plan of study, your assistantship will not pay for the tuition.

How many graduate hours does a graduate assistant have to take in the summer?

None. * You are allowed to take a maximum of twelve graduate hours.

Will my assistantship pay the tuition for graduate courses in the summer?

Yes, if you were a graduate assistant for the preceding fall and spring semesters or are working as a graduate assistant during the summer.

If you were a graduate assistant for the spring semester only and will be one in the upcoming fall, you will be eligible for reimbursement for your summer graduate courses. Please consult with the Office of Graduate Studies.

How do I pay for classes?

Once the necessary paperwork has been submitted to the Office of Graduate Studies by your department/school/office, Cashiering/Student Accounts will be notified of your assistantship. Your account will then be credited for the classes which are covered by your assistantship. **Please be sure you pay the fees and any other charges not covered by your assistantship.**

Will my assistantship pay for graduate courses taken at the other three University of Nebraska campuses (UNL, UNK and UNMC)?

Yes, if the courses are required in your plan of study, a tuition voucher will be completed by the Office of Graduate Studies at the time of verifying enrollment. You will need to complete the online Intercampus Registration Form (https://csprdn.nebraska.edu/psc/csprdn/NBX/SA/s/WEBLIB_PTBR.ISCRIPT1.FieldFormula.IScript_StartPage/?ghcmd=saml).

What happens if I resign my assistantship?

The Office of Graduate Studies will send you a prorated bill for tuition from the date you resigned your assistantship. You will be placed on stop enrollment until the bill is paid.

What happens if I don't start my assistantship at the beginning of the semester?

Assistantships may be awarded on an academic-year basis, a calendar-year basis, or semester-by-semester basis. Normally these appointments start at the beginning of a semester. The department/school/office should contact the Office of Graduate Studies for prior approval if the assistantship is not starting at the beginning of a semester. If the late hiring is approved, the Office of Graduate Studies will send you a prorated bill for the graduate courses you are enrolled in; beginning with the date you started your assistantship.

May I hold another job (additional employment) in addition to my assistantship?

The Graduate Faculty considers a student who is pursuing graduate study and holding a Graduate Assistantship to be carrying the equivalent of

a full-time workload and therefore, discourages the practice of holding additional jobs which may interfere with satisfactory performance of assigned duties. With the approval of your graduate program committee and the Office of Graduate Studies, an additional assignment may be accepted if professionally relevant and if your total FTE does not exceed .49.

What if I become sick and miss work or take a vacation?

Graduate Assistants do not earn sick or vacation hours, please consult with your department/school/office concerning their policies.

Do graduate assistants work when offices are open, but the university is closed for classes?

As a graduate assistant averages 20 hours per week, they are treated like faculty depending on their assignment you may be expected to work, and this must specifically be stated in their workload agreement (GA contract letter) and discussed well in advance. You should check with your GA supervisor regarding their policy.

How long may I hold a graduate assistantship?

Assistantships may be awarded on an academic-year basis, a calendar-year basis, or semester by semester basis.

Students working towards a master's degree may not hold an assistantship for more than four (4) semesters: Educational Specialist students are limited to four (4) semesters beyond their master's degree; doctoral students are limited to six (6) semesters beyond their master's degree. These appointments exclude summer sessions. An assistantship may be extended on an individual basis upon the recommendation of the Graduate Program Committee of the department and the approval of the Dean for Graduate Studies.

Accounting

• Accounting, MACC (p. 989)

• Internal Audit, Fraud and Control Certificate (p. 991)

Accounting, MACC

The Master of Accounting (MAcc) program at UNO is designed for dedicated students with career aspirations demanding a high level of accounting expertise. As such, the program involves both intensive and extensive professional preparation, with an emphasis on technology, data analytics, and quantitative methods. This focus prepares our graduates with the technological, analytical, and quantitative skills employers demand. Our program provides broad-based preparation for individuals seeking careers in public, private or not-for-profit organizations.

The MAcc program offers graduates an affordable, high-quality graduate education from an AACSB-accounting-accredited institution. Specialized accounting accreditation by the AACSB (Association to Advance Collegiate Schools of Business) is earned by demonstrating that we meet international standards of excellence relating to delivering and managing undergraduate and graduate accounting programs, and fewer than 200 institutions worldwide hold AACSB accounting accreditation.

A very practical benefit of having our MAcc program AACSB-accounting-accredited is that the Nebraska Board of Public Accountancy (NBPA) recognizes AACSB accounting accreditation as initial evidence that our graduates meet educational requirements to sit for the CPA exam. Final determination of CPA Exam eligibility remains under the discretion of the NBPA.

Our MAcc program is an approved STEM (Science, Technology, Engineering, and Mathematics) Designated Degree Program. Under the Optional Practical Training (OPT) program, international students who graduate from the program may stay in the United States and received training through work experience. Eligible F-1 students with STEM degrees who finish their

program of study and participate in this initial period of regular post-completion OPT have the option to apply for a STEM OPT extension.

Financial Assistance

MAcc students are eligible to apply for graduate scholarships, fellowships, and assistantships and will find information about these opportunities at [MAcc.unomaha.edu \(https://www.unomaha.edu/college-of-business-administration/accounting/graduate-program/\)](https://www.unomaha.edu/college-of-business-administration/accounting/graduate-program/). Employed applicants should explore tuition reimbursement plans from their employers.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- Applicants must have earned a minimum GPA of (3.0/4.0) in their undergraduate program. The baccalaureate degree must have been received from a properly accredited institution. If the applicant's undergraduate degree is in accounting, then we further require a minimum GPA of 3.0 overall and upper-division accounting GPA. Applicants with a GPA less than 3.0 may petition for admission after they have submitted a satisfactory GMAT score.
- **Entrance Exam:** Applicants may be admitted by taking the GMAT and scoring at least 550.
- GMAT exemptions: Applicants may qualify for a GMAT exemption under one of the following four conditions:
 - Earned CPA license; OR
 - Successful completion a master's degree in a business field from an AACSB-accredited university; OR
 - ALL of the following must be met:
 - Completion of an undergraduate business degree with a major in accounting from an AACSB-accredited school, AND
 - Upper-division (3000/4000-level) accounting GPA of 3.0 or higher, AND
 - Overall GPA of 3.0 or higher; OR
 - ALL of the following must be met:
 - Currently working on an undergraduate business degree with a major in accounting from an AACSB-accredited school, AND
 - Earned a minimum of twelve upper-division (3000/4000-level) accounting credit hours with a GPA 3.0 or higher in these accounting courses, AND
 - Overall GPA of 3.0 or higher, AND
 - Maintaining the accounting and overall GPAs of 3.0 or higher through degree conferral
- An applicant with an earned bachelor's degree with a major in accounting from a non-AACSB college or university with 3.0 or higher overall and upper-division accounting GPAs will be

evaluated individually for a GMAT waiver. At a minimum this will require evidence of other accreditation credentials and a substantially earned accounting GPA (a minimum of 3.5 in all upper division accounting courses). Additional evidence may be required. The perspective student must contact the MAcc director to submit a request for evaluation.

- Credit received for internships is excluded from these calculations of overall and upper-division accounting GPAs.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 100, IELTS: 7.5, PTE: 68, Duolingo: 130
- **Note:** Applicants who have met the admission requirements above, but who have not completed all of the foundation course requirements, will be admitted provisionally. Provisionally admitted students must earn a minimum GPA of B (3.0/4.0) in all foundation courses taken to satisfy the requirements set out in their provisional admittance. Provisionally admitted students who do not earn a minimum GPA of B (3.0/4.0) in all foundation courses will be immediately dismissed from the MAcc program.

Degree Requirements

Foundation Requirements

Accounting is a technical subject and graduate work in the discipline requires a solid understanding of the material covered in the undergraduate curriculum. To make sure our students are adequately prepared we have a list of foundation requirements below. Students may be provisionally accepted to the program before they have completed or attempted any of the foundation requirements. However, admission will be provisional and no graduate-only accounting classes may be taken before the foundation requirements have been successfully completed—except students enrolled in their final foundation course may elect to enroll in graduate classes that do not require that course as a prerequisite.

Students who have completed the foundation requirements or their equivalents at a properly accredited institution before their application must have an overall GPA of (3.0/4.0) in these courses and earned no grade on any of the foundation courses lower than a C (2.0/4.0).

¹ If the equivalent undergraduate course has been completed (ACCT 4050, 4010, 4040, 4060, or 4070), students cannot take the graduate equivalent course. Other approved electives will be discussed and approved by the MAcc program director.

Exit Requirement

- Comprehensive Examination

Other Program Related Information

Transfer credits: All transfer credits must be approved by the MAcc program director. A maximum of nine credit hours may be considered, and must be earned at an AACSB-accredited institution.

Academic Performance

In addition to the Quality of Work Standards required by the UNO Graduate College, MACC students may repeat only once any ACCT 8–0 or ACCT 8–6 level course in which they receive any grade, including "W" or "I".

Students earning a third grade of "C+" or below (or any single grade of "C-" (1.67 on a 4.0 scale) will be automatically dismissed from the MACC program. Dismissed students will be immediately administratively withdrawn from all courses in which they are enrolled for MAcc credit in any subsequent semester or summer session until reinstatement has been granted by the MAcc graduate program committee (MAcc GPC).

Students who have been dismissed from the MAcc program may submit a written petition for reinstatement to the MAcc GPC. Students who have petitioned the MAcc GPC for reinstatement may not enroll in any courses

for MAcc credit. Upon receiving a petition for reinstatement, the MAcc GPC will evaluate the student's petition. As part of the reinstatement petitioning process, the MAcc GPC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student, and this information may be used by the MAcc GPC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege, and not all students who are dismissed will be reinstated. Students who have been reinstated will be subject to reinstatement conditions as specified by the MAcc GPC. These reinstatement conditions may include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher (the exact grade requirements for retaken courses may in fact be higher than "B" (3.0)). Students not achieving the reinstatement conditions will be automatically dismissed with no additional opportunity for reinstatement.

Internal Audit, Fraud and Control Certificate

The objective of the internal auditing, fraud, and control certificate is to provide students with current information in the profession of internal audit, accounting information systems, and fraud risk assessment. The certificate provides a foundation for the Certified Internal Auditor (CIA) examination and license certification. Earning this certificate will encourage and prepare students to pursue the CIA license credential. This certificate and potential professional certification will help students sharpen their skills and earn a standard of credibility and recognition of competence in the field.

- Applicants must meet the course pre-requisites for the courses in the certificate program.

Athletic Training, MA

The mission of the athletic training program at the University of Nebraska at Omaha is to prepare students for successful careers or advanced academic studies in the field of athletic training by providing didactic and clinical education, resources, and opportunities which lead to the growth and development of dedicated practitioners, reflective scholars, and responsible citizens.

Program Related Information

Accreditation

This program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE).

Alternative Entry into the MA in athletic training from the BS in kinesiology

The School of Health and Kinesiology offers an alternative entry into the MA in athletic training, which allows outstanding students to complete the BS in Education undergraduate kinesiology degree and the MA in athletic training graduate degree. The alternative entry program is designed for dedicated students who are motivated and willing to take on early the challenges relating to graduate education. Interested students are encouraged to meet with their academic advisor for more information about this program.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Summer 2026: The priority candidate deadline is January 15. Applications may be accepted through April 15.

Other Requirements

- Minimum cumulative undergraduate GPA of 3.0/4.0 is required for unconditional admission.
 - Students with a 2.70-2.99 cumulative GPA may apply and be admitted provisionally. Provisional admission typically means that the admitted student must maintain a 3.0 GPA or higher, and earn “B” or higher on all courses during the first 12 hours of graduate coursework.
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110 in order to be considered a strong candidate for admission.
- Statement of Purpose:** Address the following in under 1000 words:
 - Why should you be selected for the University of Nebraska at Omaha Graduate athletic training Program?
 - Describe your attributes that you feel are clearly and directly related to the profession of athletic training.
 - What in your life has most directly influenced your choice of becoming an athletic trainer?
 - What is/are your primary career goal(s)?
- Letters of Recommendation:** Two letters from individuals who should be able to speak about your abilities as a student, your leadership and problem-solving skills, and your potential as an athletic training student.
- Applicants must complete a minimum of 25 hours of observation with a an athletic trainer (ATC).
 - These hours should be completed in the 12-month period prior to application to the program. For students with more than 25 hours, a minimum of 25 hours must be completed in the 12-month period prior to application.
- All graduate candidates accepted to the UNO athletic training program:
 - Who received their bachelor’s degree from another institution must provide the course syllabi and course outlines/schedules in order to provide evidence that specific National Athletic Trainers’ Association Educational Competencies and Proficiencies were completed.
 - Must provide proof of physical examination and required vaccinations prior to admission. The physical exam must be completed within 12 months of the first day of our summer session course (typically the first week of July).

Degree Requirements

The following undergraduate prerequisites (deficiencies) must be completed prior to admission with a grade of “C” or better:

- Anatomy and Physiology (6 Credits)
- Biology (3 Credits)
- Biomechanics (3 Credits)
- Chemistry (3 Credits)
- Exercise Physiology (3 Credits)
- Nutrition (3 Credits)
- Physics (3 Credits)
- Psychology (3 Credits)

Other Requirements

Once admitted to the athletic training program, the student will obtain clinical hours as part of course requirements. Students will be expected to obtain an average of 20 hours of clinical experience per week during each

fall and spring semester, which include some nights, weekends, and travel. Required clinical experiences must be obtained over a minimum of six (6) semesters.

Six graduate hours of electives (ATHT, KINS, PHHB, BMCH)		
HEKI 8990	THESIS (6 hours)	
Total Credits		47

¹ For more information, please call 402.554.2670.

Exit Requirements

In order to graduate with an MA in athletic training, the following criteria must be met:

- Successful completion ATHT 8900 administered during the student’s final semester.
- Successful completion of all clinical education requirements as given in course syllabi and the Athletic Training Student Handbook.

Biology

Degree Programs Offered

- Biology, MS (p. 993)**

Biology, MS

The goal of the Department of Biology is to provide students with individualized, broad training in biology leading to a Master of Science (MS) degree. Original research is an integral part of both the thesis and non-thesis degree options. Faculty areas of expertise include ecology, physiology, genetics, molecular biology, taxonomy, behavior, and developmental biology of a wide variety of organisms. The MS degree prepares students for employment in industry, private or government agencies, and academics, as well as further education in professional programs, such as the PhD or MD.

rkellar@unomaha.edu

Program Website (<https://www.unomaha.edu/college-of-arts-and-sciences/biology/>)

The Department of Biology annually awards graduate assistantships. New applicants should indicate their interest in applying for an assistantship as part of the admission application and should include your employment history along with names and contact information of three references in your resume or CV. The assistantships require 20 hours per week of teaching and/or other assignments.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the applicant has elected to begin coursework.

To receive full consideration for funding, applications for fall or summer must be received by January 15. Spring applicants must submit applications by September 15 for funding consideration. Applicants submitting applications after these priority deadlines will be considered for graduate teaching assistantships if funding is available and may apply for support in subsequent semesters.

Other Requirements

- The applicant's GPA in undergraduate biology courses will be determined and must be 3.0 or above (on a 4.0 scale).
- Applicants should have a strong background in biology and related disciplines with a minimum of 24 credit hours in biology or related life sciences, including courses in ecology and molecular or cell biology, as well as college-level course work in chemistry and math or statistics. Applicants lacking courses in one or more of these areas may be admitted provisionally and required to complete additional courses during their graduate program as a condition of admission.
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 95, IELTS: 7, PTE: 64, Duolingo: 125
- Statement of Purpose:** The Department of Biology strongly encourages applicants to contact a professor whose research interests overlap with their own goals for graduate research. Due to the

individualized nature of the biology graduate program, otherwise qualified applicants may not be admitted if appropriate faculty are not available to serve as advisors. Please indicate in your statement of purpose which faculty member has been contacted or plan to contact.

- Resume or curriculum vitae (CV)-** including an outline of educational background, employment history, research experience, and a list of references.
- Letters of Recommendation:** Three academic letters of recommendation are required.
- Applicants not meeting the GPA criteria may provide written evidence of experience or potential to perform outstanding graduate work and petition the department for provisional admission as long as their biology GPA is above the 2.7 minimum set by the Graduate College. Students seeking provisional admission should contact two or more biology faculty to discuss admission. Provisional admission will not be removed until the student has earned at least the grade of "B" (3.0 on a 4.0 scale) in each course involved in the first 12 hours of graduate study. Questions about requirements for admission should be directed to the Department of Biology.

Degree Requirements

Thesis Option

At least 50% of the 30 graduate credit hours must be graduate only courses (8xx0). The 30 credit hours of graduate course work must include:

Code	Title	Credits
Required Course		
BIOL 8010	SEMINAR IN BIOLOGY	1
BIOL 8150	PROFESSIONAL DEVELOPMENT IN BIOLOGY	2
BIOL 8250	STATISTICAL ANALYSIS AND DESIGN FOR BIOLOGICAL RESEARCH	4
Electives		
To be determined by the student, and approved by his/her graduate advisory committee; graduate courses in other departments may be included.		17
Exit Requirement		
BIOL 8990	THESIS	6
Total Credits		30

Non-Thesis Option

At least 50% of the 36 graduate credit hours must be graduate only courses (8xx0). The 36 credit hours of graduate course work must include:

Code	Title	Credits
Required Courses		
BIOL 8010	SEMINAR IN BIOLOGY	1
BIOL 8020	INDEPENDENT RESEARCH IN BIOLOGY (minimum of 2 credit hours)	2
BIOL 8150	PROFESSIONAL DEVELOPMENT IN BIOLOGY	2
BIOL 8250	STATISTICAL ANALYSIS AND DESIGN FOR BIOLOGICAL RESEARCH	4
Electives		
To be determined by the student, and approved by his/her graduate advisory committee; graduate courses in other departments may be included.		27
Total Credits		36

Any substitutions to the required courses in the thesis or non-thesis options must be approved by the graduate program committee.

Exit Requirements

All degree students must form a supervisory committee of faculty, chaired by a major advisor from the Department of Biology. In consultation with the supervisory committee, students will develop a plan of study listing courses required for graduation. This will include any deficiencies required as a condition of admission and a minimum of 30 graduate credits for the thesis option and a minimum of 36 credits for the non-thesis option. Graduate students are expected to attend the Graduate Seminar (BIOL 8010) even when not registered for it.

Thesis Option (6 hours):

Thesis candidates must complete 6 credit hours of BIOL 8990, Thesis. All candidates should carefully review the Graduate College requirements for forming a Supervisory Committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of a thesis.

Non-Thesis Option:

Comprehensive Examination administered by the supervisory committee.

Business for Bioscientists Certificate

This certificate program provides a basic understanding of business principles to biomedical PhD students. While UNMC PhD students receive extensive training in research methods and the principles of biology and medicine, they receive no formal training in business fundamentals. However, a significant portion of biomedical PhD students obtain employment in pharmaceutical, biotechnology, and other industries. For students with these career goals, formal training in business would markedly enhance their career options and competitiveness for these industry positions.

Biomechanics, MS

The MS in biomechanics is housed within the Department of Biomechanics at the University of Nebraska at Omaha. It is a degree program designed to enable students from Nebraska, nationally, and abroad to develop skills and competencies in the field of biomechanics. This program provides a new understanding of the dynamical aspects of human movement via multidisciplinary research using an evidence-based approach through clinical and translational research.

The goal of the program is to prepare students for the workforce or the pursuit of a doctoral degree. The coursework related to this degree program will provide the students with a strong and broad base which will enable students to enter the workforce at a professional level commensurate with a master's degree or to continue their training in numerous doctoral program areas. An additional strength of the coursework is its emphasis on quantitative sciences. This emphasis allows students to stand out among other candidates for fellowships, assistantships, and scholarships given to these students.

The program is enhanced by an evidence-based approach through interdisciplinary clinical and translational research. This program is

designed to be an excellent choice for students planning to continue their education beyond the bachelor's degree in the fields of biomechanics, medicine, physical therapy, occupational therapy, and other science based programs. With the high number of applicants in health professions, the MS in biomechanics gives applicants additional training in movement and quantitative sciences to stand out among other applicants.

Fast Track Program

The Department of Biomechanics has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BS in biomechanics desiring to pursue a MS in biomechanics.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - Applicants for this program are highly encouraged to pursue research opportunities in the Department of Biomechanics or comparable programs.
 - The admit term must be after the completion term of the undergraduate degree.

All 8000 level BMCH courses are eligible for students as part of the Fast Track program.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected

to begin coursework. Priority deadline of February 1 for consideration of department funded graduate assistantships.

Other Requirements

- GPA of 3.0 in undergraduate program
- **Undergraduate Deficiency Courses:**
 - MATH 1950 Calculus I
 - BMCH 2400 Human Physiology & Anatomy I (or equivalent)
 - BMCH 4630 Biomechanics (or equivalent)
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110, with no exceptions to this policy.
- **Statement of Purpose:** Written statement of goals and rationale for entering this graduate program. Also, identify the intended area of focus and the name of the faculty advisor with whom you wish to work (maximum one-page).
- **Resume or Curriculum Vitae (CV)**
- **Letters of Recommendation:** Two are required

Biomedical Informatics

Degree Programs Offered

- Biomedical Informatics, MS (p. 996)
- Biomedical Informatics, PhD (p. 998)

Biomedical Informatics, MS

The vision of this program is to develop the next generation of biomedical specialists who are uniquely positioned to advance research and practice in contemporary information and knowledge management that impact biomedical, clinical and translational research, healthcare services, healthcare practice, public health care, and healthcare delivery in general. Graduates will be able to use their preparation to apply and investigate information and communication technologies to solve problems in the related biomedical fields in a comprehensive, competitive and effective way.

The program is designed as a research-oriented program with the goals of preparing graduate students to conduct advanced basic and applied research while capably serving as prospective employees in academic research as well as the IT healthcare industry. The program is geared towards motivated traditional students and technology specialists with the appropriate educational background that are ready to expand their knowledge of contemporary biomedical informatics issues and become biomedical informatics in academic, clinical, and organizational settings.

Fast Track

The School of Interdisciplinary Informatics (SI2) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following:

- Students pursuing a CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.
- Students pursuing the BS in Neuroscience.
- This program is available for undergraduate students pursuing any CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
- Admission to Fast Track does NOT guarantee admission to the graduate program.
- The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 1
- Summer 2026: April 1
- Fall 2026: July 1

Other Requirements

- The minimum undergraduate grade point average (GPA) requirement for the MS in BMI program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a 4-year undergraduate degree.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Writing Sample:** a two-page, double-spaced, word-processed essay that addresses the following two topics:
 - Discussion of two accomplishments that demonstrate your potential for success in the graduate program

- Discussion of your unique personal qualities and life experiences that distinguish you from other applicants to this graduate program
- **Resume:** Submit a detailed resume indicating your work experience and background.
- Optional: One letter of recommendation from a reference who can evaluate your work and/or academic achievements.
- Optional: Although not required, applicants are strongly encouraged to arrange for an interview either one or more members of the graduate program committee by directly contacting the committee chair. Telephone interviews are highly recommended for applicants outside the local area.

Degree Requirements

Science Foundation Requirements

Foundation courses ensure that all students in the biomedical informatics (BMI) MS program have a strong foundation on which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for subsequent classes in the program, but they also contain a distinct body of knowledge that is an important part of the BMI professional's education. All foundation courses are required for all students. However, applicants who have obtained an undergraduate BMI degree will typically already have this foundation. In such cases, most, if not all, foundation courses are waived. Applicants with undergraduate degrees in other disciplines, including computer science, management information systems, or engineering, will usually require one or more foundation courses. Occasionally, an applicant's work experience may be sufficient to waive one or more of the foundation courses.

Waivers for foundation courses are granted by the chair of the graduate program committee upon the recommendation of the faculty member who is responsible for an individual course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have an option for testing out.

Applicants should have background in anatomy, physiology, cell biology or equivalent (any health science degree). Applicants with degrees in other disciplines will usually have to take foundation courses.

Foundation courses cannot be used to satisfy the 36 semester hours required for the MS in biomedical informatics degree. Applicants who have not completed all the foundation course requirements may be admitted on a provisional status until those requirements have been completed. All foundation courses must be completed prior to or concurrent with the first six hours of MS in BMI graduate coursework.

Exit Requirements

- Thesis Option: BMI 8990 6 Hours
 - All candidates should carefully review the Graduate College requirements for forming a supervisory committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of a thesis. This committee will be responsible for planning and supervising the student's thesis in coordination with the the BMI GPC. A supervisory committee shall be formally established for each student upon completion of at least nine hours of coursework or one year (which ever comes first) in the MS program. This committee will have responsible for planning and supervising the student's thesis in coordination with the campus-based BMI graduate program committee.
- Capstone Option: CIST 8950 3 Hours
 - Students who select the capstone exit option will have to select another elective in order to fulfill the program's 36 credit hour requirement.

Biomedical Informatics, PhD

The Doctor of Philosophy in biomedical informatics (BMI) degree is designed to prepare the next generation of biomedical informatics researchers who are uniquely positioned to advance research and practice in contemporary information and knowledge management that impact biomedical, clinical and translational research, healthcare services, healthcare practice, public health care, and healthcare delivery in general. Our graduates will be prepared to proficiently apply and navigate information and computer technologies to drive innovative solutions across various biomedical domains.

The mission of the PhD program is to build following competencies in our graduates:

- Understanding of theory and application of biomedical informatics, integrating computer science, medicine, biology, and healthcare.
- Building proficiency in analyzing, designing, developing, and implementing cutting-edge biomedical informatics systems and technologies.
- Developing capability to conduct and oversee high-quality, basic and applied research in the BMI domain.
- Establishing solid foundation in academic teaching principles.
- Nurturing comprehensive knowledge of multidisciplinary and emerging areas within biomedical informatics.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 1
- Summer 2026: April 1
- Fall 2026: July 1

Other Requirements

- **Entrance Exam:** Graduate Record Examination (GRE) scores are required for most applicants but are only one component of a holistic admission decision. GRE requirement may be waived for students on an individual basis based on a review by the Doctoral Program Committee.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission. Minimum acceptable scores are:
 - Internet-based TOEFL: 90, IELTS: 7.0, PTE: 64, Duolingo: 120
- **Statement of Purpose** (not to exceed two pages) which address the following questions:
 - What do you hope to accomplish with a PhD in biomedical informatics?
 - Why are you applying to this specific program?
 - What background or qualifications do you have that you believe are essential for success in this program?
 - What general area or topics do you hope to study?
 - What do you expect to be doing five to ten years after completing the doctoral program?
- **Writing Sample:** Evidence of graduate potential in the form of academic papers, publications, theses or project reports done in an academic or industrial setting.
- **Resume:** Submit a detailed resume indicating your work experience and background.
- **Letters of recommendation:** Three letters from references who can provide a thorough evaluation of your strengths and weaknesses regarding your academic work, and who are qualified to assess your likelihood of success in graduate school.

Applicants must follow the formal procedures established for admission to the graduate program at the appropriate NU campus. Applicants must have:

- successfully completed a baccalaureate degree from an accredited institution: preference will be given to students with a master's or doctoral degree from a related field.
- demonstrate superior performance in mathematics, including calculus, discrete mathematics and statistics, and a sequence of courses in the theory and practice of one or more information technology areas.
- documented test aptitude, interest and commitment to scholarly activities and research.
- proficiency in English, sufficient to engage in advanced studies.

Evaluation for admission will be based on a portfolio approach that will include the following:

- class standing during the applicant's baccalaureate and master's level studies.
- grade point average in the undergraduate degree that is equivalent to 3.5 or higher.
- verbal, quantitative, and analytic scores on the aptitude tests of the Graduate Record Examination (GRE)
- letters of recommendation
- other evidence of graduate potential, such as a portfolio of quality of papers or publications, projects, etc., completed by the applicant either in an academic or industrial setting.
- A personal interview, if warranted and feasible.

International students may be assessed for English proficiency and asked to take courses in English as a second language. All students will be encouraged to take courses to improve their technical writing and professional communication skills.

Degree Requirements

The doctoral BMI program typically requires 90 credit hours beyond a baccalaureate degree. It consists of common required foundation/core courses, including doctoral seminars and colloquia, a major field of study, and a cognate/minor field of study in a related discipline.

The doctoral program is divided into four phases from a student's perspective: foundation/core coursework, major field of study/research coursework, additional elective coursework in cognate field/minor field of study (as advised by the student's supervisory committee), and doctoral research and dissertation.

Information Technology Prerequisites

Applicants should have a background in programming languages, data structures, statistics, math or experimental methods (any engineering, computer science related degree). Students with degrees in other disciplines will usually have to take foundation courses. Occasionally, a student's work experience may be sufficient to waive one or more foundation courses.

Doctoral Program Supervisory Committee

The supervisory committee shall be established before a doctoral student begins the last 45 credit hours of their program of study. This committee will have responsibility for planning and supervision of the student's doctoral program in coordination with the BMI graduate program committee. This includes developing comprehensive exam, defending the the doctoral dissertation proposal, approving the completed dissertation, and conducting the final oral examination. Students should review the BMI Doctoral Handbook for more information on requirements for selecting the supervisory committee members.

The student's dissertation advisor in consultation with the student will nominate the individuals to serve on the supervisory committee. The responsibilities, procedures, and actions of the supervisory committee are governed by the rules and bylaws of the Graduate College as outlined in the UNO Graduate catalog.

Within three weeks of its appointment, the supervisory committee will meet to designate and subsequently submit to the Office of Graduate Studies a complete program of studies conforming to the requirements for the degree. At least half of the total hours for the degree must be completed at the University of Nebraska after the filing of the program of study is filed. Any subsequent changes in the program or in the dissertation topic must be approved by the supervisory committee and recommended to the dean for Graduate Studies.

Academic Requirements

Up to 36 credit hours of the coursework in the preparatory and advanced studies of the doctoral program may be accepted if from an accredited institution. Academic requirements for the doctorate degree include:

- Doctoral research seminars in one or more of the thematic areas of the program.
- Advanced courses (subject to dissertation advisor and graduate committee approvals) related to the student's expected field of study/research area.
- Courses in an associated field of study.
- Courses or colloquia relating to teaching, ethics and research.
- Participation in relevant graduate research seminars each semester.
- Successful passing of qualifying (comprehensive) examination.
- Presentation and defense of a dissertation research proposal on a topic in the approved major field of study/research area.
- Submission of the final dissertation manuscript in appropriate format after a successful dissertation defense.

Requirements for Admission to Candidacy

Students will follow the general candidacy requirements in the UNO Graduate College. Admission to the graduate program does not necessarily imply admission to candidacy for a higher degree.

To be admitted to candidacy for the doctorate degree, a doctoral student must:

- Pass the written qualifying (comprehensive) examination.
- Successfully complete all coursework with satisfactory grades.
- Receive the approval of his/her dissertation proposal before the supervisory committee (oral examination).

After the student has met these requirements, the supervisory committee will recommend to the Office of Graduate Studies his/her admission to candidacy for the doctorate degree, the recommendation will note the dates of completing the comprehensive exam. Such a recommendation must be filed at least seven months prior to the final oral examination for defending his/her dissertation in the presence of his/her supervisory committee. Following admission to candidacy, the student must register during each academic year semester until he/she receives the doctorate degree. Students not in residence may register for a minimum of one semester hour credit in dissertation. Failure to register during each academic year semester will result in termination of candidacy. The term of candidacy is limited to three years.

Dissertation and Final Examination

The dissertation should treat a subject in-depth from the candidate's major field of study/research area and as approved by his/her supervisory committee. The student's dissertation should show his/her technical mastery of the field and create novel material by advancing or modifying knowledge, creating new material, finding new results, drawing new conclusions, or interpreting old material in a new light.

If the dissertation proposal is approved, the student may conduct the dissertation research under the guidance of the dissertation advisor. The student is advised to consult with his/her supervisory committee until the committee accepts the dissertation. After the dissertation research is completed, the dissertation document and/or product must be presented to all the members of the supervisory committee in time to permit review and approval. Manuscripts must be turned in at least thirty days in advance of the final oral examination over the dissertation. The dissertation will be defended at an open meeting conducted by the student's supervisory committee.

Grade Requirements

In addition to maintaining at least a 3.0 GPA for all course work, all doctoral students must obtain a grade of B or better in any of the required courses. Any student failing the grade requirements will be denied from taking the comprehensive examination and/or dismissed from the program.

Exit Requirements

Completing Graduation Requirements

After successfully defending his or her dissertation, the student should obtain signatures from all members of their supervisory committee on the Report on Completion of Degree form and submit the form along with a copy of their title and abstract page to the Office of Graduate Studies.

Teaching Requirements

All doctoral students are required to teach at least one course while studying in the program.

Residency Requirements

All full-time doctoral students must complete 27 hours within 18 months in order to meet the residency requirement of the University. Part-time students must complete 18 hours during the same period. The residency requirement ensures that progress toward the degree occurs within a reasonably compact time frame, enabling the doctoral student to integrate his or her course work with the dissertation.

Progress Report

At the end of each semester, every doctoral student (full-time or part-time) must complete the Progress Report form and submit it to the chair of the doctoral program committee.

Satisfactory Progress

A minimum of three years of full-time graduate study is normally required to complete a doctoral program. The maximum time allowed is eight years from the filing of the student's plan of study in the Office of Graduate Studies. Students not making satisfactory progress will be counseled out of the program.

Leave of Absence

Under extraordinary circumstances, e.g., medical problems, a student may request a leave of absence from the program for a period of no more than one year. The request must be submitted to and approved by the student's supervisory committee and/or doctoral program committee. The request should include necessary modifications to the plan of study as a result of the leave. The leave of absence stops the clock for the total time required for the program and the time required to meet the residency requirement. If a student withdraws in mid-semester and is approved for a leave of absence, the clock starts at the beginning of the following semester. A student does not have to have met the residency requirement in order to apply for a leave of absence. If a student does not return to the program within the one year approved for the leave of absence, then the student must submit an application to re-apply to the program. Re-admission to the program is not guaranteed at that point. Please refer to the Graduate Catalog for the complete policy on a leave of absence.

Business Administration

Degree Programs Offered

- Business Administration, MBA (p. 1011)
- Business Administration, Executive MBA (p. 1021)
- Business Administration, MBA and Economics, MS (MBA/ECON) (p. 1026)
- Business Administration, MBA and Management Information Systems, MS (MBA/MIS) (p. 1022)
- Business Administration, MBA and UNMC PharmD (MBA/PharmD) (p. 1035))
- Business Administration, MBA and UNMC Doctor of Dental Surgery (MBA/DDS) (p. 1038)
- Business Administration, MBA and UNMC Doctor of Physical Therapy (p. 1037)
- Business Administration, MBA and UNMC Nursing (MBA/MSN) (p. 1039)
- Business Administration, MBA and UNMC Master of Perfusion Science (p. 1041)
- Business Administration, MBA and UNMC Master of Physician Assistant Studies (p. 1043)
- Business Administration, MBA and Public Health, MPH (MBA/MPH) (p. 1032))

Certificates Offered

- Business for Bioscientists Certificate (p. 994)
- Business in Health Administration Certificate (p. 1045)
- Executive Business Certificate (p. 1046)
- Executive Business Analytics Certificate (p. 1046)
- Executive Business Leadership Certificate (p. 1047)
- Human Resources and Training Certificate (p. 1048)
- Logistics & Supply Chain Management Certificate (p. 1049)

Business Administration

Graduate Courses

BSAD 8000 BUSINESS ETHICS: ACHIEVING SOCIAL RESPONSIBILITY (2 credits)

This core MBA course will explore the relationship between law and ethics, will examine the generally-accepted theoretical principles associated with doing business ethically, and will examine practical ethical issues associated with various facets of business.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent) or admission to the MAcc program. Students with an undergraduate major or a graduate degree in Law may not include this course in a plan of study for the MBA degree. Not open to non-degree students

BSAD 8026 RESEARCH METHODS IN ECONOMICS AND BUSINESS (3 credits)

Covers the methodology of economics: choosing a research topic, literature search tools, data source identification, data summary techniques, basic statistical data analysis using statistical packages, and clear economics writing. The student will become familiar with these techniques through text materials, journal studies, and completion of an empirical economics paper.

Prerequisite(s): Graduate standing. Not open to nondegree students.

BSAD 8030 INFORMATION TECHNOLOGY IN BUSINESS (3 credits)

The premise of this course is that today's managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application.

Prerequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent). Not open to nondegree students.

BSAD 8040 BUSINESS AND INFORMATION TECHNOLOGY: CONNECTING PEOPLE AND INFORMATION (2 credits)

The premise of this course is that today's managers must learn to use information technology to create competitive firms, manage global corporations and provide useful products and services to customers. Accordingly, the content of this course is focused on use of information technology for competitive advantage. Students will develop case studies of firms who have achieved this objective. Furthermore, the course will address emerging technologies and their current and potential application.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in management information systems may not include this course in a plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8060 PEOPLE: CULTIVATING SKILLS FOR LEADERSHIP (2 credits)

This course will prepare students with the skills to effectively enact the critical leadership skills of listening, employee feedback and coaching, goal-setting, empowerment/delegation, influencing, interviewing, conflict, negotiation, intercultural awareness, team/group discussions, and business etiquette.

Prerequisite(s): Admission to the MBA program. Not open to non-degree graduate students.

BSAD 8066 HEALTHCARE ANALYTICS FOR BUSINESS (3 credits)

This course will focus on the mixing of analytics and technology to develop key performance indicators that integrate and evaluate clinical, administrative, and financial performance. Concepts in this course explore the intersection of information management, performance metrics, data visualization, and result communication spanning across the healthcare ecosystem. Topics covering health outcome analysis, financial performance, developing analytic strategies, data quality and governance, and the four stages of actionable intelligence are all used to educate the advantages of leveraging analytics. (Cross-listed with HLSC 8066, MGMT 8066, MGMT 4060, SCMT 8066, SCMT 4060).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8070 COACHING & DEVELOPING OTHERS (2 credits)

Organizational leaders must effectively coach and develop others in order to ensure sustainable long-term organizational performance. Both through one-on-one feedback and coaching as well as through strategy-aligned organizational-level talent development programs, leaders establish the organization's culture of employee development and growth.

Prerequisite(s): Admission to Executive MBA Program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8076 INTERNATIONAL LOGISTICS MANAGEMENT (3 credits)

This course will focus on the logistics of international trade and how managers facilitate the flow of goods and services in import and export environments. Students will learn about infrastructure and business practices needed to manage international transportation, communications, services, and regulatory requirements. Students will develop an understanding of international terms of trade, transaction risk management, and location decisions for placement of warehouses and distribution centers. (Cross-listed with HLSC 8076, SCMT 4070, SCMT 8076).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8080 BUSINESS FORECASTING (3 credits)

The course will cover forecasting tools and applications applied to business settings. The first half of the course will cover traditional Econometric forecasting methods and the second half of the course will focus on predictive analytics models and machine learning. Time in the computer lab will be focused on teaching students how to implement the models discussed in lectures. (Cross-listed with ECON 8310).

Prerequisite(s): ECON 8320 (or equivalent programming experience) or permission of instructor. Not open to non-degree graduate students.

BSAD 8090 ESSENTIAL LEADERSHIP SKILLS (3 credits)

This course will teach students the interpersonal skills necessary to effectively manage others. Second, this course will serve as a vehicle to assess the business content knowledge and computer literacy of incoming MBA students in order to provide customized remediation recommendations for each student. Third, the course will collect information that will be used for assessment and accreditation purposes to evaluate the effectiveness of the MBA program. This course will address the following MBA program themes: communication, change agent, teamwork, information technology, critical thinking and information gathering and analysis.

Prerequisite(s): Admission to the MBA program and completion of MBA foundation courses (or equivalent) or may be taken concurrently with the final foundation course. Not open to nondegree students.

BSAD 8096 MANAGING COLLABORATIVE ENGAGEMENT (3 credits)

This course will provide students with the opportunity to develop knowledge and strategies for leading teams, enhancing collaboration, building consensus, problem solving in teams, facilitating group processes, and designing collaborative workspaces. (Cross-listed with ACMP 4090, MGMT 4090, MGMT 8096, SCMT 4090).

Prerequisite(s): Admission to a graduate program at UNO or the STRATCOM Leader Fellow Program. Not open to non-degree graduate students.

BSAD 8100 MANAGERIAL ECONOMICS (3 credits)

The course will offer students tools of analysis drawn from consumer theory and the theory of the firm in order to improve the understanding of human behavior as it is constrained in the context of business decision-making. This course is intended for students who are seeking the degree of Master of Science in Economics or the degree of Master of Business Administration.

Prerequisite(s): ECON 2200 and 2220 or BSAD 8180 and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to nondegree students.

BSAD 8110 ACCOUNTING AND FINANCIAL FUNDAMENTALS (3 credits)

The course is designed to give incoming graduate students the foundation in accounting that is necessary for subsequent graduate courses. Emphasis is on introducing the students to as many accounting concepts as possible.

Prerequisite(s): Graduate admission or permission of the appropriate graduate advisor. This course cannot be used in a plan of study for any graduate program at UNO. Not open to non-degree graduate students.

BSAD 8136 HUMAN RESOURCE MANAGEMENT (3 credits)

This course is a comprehensive review of the field of human resource management and its relevance to employees, managers, and organization stakeholders for goal achievement. The design of this course is structured to educate future managers and leaders on the importance of utilizing effective HR methods that comply with federal laws and the critical role of HR professionals in achieving the organization's positive workplace culture, competitive advantage, and overall success. (Cross-listed with MGMT 8136, MGMT 4030, HRM 8136, HRM 4030).

Prerequisite(s): BSAD 8250 (Organizational Behavior) is recommended (but not required) prior to enrollment.

BSAD 8140 BUSINESS INTELLIGENCE ANALYSIS (2 credits)

In BSAD 8440 you learned how to extract and manipulate data in a business intelligence tool. In this class you will learn to use this data to extract business knowledge. To do this, you will learn about the data model, methods of aggregation, and visualizations in the business intelligence (BI) software.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8440. Not open to non-degree graduate students.

BSAD 8146 TOTAL REWARDS (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee compensation and benefits programs. Students will gain and utilize effective strategies for managing the single largest controllable expense for organizations; employee pay and benefits. The design of this course is most beneficial for students pursuing future careers in management and human resource professions. (Cross-listed with MGMT 8146, MGMT 4010, HRM 4010, HRM 8146).

Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8150 ECONOMICS: ESSENTIAL CONCEPTS FOR MANAGERS (2 credits)

This course exposes MBA students to fundamental economic concepts necessary for successful business planning and financial success. Topics include: Comparative advantage and international trade, market dynamics, the role that the competitive landscape plays in company decision-making, macroeconomic growth and development, and monetary and fiscal policy and their impact on business activity.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in economics may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8156 TALENT DEVELOPMENT (3 credits)

This course is a comprehensive review of the theory and practice of developing and implementing cost-effective employee training and development programs to optimize human capital effectiveness in modern organizations. The course is designed to enable future managers and human resource professionals to utilize effective strategies for assessing employee training needs and developing appropriate solutions to maximize talent utilization. (Cross-listed with MGMT 8156, MGMT 4120, HRM 4120, HRM 8156).

Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8160 INTERMEDIATE ANALYTICS (2 credits)

Business Intelligence software tools are statistical in nature. Many of the visualizations/widgets use statistics "under the hood" to provide insights to you the user. Can you trust these insights? How are they calculated? When are they appropriate? In this class, you will learn the answers to these questions.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8140. Not open to non-degree graduate students.

BSAD 8166 STAFFING THE ORGANIZATION (3 credits)

This course is a comprehensive review of issues and techniques involved in the acquisition and management of a high quality and diverse workforce for optimal organizational effectiveness. Students pursuing future manager and human resource professions will benefit from practice utilizing effective strategies for recruiting, selecting, placing, and integrating new employees into an organization's workforce. (Cross-listed with MGMT 8166, MGMT 4110, HRM 4110, HRM 8166).

Prerequisite(s): BSAD 8136 is recommended but not required.

BSAD 8176 EMERGING TRENDS IN SUPPLY CHAIN MANAGEMENT (3 credits)

This course will focus on trends influencing supply chain management and design in the 21st century. Key concepts in this course will include contemporary opportunities and challenges in creating customer value via the supply chain with a focus on globalization and risk management. Specific topics will include the influence of the empowered customer on supply chain design, global supply chain trends, and the need for integration of technology and talent to create a competitive advantage. (Cross-listed with HLSC 8176, SCMT 4170, SCMT 8176).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8190 APPLICATIONS IN ANALYTICS (2 credits)

What is a 'business question' and how do you answer it with data? In this class you will learn to form testable business questions. This course will build on the knowledge you gained in BSAD 8440, BSAD 8140, and BSAD 8160 to answer your business questions with the help of business intelligence software.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8160. Not open to non-degree graduate students.

BSAD 8200 MANAGERIAL ACCOUNTING (3 credits)

A study of concepts, analysis and procedures of accounting utilizing internal financial and non-financial data which provides management with information for planning and controlling routine operations, for non-routine decisions, policy-making and long-range planning; and for external reporting to stockholders, governments and interested parties.

Prerequisite(s): ACCT 2010 and 2020 or BSAD 8110, and BSAD 8060. BSAD 8060 may be taken prior to or concurrent. Not open to nondegree students.

BSAD 8206 CONSULTATIVE SELLING PRINCIPLES (3 credits)

The primary focus of the Consultative Selling Principles course is to develop the behaviors, methodologies, principles, and processes required to successfully lead and manage complex selling initiatives to a win-win close. The course examines and applies, through role playing and other activities, the critical relationship building, critical thinking, problem solving, listening and negotiating capabilities which are the foundation skills underlying consultative selling. (Cross-listed with MKT 4200)

Prerequisite(s): MKT 3310 with 'C+' or better; MKT 3100 with C+ or better; GPA of 2.5 or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8210 ACCOUNTING: DECISIONS & CONSEQUENCES (2 credits)

Managers and administrators must be able to understand, analyze, and use accounting information to make operational and strategic business decisions. In this course, we will study practical uses of accounting information to address the problems and decisions managers face in business. Emphasis is placed on the user of accounting information rather than the preparer. Upon completion of this course, a student should be able to use accounting information to make management decisions, understand how accounting rules inform those decisions, and consequently, how those decisions affect a company's financial reports.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or graduate degree in accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8216 SELLING FINANCIAL SERVICES (3 credits)

Selling Financial Services concentrates on methods to effectively sell services and products in the financial services industry, including the banking, brokerage and insurance sectors. Targeting, initiating, and acquiring client relationships, expanding business opportunities, and maintaining long-term client relationships are the course's focal points. This integrative course is designed to provide students with a basic understanding of the selling profession and sales culture within the financial services industry. (Cross-listed with MKT 4210, FNBK 4210).

Prerequisite(s): Not open to non-degree graduate students.

BSAD 8220 ADVANCED APPLICATIONS IN ANALYTICS (2 credits)

Using the knowledge gained in BSAD 8440, BSAD 8140, BSAD 8160, and BSAD 8190, each student in this course will work individually to apply the entire business analytics process (starting with data collection and ending with using results to make informed decisions) to a real problem in their own organization.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8190. Not open to non-degree graduate students.

BSAD 8226 GLOBAL STRATEGIC ACCOUNT MANAGEMENT (3 credits)

Throughout this course, the management of strategic account programs at national, multi-country, and global levels will be addressed. The primary focus of the curriculum is on the critical success factors for driving revenue, sustainable long term-growth and profitability with a base of core strategic buyers.

Prerequisite(s): Senior or graduate student standing and permission of the instructor. Not open to non-degree graduate students.

BSAD 8230 LEADING CHANGE & INNOVATION (2 credits)

This course focuses on providing leaders with the knowledge and ability to lead organizational change and enhance organizational innovation. Topics include organizational culture, organizational design, and organizational processes (including reward systems).

Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8236 GLOBAL BUSINESS MANAGEMENT (3 credits)

The central objective of this course is to explore the unique opportunities and challenges that confront international managers as they navigate the complex and ever-changing global economic, political, legal, technological, and cultural environment. This course will particularly focus on people, values, and culture, better equipping students to both undertake an international career as well as effectively lead organizations with a culturally diverse workforce in any environment. (Cross-listed with MGMT 4150, MGMT 8236).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8240 EFFECTIVE LEADERSHIP OF PEOPLE (2 credits)

This course aims to enhance the leadership effectiveness of students by developing knowledge of what constitutes effective leadership and how to apply leadership concepts and models.

Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8250 ORGANIZATIONAL BEHAVIOR: ENHANCING HUMAN & ORGANIZATIONAL CAPABILITIES (2 credits)

This course will prepare students with the knowledge necessary to manage and lead organizations effectively. Students will learn management theories, understand important research findings in organizational behavior, and apply both theory and research results to real organizational situations, thus giving them the capacity to use OB theories to enhance organizational effectiveness.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent).

Students with an undergraduate major or a graduate degree in management may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8256 NEW VENTURE FORMATION (3 credits)

This course provides hands-on experience in assessing industries, customers, and competitors for a potential new business venture. Students will create a business plan for a business venture idea that includes distinctive new products and services, a venture strategy, a venture financing plan, and a compelling investor pitch. (Cross-listed with ENTR 4730).

Prerequisite(s): Admission to the MBA program

BSAD 8260 EFFECTIVE USE & REPORTING OF ACCOUNTING INFORMATION (2 credits)

This course focuses on the use and reporting of accounting information, with an emphasis on financial statements and how executive decisions can influence these statements. Financial statements, including footnotes and explanatory material, are the primary instruments utilized by parties external to the enterprise in making judgments about the enterprise. By understanding how management decisions are reflected in the financial statements, managers will understand how they can influence their judgment.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8266 TECHNICAL BUSINESS DEVELOPMENT (3 credits)

Students will learn how to navigate the four main milestones of the technical sales process: Responding to requests for proposals (RFPs), conducting exploratory customer meetings, submitting RFP responses, and interviewing for projects. The course will broaden understanding of the sales process in technical domains where sales cycles are longer and decision processes are more complex. This class will also emphasize team selling. (Cross-listed with MKT 4260, MKT 8266).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8280 EMPLOYEE RECRUITMENT, ENGAGEMENT, AND RETENTION (2 credits)

Effective recruitment, engagement, and retention of highly motivated and high performing employees is critical for organizational success. This course will address the key organizational characteristics that must be in place for this to occur.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership.

BSAD 8300 ORGANIZATION THEORY & DESIGN (3 credits)

This course is designed to increase students' understanding and knowledge of how organizations are designed and structured in order to create value and competitive advantage, and how organizations can operate in an effective and efficient manner in an ever-changing environment. The course will address topics such as: organizational effectiveness, organizational structure, organizational design, organizational culture, organizational technology, the external environment, organizational change, and the organizational life cycle. The ultimate goal is for students to be able to understand how organizations should be structured as a result of both external and internal factors. (Cross-listed with MGMT 8300).

Prerequisite(s): Graduate. Not open to non-degree graduate students.

BSAD 8310 MANAGING PERFORMANCE IN ORGANIZATIONS (3 credits)

A human behavior course emphasizing the areas of individual behavior, interpersonal behavior, group behavior and the interplay of human and non-human factors.

Prerequisite(s): Essential Leadership Skills (BSAD 8060) or admission to the MAcc program. Not open to nondegree students.

BSAD 8326 SALES MANAGEMENT (3 credits)

The student will be exposed to current research findings in sales management and to business cases and simulations where sales management theories and concepts will be applied. This course will prepare students to develop and implement specific compensation, motivation, and evaluation strategies for managing sales professionals across a wide variety of organizations. (Cross-listed with MKT 4320.)

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8330 LEADING TEAMS (2 credits)

This course focuses on building and leading high-performing teams in organizations. Topics include how to evaluate team effectiveness, how to create and develop teams that are cohesive and high-performing, how to lead and facilitate teams, and how to diagnose and intervene when teams are experiencing problems.

Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8336 PROJECT MANAGEMENT (3 credits)

This course focuses on the systemic exploration of planning and executing complex projects to create organizational success. Using a comprehensive understanding of principles, methodologies, and tools within project management, students will learn how to initiate critical processes, plan objectives and constraints, execute management and leadership, monitor budgets and development, and close outcomes of complex projects. Skills obtained from this course enhance individuals' ability to recognize, identify, and prioritize organizations' culture and structure to lead projects across various industries efficiently. (Cross-listed with HLSC 8336, MGMT 8336, MGMT 4330, SCMT 4330, SCMT 8336)

Prerequisite(s): Admission to Graduate College, MBA Program, Healthcare Logistics and Supply Chain Management program, or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8340 INTERNATIONAL BUSINESS STUDY ABROAD (3 credits)

This course provides students with an international business and cultural experience through a study tour in a selected international location. Students will develop an understanding of the factors that affect international business decisions by visiting American companies operating abroad and foreign companies that export goods and services to the U.S.

Prerequisite(s): Instructor Permission.

BSAD 8345 CONSUMER BEHAVIOR (3 credits)

Consumers purchase, use, experience, and dispose of products and services as part of their consumption process. How and why consumers choose various brand options, form judgments about these brands, and decide which options to buy and/or re-buy are essential knowledge for marketing professionals. The course covers the psychological and social issues that guide consumption decisions. (Cross-listed with MKT 3320).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8356 GLOBAL SOURCING AND INNOVATION (3 credits)

This course focuses on global suppliers as partners in the development and commercialization of new products. Students will learn about open innovation and the integration of internal and external business systems in new product innovation. Students will develop an understanding of regulatory policies related to information sharing and the intellectual property rights of buyers and suppliers. (Cross-listed with HLSC 8356, SCMT 4350, SCMT 8356).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8360 EFFECTIVE MANAGEMENT OF CAPITAL STRUCTURE, CASH, & RISK (2 credits)

Students will develop strategic decision making skills by using financial concepts including time value of money, capital budgeting processes, cash flow forecasting and project risk analysis. Topics covered include: capital budgeting, financial statement analysis, capital structure, financial risk analysis.

Prerequisite(s): Admission to the Executive MBA program or Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8366 E-MARKETING (3 credits)

This course focuses on utilizing the Internet as a marketing platform. Course content includes discussion of how the Internet is used by businesses for designing products, pricing, promotions, distribution, positioning, gathering information, and cultivating relationships with stakeholders. The discussion about the rise of social media, sharing economy, virtual reality devices, and other relevant trends will also be part of the course. (Cross-listed with MKT 4360).

Prerequisite(s): BSAD 8400 with a grade of 'B' or above. Not open to non-degree graduate students.

BSAD 8370 TALENT MANAGEMENT LEADERSHIP (2 credits)

This course will focus on how leaders can proactively and comprehensively enhance organizational effectiveness through maximizing employee engagement, retention strategies and high performance teams using people-focused practices across the entire organization.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8376 SUPPLY CHAIN ANALYTICS (3 credits)

This course focuses on integrating supply chain management through the use of key performance indicators. Key concepts in this course include data visualization, supplier performance metrics, service-dominant logic, and the supply chain for data. Specific topics include the influence of the empowered customer on supply chain metrics, using metrics to develop a competitive advantage, data-driven decision making, and the four stages of actionable intelligence. (Cross-listed with HLSC 8376, SCMT 4370, SCMT 8376).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8380 EFFECTIVE SYSTEMS, OPERATIONS, AND IT (2 credits)

Students will learn how to employ decision-making skills to create a long-term competitive advantage for an organization through operational and technical excellence. Key concepts in this course will include developing a view of organizations as technical and behavioral systems, operations management, quality management, strategies related to IT procurement, deployment, maintenance and security, and the supply chain. Specific topics will include applied systems theory, process improvement, quality assurance, supply chain management, IT systems development strategies, and issues related to systems security, data security, and data privacy.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business

BSAD 8386 INDUSTRIAL PURCHASING AND LOGISTICS MANAGEMENT (3 credits)

This course will focus on the strategic procurement of products and services in order to gain a competitive advantage through integrated supply management. Students will learn about strategic supply management, contract negotiation, and supplier quality management. Students will develop an understanding of supplier performance management through the use of supply chain information systems. (Cross-listed with HLSC 8386, MKT 4380, SCMT 4380, SCMT 8386).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8396 MARKETING ANALYTICS (3 credits)

This course focuses on the application of data analytics in marketing decision making (e.g., segmentation, sales forecasting, and resource allocation). Students will learn to apply statistics and econometrics to solve marketing problems. Key topics in this course include marketing data visualization, marketing metrics, descriptive and predictive analytics, and digital marketing analytics. This course takes a very hands-on approach with real-world databases and equips students with tools that can be used immediately on the job. (Cross-listed with MKT 4370).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8400 MARKETING POLICIES (3 credits)

This course provides an introduction to the fundamental concepts of marketing, including a customer orientation, matched with attention to competition and core strengths. The course will illustrate strategies and principles that will help you understand how marketing managers, product managers or service managers must think through their situations, determine their goals and lay a course to achieve those goals.

Prerequisite(s): Completion of MBA foundation courses and BSAD 8060 (prior to or concurrent); or admission to MAcc program. Not open to nondegree students.

BSAD 8420 MARKETING: UNDERSTANDING CONSUMERS AND MARKETS (2 credits)

This course exposes MBA students to the fundamental concepts, practices and issues of marketing. A wide range of marketing practices and structures will be explored including product and service firms, consumer and business markets, profit and not-for-profit organizations, domestic and global companies, and small and large businesses.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent). Students with an undergraduate major or a graduate degree in marketing may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8426 BUSINESS DEMOGRAPHICS (3 credits)

The goal of this course is to develop a demographic perspective in order to assist in understanding the business environment and business policy. How population change impacts consumer markets and all of the functions (for example, accounting, finance and management) that must exist for these markets to perform. Includes a history of population change and policy as well as a view toward international population considerations. (Cross-listed with MKT 4420).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8430 STRATEGIC BRAND MANAGEMENT (3 credits)

An exploration of the characteristics, meanings, and management of brands in the business world. The course examines brands as a strategic asset, and draws on managerial, consumer, and cultural perspectives.

Prerequisite(s): BSAD 8420 or permission of instructor. Not open to nondegree students.

BSAD 8435 MARKETING INNOVATION (3 credits)

Product, service, and process innovation are essential drivers of firm performance. However, firms face considerable and complex challenges when bringing innovative ideas to life. For example, what marketing research methods should we employ to uncover vital consumer insights? How do these insights influence the development and launch of new products and services? What differentiated value are we delivering to our consumers? How do we successfully bring this new product or service to market? How does a brand's purpose and personality influence consumers' perceptions, purchase decisions, adoption, and engagement? This course will cover key marketing principles involved in the development and launch of new and innovative products and services - from conception to commercialization. Furthermore, we will explore how new-age technologies impact each stage of the development and launch processes. (Cross-listed with MKT 3400).

Prerequisite(s): BSAD 8420 or equivalent; and admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8436 LEARNING TO LEAD (3 credits)

The course provides students with the opportunity to learn historical and modern theories of effective leadership, gain insight into their own leadership styles and aspirations, and learn how to apply leadership theories to real-world leadership cases. Along with empowering individuals' leadership capabilities, this course explores the factors that can influence leader decision-making. (Cross-listed with MGMT 4230, MGMT 8436).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8440 BUSINESS INTELLIGENCE DATA EXPLORATION (2 credits)

The first in any analytics project is to get data ready for analysis. In this class you will learn to extract data from a business data source and ready it for analysis in a business intelligence software tool. In the process you will learn tools necessary for this process including SQL, Power Query, M, and DAX.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics. Not open to non-degree graduate students.

BSAD 8446 QUALITY MANAGEMENT (3 credits)

This course approaches Quality Management from a practical quantitative-oriented point of view. Throughout this course, students will be introduced to all five steps of the six sigma continuous process improvement (Define, Measure, Analyze, Implement, and Control). The assignments are designed in project-based formats, in which students will initiate their own process improvement project and follow through with each step for a final grade. Upon the completion of this course, students will understand the ever-evolving nature of quality and quality management. They will also have practical experience in initiating and managing process improvement project at small scale and apply six sigma in their future work. (Cross-listed with MGMT 4440, SCMT 4440).

Prerequisite(s): BSAD 2130 (Business Statistics) or equivalent, admission to the MBA or Masters of Healthcare Logistics and Supply Chain Management program, or permission of instructor

BSAD 8450 SEMINAR IN MARKETING (3 credits)

Exploration, study and critical analysis of contemporary marketing problems, trends, methods and approaches for seminar discussion and written report.

Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8456 MANAGERIAL NEGOTIATION STRATEGIES (3 credits)

This course introduces students to the theory and practice of negotiation across various organizational settings. The ability to successfully negotiate an outcome is an important aspect of management and leadership. Negotiation can be used to determine multiparty relationships, manage conflict resolution, and improve organizational outcomes. Using a combination of conceptual frameworks, roleplaying exercises, and debriefing opportunities, the design of this course is structured to help students understand the power and influence negotiation has over the successful outcomes of managers, leaders, and organizations. (Cross-listed with HLSC 8456, MGMT 4450, MGMT 8456, SCMT 4450, SCMT 8456).

Prerequisite(s): Admission to Graduate College, MBA Program, Healthcare Logistics and Supply Chain Management program, or by permission of the instructor.

BSAD 8476 BEHAVIORAL FINANCE & INVESTING (3 credits)

This course focuses on how actual investor behaviors and market behaviors differ from traditional theories of finance. This course will examine psychological biases, identify how such biases influence financial markets and settings, and explore methods that can be utilized to recognize and overcome such behavioral pitfalls. (Cross-listed with FNBK 4470).

Prerequisite(s): Admission to graduate college, MBA program, or by permission of instructor. Not open to non-degree graduate students.

BSAD 8480 BUSINESS ECONOMICS AND CORPORATE STRATEGY (2 credits)

Using Porter's famous "Five Forces" stakeholder framework, students taking this course learn both how successful business executives can apply economic analysis to inform business strategy from both an internal operations and external stakeholder perspective. Internal operations involve the managing labor, equipment, and materials acquisition from suppliers in cost effective ways. External stakeholder perspectives involve consideration of a company's domestic and global industry structure, behavior of its competitors, consumer behavior, as well as broader community influences.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business.

BSAD 8516 SECURITY ANALYSIS & INVESTING (3 credits)

Study of the US securities and investment markets, to include understanding of the efficient market, fundamental and technical analysis approaches for the valuation of marketable securities, and risk and return within a portfolio. Analysis ranges from considering the economy, industry groups, and individual corporations when selecting securities to investigating various investment products appropriate for individuals. (Cross-listed with FNBK 4310).

Prerequisite(s): Graduate admissions

BSAD 8520 SEMINAR INVESTMENT MANAGEMENT (3 credits)

This course focuses upon the modern portfolio theory of investment management and its application in formulation of policies for individuals and institutional investors. Topics addressed will include qualitative and quantitative analysis of the risks and returns of portfolio management using efficient market, fundamental analysis, and technical analysis approaches.

Prerequisite(s): BSAD 8510. Not open to nondegree students.

BSAD 8530 BANK & FINANCIAL MARKETS (3 credits)

This course focuses on the theory and practice in managing commercial banks. Topics covered include but not limited to: bank regulations, bank performance analysis, asset liability management, credit analysis and consumer loans. The course emphasizes the link between theory and practice through assigned course related readings, guest lecturers from industry experts, and a comprehensive bank research project on a local bank of your choice. At the end of the course, students should have a good understanding of basic banking theories as well as banking practices, and current issues and challenges facing the banking industry.

Prerequisite(s): BSAD 8500. Not open to non-degree graduate students.

BSAD 8540 MULTINATIONAL FINANCIAL MANAGEMENT (3 credits)

The focus of this course is on multinational financial management as viewed and practiced by the multinational firm and on current developments in international financial markets, including global banking. Familiarity with certain areas of the firm's environment, such as the international monetary system, the European Monetary System, and determination of exchange rates under alternative regimes, is essential to the international financial manager.

BSAD 8550 SEMINAR IN FINANCE (3 credits)

This course will address specific financial management topics which will vary by semester and is intended for graduate students.

BSAD 8560 MARKETING STRATEGY: CUSTOMERS AND MARKETS (2 credits)

This course will focus on how successful businesses match their objectives and resources with opportunities in the marketplace by identifying and measuring consumer needs, determining target markets and deciding which products and services to offer. This course will also address pricing, promotion, and distribution strategies to create competitive advantage in domestic and international markets.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8570 EFFECTIVE STRATEGIC MANAGEMENT (2 credits)

This course centers around the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. Students will develop the strategic thinking skills needed to formulate and execute successful strategies for firms/organizations in a variety of industries and dynamic environments. Emphasis is given to the contributions of several business disciplines of study, such as marketing, finance and management, to understanding both the internal operations of the organization and the influences of the external environment. This course is integrative and introduces both the theory and practice that enables that integrative process.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business. Not open to non-degree graduate students.

BSAD 8576 INVESTMENT MANAGEMENT FOR FINANCIAL ANALYSTS (3 credits)

This course provides critical knowledge needed for students pursuing a career in investment management. The topic areas bridge academic theory, current industry practice, and ethical and professional standards and comprehensively address the areas assessed in the Chartered Financial Analyst examinations. (Cross-listed with FNBK 4570)

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

BSAD 8590 EXECUTIVE MBA CAPSTONE PROJECT (4 credits)

Students in the Executive MBA capstone project course will complete an applied consulting project for an organization that requires them to integrate knowledge across multiple Executive MBA program knowledge areas. Students will identify the key problem(s) to be solved, use sound methodologies to gather necessary data, identify and employ relevant evidence-based research and practitioner literatures, apply relevant models and theories to guide the generation of potential solutions and implementation strategies, and identify the feasibility and financial implications of their proposed solution(s).

Prerequisite(s): Admission to the Executive MBA Program. Not open to non-degree graduate students.

BSAD 8596 INSURANCE PLANNING (3 credits)

An analysis of risk management techniques for handling the risk exposures most businesses face, including insurance, self insurance, risk control and risk avoidance, among others. (Cross-listed with FNBK 4590).

BSAD 8600 REAL ESTATE FINANCE THEORY AND APPLICATIONS (3 credits)

This course explores advanced financial analysis tools and methodologies used to quantify complex factors surrounding real estate productivity, value, investment, and project feasibility. Specific course topics will coincide with student interest in one of three focus areas: Investment, Development, or Commercial Finance.

Prerequisite(s): RELU 3410 and BSAD 8630, or permission of Real Estate Program Director.

BSAD 8605 REAL ESTATE PRINCIPLES AND PRACTICES (3 credits)

This is a survey course in real estate principles and practices, which is designed to familiarize students with industry terminology, current practices, and cover the following topics: Licensure, property rights, legal descriptions, real estate law and contracts, appraisal, financing, investments, Fair Housing, and related topic areas. This course provides foundational knowledge of the real estate field and will prepare students to successfully complete more advanced real estate coursework. NOTE: Students cannot receive credit for both RELU 2410 and RELU 3410. (Cross-listed with RELU 3410).

Prerequisite(s): Admission to Graduate College, MBA Program, or permission of Real Estate Program Director.

BSAD 8606 FINANCIAL RISK MANAGEMENT (3 credits)

The course provides students with an intermediate level analysis of financial derivatives, and the use of these instruments for managing risk in financial institutions. (Cross-listed with FNBK 4600.)

Prerequisite(s): BSAD 8500 and 8510 or their equivalent, and graduate standing. Not open to nondegree students.

BSAD 8610 REAL ESTATE APPRAISAL (3 credits)

This course addresses the fundamentals of real estate valuation and appraising, including factors affecting value, valuing land, improvements, and special classes of residential property, appraisal practice and rules, depreciation and obsolescence, and the mathematics of appraising.

Prerequisite(s): RELU 3410 and BSAD 8630, or permission of instructor.

BSAD 8616 REAL ESTATE INVESTMENTS (3 credits)

This course focuses on methods used to analyze existing and proposed commercial and residential real estate investments through dynamic programming models, and explores strategies to finance commercial real estate. The class ultimately prepares students to understand the risks and rewards associated with financing and investing in real estate. (Cross-listed with RELU 4390).

Prerequisite(s): RELU 2410 or RELU 3410 or FNBK 3250 or BSAD 8605 or BSAD 8630

BSAD 8625 PROPERTY MANAGEMENT (3 credits)

This course focuses on commercial and residential property management concepts and their application to the operation, control, and oversight of real property. The course will study leasing, tenant selection and relations, maintenance, marketing, contract management, asset management principles, as well as Fair Housing Laws and the Americans With Disabilities Act as they pertain to property management. (Cross-listed with RELU 3450).

Prerequisite(s): BSAD 8605, or permission of the Real Estate Program Director.

BSAD 8626 REAL ESTATE DEVELOPMENT (3 credits)

This course focuses on the procedures and complexities in developing and redeveloping various commercial property types and mixed-use real estate. Topics include an overview of the real estate development process, assembling a team, identifying project stakeholders, financial analysis, site selection, market analysis, and the regulatory environment. (Cross-listed with RELU 4440).

Prerequisite(s): BSAD 8605 or BSAD 8630, or permission of the Real Estate Program Director.

BSAD 8630 FINANCE: UNDERSTANDING CAPITAL AND CASH (2 credits)

As a comprehensive introduction to financial management, the course will cover various fields of finance and discuss topics including the time value of money, bond and stock valuation, capital budgeting.

Prerequisite(s): BSAD 8060 or BSAD 8070, 8150 and 8210. Students with an undergraduate major or a graduate degree in finance or accounting may not include this course on their plan of study for the MBA degree. Not open to non-degree graduate students.

BSAD 8640 IT: STRATEGIC DEVELOPMENT AND DEPLOYMENT (1 credit)

Students will gain a strategic perspective of information technology management, including current trends and best practices, and understand how technology can be used in competitive positioning. Processes for innovation and research and development spending and new business models will be covered.

BSAD 8650 VISION & STRATEGIC LEADERSHIP (2 credits)

This course focuses on the critical role that organizational leaders play in ensuring that the organization has a clear vision and a clear mission which are in alignment with the organization's business strategy and unit goals and effectiveness metrics. This course focuses on the mission and vision creation and communication process as well as vertical and horizontal goal alignment.

Prerequisite(s): Admission to the Executive MBA program or the Executive Certificate in Business Leadership. Not open to non-degree graduate students.

BSAD 8660 FRONTIERS OF ANALYTICS (2 credits)

In this program, you have learned many analytics techniques. However, analytics is a constantly evolving field with increasingly advanced methods. What techniques might be presented to you as a manager? How do you interpret these results? In this class we will explore cutting-edge analytics methods and when they are appropriate for your business.

Prerequisite(s): Admission to the Executive MBA Program or the Executive Certificate in Business Analytics; Completion of BSAD 8160. Not open to non-degree graduate students.

BSAD 8680 SUPPLY CHAIN INTEGRATION (3 credits)

This course will focus on the integration of internal and external systems designed to maximize the efficiency and effectiveness of supply chain networks developed by industrial organizations, government agencies, and not-for-profit organizations. Key concepts will include supply chain design, trends in technology, and cross-functional collaboration, coordination, and communication along the value chain. Specific topics will include the influence of empowered customers on supply chain integration, global supply chain trends, closed-loop supply chains, and the challenges and benefits of integrating technology and talent in the workplace. Students enrolled in the Master's in Healthcare Logistics and Supply Chain Management program should consult with their advisor about this course satisfying that degree's capstone requirement. (Cross-listed with HLSC 8680, SCMT 8680).

Prerequisite(s): Admission to Graduate College, MBA Program, or instructor permission. Students in the Master's of Healthcare Logistics and Supply Chain Management must complete this course in the last nine hours of the program. Not open to non-degree graduate students.

BSAD 8696 EMERGING TECHNOLOGY AND INNOVATION (3 credits)

This course equips entrepreneurially-minded students with a more complete range and vision of the viability of various startup opportunities (with a specific focus on innovative technologies and innovative business models). Students will become familiarized with the new and emerging technologies and innovations that define modern industries and product categories, as well as the various shifts in the way cutting-edge business gets done, regardless of industry. (Cross-listed with ENTR 4690, ENTR 8696, MGMT 4690, MGMT 8696).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8700 BUSINESS ANALYTICS: MAKING SENSE OF DATA (2 credits)

The purpose of this course is to provide business managers with an understanding of the important role data analytics has assumed in today's organizations. Data analytics has become a key component in accomplishing strategic and operational goals. This course is designed to familiarize students with the concepts and principles of analytics. It is targeted for graduate or MBA students who have little or no background in analytics. Therefore, it focuses on breadth of coverage rather than depth in any specific area.

Prerequisite(s): BSAD 8060 or BSAD 8070 (prior to or concurrent); or admission to the MAcc program. Not open to non-degree graduate students.

BSAD 8710 SUPPLY CHAIN MANAGEMENT (3 credits)

This course will focus on supply chain management as a key functional area of organizational success. Students will learn about current techniques used by supply chain practitioners to make strategic and tactical decisions that support the overall strategy and day-to-day operations of an organization. Students will develop an understanding of how supply chain decisions and appropriate metrics of performance can be utilized to improve the operational efficiency and effectiveness of an organization. (Cross-listed with HLSC 8710, SCMT 8710).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor. Not open to non-degree graduate students.

BSAD 8720 STRATEGIC FINANCIAL MANAGEMENT (2 credits)

This course is intended to be advanced financial management. It will stress the theory and application of topics including, but not limited to capital budgeting, cash flow estimation, real options, capital structure, dividends and share repurchases, working capital management, budgeting, planning and forecasting, and lease management. The material covered in Strategic Financial Management will increase the student's knowledge of how to strategically manage financial resources to increase the intrinsic value of the organization.

Prerequisite(s): For MBA students, BSAD 8630. For MAcc students, completion of all Master of Accounting (MAcc) foundation courses. Not open to non-degree graduate students.

BSAD 8726 INNOVATION VENTURES (3 credits)

This team-based course provides students with the opportunity to practice the basic tools of business discovery and validation. Concepts and techniques in innovation, entrepreneurship, and strategy will be used to aid students in the venture creation process. Important considerations impacting the viability of the venture post formation will also be explored. Practical real-world experimentation is the central component of the course and will help students to conceive, develop, and launch their own innovative ventures. (Cross-listed with ACMP 4720, HCC 8256, ENTR 4720, ENTR 8726, MGMT 4720, MGMT 8726, MKT 4720, MKT 8726).

Prerequisite(s): Admission to Graduate College, MBA Program or by permission of the instructor.

BSAD 8736 ECONOMICS OF ENTREPRENEURSHIP (3 credits)

This course will review economic theories of entrepreneurship with special emphasis on Schumpeter's theory of creative destruction. The main focus of the seminar will be on the "high-level" entrepreneurship that sometimes results in major innovations. This course will address the societal benefits of entrepreneurship, factors influencing entrepreneurial success, the policies that best encourage entrepreneurship, and how firms can survive and prosper in an entrepreneurial environment. (Cross-listed with ECON 4730, ECON 8436)

Prerequisite(s): ECON 2200 or permission of the instructor for all students

BSAD 8766 SELLING IN AN ENTREPRENEURIAL CONTEXT (3 credits)

Successful entrepreneurs are able to identify unmet needs in the marketplace and then design and sell products or services that fulfill those needs. Sales effectiveness is essential for entrepreneurs because they must be able to build sustainable sales pipelines that ensure profitable growth while simultaneously addressing other pressing issues including financing, staffing, and product development. This course will focus on consultative solution-based sales fundamentals that can be applied in an entrepreneurial selling environment. (Cross-listed with ENTR 4760, MKT 4760)

Prerequisite(s): GPA 2.5 or better; MKT 3100 with a "C+" or better; MKT 3310 with a "C+" or better; or permission of instructor. Not open to non-degree graduate students.

BSAD 8776 INTRODUCTORY MAVERICK VENTURE FUND (1 credit)

This course teaches the basics of venture capital, including, the topics of term sheets, due diligence and learning the perspectives of the entrepreneur and investor. Students in this course have the opportunity to observe more advanced students making investments, ranging from 5,000 dollars to 10,000 dollars plus. This course is the first of three, one-credit courses where students gain more advanced venture funding knowledge and application at each level. (Cross-listed with ENTR 4770).

Prerequisite(s): This course requires instructor approval. Students must apply and interview to take this course. Preference is given to students in their junior year, and must have three semesters of school left before graduating.

BSAD 8786 INTERMEDIATE MAVERICK VENTURE FUND (1 credit)

In this course, students source deals, listen to pitches, and select start-ups to be funded. Investments typically range from 5,000 dollars to 10,000 dollars plus. This course is the second in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4780).

Prerequisite(s): This course requires instructor approval. Students must have completed BSAD 8776 with a grade of C or better.

BSAD 8796 ADVANCED MAVERICK VENTURE FUND (1 credit)

This course applies advanced concepts of venture capital. Students will learn how to monitor and assist start-ups in the scaling process. Students learn how to leverage community partners to amplify investment opportunities. This course is the third in a set of three courses that increase in difficulty with each course. (Cross-listed with ENTR 4790).

Prerequisite(s): This course requires instructor approval. Students must have completed BSAD 8786 with a grade of C or better.

BSAD 8800 MBA PROJECT-FOCUSED CAPSTONE (2 credits)

In this Master's of Business Administration (MBA) required project-focused capstone course, students complete a service-learning consulting project for a non-profit or other type of organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program.

Prerequisite(s): Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 prior to Capstone and must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Not open to non-degree graduate students.

BSAD 8820 CONTEMPORARY BUSINESS ISSUES (1 credit)

This course exposes students to contemporary business issues that they are likely to experience as leaders. Students will examine and synthesize academic literature relevant to an instructor-approved specific topic associated with the contemporary business issue of focus. This course is to be used for MBA students who need a one credit hour course to meet their credit hour graduation requirements.

Prerequisite(s): Permission of MBA advisor (email mba@unomaha.edu). Not open to non-degree graduate students.

BSAD 8830 STRATEGY: DEVELOPING SUSTAINABLE COMPETITIVE ADVANTAGE (2 credits)

This course centers on the theme that a company achieves sustained success if and only if its managers (1) develop, and revise as needed, an action-oriented strategic plan and (2) implement and execute the plan with some proficiency. The primary objective of this course is to sharpen the ability of students to think strategically, to diagnose situations from a strategic perspective and to develop creative solutions to enable firms to achieve a sustainable competitive advantage.

Prerequisite(s): Students must successfully complete BSAD 8150 and BSAD 8210 before enrolling in this course. This course must be taken within the first 20 hours of the MBA program. Not open to non-degree graduate students.

BSAD 8836 FUNDAMENTALS OF FINANCIAL PLANNING (3 credits)

The course provides students with practical skills in evaluating personal financial statements, applying time value of money principles, creating education funding strategies, advising on debt management, integrating behavioral finance, and understanding regulatory, ethical, legal, and economic aspects of financial planning. (Cross-listed with FNBK 4300).

BSAD 8846 RETIREMENT PLANNING & EMPLOYEE BENEFITS (3 credits)

This course addresses key retirement issues, such as income planning, Social Security, Medicare, long-term care insurance, and retirement plan distributions. It also covers housing, guardianships, powers of attorney, and living trusts. Students will explore employee benefits, focusing on distribution options, rules, taxation, and investment strategies. Additional topics include equity-based and deferred compensation. The course provides a broad understanding of factors influencing retirement decisions for individuals. (Cross-listed with FNBK 4320).

BSAD 8856 ESTATES AND INCOME TAX (3 credits)

This course covers estate planning topics, such as estate and gift taxes, trust planning, property ownership, life insurance, annuities, postmortem tax strategies, and charitable giving. It emphasizes tax planning strategies related to investment goals, focusing on discretionary income and net worth. Students will learn to evaluate investment decisions based on current tax implications. (Cross-listed with FNBK 4330).

BSAD 8866 APPLICATIONS IN PERSONAL FINANCIAL PLANNING (3 credits)

In this course for the Financial Planning program, students apply their knowledge through case-based learning to demonstrate their proficiency in financial planning, insurance, tax, retirement, and estate planning. The course involves a comprehensive case analysis, integrating key areas of financial planning. (Cross-listed with FNBK 4340).

Prerequisite(s): BSAD 8836, BSAD 8510, BSAD 8846, BSAD 8596, & BSAD 8856

BSAD 8880 ARTS AND THE EXECUTIVE (3 credits)

The course will provide the graduate student with an understanding of the organizational and managerial issues involved in an arts organization as the role of the arts in the business community.

Prerequisite(s): Graduate. Not open to nondegree students.

BSAD 8900 INDEPENDENT STUDY (1-6 credits)

In this independent study course, individual students are able to complete independent research in a business-related topic area under the supervision of a faculty member. Written independent study reports are expected to include appropriate academic citations and references.

Prerequisite(s): Graduate and permission of MBA Advisor. Requires submission of completed Independent Study Contract to MBA Advisor prior to registration. Not open to non-degree graduate students.

BSAD 8926 SPECIAL TOPICS IN BUSINESS (3 credits)

This business-focused special topics course is designed to provide students the opportunity to focus on a current or emerging topic in any area of business. An in depth exploration of the topic will be undertaken with the expectation that students will play an active role in the course and engage deeply with the material and concepts addressed within the focal topic area. (Cross-listed with BSAD 4920).

Prerequisite(s): Not open to non-degree graduate students.

BSAD 8990 THESIS (1-6 credits)

A research project, under the supervision of a faculty thesis adviser in the College of Business Administration, in which the student establishes his capacity to design, conduct and complete an independent, scholarly investigation of a high originality. The research topic and the completed project must be approved by the student's faculty thesis adviser and two other faculty members, one of whom must be from outside the program area.

Prerequisite(s): Permission of graduate adviser. Not open to non-degree graduate students.

Business Administration, MBA

The mission of the MBA program at the University of Nebraska at Omaha (UNO) is to prepare students to contribute significantly to organizational productivity through learning experiences, emphasizing the application of sound and innovative business techniques. By acquiring the knowledge and abilities necessary to be a problem solver who is influential, innovative, and socially responsible, the graduate of the UNO MBA program will be an effective leader in enhancing organizational capabilities. The graduate will be well prepared for a responsible management position and will have an understanding of the technological and global business environment.

In addition to developing a strong background in the functional areas of business, the UNO MBA program focuses on developing essential leadership capabilities in its graduates.

Triple Bottom Line (TBL)

The TBL framework that has been incorporated into the curriculum provides a distinctive structure to the program that we can communicate to students, employers and others. TBL will help students see relationships between issues in a turbulent business environment. It compels students to understand the relationship between social, economic and environmental trends. A TBL framework for the MBA program will develop principled leaders who can effectively anticipate unfortunate surprises and uncover new opportunities. These leaders can position their firms to be a step ahead of competitors.

FastTrack Program

The College of Business Administration MBA program has developed a FastTrack program for highly qualified and motivated students providing the opportunity to complete a BSBA or BMS degree and an MBA degree in an accelerated time frame. With FastTrack, students may count up to nine graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BSBA or BMS degree and desiring to pursue an MBA
- Students must have completed no less than 60 undergraduate hours
- Students must have a minimum undergraduate GPA of 3.0
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.
- Please note, BSAD 8110 will apply toward the completion of the BMS degree program requirements, but only as a foundation course for the MBA.

Enrollment of Non-Degree Students

Following a review of their transcripts by the MBA advisor, non-degree students may be permitted to enroll in MBA foundation courses only, BSAD 8110 and ECON 1200 (3.0 junior/senior GPA required).

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: November 1
- Summer 2026: April 1 (Limited availability for international applicants)
- Fall 2026: July 1 (June 1 for international applicants)

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>) must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Resume** (employment and educational history)
- **Unconditional Admission:** may be granted to an applicant whose record includes the following:
 - 2.85 undergraduate junior/senior GPA, or cumulative graduate GPA
 - Applicants qualifying for unconditional admission, based on the standards outlined above, but lacking some foundation courses, will be granted provisional status until all foundation courses are completed with grades of "B" (3.0/4.0) or above.
- **Provisional Admission:** Applicants who do not meet the conditions for unconditional admission may be considered for provisional admission status. These applicants will be notified that the CBA Graduate Program Council (CBA GPC) will evaluate the files of all

applicants being considered for provisional admission. Candidates being considered for admission on this basis will receive notification from the UNO Office of Graduate Studies. If granted provisional admission, the student must earn minimum "B" (3.0/4.0) grades in each of the MBA courses completed in the first 12 hours of the program. Students not meeting this standard are subject to dismissal.

- **Foundation courses:** An applicant must have completed basic courses in the following areas, either as an undergraduate student or prior to enrolling in the first MBA course:

Code	Title	Credits
Accounting		
Select one of the following:		3-6
BSAD 8110	ACCOUNTING AND FINANCIAL FUNDAMENTALS	3
Or one year of Principles of Accounting at the undergraduate level:		
ACCT 2010 & ACCT 2020	PRINCIPLES OF ACCOUNTING I and PRINCIPLES OF ACCOUNTING II	6
Economics		
Select one of the following:		3-6
ECON 1200	SURVEY OF ECONOMICS	3
Or Micro and Macro Economics at the undergraduate level:		
ECON 2200 & ECON 2220	PRINCIPLES OF ECONOMICS (MICRO) and PRINCIPLES OF ECONOMICS (MACRO)	6
Principles of Business Statistics		
Select one of the following:		
BSAD 2130	PRINCIPLES OF BUSINESS STATISTICS	3
Or one semester of statistics		
Mathematics		
College Algebra or higher with the following courses at UNO:		
MATH 1220	COLLEGE ALGEBRA	3
or MATH 1300	COLLEGE ALGEBRA WITH SUPPORT	
or MATH 1320	COLLEGE ALGEBRA	
English Composition I		
ENGL 1150	ENGLISH COMPOSITION I ¹	3

¹ ENGL 1150 is required as a foundation course for all students admitted to the MBA program who are required to complete the TOEFL/IELTS. The English composition requirement must be satisfied within the first two semesters of a student's program.

- Courses successfully completed with a grade of A, B, or C (2.0 on 4.0 scale) in the applicant's undergraduate program are considered as sufficient preparation. Otherwise, the applicant must complete foundation requirements prior to enrolling in the first MBA course with a minimum B (3.0 on 4.0 scale) grade. Foundation courses, including BSAD 8110 and ECON 1200, may not be used on a plan of study.

Project Capstone Course (2 hours)

BSAD 8800 - MBA Project-Focused Capstone. As the project-focused capstone course for the Master of Business Administration (MBA) degree, this course will focus on students completing a service-learning consulting project for a non-profit or other organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite:** Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the Capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class. Not open to non-degree graduate students.

ECON 8330 - Data Analysis from Scratch. This course may be substituted for BSAD 8800 as the Capstone requirement for MBA students. Students in the course will work on a service-learning consulting project, specifically focused on a client data project. The consulting project will focus on the application of knowledge and skills learned in the MBA program and the Business Analytics concentration. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite(s)/Corequisite(s):** A multivariate or regression analysis course such as ECON 8300 (<https://catalog.unomaha.edu/search/?P=ECON%208300>), ISQA 9130 (<https://catalog.unomaha.edu/search/?P=ISQA%209130>) or STAT 8436 (<https://catalog.unomaha.edu/search/?P=STAT%208436>), and a programming class such as ECON 8320 (<https://catalog.unomaha.edu/search/?P=ECON%208320>) or equivalent programming experience; or instructor approval. Students also must successfully complete BSAD 8630 (<https://catalog.unomaha.edu/search/?P=BSAD%208630>), BSAD 8420 (<https://catalog.unomaha.edu/search/?P=BSAD%208420>), and BSAD 8830 (<https://catalog.unomaha.edu/search/?P=BSAD%208830>) before taking this course for the Capstone requirement.

Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Not open to non-degree graduate students.

Directed Elective Requirement

For students who have earned an undergraduate or graduate degree in accounting, economics, management, management information systems,

or marketing, the core course(s) corresponding to the student's previously earned degree(s) will be waived. To satisfy degree requirements, the student must complete a directed elective in the waived field as indicated. For students who have earned an undergraduate or graduate degree in finance, the core course(s) corresponding to the student's previously earned degree may be waived upon request. Students with more than one core course waiver will be required to take an additional 1-credit hour seminar or 3-credit hour elective to fulfill degree requirements.

Accounting Directed Electives

MBA Electives (9 hours)

Electives (8000-level) may be chosen from MBA, master's level Accounting and Economics, as well as courses in other departments as listed below.

A directed elective, if required, is part of the nine (9) hours of electives required for degree completion.

A maximum of nine (9) hours of dual-level (graduate/undergraduate) electives may be included in the plan of study for an MBA degree.

MBA policy limits the number of Special Topics/Special Studies (BSAD 8910) electives to a maximum of nine hours, which may be applied to the MBA program as electives.

Not all elective courses are offered each semester.

Transfer of Graduate Credit

Students who have completed graduate courses at other approved AACSB (Association to Advance Collegiate Schools of Business) graduate schools may request permission to transfer as many as nine (9) semester hours of credit, provided the courses are pertinent to the student's graduate program. Grades in courses for transfer credit must be equivalent to "B" (3.0/4.0) or higher. All work for transfer of credit must have been taken within the ten-year period allowed for the master's in business administration degree. Petitions for the transfer of credit are submitted by the student to the MBA advisor who forwards the petition with a recommendation to the Dean for Graduate Studies for approval. Visit the AACSB website (<http://www.aacsb.edu>) for the listing of AACSB accredited institutions.

MBA Exit Requirement Comprehensive Examination

All students earning an MBA degree must complete a comprehensive examination or a comprehensive examination equivalent. The comprehensive examination requires the student to demonstrate the knowledge gained from the core courses and the ability to synthesize that knowledge in the analysis of questions involving more than one concept. Completion of the project focused capstone course (BSAD 8800) with a grade of "B" (3.0/4.0 scale) or better is equivalent to completion of the comprehensive examination. If a student transfers in credit for the non-comprehensive examination components of the project focused capstone course, then the student must pass a written comprehensive examination prepared by and graded by the graduate program council.

Thesis Option

MBA students may elect to complete a 6-hour thesis under the guidance of a supervisory committee. The student is responsible for compliance with all Graduate College and MBA graduate program council rules and procedures with respect to formation of a supervisory committee and completion of a thesis. The student shall submit to the supervisory committee a document including: 1) a proposed plan of study; 2) a description of the student's research topic; and 3) the student's research methodology. The student shall make an oral defense of the document to the supervisory committee. The supervisory committee's approval shall be in writing. A supervisory committee's approval should be obtained at least seven months before the intended graduation date. If a student elects to complete a thesis, then the supervisory committee of the thesis shall decide how the student will satisfy the comprehensive examination requirement and the business case requirement. The supervisory committee's written approval of the plan of study shall require either the student's completion of the project focused capstone course or a comprehensive examination (either written or oral) prepared by and graded by the supervisory committee.

Other Requirements to Complete the Program

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

Total Credit Hours: 33

Concentrations

The MBA Program offers concentrations in the areas listed below. A concentration shall include at least nine (9) credit hours.

With the prior, written approval of the College of Business Administration graduate program council and the dean for Graduate Studies, an independent research, special studies, or special topics graduate-level course from accounting, business administration or economics, when such course has as its principal focus issues relevant to business administration or the concentration, may be substituted.

Business Analytics Concentration

Code	Title	Credits

Academic Performance

Each semester, student files will be reviewed where a student received a grade lower than a "B" (3.0 out of 4.0). Following this review, the College of Business Administration's Graduate Program Council (CBA GPC) may place conditions or restrictions on the student. Following notification to the student, the student may petition the CBA GPC for a review of the conditions or restrictions imposed.

Students earning a third grade of "C+" or lower (or any single grade below "C" (1.67 on a 4.0 scale)) will be automatically dismissed from the MBA program. Dismissed students will be immediately administratively withdrawn from all courses in which they are enrolled for MBA credit. Students who have been dismissed may not enroll in any courses for MBA credit in any subsequent semester or summer session until reinstatement has been granted by the CBA GPC and the graduate dean.

Students who have been dismissed from the MBA program may submit a written petition for reinstatement to the CBA GPC. Students who have petitioned the CBA GPC for reinstatement may not enroll in any courses for MBA credit. Upon receiving a petition for reinstatement, the CBA GPC will evaluate the student's written petition for reinstatement. As part of the reinstatement petitioning process, the CBA GPC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student. This information may be used by the CBA GPC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and not all students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period of the CBA GPC's discretion and must satisfy the probationary conditions specified by the CBA GPC. In addition to probationary conditions, reinstated students will be subject to additional reinstatement conditions as specified by the CBA GPC. These reinstatement conditions will include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher [the exact grade requirements for retaken courses may in fact be higher than "B" (3.0)]. Students not achieving the probationary or reinstatement conditions will be automatically dismissed.

MBA Probation Policy

If granted Provisional Admission, the student must earn minimum "B" grades (3.0 on 4.0 scale) in each of the MBA courses completed in the first 12 hours of the program. Students not meeting this standard will be immediately placed on probation. A letter will be sent to the student regarding violation of the terms of provisional admission and the probation status. The student must submit a written letter to the CBA GPC acknowledging the basis for probation and requesting continuation in the MBA program within two weeks on receipt of the notification. Students who have petitioned the CBA GPC for continuation in the program may remain in the program and enroll in courses for MBA credit. Students who have NOT petitioned the CBA GPC for continuation within two weeks of notification, will not be allowed to remain in the program or register for courses, and will be administratively withdrawn. Upon receiving a petition for continuation, the CBA GPC will evaluate the student's written petition. As part of the petitioning process, the CBA GPC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student. This information may be used by the CBA GPC in the decision. Information provided by previous instructors will not be shared with the student. If a student's provisional status is restored, then the student will need to earn a B grade or better in the affected course at the earliest opportunity.

MBA Program Two Strikes Rule

A UNO MBA student may enroll only **twice** in each MBA course. If the class is not successfully completed on the second attempt, then the student will be dismissed from the MBA program. **An enrollment is defined as being enrolled in the course after the last day to withdraw via MavLINK and receive a 100% refund. The last day for withdrawal will be as stated in the current academic calendar for a full semester course (3 credits) <http://registrar.unomaha.edu/calendar/>; for an eight-week graduate course (2 credits) the last day for withdrawal will be the third day (including the start date) of the course as designated in MavLINK.**

In addition to the Quality of Work Standards established by the Graduate College, MBA students may repeat only once a BSAD 8xx0 level course in which they receive any grade, including "W" or "I."

GPC Will Consider Grades Earned in Repeated Courses

When making decisions based on Quality of Work Standards issues, the CBA GPC will consider the initial grade(s) received in a course as well as the most recent grade received for the course. This approach differs from the method used to calculate GPA in a student's MavLINK/Degree Works file,

where the most recent grade replaces the grade received in the previous attempt.

Student Responsibilities

Each student admitted to graduate studies is responsible for knowing the procedures and regulations of the Graduate College.

Each student should consult with the MBA advisor at least once each semester to assure continued progress toward the degree objective. Students must maintain a 3.0 ("B") average to fulfill the program and graduation requirements. No more than two "C's" or two "C+'s" in graduate courses are permitted.

Business Administration, Executive MBA

The mission and overarching themes of the Executive MBA program are to provide experienced managers and professionals with an applied and integrative business management education that develops and furthers their critical thinking, decision-making, and leadership abilities. Graduates of this program will be better prepared to drive and lead change, manage resources, and effectively address strategic issues in a dynamic global economy.

The Executive MBA program is designed for middle- and upper-level managers, experienced professionals, and established business owners who have a vision for themselves and their firms.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Fall 2026: June 15

Other Requirements

- A minimum of six (6) years of professional-level work experience with managerial/supervisory experience preferred.
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Statement of Purpose:** In one page or less, describe your interest in the UNO Executive MBA and how completion of this program will help you achieve your career goals.
- Resume:** Current resume detailing employment history, specific job responsibilities, accomplishments, leadership roles, and community involvement.

Business Administration, MBA and Management Information Systems, MS (MBA/MIS)

In today's context of globally integrated and interdependent businesses, ubiquitous information technologies, and a mobile workforce, it is critical that graduate education provides students opportunities to develop integrated business and technology skills. The primary purpose of this dual degree program is to provide this integration by enabling students to complete the MBA and MS in MIS degrees simultaneously. This track is designed for dedicated students who are willing to take on the challenges related to graduate education from two perspectives—business administration and management information systems. As such, this program involves intensive preparation in both business administration and information systems and a specialization in an area that combines both backgrounds. The dual degree program requires a minimum of 55 hours of course work beyond foundation requirements. Students who wish to pursue this option must work closely with an adviser to develop an integrated plan of study at an early stage. Students who complete the dual degree program will receive two degrees, two diplomas, and will have both degrees recorded on their transcript.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: November 1
- Summer 2026: April 1 (Limited availability for international applicants)
- Fall 2026: July 1 (June 1 for international applicants)

Other Requirements

- All applicants must have earned a minimum junior/senior GPA of 3.0 for both the MBA and the MS in MIS programs.
- **Entrance Exam:** Submitting GMAT or GRE scores [may strengthen your application](#).
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum

language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** Applicants are required to submit a statement of purpose (500-750 words) addressing the following. The statement must be written in the applicant's own words, reflecting their goals and aspirations. Plagiarism in the statement may result in the rejection of the entire application.
 - Why you want to study at UNO
 - Career goals
 - Relevant qualifications or work experience that demonstrate potential for success in the graduate program
 - Motivations for pursuing graduate education
- **Resume:** Include work experience and education
- **OPTIONAL:** One letter of recommendation from a reference who can evaluate your work and/or academic achievements.
- **Interview:** optional
 - Although not required, applicants are strongly encouraged to arrange for an interview with one or more members of the graduate program committees of the MBA and MIS programs by directly contacting the committee chairperson of the College of IS&T. Telephone interviews are highly recommended for applicants outside the local area.
- Students qualifying for admission based on the standard outlined above, but lacking some foundation courses, will be granted provisional status until all foundation courses are completed with grades of "B" (3.0 on a 4.0 scale) or better.

MBA Foundation Courses

Code	Title	Credits
Accounting		
Select one of the following:		3-6
BSAD 8110	ACCOUNTING AND FINANCIAL FUNDAMENTALS	
ACCT 2010 & ACCT 2020	PRINCIPLES OF ACCOUNTING I and PRINCIPLES OF ACCOUNTING II	
Or one year of Principles of Accounting at the undergraduate level		
Economics		
Select one of the following:		3-6
ECON 1200	SURVEY OF ECONOMICS	
ECON 2200 & ECON 2220	PRINCIPLES OF ECONOMICS (MICRO) and PRINCIPLES OF ECONOMICS (MACRO)	
Or Micro- and Macro-Economics at the undergraduate level		
College Algebra		
College Algebra or higher with the following courses at UNO:		
MATH 1220	COLLEGE ALGEBRA	3
or MATH 1300	COLLEGE ALGEBRA WITH SUPPORT	
or MATH 1320	COLLEGE ALGEBRA	
English Composition		
A required course for all international students entering the MBA program who are required to take the TOEFL:		
ENGL 1150	ENGLISH COMPOSITION I	3

MS in MIS Foundation Courses

Foundation courses ensure that all students have a strong foundation on which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for other courses in the program,

but they also contain a distinct body of knowledge that is an important part of the MIS professional's education. All foundation courses are required for all students. Students who have obtained an undergraduate MIS degree will typically have this foundation. Other students, including computer science or engineering majors, will usually have to take one or more foundation courses. Occasionally, a student's work experience may be sufficient to waive one or more foundation courses.

Waivers for foundation courses are granted by the chair of the graduate program committee upon the recommendation of the faculty member who is responsible for an individual foundation course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have an option for testing out. Results of a test out are not appealable or repeatable.

Foundation courses cannot be used to satisfy the hours required for the dual degree. Students who have not completed all the foundation course requirements may be admitted on provisional status until those requirements have satisfactorily been completed. All must be completed prior to or concurrent with the first six hours of MS in MIS graduate course work.

Code	Title	Credits
Six (6) hours of programming coursework or equivalent experience:		
CIST 1600	INTRODUCTION TO PROGRAMMING USING PRACTICAL SCRIPTING	3
Or equivalent

MBA Directed Elective Requirements

For students who have earned an undergraduate or graduate degrees in accounting, economics, management, or marketing, the core course(s) corresponding to the student's previously earned degree(s) will be waived. To satisfy degree requirements, the student must complete a directed elective in the waived field as indicated. For students who have earned an undergraduate or graduate degree in finance, the core course(s) corresponding to the student's previously earned degree may be waived upon request. Students with more than one core course waiver will be required to take an additional 1-credit hour seminar or 3-credit hour elective to fulfill degree requirements.

MBA/MIS Exit Requirements

Capstone Courses (5 hours)

BSAD 8800 - MBA Project-Focused Capstone. As the project-focused capstone course for the Master of Business Administration (MBA) degree, this course will focus on students completing a service-learning consulting project for a non-profit or other organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite:** Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the Capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class.

OR

ECON 8330 - Data Analysis from Scratch. This course may be substituted for BSAD 8800 as the Capstone requirement for MBA students. Students in the course will work on a service-learning consulting project, specifically focused on a client data project. The consulting project will focus on the application of knowledge and skills learned in the MBA program and the Business Analytics concentration. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite(s)/Corequisite(s):** A multivariate or regression analysis course such as ECON 8300 (<https://catalog.unomaha.edu/search/?P=ECON%208300>), ISQA 9130 (<https://catalog.unomaha.edu/search/?P=ISQA%209130>) or STAT 8436 (<https://catalog.unomaha.edu/>)

search/?P=STAT%208436), and a programming class such as ECON 8320 (<https://catalog.unomaha.edu/search/?P=ECON%208320>) or equivalent programming experience; or instructor approval. Students also must successfully complete BSAD 8630 (<https://catalog.unomaha.edu/search/?P=BSAD%208630>), BSAD 8420 (<https://catalog.unomaha.edu/search/?P=BSAD%208420>), and BSAD 8830 (<https://catalog.unomaha.edu/search/?P=BSAD%208830>) before taking this course for the Capstone requirement. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program.

ISQA 8950 **MIS Capstone** (3 credits) (taken within the last 6 hours or the final semester of the program, with all core courses completed).

Code	Title	Credits
BSAD 8800	MBA PROJECT-FOCUSED CAPSTONE	2-3
or ECON 8330	DATA ANALYSIS FROM SCRATCH	
ISQA 8950	CAPSTONE MANAGEMENT INFORMATION SYSTEMS	3

Thesis Option

To take this option, a student will be required to enroll in six (6) hours of thesis credit:

MBA Program

Code	Title	Credits
BSAD 8990	THESIS	1-6

MS-MIS Program

Code	Title	Credits
ISQA 8990	THESIS	3

The thesis must be in an area that relates to both the business administration and information systems domains. The Supervisory Committee must include at least one CBA faculty member and one ISQA faculty member.

Other Requirements to Complete the Program

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

Other Program-Related Information

Transfer Credits

A student may transfer credits into the MBA/MIS dual-degree program subject to the following conditions:

- No more than 1/3 of the credits for the dual-degree program may be transfer credits
- No more than 1/3 of the business credits for the dual-degree program may be transfer credits
- No more than 1/3 of the MIS credits for the dual-degree program may be transfer credits
- The transfer credits must conform to the transfer policies of the individual programs that make up the dual-degree program

Total Credit Hours: 55

Academic Performance

In addition to UNO Graduate College Quality of Work Standards, Dual Degree (DD) students may repeat only once a BSAD 8-0-level course in which they receive any grade, including "W" or "I". Students earning three "C/C+" grades, or a grade of "C-" or below, will be automatically dismissed from the DD program. Dismissed students will be immediately

administratively withdrawn from all courses in which they are enrolled for DD credit.

Students who have been dismissed may not enroll in any courses for DD credit in any subsequent semester or summer session until reinstatement has been granted by the Dual-Degree Program Academic Standards Committee (DDPASC) comprised of the 2 GPC Chairs and 1 faculty member from each GPC.

Students who have been dismissed from the DD program may submit a written petition for reinstatement to the DDPASC. Students petitioning the DDPASC for reinstatement may not enroll in any course for DD credit until after the DDPASC has ruled on the petition. Upon receiving a petition for reinstatement, the DDPASC will evaluate the student's written petition for reinstatement. As part of the reinstatement petitioning process, the DDPASC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student; this information may be used by the DDPASC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and not all students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period at the DDPASC's discretion and must satisfy the probationary conditions specified by the DDPASC. In addition to probationary conditions, reinstated students will be subject to additional reinstatement conditions as specified by the DDPASC. These reinstatement conditions will include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher (the exact grade requirements for retaken courses may in fact be higher than "B" (3.0)). Students not satisfying the probationary or reinstatement conditions will be automatically dismissed.

Grades Earned in Repeated Courses

When making decisions related to the Quality of Work Standards issues outlined in the UNO Graduate Catalog, the Dual-Degree Program Academic Standards Committee (DDPASC) will consider the initial grade(s) received in a course as well as the most recent grade received for the course. This approach differs from the method used to calculate GPA in a student's MavLINK/DegreeWorks file, where the most recent grade replaces the grade received in the previous course attempt.

Business Administration, MBA and Economics, MS (MBA/ECON)

In a world with increasingly more data, the quantitative focus of the graduate economics degree is increasingly attractive to students and employers. Businesses generate data at an unprecedented rate, and the econometric and modeling skills of an applied economics degree allows graduates to make sense of business data in a systematic and scientific way. This specialization is enhanced with the broad knowledge provided by an MBA degree. Students in the MBA program demonstrate basic proficiency in a number of business-related disciplines, including marketing, management, accounting, and finance. This wide domain of knowledge allows students to apply the analytical skills learned in economics courses to a wider set of business problems, thereby adding value to their organizations. Students who wish to pursue this option must work closely with an advisor to develop an integrated plan of study at an early stage. Students who complete the dual degree program will receive two degrees, two diplomas, and will have both degrees recorded on their transcript.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: November 1
- Summer 2026: April 1 (Limited availability for international applicants)
- Fall 2026: July 1 (June 1 for international applicants)

Other Requirements

- Junior/senior GPA of at least 2.85 (on a 4.0 point scale)
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>) must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Resume:** (employment and educational history)

BSAD 8830	STRATEGY: DEVELOPING SUSTAINABLE COMPETITIVE ADVANTAGE	2
BSAD 8800	MBA PROJECT-FOCUSED CAPSTONE	2
Electives		21
Electives must contain 9 from the approved MBA elective list, 9 credits from the economics approved elective list, and 3 credits from from courses common to both lists.		
Total Credits		58

Exit Requirements

MBA Exit Requirement

BSAD 8800 - MBA Project-Focused Capstone. As the project-focused capstone course for the Master of Business Administration (MBA) degree, this course will focus on students completing a service-learning consulting project for a non-profit or other organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite:** Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class. Not open to non-degree graduate students.

ECON 8330 - Data Analysis from Scratch. This course may be substituted for BSAD 8800 as the Capstone requirement for MBA students. Students in the course will work on a service-learning consulting project, specifically focused on a client data project. The consulting project will focus on the application of knowledge and skills learned in the MBA program and the Business Analytics concentration. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite(s)/Corequisite(s):** A multivariate or regression analysis course such as ECON 8300 (<https://catalog.unomaha.edu/search/?P=ECON%208300>), ISQA 9130 (<https://catalog.unomaha.edu/search/?P=ISQA%209130>) or STAT 8436 (<https://catalog.unomaha.edu/search/?P=STAT%208436>), and a programming class such as ECON 8320 (<https://catalog.unomaha.edu/search/?P=ECON%208320>) or equivalent programming experience; or instructor approval. Students also must successfully complete BSAD 8630 (<https://catalog.unomaha.edu/search/?P=BSAD%208630>), BSAD 8420 (<https://catalog.unomaha.edu/search/?P=BSAD%208420>), and BSAD 8830 (<https://catalog.unomaha.edu/search/?P=BSAD%208830>) before taking this course for the Capstone requirement. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Not open to non-degree graduate students.

Economics Exit Requirement

Comprehensive Examination

Other Requirements to Complete the Program

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

Concentrations

Business Analytics Concentration

Code	Title	Credits
ECON 8306	QUANTITATIVE APPLICATIONS IN ECONOMICS AND BUSINESS	3

Academic Performance

In addition to UNO Graduate College Quality of Work Standards, Dual Degree (DD) students may repeat only once a BSAD 8-0-level course in which they receive any grade, including "W" or "I". Students earning three "C/C+" grades, or a grade of "C-" or below, will be automatically dismissed from the DD program. Dismissed students will be immediately administratively withdrawn from all courses in which they are enrolled for DD credit.

Students who have been dismissed may not enroll in any courses for DD credit in any subsequent semester or summer session until reinstatement has been granted by the Dual-Degree Program Academic Standards Committee (DDPASC) comprised of the 2 GPC Chairs and 1 faculty member from each GPC.

Students who have been dismissed from the DD program may submit a written petition for reinstatement to the DDPASC. Students petitioning the DDPASC for reinstatement may not enroll in any course for DD credit until after the DDPASC has ruled on the petition. Upon receiving a petition for reinstatement, the DDPASC will evaluate the student's written petition for reinstatement. As part of the reinstatement petitioning process, the DDPASC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student; this information may be used by the DDPASC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and not all students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period at the DDPASC's discretion and must satisfy the probationary conditions specified by the DDPASC. In addition to probationary conditions, reinstated students will be subject to additional reinstatement conditions as specified by the DDPASC. These reinstatement conditions will include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher (the exact grade requirements for retaken courses may in fact be higher than "B" (3.0)). Students not satisfying the probationary or reinstatement conditions will be automatically dismissed.

Business Administration, MBA and Public Health, MPH (MBA/MPH)

The MBA/MPH dual degree program is designed for students who desire specialized expertise and training in public health management and administration. Graduates will be equipped to work in a variety of public interest arenas, commercial or industrial employment, hospitals or insurance settings, or in universities.

Admissions

Application Deadlines

- Spring 2026: October 1
- Fall 2026: June 1

Other Requirements

- Minimum junior/senior GPA of at least 2.85 in undergraduate courses related to proposed major
- Resume (employment and educational history)
- Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - 80 on the TOEFL
 - 6.5 on the IELTS

Admission Criteria

- Students who have already graduated with the MBA or MPH degree are not eligible for the MBA/MPH dual degree program.
- The admission requirements for the MBA program can be found on the UNO MBA website (<https://www.unomaha.edu/college-of-business-administration/mba/>).
- Students qualifying for admission based on the standards outlined above but lacking MBA foundation courses will be granted *provisional status* until all foundation courses are completed with grades of "B" (3.0 on a 4.0 scale) or above.
- Students who are already enrolled in the MBA program at the College of Business Administration may apply for admission to the MBA/MPH dual degree program if they are in good academic standing and have not completed more than 12 semester hours within the MBA program.
- The admission requirements for the MPH program can be found on the UNMC College of Public Health – Master of Public Health website (<http://www.unmc.edu/publichealth/programs/mphdualdegree/mba-mph.html>).
- Students who are already enrolled in the MPH program at the College of Public Health may apply for admission to the MBA/MPH dual degree program if their GPA is at least 3.0 and have not completed more than 18 semester hours toward the MPH program.

Dual Admission

Applicants must complete the application process for each of the programs, MBA and MPH, separately, and **MUST** meet the requirements for each program. The student must indicate that he or she is applying for admission to the MBA/MPH dual degree program on the application.

Applications are evaluated by each degree program in separate admissions processes. It is possible that an applicant will be admitted to one program and not the other. In this case the applicant can matriculate into the accepted program, but not participate in the dual degree option.

Degree Requirements

Foundation Courses

A student must complete the foundation courses listed below prior to, or concurrent with enrollment in the first MBA course. Courses successfully completed A, B, or C (2.0 on a 4.0 scale) grades in the student's undergraduate program are considered as sufficient preparation.

Otherwise, the student must complete the foundation requirements with a grade of B (3.0 on a 4.0 scale) or above.

MBA Foundation Courses

Code	Title	Credits
Accounting		
BSAD 8110	ACCOUNTING AND FINANCIAL FUNDAMENTALS	3
Or one year of Principles of Accounting at the undergraduate level:		6
ACCT 2010	PRINCIPLES OF ACCOUNTING I (or its equivalent)	
ACCT 2020	PRINCIPLES OF ACCOUNTING II (or its equivalent)	
Economics		
ECON 1200	SURVEY OF ECONOMICS	3
Or Micro-economics and Macro-economics at the undergraduate level:		6
ECON 2200	PRINCIPLES OF ECONOMICS (MICRO) (or its equivalent)	
ECON 2220	PRINCIPLES OF ECONOMICS (MACRO) (or its equivalent)	
Mathematics		
College Algebra or higher with the following courses at UNO:		
MATH 1220	COLLEGE ALGEBRA	3
or MATH 1300	COLLEGE ALGEBRA WITH SUPPORT	
or MATH 1320	COLLEGE ALGEBRA	
English Composition		
The following is a required course for all international students who are required to take the TOEFL:		
ENGL 1150	ENGLISH COMPOSITION I	3
Statistics		
Select one of the following:		
BSAD 2130	PRINCIPLES OF BUSINESS STATISTICS	3
or		
CPH 506 or BIOS 806	Biostatistics I	
Or one semester of undergraduate statistics		

The degree requirements for the dual MBA and MPH program include the completion of a minimum of **60 semester hours** of graduate credit beyond MBA foundation courses identified at the time of admission. These hours will be completed as follows. Each student admitted to the dual degree option will, within the first semester of their enrollment, file a plan of study in close consultation with a graduate advisor.

Core Courses: 37 credit hours

- MBA: 22 hours required
- MPH: 15 hours required

MBA Core Courses (22 hours)

Code	Title	Credits
BSAD 8060	PEOPLE: CULTIVATING SKILLS FOR LEADERSHIP (Required as the first graduate course for all MBA students)	2
BSAD 8000	BUSINESS ETHICS: ACHIEVING SOCIAL RESPONSIBILITY	2

Capstone Courses & Service Learning (8 credit hours)

BSAD 8800 **MBA Project-Focused Capstone** (2 credits) The project-focused capstone course for the Master's of Business Administration (MBA) degree will focus on students completing a service-learning consulting project for a non-profit or other organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite:** Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the Capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class. Not open to non-degree graduate students.

- Students will complete the MPH program service learning course (CPH 528: Applied Practice Experience for MPH Students, 3 credit hours)
- Students will complete the MPH program capstone course (CPH 529: MPH Capstone Experience, 3 credit hours) with a grade of B (3.0) or higher.

Students must complete all core and concentration area courses, be within 12 hours of graduation (including 6 hours of service learning/capstone experience), and be in good academic standing to start the Service Learning/ MPH Capstone Experience.

Elective and Concentration Courses (15 credit hours)

MBA/MPH students qualifying for an MBA core course waiver based on their undergraduate major(s) or previous degree(s) will be required to complete a **Directed Elective** in the waived field(s). The waived core course will not satisfy degree requirements. For the list of approved directed electives please consult with your advisor.

MBA/MPH students are not eligible to choose a concentration area for the MBA program. Instead, they will have the option to complete a concentration in biostatistics, emergency preparedness, epidemiology, or public health administration and policy at UNMC. If a student is completing one of these concentration, they will also need to complete the corresponding electives for that concentration.

Biostatistics Concentration

Code	Title	Credits
CPH 517 - BIOS 835	Design of Medical Studies	3
CPH 651 - BIOS 810	Introduction to SAS Programming	3
CPH 652 - BIOS 818	Biostatistical Methods II	3
CPH 653 - BIOS 823	Categorical Data Analysis	3
Total Credits		12

Students completing the MBA/MPH with a concentration in biostatistics will transfer a maximum of nine (9) hours of coursework from the MPH courses listed below to fulfill elective requirements for the MBA program. Minimum "B" (3.0 on a 4.0 scale) grade required in each course to be transferred. Transfer and application of the "professional" hours from UNMC to the UNO MBA program will take place upon completion of the MPH degree. These courses are:

Code	Title	Credits
CPH 517	Design of Medical Studies	3
CPH 651	Introduction to SAS Programming	3
CPH 652	Biostatistical Methods II	3
CHP 653	Categorical Data Analysis	3

Emergency Preparedness Concentration

Code	Title	Credits
CPH 550 - EPI 810	Emergency Preparedness: Prevention	3
CPH 553 - EPI 813	Emergency Preparedness: Response	3
CPH 554 - EPI 814	Emergency Preparedness: Response and Recovery	3
CPH 631 - EPI 811	Emergency Preparedness: Protection	3
Total Credits		12

Students completing the MBA/MPH with a concentration in emergency preparedness will transfer a maximum of nine (9) hours of coursework from the MPH courses listed below to fulfill elective requirements for the MBA program. Minimum "B" (3.0 on a 4.0 scale) grade required in each course to be transferred. Transfer and application of the "professional" hours from UNMC to the UNO MBA program will take place upon completion of the MPH degree. These courses are:

Code	Title	Credits

CPH 553 - EPI 813	Emergency Preparedness: Response	3
CPH 631 - EPI 811	Emergency Preparedness: Protection	3

Epidemiology Concentration

Code	Title	Credits
CPH 621 - EPI 821	Applied Epidemiology	3
CPH 628 - EPI 845	Epidemiologic Methods	3
CPH 650 - BIOS 808	Biostatistics II	3
CPH 651 - BIOS 810	Introduction to SAS Programming	3
Electives (6 Cr. Hrs. 1 GE and 1 ID)		
CPH 620	Chronic Disease Epidemiology	
CPH 753	Cancer Epidemiology	
CPH 623	Infectious Disease Epidemiology: Theory and Methods	

CPH 723 Epidemiological Methods in Infectious Disease Outbreak Investigation

Total Credits	12
----------------------	-----------

Students completing the MBA/MPH with a concentration in epidemiology will transfer a maximum of nine (9) hours of coursework from the MPH courses listed below to fulfill elective requirements for the MBA program.

Minimum "B" (3.0 on a 4.0 scale) grade required in each course to be transferred. Transfer and application of the "professional" hours from UNMC to the UNO MBA program will take place upon completion of the MPH degree. These courses are:

Code	Title	Credits
CPH 621 - EPI 821	Applied Epidemiology	3
CPH 628 - EPI 845	Epidemiologic Methods	3
CPH 650 - BIOS 808	Biostatistics II	3

Public Health Administration and Policy Concentration

Code	Title	Credits
CPH 502	Health Services Administration	3
CPH 562	Human Resources Management in Health Organizations	3
CPH 565	Health Care Finance	3
CPH 566	Health Policy	3
CPH 580	Health Care Organizational Theory and Behavior	3
Total Credits		15

Students completing the MBA/MPH with a concentration in public health administration and policy will transfer a maximum of nine (9) hours of coursework from the MPH courses listed below to fulfill elective requirements for the MBA program. Minimum "B" (3.0 on a 4.0 scale) grade required in each course to be transferred. Transfer and application of the "professional" hours from UNMC to the UNO MBA program will take place upon completion of the MPH degree. These courses are:

Code	Title	Credits
CPH 502	Health Services Administration	3
CPH 565	Health Care Finance	3
CPH 566	Health Policy	3

Other MBA Requirements

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

Academic Performance

Foundation courses cannot be used to meet the 60 semester-hour requirement for the MBA/MPH joint degree.

MBA Program Two Strikes Rule

A UNO MBA student may enroll only **twice** in each MBA course. If the class is not successfully completed on the second attempt then the student will be dismissed from the MBA program. **An enrollment is defined as being enrolled in the course after the last day to withdraw via MavLINK and receive a 100% refund. The last day for withdrawal will be as stated in the current academic calendar for a full semester course (3 credits); for an eight-week course (2 credits) the last day for withdrawal will be the third day (including the start date) of the course as designated in MavLINK.**

MBA Program Academic Performance

Students earning a third grade of "C+ "or lower (or any single grade below "C" (1.67 on a 4.0 scale)) will be automatically dismissed from the MBA program. Dismissed students will be immediately administratively withdrawn from all courses in which they are enrolled for MBA credit. Students who have been dismissed may not enroll in any courses for MBA credit in any subsequent semester or summer session until reinstatement has been granted by the College of Business Administration's Graduate Program Council (CBA GPC) and graduate dean.

Students who have been dismissed from the MBA program may submit a written petition for reinstatement to the CBA GPC. Students who have petitioned the CBA GPC for reinstatement may not enroll in any courses for MBA credit. Upon receiving a petition for reinstatement, the CBA GPC will evaluate the student's written petition for reinstatement. As part of the reinstatement petitioning process, the CBA GPC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student and this information may be used by the CBA GPC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and not all students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period of the CBA GPC's discretion and must satisfy the probationary conditions specified by the CBA GPC. In addition to probationary conditions, reinstated students will be subject to additional reinstatement conditions as specified by the CBA GPC. These reinstatement conditions will include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher (the exact grade requirements for retaken courses may in fact be higher than "B" 3.0). Students not achieving the probationary or reinstatement conditions will be automatically dismissed.

GPC Will Consider Grades Earned in Related Courses

When making decisions based on Quality of Work Standards issues, the CBA GPC will consider the initial grade(s) received in a course as well as the most recent grade received for the course. This approach differs from the method used to calculate GPA in a student's MavLINK file, where the most recent grade replaces the grade received in the previous attempt.

Student Responsibilities

- Each student admitted to graduate studies is responsible for knowing the procedures and regulations of the Graduate College.
- Each student admitted to the dual degree option will, within the first semester of their enrollment, file a plan of study in close consultation with a graduate advisor.
- Once admitted to the MBA/MPH dual degree program, the MBA Director in the College of Business Administration will oversee the student's progress in the MBA curriculum, and faculty in the College of Public Health will oversee the student's progress in the MPH curriculum.
- Each student has to complete both the MBA and MPH orientations.
- Students must maintain academic eligibility as defined by each degree program.

Business Administration, MBA and UNMC PharmD (MBA/PharmD)

The MBA/PharmD dual degree program is designed for pharmacy students who desire to possess both clinical skills and an understanding of business management, leadership, and strategic decision making. Graduates will be prepared to anticipate change and to make decisions that balance patient outcomes and the overall cost of care.

Admissions

Application Deadlines

- Spring 2026: November 1
- Summer 2026: April 1 (Limited availability for international applicants)
- Fall 2026: July 1 (June 1 for international applicants)

Program Specific Requirements

College of Pharmacy Students

To be eligible for enrollment in the UNO MBA program, the UNMC student must:

- Be in the top 50% of his/her pharmacy school class;
- Secure approval from the UNMC COP associate dean of student affairs;
- Secure approval from the MBA advisor;
- Meet UNO MBA admission requirements including the submission of required transcripts, test scores, and resume;
- Complete UNO's application for graduate admission;
- Applicants that did not complete a baccalaureate degree prior to enrollment in the PharmD program must have completed a minimum of ninety (90) college level credits to qualify for admission;
- Junior/Senior GPA calculation will be based on the most recent sixty (60) credits including PharmD credits.

MBA Program Specific Requirements

Admission may be granted to an applicant whose record includes at least the following:

- 2.85 junior/senior grade point average;
- **Resume** (employment and educational history);
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - **550; Paper-based TOEFL:** Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

Admission Criteria

- Students who have already graduated with the MBA or PharmD degree are not eligible for the MBA/PharmD dual degree program.
- Students qualifying for admission based on the standards outlined above but lacking MBA foundation courses will be granted provisional

status until all foundation courses are completed with grades of "B" (3.0 on a 4.0 scale) or above.

Business Administration, MBA and UNMC Doctor of Physical Therapy

The health care industry is an ever-changing landscape, requiring those in leadership positions to navigate complex issues associated with patient care, operations, change management and public policy, to name a few. Allied health professionals comprise approximately 60 percent of the total health care workforce, and together provide the fundamental framework critical to the success of the American health care system. Students jointly pursuing education in an allied health profession and in business are uniquely prepared not only for health care practice, but also for taking on key decision-making roles in health care organizations.

Elective Courses (9 hours)

Students completing the MBA/DPT program will transfer nine hours of coursework from the courses listed below to fulfill elective requirements for the MBA program. Minimum of "B" (3.0 on a 4.0 scale) grade required in each course to be transferred.

Transfer and application of the "professional" hours from UNMC to the UNO MBA program will take place upon completion of the DPT degree. The courses are:

Code	Title	Credits
PHYT 622 & 722	Practice Management Skills for the Physical Therapist I and II	3
PHYT 640	Critical Inquiry I	3
PHYT 740	Critical Inquiry II	3
Total Credits		9

MBA/DPT students who have earned undergraduate or graduate degrees in accounting, economics, finance, management, management information systems, or marketing, the MBA core course(s) corresponding to the

student's undergraduate major(s) or degree(s) will be waived and the student will complete a directed elective in the waived field in addition to the hours transferred from UNMC. The waived core course will not satisfy degree requirements. Please consult with your advisor for a complete list of approved directed electives.

MBA/DPT students are not eligible to choose an MBA concentration because UNMC CAHP courses will comprise all electives.

Other MBA Requirements

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

Business Administration, MBA and UNMC Doctor of Dental Surgery (MBA/DDS)

Dentistry professionals equipped with both clinical expertise and a solid grasp of business management, leadership, and strategic decision-making will be well-prepared to tackle the challenges of the modern healthcare environment. Students jointly pursuing education in the dental profession and in business are thoroughly prepared to manage a practice efficiently, make informed financial decisions, and lead with confidence in the healthcare industry.

BSAD 8800-MBA Project-Focused Capstone (2 credits) The project-focused capstone course for the Master's of Business Administration (MBA) degree will focus on the students completing a health care-related project for a nonprofit or other organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite:** Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class. Not open to non-degree graduate students.

Code	Title	Credits
BSAD 8800	MBA PROJECT-FOCUSED CAPSTONE	2

Elective Courses (9 hours)

Students completing the MBA/DDS program will transfer nine hours of coursework from the courses listed below to fulfill elective requirements for the MBA program. Minimum of "B" (3.0 on a 4.0 scale) grade required in each course to be transferred.

Transfer and application of the "professional" hours from UNMC to the UNO MBA program will take place upon completion of the DDS degree. The courses are:

Code	Title	Credits
ORBI 581	Patient Communication and Management	2
DENT 615	Topics in Dental Public Health	1
ORBI 535	Critical Thinking	1
ADRS 687	Seminar in Practice Transition	2
ADRS 610	Practice Management	3
Total Credits		9

MBA/DDS students who have earned undergraduate or graduate degrees in accounting, economics, finance, management, management information systems, or marketing, the MBA core course(s) corresponding to the student's undergraduate major(s) or degree(s) will be waived and the student will complete a directed elective in the waived field in addition to the hours transferred from UNMC. The waived core course will not satisfy degree requirements. Please consult with your advisor for a complete list of approved directed electives.

MBA/DDS students are not eligible to choose an MBA concentration because the DDS courses will comprise all electives.

Other MBA Requirements

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

Business Administration, MBA and UNMC Nursing (MBA/MSN)

The MBA/MSN dual degree program is designed for nursing students who desire to possess both clinical skills and a clear understanding of business management, leadership, and strategic decision making. Graduates will be prepared to anticipate change and to make decisions that balance patient outcomes and the overall cost of care.

Admissions

Application Deadlines

- Spring 2026: November 1
- Summer 2026: April 1 (Limited availability for international applicants)
- Fall 2026: July 1 (June 1 for international applicants)

Admission Criteria

- Students who have already graduated with the MBA or MSN degree are not eligible for the MBA/MSN dual degree program.
- Students must complete separate applications for the MBA and MSN programs and must meet the requirements for each program.
- The admission requirements for the MSN program can be found on the UNMC MSN (<https://www.unmc.edu/nursing/admissions/admissions-information/admissions-information-msn-pmc.html>) website.
- CON students seeking admission to the MBA portion of the dual degree program must complete the UNO Application for Graduate Admission (<https://www.unomaha.edu/graduate-studies/prospective-students/application-process.php>) and request admission to the MBA/MSN program.
- Students who are already enrolled in the Nurse Leader concentration in the CON MSN program may apply for admission to the MBA/MSN dual degree program if their GPA is at least 3.0 and they have not yet completed more than **18 semester hours** towards the MSN program.
- Students who are already enrolled in the UNO MBA program may apply for admission to the MBA/MSN dual degree program if they are in good academic standing and have not completed more than **12 semester hours** towards the MBA program.
- Students qualifying for admission based on the standards outlined above but lacking MBA foundation courses will be granted provisional status until all foundation courses are completed with grades of "B" (3.0 on a 4.0 scale) or above.

MBA Program Specific Requirements

Admission may be granted to an applicant whose record includes at least the following:

- 2.85 junior/senior grade point average
- **Resume** (employment and educational history)
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.

- **550; Paper-based TOEFL:** Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

Elective Courses (9 hours)

Students completing the MBA/MSN program will transfer nine hours of coursework from the nursing courses listed below to fulfill elective requirements for the MBA program. Minimum of "B" (3.0 on a 4.0 scale) grade required in each course to be transferred.

Transfer and application of the "professional" hours from UNMC to the UNO MBA program will take place upon completion of the MSN degree. The courses are:

Code	Title	Credits
NRSG 604	Foundations of Population Based Health Policy	3
NRSG 608	Transformational Leadership	3
NRSG 620	Leading Care Systems as Nurse Managers	2
NRSG 624	Evaluating Care Systems for Nurse Managers	3
Total Credits		11

MBA/MSN students who have earned undergraduate or graduate degrees in accounting, economics, finance, management, management information systems, or marketing, the MBA core course(s) corresponding to the student's undergraduate major(s) or degree(s) will be waived and the student will complete a directed elective in the waived field in addition to the hours transferred from UNMC. The waived core course will not satisfy degree requirements. Please consult with your advisor for a complete list of approved directed electives.

MBA/MSN students are not eligible to choose an MBA concentration because UNMC CON courses will comprise all electives.

Other MBA Requirements

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

Academic Performance MBA Program Two Strikes Rule

A UNO MBA student may enroll only **twice** in each MBA course. If the class is not successfully completed on the second attempt then the student will be dismissed from the MBA program. An enrollment is defined as being enrolled in the course after the last day to withdraw via MavLINK and receive a 100% refund. The last day for withdrawal will be as stated in the

current academic calendar for a full semester course (3 credits); for an eight-week course (2 credits) the last day for withdrawal will be the third day (including the start date) of the course as designated in MavLINK.

MBA Program Academic Performance

Students earning a third grade of "C+" or lower (or any single grade below "C" 1.67 on a 4.0 scale) will be automatically dismissed from the MBA program. Dismissed students will be immediately administratively withdrawn from all courses in which they are enrolled for MBA credit. Students who have been dismissed may not enroll in any courses for MBA credit in any subsequent semester or summer session until reinstatement has been granted by the College of Business Administration's Graduate Program Council (CBA GPC) and graduate dean.

Students who have been dismissed from the MBA program may submit a written petition for reinstatement to the CBA GPC. Students who have petitioned the CBA GPC for reinstatement may not enroll in any courses for MBA credit. Upon receiving a petition for reinstatement, the CBA GPC will evaluate the student's written petition for reinstatement. As part of the reinstatement petitioning process, the CBA GPC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the student and this information may be used by the CBA GPC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and not all students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period of the CBA GPC's discretion and must satisfy the probationary conditions specified by the CBA GPC. In addition to probationary conditions, reinstated students will be subject to additional reinstatement conditions as specified by the CBA GPC. These reinstatement conditions will include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher (the exact grade requirements for retaken courses may in fact be higher than "B" (3.0). Students not achieving the probationary or reinstatement conditions will be automatically dismissed.

CBA GPC Will Consider Grades Earned in Repeat Courses

When making decisions based on Quality of Work Standards issues, the CBA GPC will consider the initial grade(s) received in a course as well as the most recent grade received for the course. This approach differs from the method used to calculate GPA in a student's MavLINK file, where the most recent grade replaces the grade received in the previous attempt.

Student Responsibilities

- Each student admitted to graduate studies is responsible for knowing the procedures and regulations of the Graduate College.
- Each student admitted to the MBA/MSN will, within the first semester of their enrollment in the MBA program, file a plan of study in close consultation with a graduate advisor.
- Once admitted to the MBA/MSN dual degree program, the MBA Director in the College of Business Administration will oversee the student's progress in the MBA curriculum, and faculty in the College of Nursing will oversee the student's progress in the MSN curriculum.
- Each student has to complete the MBA orientation.
- Students must maintain academic eligibility as defined by each degree program.

Business Administration, MBA and UNMC Master of Perfusion Science

The health care industry is an ever-changing landscape, requiring those in leadership positions to navigate complex issues associated with patient care, operations, change management and public policy, to name a few.

Allied health professionals comprise approximately 60 percent of the total health care workforce, and together provide the fundamental framework critical to the success of the American health care system. Students jointly pursuing education in an allied health profession and in business are uniquely prepared not only for health care practice, but also for taking on key decision-making roles in health care organizations.

Business for Bioscientists Certificate

This certificate program provides a basic understanding of business principles to biomedical PhD students. While UNMC PhD students receive extensive training in research methods and the principles of biology and medicine, they receive no formal training in business fundamentals. However, a significant portion of biomedical PhD students obtain employment in pharmaceutical, biotechnology, and other industries. For students with these career goals, formal training in business would markedly enhance their career options and competitiveness for these industry positions.

Human Resources and Training Certificate

The purpose of the graduate certificate in human resources and training (HRST) is to help post-baccalaureate students and working professionals expand their educational background and enhance their knowledge and skills in either human resources or training and development. The first concentration, human resources, focuses on enhancing organizational effectiveness through employee recruitment, selection, placement, performance evaluation, motivation, and retention. The second concentration, training and development, focuses on enhancing training skills and program design including developing, implementing, assessing, and delivering training programs. The HRST certificate is useful for individuals currently employed in the human resources or training fields and for individuals who desire to enter those fields. The graduate courses required for this certificate address both theory and application from the fields of communication, psychology, and business.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications are accepted and reviewed on a rolling basis throughout the year.

Other Requirements

- Admission to the HRST graduate certificate program requires a baccalaureate degree with at least a 3.0 GPA, a major or a minor (or at least a 15 credit concentration) in communication studies, psychology, business, or related area, plus at least one three credit course in research methods or statistics.

- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

- Statement of Purpose:** A 1000 word maximum statement of purpose essay describing which concentration you wish to pursue and why.
- Resume:** A resume that includes your work history
- Letter of Recommendation:** One letter of recommendation from a current or former supervisor or professor. During your online application process, you will be asked to provide the name and email address of the person writing your recommendation letter. The online application system will send an email to your recommender containing a link for online submission of the recommendation letter.

Academic Performance

In addition to the Quality of Work Standards established by the Graduate College, students in the Logistics & Supply Chain Management certificate program may repeat a BSAD 8xxx level course in which they receive any grade, including "W" or "I" one time. If the class is not successfully completed on the second attempt, the student will be dismissed from the Logistics & Supply Chain Management certificate program.

Each semester, student files will be reviewed where a student received a grade lower than a "B" (3.0 out of 4.0). Students earning more than one grade of "C+" or lower (or any single grade below "C" (1.67 on a 4.0 scale)) will be automatically dismissed from the Logistics & Supply Chain Management certificate program.

Dismissed students will be immediately administratively withdrawn from all MBA courses in which they are enrolled for credit. Students who have been dismissed may not enroll in any MBA courses for credit in any subsequent semester or summer session until reinstatement has been granted by the CBA GPC and the graduate dean.

Communication

Degree Programs Offered

- Communication (MA) (p. 1050)

Certificates Offered

- Communication Certificate (p. 1052)
- Human Resources and Training Certificate (p. 1048)

Communication, MA

The program provides a learner-centered, flexible, and dynamic environment designed to help students pursue their career goals—whether that's obtaining professional employment, preparing for a career in higher education, or for upskilling within their current profession.

We aspire to offer an empowering educational experience through exceptional faculty who are committed to cultivating students' breadth and depth of knowledge about communication. We strive to foster a spirit of inquiry, meet individual student goals, and prepare students for professional and personal success.

Fast Track

The School of Communication has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine (9) graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing BA/BS in communication studies or a BA/BS in journalism and media communication
- Students must have completed no less than 75 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0 and a major GPA of 3.75.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
- Admission to Fast Track does NOT guarantee admission to the graduate program.
- The admit term must be after the completion term of the undergraduate degree.

The following courses may be taken under the Fast-Track program:

COMM 8000, Foundations of Communication

COMM 8010, Quantitative Methods

COMM 8020, Qualitative Methods

COMM 8040, Rhetorical Methods

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 1
- Fall 2026: August 1

If you are applying for a **graduate assistantship**, both admissions and assistantship application materials must be completed by **March 1** (for Fall Semester) and **October 1** (for Spring Semester) for priority consideration.

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** The statement should be 500 words in length and should answer the following questions:
 - Why have you chosen the UNO School of Communication master's degree program?
 - What are your areas of scholarly interest and research?
 - What are your personal or professional plans after you complete the master's degree? How will this degree support your plans?
- **Writing Sample:** An academic or otherwise-demonstrative writing sample (e.g., term paper, senior thesis, or research paper) that demonstrates the applicant's strengths as a writer and researcher.
- **Resume or CV:** Identify major and minor field(s) of study, overall GPA, and GPA within major, as well as all relevant experience.
- **Letters of Recommendation** - Two letters are required. A minimum of one letter from a faculty member of the applicant's undergraduate program should be included if at all possible. The other letter should address an applicant's ability to do advanced-level academic work. References from family members, friends, or other non-professional sources will not be considered.

Admission Status

- **Unconditional Admission** may be granted to a student whose record includes at least the following:
 - Certification of a bachelor's degree from a regionally accredited institution
 - Documentation through official transcripts using a 4.0 grade point scale of having earned at least:
 - A 3.25 in communication or undergraduate major work.
 - Either a 3.0 overall undergraduate average GPA or a 3.25 average GPA in the last half of undergraduate credit hours, and
 - Inclusion of nine (9) to 15 undergraduate (junior or senior level) theory and/or research courses in communication (e.g., communication studies, speech communication, broadcasting, journalism, mass communication, media communication or studies, rhetoric) or a related field as approved by the graduate program chair (GPC) and/or the graduate admissions committee.
- **Provisional Admission** may be granted for reasons of experience, maturity or other circumstances to a student who does not meet the unconditional admission standards. A student will not be admitted who does not meet UNO Graduate College provisional admission standards (a 2.75 GPA for both undergraduate major and minor).
 - The school's graduate admission committee may require any one or any combination of the following in deciding whether or not to recommend provisional admission:
 - Completion of prescribed course(s) (not for graduate credit) with a grade of "B" (3.0/4.0) or better, with course(s) approved in advance by the GPC and/or the graduate admission committee.
 - Completion of the first 12 graduate hours of coursework with a grade of "B" (3.0/4.0) or better as a non-declared student.
- Provisionally admitted graduate students cannot serve as graduate teaching assistants until they have met the requirements of the provisional admission.

Degree Requirements

Required/Core Courses

Students will take a total of 12 credit hours of core classes. These classes expose students to mass and speech communication theories as well as research methodologies in the communication discipline. The core courses must be completed within the first 18-21 credit hours of a student's program. (This requirement may be waived for students entering the communication graduate program with approved graduate credits to be used in the plan of study). If a student fails to achieve an average grade of "B" (3.0/4.0) in the overall core, the student may retake each core course with a grade below "B" once, and must obtain an average grade of "B" or higher to remain in the program.

Thesis Option

Code	Title	Credits
Required Core Courses		
The 12 hours of required courses listed below must be completed with an average grade of "B" or better:		
COMM 8000	FOUNDATIONS OF COMMUNICATION	3
COMM 8010	COMMUNICATION RESEARCH METHODS SEMINAR: QUANTITATIVE	3
COMM 8020	COMMUNICATION RESEARCH METHODS SEMINAR: QUALITATIVE	3
COMM 8040	SEMINAR IN RHETORICAL CRITICISM	3
Electives		
Select 15 elective hours in consultation with the graduate program chair. These will be denoted as either COMM, CMST, or JMC. Three to six elective hours from outside the school may be counted toward degree requirements with permission of the graduate program chair. Electives must be completed with an average grade of "B" or better to maintain GPA requirements for program and university.		15
COMM 8990	THESIS	6
Total Credits		33

All candidates should carefully review the Graduate College requirements for forming the thesis supervisory committee, for submitting the Thesis Supervisory Committee form, the Thesis/Thesis Equivalent Proposal Approval form, and the Report on Completion of Degree form as well as for the final approval and submission of the thesis.

Project Option

Code	Title	Credits
Required Core Courses		
The 12 hours of required courses listed below must be completed with an average grade of "B" or better:		
COMM 8000	FOUNDATIONS OF COMMUNICATION	3
COMM 8010	COMMUNICATION RESEARCH METHODS SEMINAR: QUANTITATIVE	3
COMM 8020	COMMUNICATION RESEARCH METHODS SEMINAR: QUALITATIVE	3
COMM 8040	SEMINAR IN RHETORICAL CRITICISM	3
Electives		
Select 18 elective hours in consultation with the graduate program chair. These will be denoted as either COMM, CMST, or JMC. Three to six elective hours from outside the school may be counted toward degree requirements with permission of the graduate program chair. Electives must be completed with an average grade of "B" or better to maintain GPA requirements for program and university.		18

COMM 8970	GRADUATE PROJECT	3
Total Credits		33

The project, in lieu of a thesis, is based on a proposal approved by the student's committee. The student must complete a project which is defended orally before their project committee.

Exit Requirements

Students will take either six (6) thesis credit hours or three (3) project hours during the final semester(s) of their program. These credit hours must be 1) taken either concurrently or after the student's final semester of coursework and 2) must be taken and completed in order to successfully complete the program. It is strongly encouraged that coursework is completed prior to the thesis or project. Students will meet with the GPC to discuss which option to consider.

Thesis Option

All candidates should carefully review the Graduate College requirements for forming a supervisory committee, for submitting the Thesis Supervisory Committee form, the Thesis/Thesis Equivalent Proposal Approval form, and the Report on Completion of Degree form as well as for the final approval and submission of the thesis. Theses are defended orally before the student's thesis committee.

Project Option

The project, in lieu of a thesis, is based on a proposal approved by the student's committee. Projects are defended orally before the student's project committee.

Communication Certificate

The communication graduate certificate program provides potential students who are not interested in a complete MA program the opportunity to expand their knowledge of the discipline or customize their learning toward a specific area of study. This can be helpful for career promotion, professional opportunities, teaching in-discipline at the community college/dual-enrollment level, personal exploration, etc.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications are accepted and reviewed on a rolling basis throughout the year.

Other Requirements

- Admission to the HRST graduate certificate program requires a baccalaureate degree with at least a 3.0 GPA, a major or a minor (or at least a 15 credit concentration) in communication studies, psychology, business, or related area, plus at least one three credit course in research methods or statistics.
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

- Statement of Purpose:** A 1000 word maximum statement of purpose essay describing which concentration you wish to pursue and why.
- Resume:** A resume that includes your work history
- Letter of Recommendation:** One letter of recommendation from a current or former supervisor or professor. During your online application process, you will be asked to provide the name and email address of the person writing your recommendation letter. The online application system will send an email to your recommender containing a link for online submission of the recommendation letter.

Degree Requirements

Code	Title	Credits
Area One		
Select three hours from the following		3
BSAD 8136	HUMAN RESOURCE MANAGEMENT	
CACT 8530	PERSONNEL PSYCHOLOGY AND LEADERSHIP	
PSYC 8646	PERSONNEL PSYCHOLOGY	
Area Two		
Select three hours from the following		3
BSAD 8156	TALENT DEVELOPMENT	
COMM 8156	ORGANIZATIONAL TRAINING AND DEVELOPMENT	
PSYC 9620	TRAINING AND DEVELOPMENT	
Area Three		
Select three hours from the following		3
BSAD 8250	ORGANIZATIONAL BEHAVIOR: ENHANCING HUMAN & ORGANIZATIONAL CAPABILITIES	
COMM 8170	ORGANIZATIONAL COMMUNICATION AND LEADERSHIP	
PSYC 8636	ORGANIZATIONAL PSYCHOLOGY	
PSYC 9421	POSITIVE ORGANIZATIONAL PSYCHOLOGY AND LEADERSHIP	
or CACT 8520	POSITIVE ORGANIZATIONAL PSYCHOLOGY AND LEADERSHIP	
Area Four		
Select six hours from the following		6
BSAD 8096	MANAGING COLLABORATIVE ENGAGEMENT	
BSAD 8146	TOTAL REWARDS	
BSAD 8166	STAFFING THE ORGANIZATION	
COMM 8010	COMMUNICATION RESEARCH METHODS SEMINAR: QUANTITATIVE	

COMM 8020	COMMUNICATION RESEARCH METHODS SEMINAR: QUALITATIVE
COMM 8250	STRATEGIC COMMUNICATION
COMM 8576	INTERCULTURAL COMMUNICATION: THEORY AND PRACTICE
PSYC 8656	CREATIVITY AND INNOVATION IN ORGANIZATIONS
or CACT 8506	CREATIVITY AND INNOVATION IN ORGANIZATIONS
PSYC 9610	MOTIVATION & MORALE
PSYC 9660	CRITERION DEVELOPMENT AND PERFORMANCE APPRAISAL

Total Credits

15

Courses must be completed in at least two of the three units (i.e., business administration, communication, or psychology) associated with this certificate program.

Exit Requirements

Portfolio

Students admitted to the HRST graduate certificate program must create a portfolio (notebook) containing at least one sample project from each course. A portfolio review will be conducted by the student's advisor before the certificate is awarded. Contact your advisor during the last semester of your program.

Other Program-Related Information

Many courses are offered online-check each semester schedule for details and availability. Students may need to obtain approval and/or a permit number to enroll in some courses. For psychology (PSYC) courses, please contact the instructor for approval; for business administration (BSAD) courses, please contact the MBA advisor at 402.554.3010, and for communication studies (CMST) courses, please contact the certificate advisor at 402.554.6079.

Computer Science

Degree Programs Offered

- Computer Science, MS (p. 1054)

The graduate certificate programs provide focused, short-term programs of study beyond the baccalaureate degree for individuals seeking to improve their experience, advance in position and salary, expand their education background, and complete work that may potentially be applied to a master's degree. Students who are admitted to the MS in Computer Science program may transfer credits from certificate courses to a relevant concentration in the MS program. Students currently in the MS in Computer Science may also complete certificate programs as part of their studies.

Certificates Offered

- Artificial Intelligence Certificate (p. 1057)
- Communication Networks Certificate (p. 1058)
- Machine Learning Certificate
- Software Engineering Certificate (p. 1059)
- Systems and Architecture Certificate (p. 1060)

Applicants with an undergraduate degree in Computer Science or Computer Engineering from an accredited institution are expected to have a GPA of at least 3.0. Applicants who have degrees in other fields will also be considered for admission. Students may make up their deficiencies in Computer Science by completing transition courses.

Each certificate requires completion of four graduate courses and usually involve a combination of core and elective courses. Provisional admission

courses (such as undergraduate prerequisites) for the certificate must be completed with a grade of "B-" or better. Provisional courses must be completed before continuing any certificate program. Each graduate level course might have prerequisites that must be satisfied before the associated graduate course can be taken. The exit requirements are the same as the MS in Computer Science program. This includes that students must maintain at least a 3.0 GPA and can have no grade lower than a "B-". The undergraduate transition courses assigned at the time of admission must be passed following the same policy.

Computer Science, MS

The vision of the MS in computer science graduate program is to cultivate an innovative research and teaching ecosystem that advances computational and AI-driven solutions, empowering society to address complex challenges in an era of rapid technological transformation.

Fast Track

The Department of Computer Science has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate credit hours towards the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
- The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Applicants are strongly encouraged to apply as early as possible, especially if applying for assistantships or scholarships. Some scholarships may have earlier deadlines or run out of funding.

- Spring 2026:
 - October 1 for international applicants who are required to secure a new student visa
 - November 1 for all other applicants
- Summer 2026:
 - March 1 for international applicants who are required to secure a new student visa
 - March 15 for all other applicants
- Fall 2026:
 - May 1 for international applicants who are required to secure a new student visa
 - July 1 for all other applicants

Other Requirements

- The minimum undergraduate grade point average (GPA) requirement for the MS in computer science program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a four-year undergraduate degree.
- **Entrance Exam:** The Graduate Record Exam (GRE) is not required, but those who are applying for a graduate assistantship are strongly encouraged to submit their official GRE results. GRE results cannot be older than five years. Successful applicants have typically had GRE scores of 150 verbal and 160 quantitative or better.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Resume:** Submit a detailed resume indicating your work experience and background.
- **OPTIONAL:** One letter of recommendation from a reference who can evaluate your work and/or academic achievements.
- **OPTIONAL:** Application for Graduate Assistant Position
 - If interested in applying for graduate assistant (GA) positions, please submit a letter stating your research area interests and why you feel you would make a good GA. Please note that GA positions will be considered after admission and program admission is not a guarantee of receiving a GA position.

Degree Requirements

Undergraduate Deficiencies

The curriculum for the MS in computer science requires a basic knowledge of computer fundamentals including mathematics, programming, data structures, computer architecture and operating systems. Successful completion of these courses with a "B-" or better in each course is required to become an unconditionally admitted student.

Code	Title	Credits
CIST 1400	INTRODUCTION TO COMPUTER SCIENCE I	3
CSCI 1620	INTRODUCTION TO COMPUTER SCIENCE II	3
CSCI 2030	MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE	3
CSCI 3320	DATA STRUCTURES	3
CSCI 3660	THEORY OF COMPUTATION	3
CSCI 3710	INTRODUCTION TO DIGITAL DESIGN AND COMPUTER ORGANIZATION	3

Core Courses

The five courses listed below provide an overall breadth in the areas of languages, algorithms, architecture, operating systems, and software engineering. Refer to the UNO Graduate College Quality of Work Standards for additional grade requirements.

Students selecting the thesis/project option or declaring a concentration area as part of their program are required to take three core courses; students selecting coursework option with no area of concentration must take all five core courses (note that some core courses are needed as prerequisites for certain areas of concentration).

Coursework Option

Code	Title	Credits
Core Courses		
CSCI 8000	ADVANCED CONCEPTS IN PROGRAMMING LANGUAGES	3
CSCI/MATH 8080	DESIGN AND ANALYSIS OF ALGORITHMS	3
CSCI 8150	ADVANCED COMPUTER ARCHITECTURE	3
CSCI 8530	ADVANCED OPERATING SYSTEMS	3
CSCI 8700	SOFTWARE SPECIFICATIONS AND DESIGN	3
Electives		
Select either three or five graduate-level computer science courses depending on whether a computer science area of concentration is declared.		
Concentrations		
All areas of concentration require four classes selected according to the requirements of each concentration. See Computer Science Concentrations.		
CSCI 8910	MASTER OF SCIENCE CAPSTONE ¹	3
TOTAL		33

¹ The capstone course should be taken only after students have completed **at least 75%** of course requirements for the major; this includes all core classes. Students with insufficient progress toward degree completion are prohibited from enrolling. Students must have an overall GPA of at least a 3.0 to register for the capstone course.

Thesis Option

Code	Title	Credits

Concentrations

Artificial Intelligence Concentration

The concentration in artificial intelligence provides students with an in-depth understanding of the principles and technologies used to embody machines with human-like intelligent capabilities. Students taking this concentration will have an opportunity to learn, as well as perform hands-on experiments in different areas of artificial intelligence such as software agents, multi-agent and multi-robot systems, machine vision and image processing technologies, neural network based adaptive software systems, heuristics and stochastic optimization techniques for critical decision making, machine learning and knowledge engineering techniques for embedding intelligence in computers and information systems.

Students must take any three (3) of the five (5) core courses listed under the Requirements tab (9 hours).

Code	Title	Credits
Required Courses		
CSCI 8456	PRINCIPLES OF ARTIFICIAL INTELLIGENCE	3

Elective Courses

Select three of the following: 9

CSCI 8110	ADVANCED TOPICS IN ARTIFICIAL INTELLIGENCE
CSCI 8300	IMAGE PROCESSING AND COMPUTER VISION
CSCI 8360	MACHINE LEARNING FOR TEXT
CSCI 8450	ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING
CSCI 8476	PATTERN RECOGNITION
CSCI/MATH 8480	MULTI-AGENT SYSTEMS AND GAME THEORY
CSCI 8486	ALGORITHMS FOR ROBOTICS
CSCI 8590	FUNDAMENTALS OF DEEP LEARNING

Total Credits 12

Database and Knowledge Engineering Concentration

The database and knowledge engineering concentration is designed to introduce students to preliminary as well as advanced concepts in data and knowledge management.

Students must take any three (3) of the five (5) core courses listed under the Requirements tab (9 hours).

Code	Title	Credits
Required Courses		
CSCI 8856	DATABASE MANAGEMENT SYSTEMS	3
CSCI 8340	DATABASE MANAGEMENT SYSTEMS II	3
CSCI 8360	MACHINE LEARNING FOR TEXT	3
Elective Courses		
Select one of the following: 3		
CSCI 8040	LARGE SCALE NETWORK ANALYSIS ALGORITHMS	
CSCI 8050	ALGORITHMIC GRAPH THEORY	
CSCI 8350	DATA WAREHOUSING AND DATA MINING	
CSCI 8390	ADVANCED TOPICS IN DATA BASE MANAGEMENT	
CSCI 8876	DATA MANAGEMENT AND KNOWLEDGE DISCOVERY IN COMPUTING AND INFORMATICS	
Total Credits		12

Dependable Computing Systems Concentration

The objective of the dependable computing systems (DCS) concentration is to provide the students with a broad introduction to the design and evaluation of secure and dependable distributed computing systems. The concentration focuses on the theory, development, performance evaluation, and testing of systems to cope with the today's complex challenges such as failures, malicious adversaries, integrity, safety, and availability. The general domains include network security, software assurance, and fault tolerance. Students will be exposed to both software and hardware aspects for building such systems.

Students must take any three (3) of the five (5) core courses listed under the Requirement tab (9 hours).

Code	Title	Credits
Required Courses		
CSCI 8410	DISTRIBUTED SYSTEMS AND NETWORK SECURITY	3
CSCI 8430	TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT	3
Elective Courses		
Select two of the following: 6		
CSCI 8420	SOFTWARE ASSURANCE	
CYBR 8436	QUANTUM COMPUTING AND CRYPTOGRAPHY	
CSCI 8450	ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING	
CSCI 8610	FAULT TOLERANT DISTRIBUTED SYSTEMS	
CSCI 8760	FORMAL METHODS IN SOFTWARE ENGINEERING	
Total Credits		12

Network Technologies Concentration

The concentration in network technologies will equip students to design, build, manage and leverage today's complex communication networks. This program covers not only a blend of theoretical topics and practical examples, but also state of the art network technologies such as mobile computing, distributed systems, wireless technologies, and network security.

Students must take any three (3) of the five (5) core courses listed under the Requirements tab (9 hours).

Code	Title	Credits
Required Course		
CSCI 8210	ADVANCED COMMUNICATIONS NETWORKS	3
Elective Courses		
Select three of the following: 9		
CSCI 8040	LARGE SCALE NETWORK ANALYSIS ALGORITHMS	
CSCI 8050	ALGORITHMIC GRAPH THEORY	
CSCI/MATH 8156	GRAPH THEORY & APPLICATIONS	
CSCI 8610	FAULT TOLERANT DISTRIBUTED SYSTEMS	
CSCI 8620	MOBILE COMPUTING AND WIRELESS NETWORKS	
Total Credits		12

Software Engineering Concentration

The concentration in software engineering is designed to address the growing market demand for software engineers. The concentration covers fundamental and advanced principles in all aspects of software development, equipping students with the necessary technical background to quickly adapt to rapidly changing software engineering practices and technologies.

Students must take CSCI 8700 as one of the three (3) core courses chosen from the Requirements tab (9 hours).

Code	Title	Credits
Elective Courses		
Select 4 of the following: 12		
CSCI 8256	HUMAN COMPUTER INTERACTION	
CSCI 8266	USER EXPERIENCE DESIGN	
CSCI/CYBR 8420	SOFTWARE ASSURANCE	

CSCI 8430	TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT
CSCI 8710	MODERN SOFTWARE DEVELOPMENT METHODOLOGIES
CSCI 8760	FORMAL METHODS IN SOFTWARE ENGINEERING
CSCI 8790	ADVANCED TOPICS IN SOFTWARE ENGINEERING
Total Credits	12

Systems Concentration

The systems concentration pertains to the advances in ubiquitous and emerging technologies that span over the complex cores of computing systems such as network communication, distributed computing, operating systems, and computer architecture. Recent advances in computing systems include cloud computing, social computing, Internet of Things, and cyber-physical-systems. The concentration provides the students with the fundamentals of computing systems that can be pursued in hardware, software or a combination of both.

Students must take CSCI 8150 and CSCI 8530 as two of the three (3) core courses chosen from the Requirements tab (9 hours).

Code	Title	Credits
Required Courses		
Select 9 hours from the following:		9
CSCI 8160	INTRODUCTION TO VLSI DESIGN	
CSCI 8446	INTRODUCTION TO PARALLEL COMPUTING	
CSCI 8610	FAULT TOLERANT DISTRIBUTED SYSTEMS	
CSCI 8706	COMPILER CONSTRUCTION	
Elective Courses		3
CSCI 8040	LARGE SCALE NETWORK ANALYSIS ALGORITHMS	
CSCI 8050	ALGORITHMIC GRAPH THEORY	
CSCI 8156	GRAPH THEORY & APPLICATIONS	
CSCI 8430	TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT	
CSCI 8450	ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING	
CSCI 8620	MOBILE COMPUTING AND WIRELESS NETWORKS	
CSCI 8626	3D COMPUTER GRAPHICS	
Any course not taken listed under required courses		
Depending on student's interest, a graduate course approved by GPC		
Total Credits		12

Quality of Work Standards

The Graduate College Quality of Work Standards shall be applied to foundation courses (deficiency courses) as well as courses taken as part of the degree program. In particular, the GPC will recommend to the Graduate College that any

1. Student receiving a grade of "C-" or below in any graduate course or undergraduate foundation course will be dismissed from the program or, in the case of unclassified or non-degree students, be automatically denied admission.
2. Student receiving a grade of "C+" or "C" in any undergraduate foundation course or graduate course will be placed on probation or dismissed from the program. Graduate courses may be repeated once

with GPC approval. Undergraduate foundation courses will follow the repeat policy for IS&T undergraduate courses.

3. At most three graduate courses ending in 6 (8xx6) will be counted toward the degree requirements. Graduate courses with an undergraduate component (listed under Undergraduate Deficiencies) are not eligible as elective courses.
4. Student must have a minimum grade point average (GPA) of 3.0 ("B"), with no grades lower than a "B-".

Artificial Intelligence Certificate

The objective of the certificate in artificial intelligence is to expose students to the principles and technologies used to embody machines with human-like intelligent capabilities and to enable the machines to assist humans in performing complex and hazardous tasks. Students completing this certificate program have an opportunity to learn as well as perform hands-on experiments in different areas of artificial intelligence, including automated software systems such as software agents, multi-agent and multi-robot systems, machine vision and image processing technologies, neural network-based adaptive software systems, heuristics and stochastic optimization techniques for critical decision making, and machine learning and knowledge engineering techniques that embed intelligence in computers and information systems.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: November 1
- Summer 2026: March 1
- Fall 2026: July 1

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Resume:** Submit a resume detailing your work experience and background (if applicable)

Degree Requirements

Provisional Admission

Students who have not taken an undergraduate data structures course with a grade of "B-" or better must do so before they will be allowed to continue in the program.

Code	Title	Credits
CSCI 2030	MATHEMATICAL FOUNDATIONS OF COMPUTER SCIENCE	3
CSCI 3320/8325	DATA STRUCTURES (or equivalent)	3
CSCI 3660	THEORY OF COMPUTATION	3

Completion of the Certificate

During what is expected to be the semester the certificate is completed and prior to the posted deadline, students should apply for the certificate through MavLINK on or before the deadline. If you complete the application form and do not complete all of the requirements for the certificate, contact the Office of Graduate Studies as soon as possible. You must reapply during the next semester in which you expect to complete the certificate; no additional fee is charged to reactivate your application.

The following requirements are due 12 working days prior to commencement:

- "Incomplete" and "NR" grades from previous terms must be removed so that the grade will be in the Office of Graduate Studies.
- All fees, fines, and other obligations due the university must be settled.

For students currently enrolled in courses that are a part of their plan of study, enrollment must be maintained in order to complete the certificate. A grade for any current enrollment must be received by the Registrar's Office no later than the close of business on the fifteenth working day following the end of a semester.

Awarding of Graduate Certificates

The Office of Graduate Studies will mail the certificate to students when all requirements are completed and all obligations to the university are satisfied. The Graduate College will not approve any changes in the student's permanent record once the certificate is awarded.

Communication Networks Certificate

The communication network certificate program is a career program designed to meet the growing industry demand for qualified, highly trained individuals in the field of computer network systems. The certificate is designed to give the working professional both a conceptual view and an in-depth understanding of the latest technologies. The program includes courses ranging from basic concepts such as local area networks to advanced networking concepts such as mobile wireless communication systems and networks.

Machine Learning Certificate

The recent advances in machine learning (ML) have made significant impacts in diverse fields such as health care, agriculture, transportation, education, global security, etc. Machine learning experts are in very high demand for right now and the foreseeable future. The ML graduate certificate will prepare students to become data scientists, machine learning algorithm designers, deep learning systems engineers, computer vision experts, software and application developers, and other machine learning related professionals.

Software Engineering Certificate

Software engineering is the systematic application of engineering and computer science principles to the development, maintenance and analysis of complex software systems. The demand for software engineers is very

high, and is expected to continue for many years to come. The certificate in software engineering will provide students with technical knowledge and skills to apply modern software engineering processes, methods, and tools to tackle real-world requirements, equipping them for career advancement as software professionals.

Completion of the Certificate

During what is expected to be the semester the certificate is completed and prior to the posted deadline, students should apply for the certificate through MavLINK on or before the deadline. Information can be found here (<http://www.ses.unomaha.edu/registrar/graduate.php>). If you complete the application form and do not complete all of the requirements for the certificate, contact the Office of Graduate Studies as soon as possible. You must reapply during the next semester in which you expect to complete the certificate; no additional fee is charged to reactivate your application.

The following requirements are due 12 working days prior to commencement:

- "Incomplete" and "NR" grades from previous terms must be removed so that the grade will be in the Office of Graduate Studies.
- All fees, fines, and other obligations due the university must be settled.

For students currently enrolled in courses that are a part of their plan of study, enrollment must be maintained in order to complete the certificate. A grade for any current enrollment must be received by the Registrar's Office no later than the close of business on the fifteenth working day following the end of a semester.

Awarding of Graduate Certificates

The Office of Graduate Studies will mail the certificate to students when all requirements are completed and all obligations to the university are satisfied. The Graduate College will not approve any changes in the student's permanent record once the certificate is awarded.

Systems and Architecture Certificate

This certificate provides students with knowledge in the underlying architecture of computers. Students may choose either the hardware track or the software track. In the hardware track, students gain more in-depth knowledge of the field. Students in this track will develop skills to perform system and component design, quality assurance, and testing. In the software track, knowledge in the underlying architecture helps in generating and understanding optimized software. Students in this track will develop skills that will help them perform systems programming, language processing, and system administration.

Computer Science Education Degree Programs Offered

- Computer Science Education, MS (p. 1061)
- Computer Science Education Certificate (p. 1063)

Computer Science Education, MS

This degree program is intended for those with a passion for the teaching and learning of computational thinking, computer science, and information technology skills. By developing both content knowledge and pedagogical skills related to the computing disciplines, this program is ideal for educators looking to empower young people to become the creators of next generation technologies.

In completing program coursework, certified Nebraska teachers will also meet requirements for the IT supplemental endorsement. Teachers from other states should consult with their corresponding state officials to consider local credentialing applicability.

Program Website (<http://www.unomaha.edu/college-of-information-science-and-technology/computer-science-education/graduate/ms-csed.php>)

Other Program Related Information

Students who hold current Nebraska teaching certification are eligible for the IT Supplemental Endorsement upon successfully completing the 15 hour core courses.

Grades of 'C' or lower cannot be used when applying for the State of Nebraska IT Supplemental Endorsement.

Student Learning Outcomes

Upon completion of the MS in computer science education, students will be able to:

- Demonstrate CS knowledge and skills by creating computational artifacts.
- Articulate a vision for fair practices in CS education.
- Responsively implement evidence-based pedagogy to facilitate meaningful learning experiences.
- Design learning experiences that implement evidence-based pedagogy.
- Describe relevant and recent research finding in computer science education including how they might be applied in the classroom.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 1
- Summer 2026: April 1
- Fall 2026: July 1

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet minimum language proficiency score requirement in order to be considered for graduate admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose** addressing the following:
 - Describe your academic and professional journey. Discuss your background personal and professional experiences, and your current educational context. Be sure to explain your motivation for pursuing this program at this point in your career.
 - In order to advise you on initial coursework, please describe any prior formal or informal training you have completed in computing, computer science, and information technology. This includes, but is not limited to programming/coding, web design, systems administration, computing networking, databases, and computer applications.
 - Discuss your post-master's degree plans. How will the MS in computer science education contribute to your future endeavors

related to P-12 students, educators, administrators or other community stakeholders.

- **Resume:** Professional resume or curriculum vitae
- Copy of your current teacher certification (if applicable)
- International students who do not intend to teach in the United States may be eligible for admission.

Counseling, MS

The purpose of the Department of Counseling is to prepare a diverse student population at the master's degree level for professional service as school counselors, clinical mental health counselors, student affairs professionals, and/or for advanced study. Graduates of the program are prepared to function professionally within their area(s) of concentration.

As dedicated practitioners, reflective scholars, and responsible citizens, our graduates are prepared to fill the need for highly trained professionals. Graduates are trained to support the broad range of counseling needs of the metropolitan community including: individual, couples, family and group counseling.

Program Related Information

Program Contact

unocounadmission@unomaha.edu
402.554.2764

Program Website (<https://www.unomaha.edu/college-of-education-health-and-human-sciences/counseling/>)

Other Program Related Information

- Earning a graduate degree in clinical mental health counseling or school counseling satisfies only the academic requirements for licensure and/or certification in the state of Nebraska. Students should consult the appropriate state agency/department for guidance on gaining state licensure and/or certification.
- Students should be aware that licensure and/or certification requirements often vary by state. Students interested in gaining professional licensure and/or certification outside of Nebraska should consult their intended state's licensing/certification office/department for appropriate guidelines and timelines.
- An alternative counseling endorsement is available for students in the school counseling concentration who do not hold degrees in education. This endorsement eliminates the two-year teaching requirement and includes an additional 12 credit hours. Students choosing the alternative endorsement route will complete a 60 credit school counseling curriculum instead of the 48 credit school counseling curriculum.
- Successful completion of all courses and a comprehensive exam in the student's respective concentration are requirements for graduation.
- Graduates are recommended only for positions consistent with the concentration they completed.
- Professional background checks are required for all students following admission to the program and again prior to beginning their practicum experience.
- Candidates are admitted and permitted to continue programs in counseling on the basis of their potential for successful training and professional practice. Candidates are evaluated on an ongoing basis while enrolled with respect to their suitability for continuation in the program prior to taking the counseling practicum or internship courses. Specific course and grade requirements to take practicum courses are available in the Department of Counseling.

- The P-12 school counseling and clinical mental health counseling concentrations are accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP; 2009), the national accrediting agency for counselor education programs.

Unclassified Students

Students who have already earned a master's degree in counseling and need to enroll in additional courses for licensure should apply as unclassified students. Unclassified students are allowed to take courses for which they meet the prerequisite. Successful completion of graduate courses as an unclassified student does not obligate the department to accept those courses for credit toward the fulfillment of degree requirements. Formal advisement in an endorsement area is required.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- **Clinical Mental Health Counseling and P-12 Counseling**
 - Spring 2026: September 15
 - Summer 2026: February 15
 - Fall 2026: February 15
- **Student Affairs Practice in Higher Education and Unclassified**
 - **Spring 2026, Summer 2026, and Fall 2026:** Applications for this concentration are accepted on a rolling basis. All materials must be submitted prior to the semester in which the applicant has elected to begin coursework.
 - Please note, applications submitted for the student affairs practice in higher education or unclassified cannot be changed to the clinical mental health counseling or P-12 counseling concentrations.

Other Requirements

- Bachelor's degree
- Three credit hours of behavioral science coursework is suggested.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>) must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** 2 pages (double-spaced) addressing the following:
 - Reason(s) for pursuing the counseling profession,
 - Relevant experience,
 - Personal career goals,
 - Reason(s) for choosing UNO's Counseling program.
- **Resume or curriculum vitae**
- **Letters of Recommendation:**
 - Clinical Mental Health Counseling, P-12 Counseling and Unclassified require two letters of recommendation and should be from persons who can speak to the applicant's professional competence and/or academic ability.

- Student Affairs Practice in Higher Education concentration requires no letters of recommendation.
- Group admissions interview (required for admission to the clinical mental health counseling and P-12 school counseling concentrations).

Degree Requirements

Code	Title	Credits
Concentrations		
Select an area of concentration:

Academic Performance

Ethical Conduct: It should be understood that academic performance is not the only criterion for continuation in the program or for graduation. Candidates are expected to maintain the highest standards of ethical conduct pertaining to academic course work, professional practice and research activity. Any breach in ethical conduct shall be subject to disciplinary action, regardless of the candidate's prior or current academic performance. See the "American Counseling Association Code of Ethics" for specific guidelines.

Criminology and Criminal Justice

Degree Programs Offered

- Criminology and Criminal Justice, MA (p. 1070)
- Criminology and Criminal Justice, MS (p. 1071)
- Criminology and Criminal Justice, PhD (p. 1073)
- Master of Public Administration, MPA-Criminology and Criminal Justice, MS (p. 1185)
- Master of Social Work, MSW-Criminology and Criminal Justice, MS (MSW/CRCJ) (p. 1074)

Certificates Offered

- Managing Juvenile and Adult Populations Certificate (p. 1076)

Criminology and Criminal Justice Graduate Courses

CRCJ 8010 NATURE OF CRIME (3 credits)

This course provides an overview of the major dimensions of crime in the U.S. Content areas included are the epidemiology of crime, the costs of crime and typologies of crime and criminals.

Prerequisite(s): Admission to UNO Graduate College.

CRCJ 8020 SEMINAR IN ADMINISTRATION OF JUSTICE (3 credits)

This course is designed to provide students with a critical understanding of responses to crime. Particular emphasis is placed on theory and research bearing upon the effectiveness of the policies and strategies of the principal institutions of the criminal justice system - the police, courts and corrections. Additionally, philosophical and practical matters pertaining to "justice" and "fairness" in the administration of the criminal law are explored.

Prerequisite(s): Admission to UNO Graduate College.

CRCJ 8030 CRIMINAL JUSTICE RESEARCH THEORY AND METHODOLOGY (3 credits)

Research theory and methodology in the social sciences as applicable to criminal justice; preparation of research designs, conceptual models; sampling procedures; and development of individual research papers.

Prerequisite(s): Admission to UNO Graduate College.

CRCJ 8040 SEMINAR IN POLICE AND SOCIETY (3 credits)

This course is designed to explore the role of the police in American society. Attention is given to the origins of policing, the nature of police organizations and police work, and patterns of relations between the police and the public. The values of a democratic society as they affect the law enforcement role are discussed.

Prerequisite(s): Admission to the graduate program in Criminology and Criminal Justice; or admission to the UNO graduate program and permission of instructor.

CRCJ 8050 SEMINAR IN CORRECTIONS (3 credits)

This course is designed to give an analytical perspective to the history, development, implementation and future of critical issues in the field of corrections. Primary focus will be directed toward an exploration of the various theoretical approaches to corrections and the research intended to support or refute these perspectives.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8060 SEMINAR IN THE CRIMINAL COURT SYSTEM (3 credits)

This course is designed to provide a social science perspective on the role of the courts in the criminal justice system. The ideals of the system will be compared with actual functioning, and court reform programs and proposals will be critically examined.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8070 SEMINAR IN CRIMINAL LAW AND PROCEDURE (3 credits)

This course is designed to examine substantive criminal law as the basis of social control in our country. Contemporary issues such as the insanity defense, decriminalization of so-called victimless crimes, sexual assault and abortion, and current proposals to assist victims of crimes will be among the topics explored. In addition, current criminal procedure problems relating to right to counsel, search and seizure and interrogation will be examined.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8080 SEMINAR IN JUVENILE JUSTICE (3 credits)

An inquiry in the social ramifications of the entire juvenile delinquency process including labeling, detention, incarceration and tolerance. Pre- and post-adjudicatory issues are dealt with as well as a realistic perspective given to delinquency prevention strategies.

Prerequisite(s): Admission to UNO graduate program.

CRCJ 8090 SEMINAR IN THEORETICAL CRIMINOLOGY (3 credits)

A study of the etiology of crime as a social phenomenon and an objective analysis of the historical influences and thought which molded its development into an accepted contemporary science.

Prerequisite(s): Admission to graduate program in criminology and criminal justice; or admission to UNO graduate program and instructor permission.

CRCJ 8100 CRIMINAL JUSTICE ORGANIZATION, ADMINISTRATION AND MANAGEMENT (3 credits)

This course will deal with issues in the organization and administration of modern justice agencies. The students will be exposed to theories, concepts, and issues relating to the administration and organization of justice agencies.

Prerequisite(s): Admission to the graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 8110 VICTIMOLOGY (3 credits)

The Victimology seminar provides an overview of key research areas on prevalence, predictors, and consequences of various forms of victimization. By the end of the course, students will develop a critical understanding and appreciation of the development and current state of theories of victimology, measurement of different types of victimization, and quantitative and qualitative results that have been used to inform research in the field. Furthermore, students will learn how to critically analyze and interpret primary research regarding victimization.

Prerequisite(s): Admission to UNO graduate program.

CRCJ 8120 RACE, CRIME AND INJUSTICE (3 credits)

This course examines inequities in the context of the cumulative effects of biases in the criminal justice system. Students learn how macro-structural conditions, community violence, depletion of male role models as the result of incarceration, and adversarial contacts with police can negatively impact young children residing in some lower socio-economic communities of color as well as increase their likelihood of early contact with the juvenile justice system.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and permission of the instructor.

CRCJ 8130 SEMINAR IN WOMEN AND CRIMINAL JUSTICE (3 credits)

This course focuses on the experiences of women in the criminal justice system. It will cover the history of criminological theory on women, application of mainstream criminological theory to women, and women as offenders, victims, and professionals in the criminal justice system.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8136 SOCIOLOGY OF DEVIANT BEHAVIOR (3 credits)

This course is designed to investigate the etiology of many forms of norm-violating conduct. Emphasis will be placed on rule-breaking behavior as defined in the criminal statutes. (Cross-listed with CRCJ 4130).

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8180 CRIMINAL JUSTICE INTERNSHIP (3 credits)

This course is designed to provide supervised individualized learning experiences in a selected criminal justice agency. The principal objective of the internship is to provide students with the opportunity to apply theoretical and methodological principles acquired in graduate courses to the analysis of problems in local criminal justice agencies.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice, successful completion of 15 hours of graduate work, and permission of instructor. Not open to non-degree graduate students.

CRCJ 8190 INDEPENDENT STUDY (1-3 credits)

Individual projects in research, literature review or creative production which may or may not be an extension of course work. The work will be supervised and evaluated by departmental graduate faculty members.

Prerequisite(s): Admission to graduate program at UNO, and permission of instructor.

CRCJ 8210 PROGRAM EVALUATION AND POLICY ANALYSIS (3 credits)

This course is a survey of program evaluation and policy analysis techniques. The focus is on theoretical foundations of the Criminal Justice policy process, program development and implementation, research designs specific to program evaluation and policy research, and methodological techniques commonly used to evaluate criminal justice programs and policies.

Prerequisite(s): Admission to doctoral program in Criminology and Criminal Justice; or admission to graduate program at UNO and CRCJ 8030; or instructor permission.

CRCJ 8230 TERRORISM (3 credits)

A course devoted to an exploration and analysis of contemporary special problems in the broad spectrum of law enforcement and corrections.

CRCJ 8300 COMMUNITIES AND CRIME (3 credits)

This course is designed to provide an analytical perspective to the meaning of community, theories that explain community-level crime, and police decision-making at the community level. The primary focus will be directed toward an exploration of the various theoretical approaches to explaining community-level crime, with a special emphasis on police action. This course will enable students to become proficient in the topic of community-level theories of crime and determine whether communities perpetuate or prevent criminal behavior.

Prerequisite(s): Admission to a Criminology and Criminal Justice graduate degree program, or UNO SCCJ Graduate Program Coordinator permission. Not open to non-degree graduate students.

CRCJ 8356 COMMUNITY-BASED CORRECTIONS (3 credits)

This course is intended for advanced students with a special interest in the correctional process as applied in a community setting. It is designed to focus on innovative community-based strategies for dealing with the offender as well as the traditional processes of probation and parole.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 8400 INTIMATE PARTNER VIOLENCE (3 credits)

This course examines the complex nature and dynamics of intimate partner violence (IPV). The course begins with a general presentation of IPV, such as definitions, characteristics, and the cycle of IPV. Then, theories of IPV are presented and various sources of IPV data and measurement issues are discussed. The majority of the course focuses on the historical development/evolution and current response of the criminal justice system to IPV including law enforcement response, the use of protection orders, domestic violence courts, and batterer intervention treatment programs. Additionally, the course examines "special topics" regarding IPV including teen dating violence, intimate partner homicide, and IPV within criminal careers.

Prerequisite(s): Admission to a UNO graduate degree program, or permission of the UNO School of Criminology and Criminal Justice Graduate Program Coordinator. Not open to non-degree graduate students.

CRCJ 8430 HUMAN TRAFFICKING (3 credits)

This course is designed to provide students with a systematic introduction to the study of human trafficking. Students will learn about the prevalence, predictors, and consequences of human trafficking. Additionally, students will develop a critical understanding and appreciation of the development and current state of theories, measurement, and quantitative and qualitative results that can be used to inform our understanding of the nature of these events, the victims who are harmed, the individuals who facilitate these crimes, and identification and response initiatives.

Prerequisite(s): Admission to a UNO graduate degree program, or UNO SCCJ Graduate Program Coordinator permission. Not open to non-degree graduate students.

CRCJ 8450 SEXUAL VIOLENCE (3 credits)

This course will examine the complicated nature and dynamics of sexual violence (SV). The course will begin with a general presentation of sexual violence, such as definitions and the nature, characteristics, and extent of SV. We will also consider the impact of doing "sexual violence" work on criminal justice and victim service practitioners (e.g., vicarious trauma) and the importance of self-care. Next, various tools to measure SV, sources of SV data, and measurement issues will be discussed. Then, we will move on to the major focus of this class - the historical development and evolution of different legislative, criminal justice system, and victim service system responses to sexual violence. Finally, we will examine some of the responses to sexual violence that have been generated outside of formal systems of care.

Prerequisite(s): Admission to the University of Nebraska at Omaha Graduate School

CRCJ 8516 VIOLENCE (3 credits)

This course is a survey of the nature and extent of violence. The focus is on patterns of violence across social groups, the causes and correlates of violence and violent behavior, and programs/policies geared toward violence prevention and reduction. Also of interest is the relationship between theory and violence research.

Prerequisite(s): Upper-division CRCJ major; CRCJ minor; or CRCJ 1010 and jr/sr standing.

CRCJ 8800 SPECIAL PROBLEMS IN CRIMINAL JUSTICE (3 credits)

A course devoted to an exploration and analysis of contemporary special problems in the broad spectrum of criminal justice philosophy. This course looks at philosophical issues related to social control. The purpose of this course is to foster a deeper understanding of the reasons, justifications, and problems related to societal approaches to the control of its citizens.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or UNO graduate student and permission of instructor.

CRCJ 8850 RISK/NEEDS ASSESSMENT (3 credits)

This course is designed to provide students with advanced knowledge and understanding risk and needs assessment used in case management and classification within the criminal justice system and related social services.

Prerequisite(s): Admission to graduate program in criminology and criminal justice; or, instructor permission.

CRCJ 8950 STATISTICAL APPLICATIONS IN CRIMINAL JUSTICE & PUBLIC ADMIN (3 credits)

This is a required course which provides a foundation for the use of statistical methods in criminal justice and public affairs research. It will review fundamentals of research, showing the interplay between the theory, the research, the statistical method, and the interpretation.

Prerequisite(s): Admission to UNO Graduate college.

CRCJ 8970 CAPSTONE PROJECT IN CRIMINOLOGY AND CRIMINAL JUSTICE (3 credits)

The Capstone Project offers each student the opportunity to demonstrate mastery of the theory and practice of Criminology and Criminal Justice by applying the knowledge and skills gained in the Master of Science program to a project of the student's choice. This involves completing a project report reflecting the cumulative knowledge gained from these experiences. This class is intended only for students who are completing their Master of Science degree in Criminology and Criminal Justice.

Prerequisite(s): Admission to Criminology and Criminal Justice MS program, and completion of a minimum of 24 credit hours; or permission of Masters Program Coordinator. Not open to non-degree graduate students.

CRCJ 8990 MASTERS THESIS (1-6 credits)

The thesis is required for all students in the MA program. It provides students with an opportunity to integrate theories, concepts, and aspects of the criminology and criminal justice literature with methods and techniques for conducting research, through the completion of an original research project. The thesis project should constitute original research and is conducted under the supervision of a Masters Thesis Committee.

Prerequisite(s): Admission to the MA program in Criminology and Criminal Justice; and, CRCJ 8010, CRCJ 8020, CRCJ 8030, CRCJ 8950 and 6 other 8000+ CRCJ courses. Not open to non-degree graduate students.

CRCJ 9010 SEMINAR ON LAW & SOCIAL CONTROL (3 credits)

This is a required course which will examine the relationships between the state, the law, and the citizen in a democratic society. It will also examine the relationship between social control, law and social change.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or UNO graduate student and permission of instructor.

CRCJ 9020 SEMINAR ON THEORIES OF CRIME (3 credits)

This is a required course which emphasizes conceptual and theoretical issues in contemporary criminological theory. It also provides students with a working knowledge of theory construction.

Prerequisite(s): Admission to Criminology and Criminal Justice MA or PhD graduate programs; or admission to UNO graduate program and instructor permission.

CRCJ 9030 SEMINAR ON RACE, ETHNICITY, AND CRIMINAL JUSTICE (3 credits)

This is a required course which introduces students to current empirical research and theory on racial minorities and the criminal justice system. It focuses on racial minorities as victims of crime, as offenders, and as criminal justice professionals.

Prerequisite(s): Admission to UNO graduate program.

CRCJ 9040 COMPARATIVE CRIMINOLOGY AND CRIMINAL JUSTICE SYSTEMS (3 credits)

This course provides a cross-national examination of the dynamics of criminality and the social response to crime. It also describes the extent and nature of crime in different countries.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and instructor permission.

CRCJ 9050 ACADEMIC WRITING (3 credits)

This course is designed to familiarize students with academic and professional writing with the goal of promoting the development of formal writing and organizational skills. Students will learn how to construct and organize scholarly papers to better prepare them for the comprehensive examination, the doctoral dissertation, the development of scholarly journal articles and monographs, and the development of funded project proposals.

Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and permission of instructor.

CRCJ 9080 ADVANCED STATISTICAL APPLICATIONS (3 credits)

This is a required course which will provide the student with fundamentals of modern statistical techniques used in criminal justice and public affairs research. (Cross-listed with PA 9080).

Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and CRCJ 8950 or PA 8950 and instructor permission.

CRCJ 9090 SPECIAL PROBLEMS IN RESEARCH METHODS (3 credits)

This course will explore specialized topics in research methodology. The course assumes that participants have a firm understanding of the basic principles of research methods and statistics.

Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9100 SPECIAL PROBLEMS IN STATISTICAL ANALYSIS (3 credits)

This course will explore advanced techniques of statistical analysis within the field of criminal justice. It assumes that participants have taken courses in basic descriptive and inferential statistics and advanced multivariate analysis of variance and regression.

Prerequisite(s): Admission to the graduate program in Criminology and Criminal Justice and CRCJ 9080; or admission to UNO graduate program, CRCJ 9080, and permission of the instructor.

CRCJ 9130 ADVANCED RESEARCH ON POLICING (3 credits)

This course will explore critical research issues in American policing. The focus of the course may vary and cover topics such as police discretion, police use of force, labor unions in law enforcement, gender differences in policing, and police organization management.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and permission of the instructor.

CRCJ 9150 SPECIAL TOPICS IN CRIMINAL JUSTICE RESEARCH (3 credits)

This course will focus on specialized topics in criminology & criminal justice research. The purpose of the course is to provide students with an opportunity to read and critique current research on topics such as the history of the criminal justice system, civilian review of the police, sentencing, or the application of the death penalty.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9160 SEMINAR IN COMMUNITY-BASED CORRECTIONS (3 credits)

This course will deal with strategies of correctional reform and with models and practices of community-based corrections. Recent innovations in community-based corrections will be examined to demonstrate how they fit into an overall correctional strategy.

Prerequisite(s): Admission to UNO graduate program.

CRCJ 9170 ADVANCED SEMINAR ON CORRECTIONS (3 credits)

This graduate-level seminar provides an overview of critical areas in corrections research and discusses the many complexities facing corrections. Students will gain an understanding of correctional theory, practices, policies, and issues that impact different stages of correctional processing, incarcerated individuals, correctional staff and the organization. Students will develop a broad but critical understanding of the current state of correctional research.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to a UNO graduate program and instructor permission.

CRCJ 9180 SEMINAR ON THE CRIMINAL COURT SYSTEM (3 credits)

This course will focus on the structure, organization, and operation of the state and federal court systems in the United States. The purpose of the course is to survey recent research on the dynamics of courthouse justice—charging, plea bargaining, bail decision making, jury decision making, and sentencing.

Prerequisite(s): Admission to graduate program in Criminology and Criminal Justice; or admission to UNO graduate program and permission of instructor.

CRCJ 9200 SEMINAR ON VIOLENT CRIME AND CRIMINAL BEHAVIOR (3 credits)

This course exposes students to the leading theories and research in the area of violent criminal behavior. It addresses major violent crimes including rape, homicide, and child sexual physical abuse.

Prerequisite(s): Admission to Criminology and Criminal Justice graduate program; or admission to UNO graduate program and instructor permission.

CRCJ 9220 ADVANCED CRIMINOLOGICAL THEORY AND THEORY CONSTRUCTION (3 credits)

This course is designed to extend students' knowledge of theory and theory construction beyond the basics of the elements and propositions of particular criminological theories. Students will have an opportunity to examine in depth topics such as theory construction, theory integration, theory compatibility and synthesis, and new directions in criminological theory.

Prerequisite(s): CRCJ 8090 or CRCJ 9020 and admission to graduate program in Criminology and Criminal Justice; or permission of instructor.

CRCJ 9250 SEMINAR ON VICTIMIZATION ACROSS THE LIFE-COURSE (3 credits)

The Seminar on Victimization across the Life-course provides graduate students a survey of the primary topics regarding the predictors and consequences of victimization at various points in life. This an elective course for graduate students in Criminology and Criminal Justice. By the end of the course, students will understand major theories, research methods, and seminal research studies in the victimology field. Furthermore, students will learn how to critically analyze and interpret primary research regarding victimization.

Prerequisite(s): Admission to UNO graduate program. Not open to non-degree graduate students.

CRCJ 9600 SEMINAR ON CRIMINAL JUSTICE SYSTEMS (3 credits)

This course is designed to provide students with a multidisciplinary overview of key institutions, processes, and policy issues regarding the criminal justice system. Particular emphasis is placed on examining the structures, functions, and dynamics of the police, the courts, and corrections. Additionally, the goals and values underlying justice policy within these institutions and emerging issues within each sector are explored.

Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9700 TEACHING CRIMINAL JUSTICE AT THE COLLEGE/ UNIVERSITY LEVEL (3 credits)

This seminar is a required course for doctoral students in criminal justice.

The purpose of the course is to provide students with the knowledge and skills that will enable them to become informed, effective, and stimulating teachers. A variety of pedagogical issues will be covered during the course of the semester; theories of learning and student motivation; constructing a course syllabus; designing effective writing assignments and in-class exercises; leading class discussions; testing and grading; and managing the classroom.

Prerequisite(s): Admission to Criminology and Criminal Justice PhD graduate program; or admission to Criminology and Criminal Justice MA or MS graduate program and instructor permission. Not open to nondegree students.

CRCJ 9800 ADVANCED RESEARCH DESIGN (3 credits)

This is a required course which will expose students to advanced topics in research methods in preparation for writing their doctoral dissertation. It will also apply advanced methodological techniques to problems in the field.

Prerequisite(s): Admission to PhD program in Criminology and Criminal Justice; or UNO graduate student and instructor permission.

CRCJ 9980 DIRECTED READINGS IN CRIMINOLOGY & CRIMINAL JUSTICE (1-6 credits)

This course is designed to provide the advanced graduate student with the opportunity to do extended readings on a specialized criminology or criminal justice topic.

Prerequisite(s): Admission to graduate program in criminology and criminal justice or UNO graduate program, and permission of instructor.

CRCJ 9990 DISSERTATION (1-20 credits)

The dissertation is an original research project conducted and written under the direction of a faculty dissertation committee. The dissertation provides the student with an opportunity to do original research that contributes to advancing the body of knowledge on crime and criminal justice.

Prerequisite(s): Completion of all coursework, completion of the comprehensive examination, and permission of Supervisory Committee Chair. Not open to non-degree graduate students.

Criminology and Criminal Justice, MA

The Master of Arts (MA) degree is a 30-hour non-terminal degree designed to emphasize research activity and independent inquiry. This degree is recommended for those students seeking an interim degree prior to pursuing a doctoral degree. To complete the MA degree, students must write and orally defend a thesis. The thesis is an independent research project and an academic exercise that is written to the standards of the faculty members on the thesis committee. A thesis requires a committee of three faculty members and typically takes two semesters to complete.

Fast Track

The School of Criminology and Criminal Justice has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following:
 - BS in criminology and criminal justice on either the UNO or UNL campuses
 - Double-major at UNO with a BS in criminology and criminal justice as either the primary or secondary major
 - BMS with a concentration in criminology and criminal justice

- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.25.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program. Successful completion of the graduate courses will be a significant consideration during the evaluation of admission to the MA or MS in Criminology and Criminal Justice.
 - The admit term must be after the completion term of the undergraduate degree.

Special Note: Eligible undergraduate students may enroll in any 8000-level CRCJ course approved by the SCCJ program.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 1
- Summer 2026: April 15
- Fall 2026: July 15

For those interested being considered for a graduate research assistantship, an April 1 deadline for fall admission is recommended.

Other Requirements

- **Entrance Exam:** Graduate Record Exam (GRE), a score of 300 or higher is typically required for admission to the MA program, or to be considered for a research assistantship
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 95 with a minimum of 21 in each of the four areas, IELTS: 7.5 (8.0+ preferred), Duolingo: 125
 - All ESL students are required to take a proficiency assessment examination at UNO upon admission, which will be used to determine whether further assistance is required.
- **Statement of Purpose:** One page discussing reasons for pursuing a graduate degree, research interests, and career goals for the future
- **Letters of Recommendation:** Two letters of recommendation are required, preferably from faculty or instructors familiar with your academic ability
- **Unconditional Admission:**
 - Possession of a bachelor's degree from a regionally accredited institution
 - Student has a 3.00 GPA (average of "B") overall in undergraduate work
 - At least 12 credit hours of criminal justice courses or related courses that meet the requirements of the current school

undergraduate curriculum, including a basic statistics course, a research methods course, an introductory criminal justice course, and a criminology course.

- Provisional Admission:
 - Student has not completed all of the undergraduate prerequisite course requirements for unconditional admission to graduate study
 - Student has no less than a 2.75 overall GPA for the last two years of undergraduate work and not less than a 2.75 GPA in the undergraduate major

Criminology and Criminal Justice, MS

The Master of Science degree in criminology and criminal justice is a 36 hour program (11 classes and a capstone course) designed to meet the needs of professionals who are dedicated to a career in criminal justice. This educational opportunity is offered in a *flexible online format*, or alternatively through on-campus evening classes. Full-time students can complete the degree in 18 months; part-time students may choose to pursue the degree at a slower pace.

- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program. Successful completion of the graduate

courses will be a significant consideration during the evaluation of admission to the MA or MS in criminology and criminal justice.

- The admit term must be after the completion term of the undergraduate degree.

Special Note: Eligible undergraduate students may enroll in any 8000-level CRCJ course approved by the SCCJ program.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026 and Fall 2026: Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 95 with a minimum of 21 in all four areas, IELTS: 7.5 (8.0+ preferred), PTE: 76, Duolingo: 115
 - All English as a second language students are required to take a proficiency assessment examination at UNO upon admission, which will be used to determine if further assistance is required
- **Statement of Purpose:** One page discussing reasons for pursuing a graduate degree, interests in the field, and career goals for the future
- **Resume**
- **Letters of Recommendation:** Two letters of recommendation are required, the recommendation requests are generated from your online application. These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.
- **Unconditional Admission:**
 - Possession of a bachelor's degree from a regionally accredited institution
 - Applicant has at least a 3.0 GPA (average of "B") overall in the last two years of undergraduate work
 - At least 15 credit hours of criminal justice courses or related courses that meet the requirements of the current school undergraduate curriculum, including a basic statistics course, a research methods course, an introductory criminal justice course, a criminology course, and a criminal justice or criminology diversity course.
- **Provisional Admission:**
 - Applicant must have a bachelor's degree from a regionally accredited institution (if the institution is non-accredited, 15 credit hours of graduate course work at UNO must be successfully completed before the student is eligible for unconditional admission)
 - Applicant has not completed all of the undergraduate prerequisite course requirements for unconditional admission to graduate study

- Applicant has no less than a 2.75 overall GPA in the last two years of undergraduate work and not less than a 2.75 GPA in the undergraduate major.

Criminology and Criminal Justice, PhD

The vision of the School of Criminology and Criminal Justice is to be a program that is recognized nationally for its quality and impact on research and instruction. In terms of doctoral education, the aim is to foster a learning environment in which graduate students may gain the necessary knowledge, skills, and competencies to prepare them for careers in academia or in the public or private sectors. The curriculum emphasizes written and verbal communication skills, methodological competency, a strong statistical foundation, and hands-on research experience. Doctoral students will actively engage in research under the supervision of faculty, the Director of the School's Nebraska Center for Justice Research, and/or the Director of the Juvenile Justice Institute.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadline

- Fall 2026: January 20

Other Requirements

The School of Criminology and Criminal Justice uses a holistic approach when evaluating application materials including the extent to which the applicant's interests align with faculty research areas and an interest in attracting a diverse student body with varying lived experiences. Admissions decisions are competitive with a limited number of qualified students admitted each fall semester. Applicants are typically notified of decision by mid-spring.

- Official transcripts documenting completion of a master's degree. Degree may be in process at time of application.
- A Master of Arts or Master of Science degree in criminology or criminal justice from an accredited institution is required for unconditional admission into the program.
- Applicants holding a master's degree in a related social science field (e.g., psychology, sociology, political science, public administration, etc.), but lacking substantive coursework in criminology and criminal justice may be granted provisional admission. Unconditional admission status will be granted upon successful completion of 18 hours of criminology and criminal justice core curriculum coursework.
- **English Language Proficiency:** Applicants must have a command of oral and written English. Applicants who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/>

entrance-exams.php), must meet the minimum language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL: 95 with a minimum score of 21 in each of the four areas (the paper TOEFL will NOT be accepted), IELTS: 7.5 (8.0+ is preferred), PTE: 76, Duolingo: 125
- **NOTE:** All English as second language students will be required to complete a proficiency assessment examination upon admission. This assessment will be used to determine if further assistance is required.
- **Entrance Exam:** Graduate Record Examination (GRE) scores are required.
- A GRE score above 300 (combined verbal and quantitative portions) and writing score at or above 4.0 and above is preferred. Students not meeting this threshold but demonstrate their exceptional academic potential through other aspects of their application materials may also be considered.
- **Statement of Purpose/Statement of Research Interests:** (max. 5 pages)
 - A statement of purpose should describe the applicant's prior education experience, research interests, any relevant professional experience, and long term career goals. Applicants may note their interests in working with specific faculty members with whom their research interests align.
- **Writing Sample:** This may be a chapter from a master's thesis, a published article, or a term paper or manuscript written in a scholarly style.
- **Resume**
- **Letters of Recommendation:** Three letters are required with at least two of the three letters must be submitted by professors who can attest to the applicant's academic strengths through experiences such as having the applicant as a student in their class and/or working under their direct supervision on research projects.

Dissertation	
CRCJ 9990	DISSERTATION (see details below) 20
Total Credits	62

¹ This course may be substituted with a course from another department. Permission for course substitution must be granted by a student's supervisory committee and doctoral program chair.

Both 8000- and 9000-level elective courses are available to doctoral students. A maximum of six (6) hours of dual-level courses (8–6 course number) can be included in the program of study.

A maximum of six hours of directed readings (CRCJ 9980) may be included in the program of study. These six hours can be used in preparation for the comprehensive examination. Directed readings intended for comprehensive exam prep may be taken in the semester before the administration of the comprehensive exam. All coursework, excluding coursework in the form of directed readings related to the comprehensive examination, must be completed within two and half (2.5) years from the time a student's program of study is approved by the dean for graduate studies. All students will be required to complete all courses listed as required courses. Students also must take elective courses in criminal justice or related fields.

Students are expected to complete 36 hours of coursework within two years except in extraordinary circumstances. Some of these hours may be taken during summer semesters.

Comprehensive Examination and Admission to Candidacy

After completion of 36 hours of coursework, doctoral students will be required to pass a comprehensive examination. The examination has two parts—criminological theory and criminal justice systems. Students are expected to take both comprehensive examinations during the fall and spring semesters of their third year in the program.

Dissertation

Students may register for dissertation credits after successful completion of one comprehensive examination. The dissertation must reflect original scholarship and contribute to the body of knowledge on criminology and criminal justice. The dissertation topic must be approved by the student's dissertation committee, which consists of a chair and three other members. One committee member must be a faculty member from outside the School of Criminology and Criminal Justice. The dissertation topic, prospectus, and the dissertation all require the approval of the dissertation committee. A doctoral student will be required to take at least one hour of CRCJ 9990 each fall and spring semester while working toward the completion of the dissertation. A minimum of 20 credit hours of CRCJ 9990 is required for all doctoral students.

Total Credit Hours

A minimum of 92 graduate hours beyond the baccalaureate degree. This includes up to 30 hours earned in a master's degree. Satisfactory completion of a teaching practicum is also required.

Social Work, MSW and Criminology and Criminal Justice, MS (MSW/CRCJ)

The MSW and Master of Science in criminology and criminal justice (MSW/CRCJMS) dual degree program is a collaborative effort between the

University of Nebraska at Omaha, Grace Abbott School of Social Work and the School of Criminology and Criminal Justice. The MSW/CRCJMS offers interdisciplinary preparation in the fields of social work and criminal justice leading to the master of social work and the master of criminal justice degrees, with fewer required credit hours than it would take to obtain these degrees independently.

This dual degree program prepares students to provide a range of advanced social work services for individuals, families, groups, organizations, and communities and assume leadership in the field of criminal justice and social work. Graduates with a dual MSW/CRCJMS are prepared to respond to the needs of the community by working with delinquent and criminal populations and the systems that impact these populations.

Students beginning the MSW/CRCJMS program at the MSW Generalist level must complete 81 credit hours total. Students beginning the MSW/CRCJMS program at the Advanced Generalist level, must complete 57 credit hours total.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: November 1
 - Generalist MSW/MSCRCJ students (those who do not have an undergraduate degree in social work, BSSW) admitted for the spring term are limited to only the MSCRCJ coursework in spring and summer terms. The MSW coursework will be added in the fall term.
 - Advanced Generalist MSW/MSCRCJ students (those with an undergraduate degree in social work, BSSW) can begin both MSCRCJ and MSW coursework in the spring term.
- Fall 2026: The priority deadline is February 1. Applications will be accepted through March 1.
 - Students who have earned or will be earning any undergraduate degree may apply for fall admission.
 - Students admitted as either Foundation MSW/MSCRCJ or Advanced MSW/MSCRCJ can begin both MSW and MSCRCJ coursework in the fall term.

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** The statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, in no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.
 - Why have you chosen social work?
 - Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.
 - What type of work are you planning to engage with once you attain your MSW degree?
 - Specifically, what are the issues, populations, and levels of practice you hope to work with after graduate school?
 - The social work profession is rooted in improving the lives of others. Social workers adopt a stance of humility and strive towards cultural awareness.
 - Discuss a time when you realized that your personal experience influenced your reaction to a situation.
 - Reflecting on that experience, how might it influence your future social work practice?
 - Social workers are self-reflective, strengths-based, and growth-oriented.
 - Identify a strength that you possess and an area for growth.
 - Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.
 - Social work is a values-based profession dedicated to enhancing human wellbeing. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>):
 - Identify and discuss one that resonates with you.
 - Identify and discuss one that may challenge you.
- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
 - Educational and occupational experiences since high school
 - List start and end dates with month and year
 - Identify whether the position is part or full-time
 - Identify whether the position is paid or volunteer
 - Field placements, internships or practicums
 - Honors or distinctions received
- **Letters of Recommendation:** Three letters of recommendation are required, the recommendation requests are generated from your online application. These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one

reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.

- If transferring from another accredited MSW program, one letter must be from a current faculty member associated with that program.
- The MS application for criminology and criminal justice is completed online adhering to the same admission criteria for the MSW degree. The personal statement and letters of recommendation for admission to the MSW degree will be used by the School of Criminology and Criminal Justice to admit students.
- An undergraduate cumulative GPA of 2.7 or higher is required to be considered for admission.

The MSW/MSCRCJ **Generalist Program** is a 81 credit hour program available to applicants who do **not** hold a BSSW degree from an accredited school of social work within the last 10 years.

The MSW/MSCRCJ **Advanced Generalist Program** is a 57 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

Total Credits		57

¹ A student must receive a grade of "B" or higher in practicum courses (SOWK 8400 and SOWK 8410).

² This course requires special planning with the department. Students must go through the planning process one semester prior to the start of the course. No planning happens in the summer term.

³ This course is a continuation of SOWK 8400. If a new placement is necessary, students may be required to go through the original planning process again.

⁴ Courses not selected from among the three listed may be used as an elective.

Exit Requirements

- CRCJ 8970 capstone course is offered in the fall and spring semesters. Once all required coursework has been completed, the student can register to take the capstone course. The course will require students to engage in a problem-solving project involving group work, which culminates in a written report and oral presentation.
- Satisfactory completion with a grade of B or better in SOWK 8400 and SOWK 8410

Academic Policies and Standards

Critical and Creative Thinking, MA

The Master of Arts in critical and creative thinking (MA CCT) embodies the College of Arts and Sciences' ongoing commitment to personal enrichment as well as to the practical application of analytical skills and knowledge in a diverse array of both for-profit and nonprofit professional environments. This interdisciplinary degree provides a unique opportunity to pursue both breadth and depth within the rich and diverse landscape of the liberal arts and sciences. Students pursuing this degree will enhance their career potential by developing advanced skills and abilities necessary for critical thinking, creativity, and leadership.

Fast Track Program

The Office of Latino and Latin American Studies has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing Bachelor of Arts in Latino and Latin American Studies desiring to pursue a Master of Arts in critical and creative thinking.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.

- Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.
 - Students seeking this option should work with their advisor to select appropriate graduate level courses.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: October 31
- Summer 2026: March 1
- Fall 2026: July 15

Other Requirements

- All applicants must have the equivalent of a four-year undergraduate degree from a regionally accredited four-year institution of higher learning or the equivalent international institution with a minimum GPA of at least 3.0 in undergraduate courses related to major.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 100, IELTS: 7.5, PTE: 68, Duolingo: 130

Concentrations		
Select one area of concentration.		12-15
Elective Courses		
Select 9-12 hours of elective courses. Student selecting a 12 hour concentration may count 9 hours outside the CACT program with advisor approval.		9-12
Exit Requirement		
CACT 8090	CRITICAL AND CREATIVE THINKING GRADUATE PROJECT ²	3
Total Credits		30

¹ This course must be completed within your first nine (9) hours of study.

² The graduate project, CACT 8090, is a two semester process. Early in the semester prior to planned enrollment and completion of the graduate project (fall for a spring graduate project completion or spring for a fall graduate project completion), the student identifies a faculty member from their concentration to serve as their primary advisor and another graduate faculty member from the program or from outside the program to serve as the second reader. At the end of this semester the project proposal is due. Upon receipt of the final project proposal, the student will be able to register for CACT 8090 for the semester in which they will complete the project. Enrollment in the graduate project is not available in the summer.

At least 15 hours of the MA CACT program must be done at the seminar level (courses ending in zero).

Cybersecurity

Degree Programs Offered

- Cybersecurity, MS (p. 1079)

Certificates Offered

- Cybersecurity Certificate (p. 1081)

Cybersecurity, MS

The School of Interdisciplinary Informatics (SI2) is the academic home of the Master of Science (MS) in cybersecurity. Cybersecurity is a rapidly expanding, multi-faceted science that integrates a diverse set of disciplines to address fundamental problems in the design, development, implementation and support of secure information systems. The Master of Science is a full graduate degree program balancing theory with practice in order to provide students with the knowledge and skills necessary to protect information systems. Because of the wide variety of subject areas to which cybersecurity can be applied, this degree program has two paths; cyber operations, a concentration with highly technical content, and interdisciplinary, with the opportunity for the students to tailor the degree

to specific management goals. Students may also choose between a thesis or capstone exit option based on their individual interests.

Fast Track

The School of Interdisciplinary Informatics (SI2) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate credit hours towards the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following:
 - Students pursuing a CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field
 - Students pursuing a Bachelor of Multidisciplinary Studies with a concentration in cybersecurity who wish to pursue the MS in cybersecurity.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 1
- Summer 2026: April 1
- Fall 2026: July 1

Other Requirements

- The minimum undergraduate grade point average (GPA) requirement for the MS in cybersecurity program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a four-year undergraduate degree.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission. Minimum acceptable scores are:
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** a two-page, double-spaced, word-processed essay that addresses the following two topics:
 - Discussion of two accomplishments that demonstrate your potential for success in the graduate program
 - Discussion of your unique personal qualities and life experiences that distinguish you from other applicants to this graduate program
- **Resume:** Submit a detailed resume indicating your work experience and background.
- **Optional:** One letter of recommendation from a reference who can evaluate your work and/or academic achievements.
- **Interview (optional):** Although not required, the graduate program committee may ask to conduct a telephone interview to further assess the experiences of the applicant.

Requirements

Foundation Courses

Foundation courses ensure that all students in the degree have a solid groundwork upon which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for other courses in the program, but they also contain a distinct body of knowledge that is an important part of the cybersecurity professional's education. All foundation courses are required for all students, however, students who have obtained an undergraduate degree in a related field may already have this foundation. In such a case, most, if not all, foundation courses are waived. Students with undergraduate degrees in other disciplines, including computer science, management information systems, or engineering, will usually require one or more foundation courses. Occasionally, a student's work experience may be sufficient to waive one or more of the foundation courses.

Waivers for foundation courses are potentially granted by the graduate program committee upon the recommendation of the faculty member who is responsible for an individual course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have an option for testing out.

Foundation courses cannot be used to satisfy the 33 semester hours required for the MS in cybersecurity (CYBR) degree. Students who have not completed all the foundation course requirements may be admitted on a provisional status until those requirements have been completed. All foundation courses must be completed prior to or concurrent with the first six (6) hours of MS in CYBR graduate coursework. (Nine hours if not waived)

Quality of Work Standards

The Graduate College's Quality of Work Standards shall be applied to foundation courses as well as courses taken as part of the degree program. In particular, the GPC will recommend to the Graduate College that any

1. Student receiving a grade of "C-" or below on any foundation course will be dismissed from the program or, in the case of unclassified or non-degree students, be automatically denied admission.
2. Student receiving a grade of "C+" or "C" in any foundation course will be placed on probation or dismissed from the program.
3. Student not maintaining a "B" (3.0 on a 4.0 scale") average in foundation courses will be placed on probation or dismissed from the program.

Cybersecurity Certificate

Cybersecurity is the practice of managing information related risks by ensuring confidentiality, integrity, authentication, availability, and non-repudiation of data. In addition to the national interest in cybersecurity, local businesses are increasingly reliant on secure computer infrastructures for their daily operations. A graduate-level certificate is a logical step to enhance the skill set of local and at-a-distance cybersecurity professionals. Additionally, the certificate program can serve as a feeder into the MS in cybersecurity degree should the students in the certificate choose to continue their graduate education.

Incoming certificate students that do not have a cybersecurity background may also require foundation courses as needed prerequisites, depending on which core courses are selected and depending on the background of the student.

Completion of the Certificate

During what is expected to be the semester the certificate is completed and prior to the posted deadline, students should apply for the certificate through MavLINK on or before the deadline. Information can be found here (<http://www.ses.unomaha.edu/registrar/graduate.php>). If you complete the application form and do not complete all of the requirements for the certificate, contact the Office of Graduate Studies as soon as possible. You

must reapply during the next semester in which you expect to complete the certificate; no additional fee is charged to reactivate your application.

The following requirements are due 12 working days prior to commencement:

- “Incomplete” and “NR” grades from previous terms must be removed so that the grade will be in the Office of Graduate Studies.
- All fees, fines, and other obligations due the university must be settled.

For students currently enrolled in courses that are a part of their plan of study, enrollment must be maintained in order to complete the certificate. A grade for any current enrollment must be received by the Registrar's Office no later than the close of business on the fifteenth working day following the end of a semester.

Awarding of Graduate Certificates

The Office of Graduate Studies will mail the certificate to students when all requirements are completed and all obligations to the university are satisfied. The Graduate College will not approve any changes in the student's permanent record once the certificate is awarded.

Data Science, MS

The vision of the Master of Science in data science program is to provide flexible, innovative, and technologically current education to rising data professionals who want to prepare for corporate leadership positions through their functional expertise. The interdisciplinary data science program brings together thought leaders in the fields of business, information technology, mathematics, and other units at UNO, including international university partners and local businesses.

This interdisciplinary graduate program is designed to be completed in 24 months. The curriculum includes course modules on topics that address the following major themes: data organization, manipulation, cleaning, and visualization; data analytics; working with massive amounts of data; dealing with missing and messy data; understanding the value of data and creating data products.

Economics

Degree Programs Offered

- Economics, MS (p. 1085)
- Business Administration, MBA and Economics, MS (MBA/ECON) (p. 1026)

Certificates Offered

- Economic Education Certificate (p. 1088)
- Homeland Security Focused Business Analytics Certificate (p. 1088)

Economics, MS

The science of economics creates a deep understanding of individual behavior, firm dynamics, markets, and some of the world's most interesting and challenging problems. Economics is a way of thinking that provides generalized tools to the practitioner to solve business, social, political, and many other issues faced by the modern organization.

The graduate program in economics is designed to provide a solid background in theory, quantitative methods and application appropriate to the needs of economists involved in the analysis of domestic and international business and economic conditions, financial analysis, policy analysis, forecasting, simulation and related work. In addition, the program prepares students for further graduate work in economics and related fields.

FastTrack Program

The Department of Economics has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to 9 graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing Bachelor of Science in business administration (with a concentration in economics), Bachelor of Science in economics, or Bachelor of Arts in economics, desiring to pursue a Master of Science in economics.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.

- The admit term must be after the completion term of the undergraduate degree.

Students in the Fast Track program must only enroll in dual-level ECON courses (ECON 8xx6) as their graduate coursework prior to admittance to the graduate program.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Students are strongly encouraged to apply as early as possible, especially if applying for assistantships or scholarships.

- Fall 2026:
June 1 for international applicants who are required to secure a new student visa
July 15 for all other applicants
- Spring 2026:
October 1 for international applicants who are required to secure a new student visa
December 1 for all other applicants
- Summer 2026:
March 1 for international applicants who are required to secure a new student visa
April 15 for all other applicants

Other Requirements

- Junior/senior GPA of at least 2.85 (on a 4.0 point scale)
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Applicants must have completed courses equivalent to the following five foundation courses (UNO undergraduate courses):

Code	Title	Credits
ECON 2200	PRINCIPLES OF ECONOMICS (MICRO)	3
ECON 2220	PRINCIPLES OF ECONOMICS (MACRO)	3
ECON 3200	ECONOMIC THEORY: MICRO	3
ECON 3220	ECONOMIC THEORY: MACRO	3
BSAD 2130	PRINCIPLES OF BUSINESS STATISTICS	3

- Applicants meeting the minimum GPA and language requirement but lacking some foundation courses will be granted provisional admission status until all foundation courses are completed with grades of "B" (3.0/4.0) or above.
- New economics graduate students will be admitted to pursue the non-thesis option. After completing nine (9) hours of coursework a student may submit a written request to the economics graduate program committee to transfer to the thesis option. Students are strongly encouraged to seek the advice of the economics graduate program advisor prior to submitting the written request. The student's request should include a thesis proposal written in consultation with a student-identified main thesis advisor (must be a tenure-track faculty in the economics department) who will serve as the chair of the thesis committee. In addition, the student should include an unofficial graduate transcript, a writing sample, and any other relevant information in the request. The graduate program committee, based on its evaluation of the student's potential to complete a quality master's thesis, will approve or deny this request. Upon transfer to the thesis option, an oral defense of the proposal will be scheduled, and the thesis

committee members will approve the scope of work. If the graduate program committee denies the student's request to transfer to the thesis option, the student may submit a second (and final) written request to transfer to the thesis option with supporting materials to the graduate program committee after he/she has completed 18 credit hours of coursework in the economics program.

Academic Performance

Students dismissed from the MS/MA economics program may request for reinstatement to the program by following this procedure. Write a reinstatement letter addressed to the economics graduate program committee and hand delivered to the economics graduate program advisor as soon as possible addressing the following points at the minimum:

1. Request for reinstatement;
2. Explanations for below par performance;
3. Arguments for why despite item #2 student be reinstated back into the program;
4. Describe activities student will do to ensure that performance moving forward will meet the quality of work standards set by Graduate Studies.

The economics graduate program committee will evaluate the student's request and inform the student of its decision as soon as practically possible.

Economic Education Certificate

The graduate certificate in economic education is to assist high school instructors who teach economics to obtain the 18 graduate credit hours needed to teach economics as a dual enrollment course. The Higher Learning Commission (HLC) requires that teachers must have at least 18 graduate credit hours in a given subject to teach classes that can be considered dual-enrollment. The graduate certificate is designed to expand high school teachers' economics knowledge both in theory and practice so they can deliver high quality classes at the college-level.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Students are strongly encouraged to apply as early as possible, especially if applying for assistantships or scholarships.

- Spring 2026: December 1
- Summer 2026: April 15
- Fall 2026: July 15

Other Requirements

- All applicants must have earned a minimum junior/senior GPA of 2.85
- Students must have completed ECON 2200 and ECON 2220.
 - Students with a secondary education degree from UNO may substitute ECON 2400—Economics for Educators in lieu of Principles of Macroeconomics and Principles of Microeconomics.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Fall 2026: July 15

Other Requirements

- Junior/senior GPA of at least 2.85 (on a 4.0 point scale)
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum

language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** A one-page essay explaining how the certificate would benefit the applicant's current or future career in the US Department of Homeland Security.
- Students must have completed courses equivalent to the following three foundation courses (UNO undergraduate courses):

Code	Title	Credits
ECON 2200	PRINCIPLES OF ECONOMICS (MICRO)	3
ECON 2220	PRINCIPLES OF ECONOMICS (MACRO)	3
BSAD 2130	PRINCIPLES OF BUSINESS STATISTICS	3

Degree Requirements

ECON 8316	BUSINESS INTELLIGENCE AND REPORTING	3
ECON 8320	TOOLS FOR DATA ANALYSIS	3
ECON 8330	DATA ANALYSIS FROM SCRATCH	3
Total Credits		18

Due to class sequencing, all students must start the certificate in a fall semester and can expect to take a year and a half to complete the certificate.

Educational Leadership

Degree Programs Offered

- Educational Leadership, MS (p. 1089)
- Educational Administration & Supervision, EdS (p. 1090)
- Educational Administration, EdD (p. 1091)

Educational Leadership, MS

The mission of the Department of Educational Leadership is to develop effective visionary, intellectual, and moral leaders who can cause positive change in education to promote the success of all students. The department's degree and endorsement programs have a distinctive metropolitan education orientation. The Department of Educational Leadership offers a master of science degree (MS) as well as non-degree administration endorsement programs for students who have completed a master's degree.

edleadership@unomaha.edu

Program Website (<https://www.unomaha.edu/college-of-education-health-and-human-sciences/educational-leadership/programs/ms-edl.php>)

Other Program Related Information

To be considered for financial aid students must be admitted to the MS in educational leadership. Unclassified and non-degree admission students are not eligible for financial aid consideration.

Students who have earned a previous master's degree in the education field should apply as unclassified in educational administration.

Students needing fewer than 12 credits for re-certification or professional advancement may apply as non-degree. Note that non-degree students will need to speak with the department to enroll in required classes.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission. Minimum scores for this program are:
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** 1-2 pages that addresses such topics as why you want to become a school administrator; interests; experiences; and career goals
- **Resume**
- **Letters of Recommendation:** Two letters are required
- Copy of teaching certificate
- Evidence that the candidate has met the State of Nebraska's Special Education and Human Resources requirements. Most candidates will probably have satisfied this requirement while earning their teaching endorsements; if not, they will be required to complete relevant coursework.

Unclassified Admission: Those educators with a master's degree in education may apply as unclassified and complete the required and concentration hours needed for principal or special education director state certification. The application requirements are the same as the master's degree listed above.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

An applicant for admission to the Specialist in Education degree in the Department of Educational Leadership must have earned at least a master's degree from an accredited institution and an administrative endorsement. This is a terminal degree and if an EdD is planned at any time in the future, advising to the best degree path should take place before application.

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission. Minimum scores for this program are:

- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

- **Statement of Purpose:** A 1-2 page document describing relevant professional roles and experience as well as career goals for the EdS
- **Writing Sample:** Three samples, including one with a reference section (or thesis/specialist field project)
- **Resume**
- **Letters of Recommendation:** Three required letters; one letter must be from current supervisor confirming applicant's school administrative role.
- Administrative certificate or teaching certificate if administrative certificate is not yet earned

Together with previous graduate work, the candidate's course of study must total a minimum of 69 graduate semester hours with 30 hours meeting the time limit requirement for graduate degrees. The program of study must be approved

by the department and the dean for Graduate Studies, and include a minimum of 15 semester hours after admission to the EdS program.

Elementary Education, MS

The master's degree in elementary education will:

- Provide graduate students with a diverse range of courses that best fit their individual learning needs in a flexible program.
- Expand professional connections with educators across our local and national context with diverse perspectives.
- Enhance the ability to design engaging, authentic instruction for today's students.
- Emphasize diversity, critical thinking, and culturally responsive teaching.
- Encourage collaboration within the candidate's local/regional community.
- Extend 21st century teaching skills and technology applications.

The master's degree in elementary education does not lead to initial teacher certification.

Program Related Information

Program Contact

unotedgraduateprograms@unomaha.edu

Program Website (<http://www.unomaha.edu/college-of-education/teacher-education/graduate/elementary-education.php>)

Unclassified Students

Students who are not planning to pursue a program leading to a graduate certificate or a master's degree can be admitted to the elementary education program as unclassified students. Candidates holding a previous master's degree in education who are seeking additional teaching endorsements may wish to choose an unclassified status. Unclassified students are allowed to take courses for which they meet the prerequisite. Successful completion of graduate courses as an unclassified student does not obligate the department to accept those courses for credit toward the fulfillment of degree requirements. Formal advisement in an endorsement area is required.

Formal advisement in an endorsement area is required.

- Candidates should apply for endorsements as soon as they are eligible. If a candidate applies 10 years or more after completing all coursework, a review is required to determine if more coursework is needed.
- To add an endorsement 1/3 of the coursework must be completed at UNO in the endorsement area.

Fast Track Program

The Department of Teacher Education has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine (9) graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing BS in Education desiring to pursue a MS in Elementary Education.
- Students must have completed no less than 75 undergraduate hours and successful completion of a significant number of undergraduate education courses.
- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.

- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 10
- Summer 2026: June 1
- Fall 2026: August 1

Other Requirements

- A minimum undergraduate GPA of 3.0 (on a 4.0 scale)
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Applicants working toward the master's degree must have a valid teaching certificate **or** application to a concentration that leads to certification (e.g. Accelerated Certification for Teachers concentration). Exceptions to this will be considered on an individual basis. If needed, please contact Chris Wilcoxon, the graduate program chair. Please note, a master's degree does not lead to initial certification.
- International students who do not intend to teach in the United States **may** be eligible for admission. Please note, applicants to the Accelerated Certification for Teachers concentration must already be eligible to work in the US before applying. Sponsorship will not be provided. Please contact the graduate program chair if you have questions or a unique set of circumstances you feel may qualify you for this program.

Fast Track Program

The Department of English has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing the BA degree in English desiring to pursue an MA in English
- Students must have completed no fewer than 60 undergraduate hours
- Students must have a minimum undergraduate GPA of 3.5

- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good academic standing
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted to undergraduate status including financial aid
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code
 - Admission to Fast Track does NOT guarantee admission to the graduate program
 - The admit term must be after the completion term of the undergraduate degree
- Students may enroll in dual-level courses (8xx6 or 8xx5) for Fast Track credit, but not seminars

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- To be admitted to graduate study in English, a student should have completed at least 18 credit hours in undergraduate English courses above the freshman level with an average grade of "B" (3.0/4.0) or higher.
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
 - If interested in a graduate assistantship ship minimum scores are as follows. Internet-based TOEFL: 100, IELTS: 7.5, PTE: 68, Duolingo: 130
- Statement of Purpose:** The statement (of about 500-1000 words) should convey the applicant's previous study in the field of English, any relevant work or life experience, the applicant's philosophy of learning and reason for pursuing a master's degree in English, and anything else that might help convey the applicant's personality, spirit, or intellectual character.

Teaching Assistantship

The application for a graduate assistantship requires the following additional materials, which should all be sent directly to the attention of the Graduate Program Chair, Department of English, ASH 192D, University of Nebraska at Omaha, 6001 Dodge St., Omaha, NE 68182-0175 or by e-mail to englishTAapplications@unomaha.edu

- **Application coversheet** (available online (<https://www.unomaha.edu/college-of-arts-and-sciences/english/academics/graduate-programs/engl-ta-application-20231.pdf>))
- **Statement of Purpose:** 500-1000 words detailing the applicant's ambitions in the graduate program and his or her motivation for pursuing an assistantship. In addition, this statement should convey some sense of the applicant's identity and philosophy of learning.
- **Writing Sample or Samples** of academic or creative non-fiction prose by the applicant totaling 10-20 pages in length. The sample(s) should reflect the applicant's best writing, demonstrating a cohesive argument and/or sustained thematic focus and excellent control of syntax and style.
- **Two Letters of Recommendation** from past teachers or anyone else reasonably able to offer an objective assessment of the applicant's writing, critical reasoning skills, and promise as a teacher. These letters should be sent to the above address directly by the recommenders, along with waiver forms.

Degree Requirements

Option 1: Thesis

(30 hours of coursework; 6 hours of thesis)

- For this option at least 15 hours of coursework must be seminar-level.

Code	Title	Credits
Required Courses for both Thesis and Non-Thesis Options, Select Two		6
ENGL 8010	SEMINAR: TEXT-BASED RESEARCH METHODS FOR ENGLISH STUDIES	
ENGL 8030	FIELD-BASED RESEARCH METHODS IN ENGLISH STUDIES	
ENGL 8040	WRITING FOR PUBLICATION	
Electives		
Select 24 hours for the Thesis Option, 9 hours of which must be seminars. Seminars end in a zero (0) (see below).		24
Thesis Requirement		
ENGL 8990	THESIS	6
Total Credits		36

Option 2: Non-Thesis

(36 hours of coursework)

- For this option at least 18 hours of coursework must be seminar-level.

Code	Title	Credits
Required Courses for both Thesis and Non-Thesis Options, Select Two		6
ENGL 8010	SEMINAR: TEXT-BASED RESEARCH METHODS FOR ENGLISH STUDIES

Electives		
Select 27 hours for the Non-Thesis Option, 9 hours of which must be seminars. Seminars end in a zero (0) (see below).		27
Exit Requirement		
ENGL 8980	GRADUATE CUMULATIVE EXPERIENCE WORKSHOP SEMINAR	3
Total Credits		36

Electives for both Thesis and Non-Thesis Options

Any ENGL Graduate Course 8000 or above

Coursework Outside English

With the approval of the student's advisor and the English graduate program committee, a student may include a minor or coursework from another related discipline or disciplines as part of the plan of study. For both the thesis and non-thesis options, a minor is nine hours (3 courses). The maximum amount of coursework that may be applied from another discipline or disciplines is the same as that for a minor in both options (nine hours).

Exit Requirement

Option 1 Thesis:

- ENGL 8990 Thesis six hours

Option 2 Non-Thesis:

- ENGL 8980 Capstone

Special Note: Students who were undergraduate students at UNO cannot take a dual-listed course at the graduate level if they have already taken the course at the undergraduate level.

Creative Nonfiction Writing, Editing and Publishing Certificate

The graduate certificate in creative nonfiction writing, editing, and publishing is designed for students interested in becoming more expressive, powerful writers of nonfiction prose. Students interested in securing publication of their writing are mentored in the publication process by the faculty.

The creative nonfiction writing, editing, and publishing certificate is designed for the following students:

- Writers interested in developing and publishing their creative nonfiction;
- Graduate students in English and related fields;
- Educators seeking writing-specific training and credentials;
- Working professionals who either are currently employed or will be seeking employment as experts in written communication;
- Individuals who work in community service organizations;
- Individuals dedicated to cultural activities in the community.

Total Credits

15

- Students may elect to take all 15 credits from the Required Core list. Alternatively, students may elect to take up to 6 of those credits from the Electives list.
- For ENGL 8800, topics must be related to advanced writing such as rhetoric and memory, nature writing, etc.
- For ENGL 8966, topics must be related to advanced writing such as narrative nonfiction, graphic memoir, food writing, writing women's lives or publishing the Linden Review.
- For ENGL 8100, topic must be Native American Nonfiction.

Exit Requirements

Portfolio Requirement

Students will assemble a portfolio representing their achievement in the five courses (15 hours) applied toward the creative nonfiction writing, editing and publishing certificate. The portfolio will contain at least one writing sample from each course and will be reviewed by the student's advisor and one other graduate faculty member involved in offering courses approved for this certificate. As part of the portfolio requirement, each student will make an oral presentation to the reviewing professors. During that discussion, special attention will be given to each student's professional goals for their writing. Please see the website (<http://www.unomaha.edu/college-of-arts-and-sciences/english/academics/graduate-programs/>) for the creative nonfiction writing, editing and publishing graduate certificate for a more detailed description of the portfolio requirement and the deadlines for submission.

Literature and Culture Certificate

The graduate certificate in literature and culture offers an education in the intersection between literature written in English—either originally or in translation—with human culture broadly considered. The certificate will give high school teachers the credential to teach preparatory coursework worthy of college credit at UNO and other universities. And it is also designed as a continuing education option for anyone wishing to study literature at a post-baccalaureate level for personal enrichment. The certificate can be earned as part of the larger MA in English at UNO, and it can also be applied toward completion of that larger program retroactively.

The certificate will teach:

- literature of every period, from ancient to modern, in a variety of thematic and historical contexts;
- cultural encounters captured imaginatively on the pages of the literary text;
- the relationship of a culture to the literature produced within it, both harmonious and discordant;

- theories of literary effects on the course of human culture and history; and
- literature as a celebrated artifact of human hope, critique, and beauty.

Although applicants need no formal training in literature to enroll, they should expect to be immersed in a professional discipline of literary study with a research component. One especially designated course required for the certificate will provide training for students in the methodology of literary research.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- Applicants must have completed a baccalaureate degree with at least a 3.0 (on a 4.0 scale) GPA. Undergraduate study of literature is required. Students who do not bring 18 hours of undergraduate study in English, however, would be obligated to enroll in ENGL 8010 as their *first* course of study in the certificate.
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
- Internet-based TOEFL: 100, IELTS: 7.5, PTE: 68, Duolingo: 130

Total Credits 18

English Dual Enrollment Certificate

This graduate certificate is intended for high school English teachers, primarily in the 19 states under the jurisdiction of the Higher Learning Commission (HLC) but also elsewhere in the country, all of whom need to have completed at least 18 hours of graduate English courses to teach dual/concurrent enrollment courses at the post-secondary level.

- For educators seeking credentials to teach dual enrollment courses
- Individuals seeking primarily online modality

Teaching English to Speakers of Other Languages Certificate

In the United States, the need for well-prepared language teachers is constant. Teachers are more likely than ever to have the opportunity to teach students who come from a variety of cultural and linguistic backgrounds.

The Department of English offers students the opportunity to obtain a certificate in teaching English to speakers of other languages (TESOL). This is a rigorous 12-hour/4-course graduate certificate. Normally, students are able to complete the certificate requirements within three semesters.

The graduate TESOL certificate is a rigorous academic credential that includes a focus on the structure of the English language, theories of second language learning, and approaches to classroom pedagogy. All teachers will eventually work with nonnative speakers, so all teaching concentrations—like math, history, science, and social studies—are welcome.

A TESOL certificate does not certify a graduate to teach in Nebraska public schools. Instead, it is an academic credential meant for teachers already certified in other areas, for people who plan to teach in venues other than public schools, and for anyone who works in some capacity with non-native speakers of English.

Students in teacher education or in speech/language pathology should contact the TESOL director prior to applying to this program.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications for this program are accepted on a rolling basis. All materials must be submitted

prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- An Introduction to Linguistics course is required. Equivalent course(s) from other institutions will be considered.
- Students in the College of Education, Health, and Human Sciences should meet with the TESOL director to plan a program of study.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
 - If interested in a graduate assistantship ship minimum scores are as follows. Internet-based TOEFL: 100, IELTS: 7.5, PTE: 68, Duolingo: 130

Degree Requirements

Code	Title	Credits
Required Course		
ENGL 8656	STRUCTURE OF ENGLISH	3
Select one of the following:		3

ENGL 8806	ENGLISH INTERNSHIP ¹	
Substitutions		
Under special circumstances, the TESOL certificate director may approve up to six hours of substitutions.		
Total Credits		12

¹ With a TESOL focus

Students are encouraged to take more than the minimum number of required courses and may not repeat any courses already taken at the undergraduate level. The linguistics faculty strongly recommends that all TESOL certificate students achieve an oral and written proficiency in a language other than English.

Technical Communication Certificate

The graduate certificate in technical communication is designed for graduate students and industry professionals seeking a foundation in the theory and practice of technical communication. This foundation provides students with the kinds of competencies expected from technical

communication professionals, including writing, editing, design, and software applications.

The technical communication certificate is designed for the following students:

- Part- and full-time UNO students pursuing graduate degrees, who are seeking a cognate area outside, but relevant to, their primary program of study;
- Industry professionals seeking to develop the knowledge and skills for a career in technical communication; and
- Business or technical professionals seeking to enhance their employment opportunities through a professional development program.

ENGL 8806	ENGLISH INTERNSHIP	1-3
ENGL 8876	TECHNICAL EDITING	3
ENGL 8896	CAPSTONE COURSE IN TECHNICAL COMMUNICATION	3
ENGL/CACT 8610	PROFESSIONAL AND TECHNICAL WRITING	3
Additional courses may be substituted with the director's approval.		
Total Credits		15

Exit Requirement

Students will assemble a final portfolio representing their achievement in the five courses (15 hours). The portfolio will contain at least one writing sample/project from each course and will be reviewed by the technical communication program director and one other member of the graduate faculty from the Department of English. Faculty teaching these courses will be aware of this portfolio requirement and will assign work that can be used as part of the portfolio (e.g., a report, user's manual, website, etc.).

Biomechanics and Kinesiology, PhD

The doctoral degree in biomechanics and kinesiology at the University of Nebraska at Omaha (UNO) is a joint program between the Department of Biomechanics and the School of Health and Kinesiology. The degree is based on the physiology, biochemistry, biophysics, motor control and development, and psychology of human movement. The program is aimed at developing researchers who are working to improve movement function and physical activity using evidence-based approaches through interdisciplinary clinical and translational research. A problem-solving approach is used across the age and health spectrum for disease prevention, health enhancement, physical rehabilitation, and motivation for physical activity. The program offers four areas of concentration in biomechanics, physiology of exercise, motor development and control, and physical activity.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework. To receive full consideration for departmental assistantships, applications must be received by January 31st.

Other Requirements

- GPA of 3.2 in master's program or in the last 30 hours of previous graduate work
- Master's degree, or minimum of 30 graduate hours in a related field, e.g., health, physical therapy
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53 with a score of at least 20 in all categories (listening, reading, writing, and speaking), Duolingo: 110
- Statement of Purpose:** Needs to state goals and objectives for seeking the degree. Students will identify their intended area of focus and the name of the faculty advisor with whom they wish to work (maximum 500 words).
- Writing Sample:** Provide a writing sample which could include: first-author scientific paper, thesis proposal, research paper, or similar example showcasing the student's aptitude for writing.
- Resume/CV**
- Letters of Recommendation:** Three are required
- Undergraduate Course Deficiencies: these courses are determined by the student's mentor in collaboration with their supervisory committee. Each student's individual deficiency courses will be approved in their program of study.
- Identification and confirmation by a faculty member willing to act as advisor and mentor to the student (see program-related information). The applicant is expected to contact a potential advisor to determine if a suitable match in interests exists. This assures that the student will be able to develop a program of study that meets the specific goals intended. Please note that assistantship funding is a separate process and should be discussed with your faculty mentor.

Degree Requirements

Code	Title	Credits
Required Courses		21
BMKI 9001 or BMKI 9031	RESEARCH IN HEALTH & KINESIOLOGY BIOSTATISTICS IN BIOMECHANICS I	
BMKI 9041 or BMKI 9040	ADVANCED STATISTICS BIOSTATISTICS IN BIOMECHANICS II	
BMKI 9000	GRANT WRITING FOR THE BIOMEDICAL SCIENCES	
BMKI 9010	PRINCIPLES AND PRACTICE OF BIOMEDICAL RESEARCH	
Take the following course for a minimum of 9 credit hours:		
BMKI 9910	DOCTORAL SEMINAR	
Concentrations		
See Biomechanics and Kinesiology, PhD Concentrations		24

BMKI 9990	DISSERTATION	15
Total Credits		60

- ¹ If required courses have previously been taken, additional research core courses must be taken in order to meet the 21-hour requirement.
- ² This seminar is designed to enhance success in academia and maximize the student's research experiences. The student will be required to register for at least 9 credit hours (typically 3 hours per semester following their first year in the program). In these credit hours the student will attend formal reading clubs with the advisor where he/she will be engaged in reviewing the related literature via journal articles, conducting research projects, reviews of literature, meta-analyses, etc. In addition, the student will be taught how to write successful grants and develop a successful line of research. Each semester for a graded outcome, the student will have to produce material such as a manuscript based on data acquired in the laboratory from the ideas developed in the seminar, a grant that will support the research ideas developed, or significant progress on a research-related project. Students will co-develop these graded outcomes each semester and submit them for approval to the doctoral program committee.

Exit Requirements

- Comprehensive Examination
- Dissertation

Program Related Information

Advisor

- Preliminary contact is made with a potential advisor prior to applying to the program. Prior to being admitted, a student must confirm mentorship with an advisor based on mutual interests and willingness of the advisor to take on the student.

Program of Study (must have 45 hours remaining after approval)

- The student and his/her advisor will determine the program of study, including the required courses, deficiency courses, and general area of research for the dissertation. The program of study must be completed by the end of the first year and approved by the faculty mentor and one additional faculty member from their respective school or department (considered the program committee) as well as the Doctoral Program Committee chair. After this approval, the student will submit the program of study form with course information to the Office of Graduate. Please note, no more than six independent study/ research credit hours are recommended; however, the program of study is determined by the student, faculty mentor, and an additional faculty member in the school or department.

Comprehensive Exam

- The required comprehensive exam will be taken towards the end of the student's coursework. The supervisory committee, in conjunction with the student will determine the nature of the exam; the exam could include a take-home exam followed by an oral defense, or writing an NIH-type grant followed by an oral exam. The supervisory committee will evaluate the exam. Once a student passes their comprehensive exam they are considered a doctoral candidate.

Dissertation Committee

- In the first semester of a students' third year, the student must form a dissertation committee. The student must submit the Appointment of Dissertation Committee form consisting of at least four University of Nebraska graduate faculty members, one of whom must be from outside the student's academic department/school in which the doctorate is to be granted. The chair of the dissertation committee must be a member of the graduate faculty. The outside representative must hold graduate faculty status within the NU system. The dean

for Graduate Studies at UNO will appoint the committee upon recommendation of the advisor. The committee will be responsible for approving the comprehensive exam, dissertation proposal, dissertation, and its oral defense. Please note, if the potential objectives of a dissertation topic change, the dissertation committee can be altered at any time.

Dissertation Proposal Form

- Within one year of successfully completing the comprehensive exam and being admitted to candidacy, a formal research proposal for the dissertation topic should be presented to the supervisory committee. The format of the proposal is subject to approval by the advisor and the supervisory committee. The proposal could include a formal written proposal with an oral defense or oral presentation of the proposed research project.

Dissertation

- After successfully completing the comprehensive exam and being admitted to degree candidacy, the student must register for at least one credit hour of dissertation for each semester until completion of the degree. A minimum of 15 hours of dissertation credit must be completed within the course of the degree.
- It is expected that the dissertation will result in manuscript submissions in referred journals in the discipline.
- Upon completion of the dissertation, an updated CV and the program exit survey must be submitted to the Doctoral Program Committee chair.

Residency

- The residency will be reasonably compact, continuous, and coherent, and a substantial portion done at and under close supervision of the university. Most of the students in the program will be full-time and continuously enrolled.

- Geography, M (p. 1107)S (p. 1107)

Certificates Offered

- Geographic Education Certificate (p. 1110)
- Geographic Information Science Certificate (p. 1109)

Geography, MS

The mission of the geography graduate program is to provide quality graduate education in physical geography, human geography and spatial analysis (GIS, cartography and remote sensing). The department offers a rich learning environment for students with close interaction between faculty and students, technology-enhanced instruction, and opportunities for fieldwork. Courses enhance student's perception and appreciation of the earth's human and physical environments as well as geography's essential role in both understanding and navigating our increasingly interconnected world. The department, an active participant in its community, has ties throughout the city and state, leading to a wide variety of internship opportunities. The department is committed to providing students with the essential knowledge and skills needed to succeed, be it in professional employment or further graduate education.

Fast Track Program

The Department of Geography/Geology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine (9) graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BA/BS in geography or BS in environmental science (geography & planning option) desiring to pursue an MS in geography.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must have a graduate faculty member in the department of Geography/Geology provide a short letter of support for their application to Fast Track as a faculty sponsor/mentor.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses
- A minimum cumulative GPA of 3.0 for graduate coursework is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived; the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

The Department of Geography/Geology offers graduate assistantships. Applications should be directed to the department and are due April 1 for the fall semester and November 1 for the spring semester. The assistantship requires 20 hours per week of teaching or similar duties. Applications received after the deadline will be considered for the next available opening.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 1
- Summer 2026: May 1
- Fall 2026: July 1

Other Requirements

- Applicants must have a GPA in geography of at least a 3.0 on a 4.0 scale
- Present as a prerequisite a minimum of 15 undergraduate semester hours of geography including physical and human geography and cartography, plus at least three hours in spatial analysis, quantitative methods or statistics;
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a

baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose**
- **Resume**
- **Letters of Recommendation:** Two are required

¹ GEOG 8026: or an approved graduate level statistics course from another department

Exit Requirements

- Thesis Option- 6 hours GEOG 8990
- Non-Thesis Option - Comprehensive Examination or Professional Conference
 - As an alternative to the oral and written non-thesis exams, students pursuing the non-thesis option can instead present a paper or a poster at a professional conference. The poster or paper must be based on the student's original research. Students must create a three-person committee and defend a research proposal first. The committee must be approved by the graduate studies coordinator. Once their research is complete, their paper and

poster or Powerpoint must be reviewed and approved by their committee. Once approved, the presentation or poster must be presented to the department before the conference and the Poster/Presentation Non-Thesis Option form completed. Students must then present at the conference and write up a one-page reflection of their experience presenting, giving the form and the reflection to the graduate studies coordinator.

Concentrations

Select an area of concentration (9 hours)

Courses offered through GEOG 8500 and GEOG 8600 will be submitted for inclusion in a concentration accompanied by a letter from the student's advisor or from the graduate program chair with the course title and specifying the concentration to which it applies.

GEOG 8036	COMPUTER MAPPING AND VISUALIZATION	
GEOG 8636	ENVIRONMENTAL REMOTE SENSING	
GEOG 8650	LAND USE	
GEOG 8800	INTERNSHIP IN ENVIRONMENTAL/REGIONAL PLANNING	

Total Credits **18**

Students may substitute advanced courses in GIS for required courses already taken. Students will be allowed a maximum of two substitutions for these required courses. Substitution must be approved by the department GIS advisor.

Geographic Education Certificate

The graduate certificate in geographic education is designed to assist high school instructors who teach geography and/or environmental science to obtain the 18 graduate credit hours needed to teach these subjects as dual enrollment courses. The Higher Learning Commission (HLC) requires that teachers must have at least 18 graduate credit hours in a given subject to teach classes that can be considered dual-enrollment. The graduate certificate is designed to expand high school teachers' geographic knowledge.

- Public Administration, MPA and Gerontology, MA (p. 1186)
- Gerontology Certificate (p. 1112)

Gerontology, PhD

Our program provides interdisciplinary training, preparing students to be leaders in the field of gerontology. Due to the multidisciplinary nature of the field, our students have much flexibility as we create individualized programs tailored to each student's research and substantive interests to ensure that their training has enough breadth and depth. Our graduates acquire knowledge through various approaches including symposia, formal classes, directed studies, research projects and workshops. All students develop abilities to understand, analyze and evaluate the challenges and opportunities of an aging population. Finally, through training by our multidisciplinary faculty, students strengthen their research and writing skills to produce quality research suitable for peer-reviewed publication and presentation at national conferences.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Fall 2026: January 15 (Priority deadline if interested in scholarship or graduate assistantship); Applications accepted through April 15

Other Requirements

- **Entrance Exam:** GRE scores are OPTIONAL for those applying to the PhD program. All applications will be reviewed whether or not GRE scores are included.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 90, IELTS: 6.5, PTE: 64, Duolingo: 120

- **Statement of Purpose:** This should describe prior education, relevant professional experience, career goals, and the specific relationship of the PhD degree to the achievement of those goals. If there are particular faculty you are interested in working with, or areas of study that you would like to pursue please include in your statement. If you are interested in a graduate assistantship, please indicate your interest and the skills you have to assist the faculty.
- **Writing Sample:** This may be a master's or honors thesis, a published article, or any similar manuscript or paper written in a scholarly style.
- **Resume**
- **Letters of Recommendation:** Three academic letters of recommendation are required.

GERO 9990	DISSERTATION	
Total Credits		90

¹ Students may take either GERO 8800 or 8056; both courses are not required.

² Students may begin work on the dissertation after successful completion of the comprehensive examination and admission to candidacy. The dissertation topic must be approved by the student's dissertation committee, which consists of a chair and three other members. One Committee member must be a faculty member from outside the Department of Gerontology. The dissertation topic, prospectus, and the dissertation all require the approval of the dissertation committee. A doctoral student will be required to take at least one hour of GERO 9990 Dissertation each fall and spring semester while working toward the completion of the dissertation. A minimum of 20 credit hours of GERO 9990 is required for all doctoral students.

Comprehensive Examination and Admission to Candidacy

When all or most of the coursework is completed on the plan of study, you must pass a written comprehensive examination. Once these exams are passed the supervisory committee will submit the necessary Application for Candidacy form for approval by the Office of Graduate Studies.

Gerontology, MA

Students pursuing the MA in gerontology are seeking a formalized and in-depth understanding of the aging process by either pursuing a thesis or non-thesis option.

- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 1
- Summer 2026: April 15
- Fall 2026: August 1

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** Please address your main areas of interest and what you plan to do with a degree in health and kinesiology. You may also address any issues with your application that you would like the admission committee to consider. Please limit your statement to one page double spaced.
- **OPTIONAL:** One letter of recommendation from a reference who can evaluate your work and/or academic achievements.

Degree Requirements

Healthcare Logistics and Supply Chain Management, MS

The healthcare logistics and supply chain management program prepares students to manage and recognize opportunities to improve healthcare supply chain efficiency, effectiveness, and resiliency. The program develops the skills necessary to create and lead high-performing healthcare organizations and networks while operating within the ethical and legal standards of the industry.

Admissions

General Application Requirements and Admission Criteria (<https://catalog.unomaha.edu/graduate/admission/>)

Application Deadlines

- Spring 2026: December 1
- Summer 2026: April 15
- Fall 2026: July 15

Other Requirements

- **English Language-Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Resume**
- **Unconditional Admission:** may be granted to an applicant whose record includes the following:
 - 2.85 undergraduate junior/senior GPA, or cumulative graduate GPA
 - Applicants qualifying for unconditional admission, based on the standards outlined above, but lacking some foundation courses, will be granted provisional status until all foundation courses are completed with grades of “B” (3.0/4.0) or above.
- **Provisional Admission:** Applicants who do not meet the conditions for unconditional admission may be considered for provisional admission status. These applicants will be notified that the program graduate program Committee (MGMT GPC) will evaluate the files of all applicants being considered for provisional admission. Candidates being considered for admission on this basis will receive notification from the UNO Office of Graduate Studies. If granted provisional admission, the student must earn minimum “B” (3.0/4.0) grades in each of the courses completed in the first 12 hours of the program. Students not meeting this standard are subject to dismissal.
- **Foundation Courses**
 - Applicants must have the following foundation courses completed for unconditional admission.

- 3 hours of undergraduate-level business management or public administration
- 3 hours of undergraduate-level math or statistics.

History

Degree Programs Offered

- History, MA (p. 1115)
- History Certificate (p. 1117)

History, MA

The mission of the Master of Arts in history program is to develop in students an understanding both of history itself and of history as a profession. In so doing, students will move beyond thinking of history as simply a series of events.

Since the professionalization of history in the late nineteenth century, historians have sought to explain not only what happened but why events unfolded the way they do. In subsequent years, this has led to an increasingly sophisticated volume of materials which deepen our understanding of the past. The process has also led to the formulation, and frequently the subsequent refutation, of models of interpretation.

In order to develop a proper understanding of the past, graduate students in history need to understand not only the events of the past but how historians have interpreted those events. As such the Master of Arts history program is committed to exposing our students to the events of history, the records of history, as well as to those who have sought to explain them. In so doing, our graduate will understand history at a much deeper level than when they entered the program.

Program Website (<https://www.unomaha.edu/college-of-arts-and-sciences/history/academics/graduate-program/graduate-program-landing.php>) Fast Track

The Department of History has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine (9) graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing BA/BS in history desiring to pursue a MA in history.
- Students must have completed no less than 75 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good academic standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - If students obtain a minimum GPA of 3.8 in the graduate courses taken within the Fast Track Program, this will be considered a plus factor for admission to the master's degree program.
 - The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: November 15
- Summer 2026: April 15
- Fall 2026: June 15 (February 15 for funding consideration)

Other Requirements

- Complete 21 semester hours of undergraduate work in history, including a course on historical research, with a 3.0 grade point average (on a 4.0 scale).
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** Submit an essay of 250-500 words describing the applicant's interests in history and why he or she wishes to earn an MA degree in History
- **Writing Sample:** 10-12 pages in length from an upper-division history (or cognate) course, or an equivalent-length history-related article published in a peer-reviewed publication
- **Letters of Recommendation:** Two letters of recommendation are required.
 - Because we seek to determine your potential as a historian, letters of recommendation should be solicited primarily from historians with whom you have worked during your academic career. If you did not major in history and therefore cannot get letters from historians, then the best remaining option is to obtain letters from professors in the field in which you majored.
- The history graduate program committee may choose, in rare cases, to admit provisionally any student who does not meet all of the above requirements, with the understanding that all conditions for unconditional admission must be met before HIST 8010 or HIST 9100 courses may be taken.
- Students who have no undergraduate course in historical research and methodology must successfully complete HIST 8030 with a grade of B or better during one of the first two semesters of their enrollment.
 - Interpretation of this requirement rests with the history graduate program committee. Students who believe that they have taken a comparable course may be asked to submit examples of their work, which will enable the graduate program committee to assess their proficiency.

Degree Requirements

Thesis Option (36 hours)

The 36-hour thesis program includes six (6) hours of thesis credit, plus 30 credit hours in graduate coursework. This program is especially recommended for students who wish to continue work toward a PhD, but is open to any student.

Students who intend to write a thesis should bear in mind that this is a substantial undertaking and one that normally takes at least a year of focused research, background reading, writing, and revision to complete, in addition to previous coursework. An MA thesis must present original research and provide evidence of both extensive work in primary sources and engagement with the current scholarship on the subject matter in question. Students should develop some idea of a topic well before they complete their coursework and, in conjunction with the GPC, identify the department member best suited to supervise the thesis. Each faculty member of the department has complete discretion as to whether he or she will work with a particular student and whether the proposed topic is acceptable. Further discussion on thesis topics will be addressed during advising and/or new student orientation.

Students who were undergraduate students at UNO cannot take a dual-listed course at the graduate level if they have already taken the course at the undergraduate level.

Code	Title	Credits
Required Courses		
Complete at least nine hours from the following distributed between the three courses. Consult your advisor for more information.		9
HIST 8030	GRADUATE HISTORICAL METHODOLOGY	
HIST 9100	SEMINAR IN HISTORY	
HIST 9200	COLLOQUIUM	
Select the remainder hours from history or other advisor approved courses. Three of these hours must be graduate only (8xx0).		21
HIST 8990	THESIS	6
Total Credits		36

- ¹ Students completing an MA with thesis may include no more than three hours **total** from among HIST 8010 and HIST 8020.

Non-Thesis Option (36 hours)

The 36-hour non-thesis program consists entirely of history coursework. This program is especially recommended for students who wish to pursue work in public history, archiving, secondary-school teaching, park-service work, etc. Students will receive guidance and support regarding future career paths from their portfolio committee.

Code	Title	Credits
Required Courses		
Complete at least nine hours from the following distributed between the three courses. Consult your advisor for more information.		9
HIST 8030	GRADUATE HISTORICAL METHODOLOGY	
HIST 9100	SEMINAR IN HISTORY

Exit Requirement		
HIST 8040	FINAL PROJECT ¹	3
Total Credits		36

- ¹ HIST 8040 may be repeated once for a total of 6 hours as determined by GPC.

- ² Students completing an MA without thesis may include no more than six hours **total** from among HIST 8010 and HIST 8020.

Exit Requirements

Thesis Option

MA Thesis Contract

Any faculty member in the Department of History who agrees to chair a MA thesis committee or who agrees to be a member of an MA thesis committee, may ask the student in question to sign a MA Thesis Contract. The basic model for such a contract will be available to students on the history graduate student Canvas page. The faculty member in question may choose to modify this basic model if they think appropriate.

All candidates should carefully review the Graduate College requirements for forming a supervisory committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of a thesis.

Course Attendance Requirement and Withdrawal Policy

- All Department of History faculty may, at their own discretion, remove from any class any graduate student who misses three or more classes during a single semester.
- The Department of History graduate program committee may remove from the program any student who withdraws from three or more courses.

Academic Progress

- Each candidate must complete his or her MA degree within eight (8) years of starting the program. A candidate who, owing to extenuating circumstances, is unable to meet this requirement may appeal in writing to the Graduate Program Chair (GPC) and/or the Department of History graduate committee for an extension of time. Such extensions will normally be granted only in cases of serious illness or military deployment.
- In addition to conforming to all requirements for academic progress laid down by the Office of Graduate Studies, the Department of History notes the following: pursuant to the section "Automatic Dismissal," wherein is noted "Departments/Schools may have additional and more stringent criteria for evaluating a student's performance and may demand a higher level of performance than that demanded by the Graduate College," please note:
 - The Department of History at UNO will automatically dismiss from the program any student who is awarded any grade below B- in two (or more) classes, regardless of whether or not they have complied with other requirements of satisfactory progress.

History Certificate

UNO's Department of History offers an 18 credit hour graduate certificate in history for educators and other professionals who already have an advanced degree in another field and wish to expand their knowledge of history. This certificate is designed to help educators meet the new requirements set by the Higher Learning Commission to teach history-related courses in institutions of higher education or dual enrollment/concurrent enrollment courses in high schools. This certificate can be earned completely online.

Code	Title	Credits
Coursework policies:		
No more than six hours can end in 5.		
Former UNO undergraduates cannot take a cross-listed graduate course that they took at the undergraduate level.		

Exit Requirements

A portfolio of coursework will be evaluated by relevant faculty other than the instructor for said course. As the portfolio is not a course, it is graded only as pass/fail with a B being the minimum grade to pass.

Graduate Courses

HIST 8010 RESEARCH DIRECTED READINGS PROJECT (1-3 credits)

Special research problems and or directed readings arranged individually with students on topics not explored in other graduate offerings. If students do not complete all the readings during the semester in which they enroll in the course, they must complete all the readings within one academic year of their enrollment.

Prerequisite(s): Minimum of nine graduate hours in history completed. Permission of history Graduate Program Chair. Open only to students enrolled in the History MA program. Not open to non-degree graduate students.

HIST 8016 RELIGION IN EARLY AMERICA (3 credits)

This course examines the history and nature of religion in North America to c. 1770 with an emphasis on the British colonies. (Cross-listed with HIST 4010, RELI 4050).

Prerequisite(s): Must be a graduate student enrolled in History MA program. Not open to non-degree graduate students.

HIST 8020 GRADUATE INTERNSHIP (1-3 credits)

The graduate student is supervised by a member of the faculty in a project involving part-time employment or service with a museum, historic site, historical society or other institution. Work hours, activities, reporting requirements, and responsibilities must be specified in written agreement between employer, student, Graduate Program Chair, and/or supervising faculty member. Normally taken for 3 hours. If a hosting institution cannot commit to a supervised workload which the departmental advisor and/or Graduate Program Chair believe to be equivalent to 3 hours, course may be taken for fewer hours. In such circumstances, student may repeat course up to a total of 3 hours.

Prerequisite(s): Must be in the History/History & Government MA program, have completed at least 6 hours of graduate credit, and have History Graduate Program Chair (GPC) and/or supervising faculty approval before enrolling. Not open to non-degree graduate students.

HIST 8030 GRADUATE HISTORICAL METHODOLOGY (3 credits)

This course will examine various historical methodologies which have been employed by historians to provide structural interpretations of the past. Although exact content may vary, examples of methodologies include the Whig Interpretation, Marxism, Structuralism, Postmodernism, and the New Social History.

Prerequisite(s): Graduate student in History/History & Government program. Not open to non-degree graduate students.

HIST 8040 FINAL PROJECT (3 credits)

The final project is an exit requirement for students completing the non-thesis option for the Master of Arts in History. Students will produce original research under the supervision of a graduate faculty advisor. A grade of B or better is required.

Prerequisite(s): Permission of History Graduate Program Chair. Open only to students enrolled in the History MA program. Not open to non-degree graduate students.

HIST 8046 HOMESCAPES: THE MATERIAL CULTURE OF EVERYDAY LIFE IN AMERICA, 1600-1860 (3 credits)

This course examines the culture and technologies of house forms and work landscapes in North America, 1600-1860. (Cross-listed with HIST 4040).

Prerequisite(s): Graduate student in history, or permission of the graduate chair.

HIST 8056 HISTORY OF WOMEN IN AMERICA TO 1875 (3 credits)

This course examines the history of women in what is now the United States from the seventeenth century to 1875. Topics include law, work, sexuality and reproduction, slavery, cross-cultural encounters, religion, political activism, and the transformation of gender by the market and industrial revolutions. (Cross-listed with HIST 4050).

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

HIST 8066 HISTORY OF WOMEN IN AMERICA FROM 1875 - 1992 (3 credits)

This course examines the history of women in the United States from 1875 to 1992. Topics include law, work, sexuality and reproduction, immigration, civil rights, political participation and party politics, and changes to the American gender system, including family structure and employment. (Cross-listed with HIST 4060, WGST 4060, WGST 8066).

Prerequisite(s): Graduate standing. Not open to non-degree graduate students.

HIST 8076 SLAVERY AND RACE RELATIONS IN THE AMERICAS (3 credits)

Slavery and Race Relations in the Americas examines the historical relationship between the trans-Atlantic slave trade and American race relations, connecting the enslavement of Africans in the Americas to race relations in the Caribbean, Latin America, and the United States. (Cross-listed with HIST 4070, BLST 4650, BLST 8656, LLS 4650, LLS 8656).

Prerequisite(s): Graduate standing

HIST 8086 THE BLACK ATLANTIC (3 credits)

This course examines the cultural and ethnic history of Black people who comprised "The Black Atlantic." The course is organized historically and begins with a brief overview of the European slave trade on the West African Coast in the 15th century. From there, we look critically at the arrival of Africans to the New World, examine varieties of slavery and freedom in the Americas, and conclude with slave revolts and emancipation activism in the 18th and 19th century. We will use the Haitian Revolution (in which Haiti became the first country to be founded by formerly enslaved people) as a special case study, a conduit for our exploration of this socio-cultural, economic, and Diasporic space. (Cross-listed with BLST 8356, BLST 4350, HIST 4080).

Prerequisite(s): Graduate standing

HIST 8146 COLONIAL AMERICAN HISTORY (3 credits)

This course provides a study of the settlement and development of North America to c. 1763 with an emphasis on the British colonies. (Cross-listed with HIST 4140).

HIST 8156 THE AMERICAN REVOLUTIONARY ERA, 1763-89 (3 credits)

This course examines the period of the American Revolution beginning with the changed circumstances in the British North American colonies following the end of the French and Indian War and concluding with the ratification of the United States Constitution. The course analyses social, political, and military themes from this period. (Cross-listed with HIST 4150).

Prerequisite(s): graduate standing

HIST 8166 THE EARLY AMERICAN REPUBLIC: FROM THE CONSTITUTION TO THE SECOND PARTY SYSTEM (3 credits)

This course covers an important period of American history beginning with the first federal government and ending with an analysis of the consolidation of the Second American Party system. Topics to be covered include the earliest debates over the nature of the federal government, foreign relations, the emergence of political parties, and the rise of the Jacksonian democracy. (Cross-listed with HIST 4160).

Prerequisite(s): graduate standing

HIST 8176 HISTORY OF THE AMERICAN WEST (3 credits)

An examination of the unique aspects of the region of the United States known as "the west." Students will learn about the multiple peoples, cultures, and environments which combined to form this region. Content will also include an examination of how the myths of the west were created. (Cross-listed with HIST 4170).

Prerequisite(s): Graduate standing

HIST 8186 THE AMERICAN CIVIL WAR PERIOD: FROM THE TEXAS REVOLUTION THROUGH RECONSTRUCTION (3 credits)

This course focuses on the period of the American Civil War. It will begin with the background to, and events of the Texas Revolution. It will then consider the growing national tensions over slavery, particularly as a consequence of the Mexican-American War before examining the immediate causes of the civil war. The course will then examine the war itself before concluding with analysis of Reconstruction. (Cross-listed with HIST 4180).

Prerequisite(s): graduate standing

HIST 8196 THE NATURE OF THE PAST: AMERICAN ENVIRONMENTAL HISTORY, PRE-HISTORY TO THE PRESENT (3 credits)

This course will introduce students to the field of American Environmental History. Students will engage with literature produced by scholars who, broadly speaking, research and write about the many ways in which humans have shaped nature and, conversely, how nature has shaped humans over time. We will focus on the myriad peoples and cultures that have thrived in what is presently the United States and how these peoples have interacted with their physical environments in a multitude of contexts, from the transformation of ecosystems for economic purposes, to the cultural and scientific ideas that have shaped human notions of the natural world, to the ways in which people have mobilized governments to transform the environment. (Cross-listed with ENVN 4390, HIST 4390, SUST 4390).

HIST 8246 EMERGENCE OF MODERN AMERICA (3 credits)

This course examines American history from the end of Reconstruction to the end of World War II. Among the topics covered are western expansion, industrialization, immigration, and the expanding international footprint of the United States. (Cross-listed with HIST 4240).

Prerequisite(s): graduate standing

HIST 8336 U.S. CONSTITUTIONAL HISTORY TO 1860 (3 credits)

This course will examine the history of the United States constitution from its promulgation in 1787 through the end of the Civil War. This will include consideration of both English and colonial precedents. The course will analyze the process of writing and ratifying the document in the late 1780s and will then look at some of the key legal decisions between 1790 and 1860. (Cross-listed with HIST 4330).

Prerequisite(s): graduate standing

HIST 8346 U.S. CONSTITUTIONAL HISTORY SINCE 1860 (3 credits)

This course examine the increasingly important role played by competing interpretations of the United States constitution since the outbreak of the Civil War. This will include the emergence of the idea of a "living constitution," the extension of constitutional guarantees to the states, and examination of critical Supreme Court cases. (Cross-listed with HIST 4340).

Prerequisite(s): graduate standing

HIST 8366 THE U.S. IN THE COLD WAR (3 credits)

This course will examine the impact of the Cold War in modern American history on two levels. First it will seek to understand how the Cold War influenced American foreign policy decisions since the end of World War II and examine the long term consequences of those policies for both the U.S. and the world. Secondly, this course will examine how the Cold War impacted or shaped American culture, domestic politics, and social movements in the postwar period. (Cross-listed with HIST 4360).

Prerequisite(s): Graduate student in history, or permission of the graduate chair.

HIST 8406 HISTORY OF NATIVE AMERICAN INDIGENOUS PEOPLES (3 credits)

This survey of North American Indigenous peoples provides a historical overview of the peoples and their interactions with settlers, wars, policies, and other events that have shaped modern Tribal and U.S. relations. (Cross-listed with HIST 4400, NAMS 4400).

Prerequisite(s): Graduate standing

HIST 8416 HISTORY OF NEBRASKA (3 credits)

An examination of the history of Nebraska from Native American occupation to the present, with emphasis on environmental factors that have shaped the region and its people. (Cross-listed with HIST 4410).

Prerequisite(s): Graduate standing

HIST 8426 THE SIOUX TRIBE (3 credits)

A cultural and historical study of the Sioux tribes emphasizing the earliest historic period to the present. (Cross-listed with HIST 4420).

HIST 8456 NATIVE AMERICAN ENVIRONMENTALISM (3 credits)

This course studies North American tribal subsistence and natural resource use practices from the early historic period to the present, Native Americans as environmentalists, and modern tribal environmentalism. (Cross-listed with HIST 4450).

HIST 8466 AMERICAN IMMIGRATION HISTORY (3 credits)

A study of American immigration from the colonial era to the present. Topics covered include Old World origins of migration, the old immigrants from western Europe, the new immigrants from southern and eastern Europe, non-European immigrants, native-born American responses to immigrants, the periods of immigrant adjustment in the new physical environment, and the contemporary revival of ethnicity. (Cross-listed with HIST 4460).

Prerequisite(s): Graduate student standing or permission of the graduate chair

HIST 8486 THE UNITED STATES IN THE 1960S (3 credits)

This course is a review of the economic, social, cultural, and political changes that marked the United States in the 1960s. (Cross-listed with HIST 4480).

HIST 8536 EUROPE: RENAISSANCE & REFORMATION (3 credits)

This course will examine European history from the fifteenth through the seventeenth centuries. Among the topics which will be covered are the Renaissance, the Protestant Reformation, the Catholic Reformation, Wars of Religion, the beginning of European overseas expansion, and the Scientific Revolution. In addition to examining the religious ideas and revolutions of the period, there will also be analysis of economic, social, and political change. (Cross-listed with HIST 4530).

Prerequisite(s): graduate standing

HIST 8546 MEDIEVAL EUROPE (3 credits)

A dive into the history of medieval Europe through the stories of men and women, their beliefs, struggles, contradictions and achievements. (Cross-listed with HIST 4540).

Prerequisite(s): graduate standing

HIST 8556 BUILDING CATHEDRALS: FAITH, POWER, AND TECHNOLOGY IN THE MIDDLE AGES (3 credits)

This course explores the construction of medieval cathedrals as monumental expressions of faith, power, and technological innovation. Through primary sources, historical analysis, and interactive role-playing, students will examine how these structures embodied the ambitions of bishops, kings, and merchants, shaped urban landscapes, and served as centers of religious life. Topics include the economic and social networks behind cathedral building, the role of relics and pilgrimage, and advancements in architectural technology. A key component of the course is a role-playing simulation in which students engage in a historical debate over the design of the dome for the Cathedral of Florence (1418). (Cross-listed with HIST 4550).

HIST 8616 TUDOR AND STUART ENGLAND (3 credits)

English history from the end of the Wars of the Roses in 1485 to the death of Queen Anne in 1714. The course will examine the efforts of the Tudors and Stuarts to establish dynasties, the religious upheavals in the sixteenth and seventeenth centuries, changes in the role of Parliament, the Civil Wars, and the beginning of English overseas expansion. (Cross-listed with HIST 4610).

Prerequisite(s): graduate standing

HIST 8726 THE HOLOCAUST (3 credits)

An interdisciplinary approach in a seminar oriented format discussing various aspects of the most notorious genocide in modern times. The course will explore the history of anti-Semitism, the rise of Nazi Germany and the road to the 'final solution.' It will further explore psychological, sociological and intellectual aspects of the dark side of humanity. (Cross-listed with HIST 4720, RELI 4160, RELI 8166).

HIST 8736 ISRAEL AND PALESTINE (3 credits)

This course will outline the history of the conflict over Palestine/Israel, examine its present status, and explore its likely unfolding in the future. It seeks to provide a broad and concise understanding of the historical events which have shaped the relations between Israelis and Palestinians, as well as a keen awareness of the challenges and prospects related to their future. (Cross-listed with HIST 4730).

HIST 8746 COMPARATIVE GENOCIDE (3 credits)

This course explores genocide and its many forms throughout history. It begins by considering the varied elements and definitions of the term. Next it looks at what makes people kill before going on to examine many different genocides throughout history. Finally, the course addresses the prosecution and prevention of genocide. (Cross-listed with HIST 4740).

Prerequisite(s): Graduate student enrolled in History MA program. Not open to non-degree graduate students.

HIST 8806 U.S. AND THE MIDDLE EAST (3 credits)

This course focuses on the evolution of US relations with and Foreign Policy vis-a-vis the Middle East over the last six decades. It seeks to illuminate the constant features in contrast to the changes in direction, examining the agendas of varying administrations as well as the treatment by the media of this region. It follows a chronological framework with particular emphasis on key thematic topics. While emphasizing the political dimensions of international relations, the class will also explore cultural and social aspects of the ties between the US and the peoples of the Middle East. (Cross-listed with HIST 4800).

Prerequisite(s): Not open to non-degree graduate students

HIST 8826 MESOPOTAMIA AND PRE-ISLAMIC PERSIA (3 credits)

Examination of the Ancient Near East from the emergence of its earliest civilizations—Sumer, Akkad and Babylonia—through the Bronze and Iron Ages, concluding with Persia in the Common Era (CE) just before the rise of Islam. (Cross-listed with HIST 4820).

HIST 8836 ANCIENT GREEK MYTH, RELIGION & MAGIC (3 credits)

Students will examine the impact of ancient Greek myth and belief on actual religious practice: e.g., "lived" religion. Areas covered include formal civic sacrifice, wartime religion, family and personal devotions, mystery cults, oracles and seers, plus the popular pursuit of magic. (Cross-listed with HIST 4830, RELI 4830, RELI 8836).

Prerequisite(s): Junior standing

HIST 8846 ALEXANDER THE GREAT AND THE MACEDONIAN ORIGIN (3 credits)

Examination of the conquests of Alexander the Great, as well as controversies in Alexander studies. Includes discussion of both the Macedonian culture that produced him and the career of his father, Philip II. (Cross-listed with HIST 4840).

Prerequisite(s): Graduate standing

HIST 8856 ROME AND THE EARLY CHURCH (3 credits)

Students will cover Roman-Christian-Jewish interactions from just before the birth of Jesus of Nazareth to c. 450 CE, with an emphasis on social and political history. We catalogue Christianity's transformation from its origins as a Jewish movement and an illegal "superstition" to the dominant religion of the Roman empire. (Cross-listed with HIST 4850, RELI 4850, RELI 8856).

Prerequisite(s): Junior standing.

HIST 8916 TOPICS IN HISTORY (3 credits)

This course introduces students to specialized subject matter not available in existing History courses. Course may be repeated as long as the topic is substantially different each time. Course may be cross-listed with other programs e.g. Native American Studies (NAMS), Women's and Gender Studies (WGST) when topics are appropriate. (Cross-listed with HIST 4910).

Prerequisite(s): Graduate standing

HIST 8990 THESIS (1-6 credits)

Thesis research project written under supervision of an adviser.

Prerequisite(s): Completion of twenty-four hours of History or History & Government graduate work. Permission of History Graduate Program Chair. Not open to non-degree graduate students.

HIST 9100 SEMINAR IN HISTORY (3 credits)

This seminar guides advanced graduate students through critical readings and practices in historical research or historiography. Topics will vary and course can be repeated under different topics.

Prerequisite(s): Graduate students in History/History & Government who have completed HIST 2980 or equivalent, or approval of GPC. Non-History grad students may be admitted after consultation with History GPC and instructors. Not open to non-degree graduate students.

HIST 9200 COLLOQUIUM (3 credits)

The colloquium guides advanced graduate students through the historiography of a specific subject. Topics will vary and course can be repeated under different topics. Open only to students enrolled in MA program in history unless permission granted by History Department Graduate Program Chair.

Prerequisite(s): Graduate students in History/History & Government who have completed HIST 2980 or equivalent, or approval of GPC. Non-History grad students may be admitted after consultation with History GPC and instructors. Not open to non-degree graduate students.

PSCI 8000 SEMINAR IN THE RESEARCH METHODS IN POLITICAL SCIENCE (3 credits)

This course introduces students to the methods of data collection and analysis for political science research.

Prerequisite(s): Permission of graduate adviser

PSCI 8005 QUANTITATIVE ANALYSIS IN POLITICAL SCIENCE (3 credits)

This course introduces students to the techniques that political scientists use to answer research questions with quantitative data, as well as issues of research design, hypothesis formation, and causation. The course emphasizes the methods used to collect, analyze, and extract information from data using statistical computer software. (Cross-listed with PSCI 3000)

Prerequisite(s): Permission of graduate adviser

PSCI 8015 URBAN POLITICS (3 credits)

This course introduces students to the development, powers, forms of government, and functions of cities and their suburbs as well as the problems faced by elected officials, business and community leaders, and citizens in the urban setting. (Cross-listed with PSCI 3010)

Prerequisite(s): PSCI 1100.

PSCI 8036 THE PRESIDENCY (3 credits)

This course introduces students to the development and modern application of presidential leadership through examination of presidential selection, presidential decision-making, the relationship of the presidency with other governmental and non-governmental actors, and the role of the presidency in making public policy. (Cross-listed with PSCI 4030)

Prerequisite(s): PSCI 1100

PSCI 8040 SEMINAR IN AMERICAN GOVERNMENT AND POLITICS (3 credits)

This course introduces students to classic and contemporary scholarship on the principles, institutions, processes, and policies of national government in the United States with an emphasis on engaging in thoughtful discussion and individual research.

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8045 GOVERNMENT AND POLITICS OF NEBRASKA (3 credits)

This course introduces students to the development, structures, functions and public policies of the government of the state of Nebraska.. (Cross-listed with PSCI 3040)

Prerequisite(s): PSCI 1100.

PSCI 8046 CONGRESS AND THE LEGISLATIVE PROCESS (3 credits)

This course introduces students to the development of the Congress and modern application of the legislative process through examination of congressional elections, congressional leadership, congressional decision-making, legislative rules and procedures, the relationship of the Congress with other governmental and non-governmental actors, and the role of the Congress in making public policy. (Cross-listed with PSCI 4040)

Prerequisite(s): PSCI 1100

PSCI 8055 STATE GOVERNMENT AND POLITICS (3 credits)

This course introduces students to the development, structures, functions and public policies of states. (Cross-listed with PSCI 3050)

Prerequisite(s): PSCI 1100.

PSCI 8056 THE JUDICIAL PROCESS (3 credits)

This course introduces students to the administration of law in federal and state courts with respect to the organization of the courts, judicial selection, judicial powers, judicial decision-making, judicial policy-making, the bar, and reform movements in the pursuit of justice. (Cross-listed with PSCI 4050)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 8100 SEMINAR IN POLITICAL ECONOMY (3 credits)

A comprehensive study of theories of political economy, linkages between politics and economics, and major contemporary issues.

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8105 LGBT POLITICS (3 credits)

This course introduces students to the political struggle for Lesbian, Gay, Bisexual, and Transgender (LGBT) equal rights in the United States using a model of political empowerment, which may be applied for all minority or identity groups and social movements, generating operationalized measures of progress toward the loci of political power. (Cross-listed with PSCI 3100, WGST 3100, WGST 8105)

PSCI 8106 MONEY IN AMERICAN POLITICS (3 credits)

This course surveys facts and scholarship about two types of money in American politics: money as a political resource and money as policy. As a political resource, money is critically important for candidates to win elections, for interest groups to exert influence on government, and for policy expertise from civil society to inform government policy. As policy itself, in history or in modern times money has lain at the heart of policy debates like the creation of a national bank, gold and silver as legal tender, and financial regulations, as well as perennial governmental processes like federal budgeting and appropriations and the selection of congressional party leaders. This course trains students to comprehend, analyze, critically evaluate, and build on key research on these topics. (Cross-listed with PSCI 4100).

Prerequisite(s): PSCI 1100 or equivalent is a strongly recommended prerequisite.

PSCI 8116 POLITICAL PSYCHOLOGY (3 credits)

This course introduces students to the role of human thought, emotion, and behavior in politics through examination of the psychological factors that motivate political elites and the mass public. (Cross-listed with PSCI 4110, PSYC 4110, PSYC 8116)

Prerequisite(s): PSCI 1100 is recommended.

PSCI 8120 SEMINAR IN LEADERSHIP (3 credits)

This course introduces students to classical and contemporary scholarship on leadership theory, research, and application. Students gain a foundation in models of leadership, assess their own leadership styles, and learn to integrate what they learn in corporate, governmental, non-profit, or community organizations. (Cross-listed with CACT 8510)

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8126 PUBLIC OPINION AND POLLING (3 credits)

This course introduces students to the origins, nature, measurement, and consequences of public opinion on policymaking. (Cross-listed with PSCI 4120)

Prerequisite(s): PSCI 1100

PSCI 8135 WOMEN AND POLITICS (3 credits)

This course introduces students to women's political participation, including holding elective office, socialization, the feminist movement and its opposition, and public policies with particular impact on women. The focus is on contemporary perspectives on women in American political ideas and behavior. (Cross-listed with PSCI 3130, WGST 3130, WGST 8135)

PSCI 8136 BROWN V. BOARD OF EDUCATION (3 credits)

Brown v. Board of Education traces the educational history of African Americans from segregation to desegregation to re-segregation. This course will review the legal cases before and after the Supreme Court's Brown decision, their aftermath, and the effects on educational policies and practices. (Cross-listed with BLST 8716, BLST 4710, PSCI 4130).

Prerequisite(s): Graduate standing or instructor permission

PSCI 8145 LATINO/-A POLITICS (3 credits)

This course introduces students to the dynamism and growth of the role of Latinos, as a group of political actors, in the United States. This course provides students with an exposure to and understanding of various concepts and dimensions of this phenomenon, including historical and contemporary Latino political thought and the efforts to increase political empowerment (representation and participation) and influence through grassroots, social, and political movements. (Cross-listed with PSCI 3140, LLS 3140, LLS 8145)

PSCI 8146 CONSTITUTIONAL LAW: CIVIL RIGHTS (3 credits)

This course introduces students to the history, principles, and judicial interpretation of key constitutional provisions and federal statutes regarding civil rights in the United States. (Cross-listed with PSCI 4140)

Prerequisite(s): PSCI 1100 or equivalent.

PSCI 8150 SEMINAR IN CONSTITUTIONAL LAW (3 credits)

This course introduces students to the Constitution and the Supreme Court's exercise of judicial review in relation to governmental powers, civil rights, and civil liberties.

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8165 POLITICAL PARTIES (3 credits)

This course introduces students to the origin, development, structure, and functions of political parties in the United States as political organizations, coalitions of voters, and governing coalitions that seek to hold office and influence public policy. (Cross-listed with PSCI 3160)

Prerequisite(s): PSCI 1100

PSCI 8175 INTEREST GROUPS (3 credits)

This course introduces students to the theories, formation, organization, and activities of interest groups and their impact on public policy, particularly through their role in campaigns and elections and lobbying. (Cross-listed with PSCI 3170)

Prerequisite(s): PSCI 1100

PSCI 8176 CONSTITUTIONAL LAW: FOUNDATIONS (3 credits)

This course introduces students to the principles, design and operation of the American constitutional system with emphasis on analysis of the Declaration of Independence, the Articles of Confederation, the proceedings of the Constitutional Convention, and the Federalist Papers. (Cross-listed with PSCI 4170)

Prerequisite(s): PSCI 1100 or junior standing or permission of instructor.

PSCI 8185 CAMPAIGNS AND ELECTIONS (3 credits)

This course introduces students to the evolution and modern application of campaigns and elections in the United States through examination of campaign management and campaign strategy in congressional and presidential elections. (Cross-listed with PSCI 3180)

Prerequisite(s): PSCI 1100

PSCI 8186 CONSTITUTIONAL LAW: THE FEDERAL SYSTEM (3 credits)

This course introduces students to American constitutional law as it relates to issues of federalism, the relation of the nation and the states, and separation of powers, the relation of the three branches of the national government. (Cross-listed with PSCI 4180)

Prerequisite(s): PSCI 1100

PSCI 8196 CONSTITUTIONAL LAW: CIVIL LIBERTIES (3 credits)

This course introduces students to the philosophy, history, and development of the personal liberties guaranteed by the Constitution including freedom of speech, religion, assembly, petition, and the right of privacy, primarily through examination of Supreme Court decisions. (Cross-listed with PSCI 4190)

Prerequisite(s): PSCI 1100

PSCI 8200 SEMINAR IN FOREIGN POLICY AND NATIONAL SECURITY (3 credits)

This course introduces students to classic and contemporary scholarship on the formulation and implementation of foreign and national security policy in the United States with an emphasis on engaging in thoughtful discussion and individual research.

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8206 INTERNATIONAL RELATIONS OF EAST ASIA (3 credits)

This course introduces students to the international politics of East Asia with an emphasis on the contemporary relations among major East Asian states (China, Japan, the Korean peninsula) and the United States. (Cross-listed with PSCI 4200)

PSCI 8216 INTERNATIONAL RELATIONS OF THE MIDDLE EAST (3 credits)

This course focuses on the international politics of the Middle East region, specifically looking at conditions for peace and causes of war. It examines how the international system, domestic politics, ideologies, and leaders influence international politics in the Middle East. (Cross-listed with PSCI 4210)

PSCI 8220 SEMINAR ON INTERNATIONAL LEADERSHIP AND STRATEGY (3 credits)

This course introduces students to international leadership and strategy theory, research, and application. (Cross-listed with CACT 8540).

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8225 INTERNATIONAL ORGANIZATIONS (3 credits)

This course introduces students to the history, principles, structures, and processes developed to organize and legitimize peaceful reconciliation of the differences of nation-states and to advance their mutual interests in the contemporary global political and economic system. (Cross-listed with PSCI 3220)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8235 GENDER AND GLOBAL POLITICS (3 credits)

This seminar introduces students to gender politics in comparative and international politics. (Cross-listed with PSCI 3230, WGST 3230, WGST 8235)

PSCI 8245 THE POLITICS AND PRACTICE OF HUMAN RIGHTS (3 credits)

This course introduces students to human rights issues across the globe and explores the theoretical foundations of human rights as well as human rights institutions and transitional justice. (Cross-listed with PSCI 3240)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8246 INTERNATIONAL CONFLICT RESOLUTION (3 credits)

This course introduces students to different approaches to peace, their basic assumptions, and their application to current conflicts.. (Cross-listed with PSCI 4240)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8250 SEMINAR IN INTERNATIONAL RELATIONS (3 credits)

This course introduces students to classic and contemporary scholarship on the issues, theories, and methodological approaches associated with the study of the nation-state system, international law, international organizations, international security, and globalization.

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8255 GLOBAL SECURITY ISSUES (3 credits)

This course introduces students to issues of national and international security that cross boundaries and threaten all countries including issues such as climate change, environmental deterioration, population and demographics, gender issues, disease and public health, the media, asymmetrical warfare, drugs/organized crime, and cyberthreats. (Cross-listed with PSCI 3250)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8256 INTELLIGENCE AND NATIONAL SECURITY (3 credits)

This course introduces students to the United States intelligence services, and their relation to broader U.S. national security policy. (Cross-listed with PSCI 4250)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8265 UNITED STATES FOREIGN POLICY (3 credits)

This course introduces students to the analysis of foreign and defense policy processes in the United States, including the role of the President, Congress, Departments of State and Defense, the intelligence community, and other actors/factors affecting policy formulation and implementation. (Cross-listed with PSCI 3260)

Prerequisite(s): PSCI 2210.

PSCI 8266 INTERNATIONAL LAW (3 credits)

The course introduces students to the general principles of international law, including the key actors, the creation and sources of international law, the interpretation of international law by courts and tribunals, and its enforcement. (Cross-listed with PSCI 4260)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8276 GLOBAL ENVIRONMENTAL POLITICS (3 credits)

This course introduces students to issues of global environmental politics and policy, including the science behind issues such as climate change, how environmental policy is made at the national and international levels, and what role politics plays in determining environmental resource use. (Cross-listed with ENVN 4270, PSCI 4270)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8286 INTERNATIONAL RELATIONS OF LATIN AMERICA (3 credits)

Analysis of the role of Latin American states in the international political arena. Emphasis upon developing, applying and testing an explanatory theory of international politics through the study of the inter-American system: the regional, institutional and ideological environment, power relations, policies and contemporary problems. (This course fulfills the department's international politics requirement). (Cross-listed with PSCI 4280, LLS 4280, LLS 8286)

PSCI 8296 INTERNATIONAL DEVELOPMENT & SUSTAINABILITY (3 credits)

This course introduces students to different concepts of international development through the lens of sustainability. The course explores a broad range of activities related to international development, including international aid, trade, philanthropy, interventions in conflict, peacebuilding, public health, human rights, social justice, and the environment. (Cross-listed with PSCI 4290, CACT 8306)

Prerequisite(s): PSCI 2210 or equivalent is recommended.

PSCI 8300 SEMINAR IN POLITICAL THEORY (3 credits)

This course introduces students to the history of political theory, from its origins in ancient Greece to its manifestations in contemporary thought. (Cross-listed with CACT 8200)

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8316 CLASSICAL POLITICAL THOUGHT (3 credits)

This course introduces students to key works representative of premodern political thought. Authors examined may include Plato, Aristotle, Xenophon, Cicero, Augustine, and Aquinas. (Cross-listed with PSCI 4310).

Prerequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8326 EARLY MODERN POLITICAL THOUGHT (3 credits)

This course introduces students to key works of the 16th through mid-18th centuries. Authors examined may include Machiavelli, Hobbes, Hume, Smith and Montesquieu. (Cross-listed with PSCI 4320)

Prerequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8336 LATE MODERN POLITICAL THOUGHT (3 credits)

This course introduces students to key texts of the mid-18th through 19th centuries. Authors to be examined may include Rousseau, Burke, Mill, Tocqueville, Marx, and Nietzsche. (Cross-listed with PSCI 4330).

Prerequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8345 AMERICAN POLITICAL THOUGHT (3 credits)

This course introduces students to the ideals, ideologies, identities, and institutions of American political thought from the country's origins to the present. Topics to be covered may include the political thought of the early American settlers and of the founding generation, the debates over the creation and implementation of the Constitution, the 19th century arguments over slavery, the rise of progressivism, the New Deal and its critics, and contemporary American conservatism and liberalism. (Cross-listed with PSCI 3340)

Prerequisite(s): PSCI 2310 is recommended.

PSCI 8346 CONTEMPORARY POLITICAL THOUGHT (3 credits)

This course introduces students to leading works of contemporary political thought, including Marx, Spencer, Dahl, Rawls, feminism, and rational choice. The theories, their interrelationships, the theorists, and the manifestations of these works will be discussed and analyzed. (Cross-listed with PSCI 4340)

Prerequisite(s): PSCI 2310 or equivalent is recommended

PSCI 8356 DEMOCRACY (3 credits)

A basic study of theory, practice and practitioners of political democracy, its roots, development, present application and problems and future. (Cross-listed with PSCI 4350)

Prerequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 8366 AUTHORITARIAN REGIMES (3 credits)

An analysis of various types of authoritarian regimes, their differences from democratic governments, and the causes of their establishment, maintenance, and failure. (Cross-listed with PSCI 4360).

PSCI 8376 GENERALS AND POLITICIANS: CIVIL-MILITARY RELATIONS (3 credits)

This course introduces students to civil-military relations and military politics across the globe. (Cross-listed with PSCI 4370).

Prerequisite(s): PSCI 2500 or equivalent is recommended.

PSCI 8476 SOUTH AFRICA & THE SOCIO POLITICS OF APARTHEID (3 credits)

South Africa and the Socio Politics of Apartheid examines the lived experiences of South African people under the Apartheid system, and their long struggle against European colonial oppression and racial segregation throughout the 20th century. Students will examine the laws, tools, and strategies that developed and sustained Apartheid, and the anti-Apartheid movements and international pressure that led to its repeal and South African democratic elections. (Cross-listed with BLST 8476, BLST 4470, PSCI 4470, SOC 8476, SOC 4470).

Prerequisite(s): Graduate standing

PSCI 8500 SEMINAR IN COMPARATIVE POLITICS (3 credits)

This course introduces students to classic and contemporary scholarship on the issues, theories, and methodological approaches associated with the systematic and comparative study of nation-states and their political systems with an emphasis on engaging in thoughtful discussion and individual research.

Prerequisite(s): Not open to non-degree graduate students.

PSCI 8505 EUROPEAN POLITICS (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Europe, including the European Union. (Cross-listed with PSCI 3500)

PSCI 8506 GOVERNMENT AND POLITICS OF GREAT BRITAIN (3 credits)

A comprehensive study of contemporary British politics and government. Emphasis will be focused on the formal institutions and informal customs and practices of the British political system. (Cross-listed with PSCI 4500).

PSCI 8526 POLITICS OF FRANCE (3 credits)

This course introduces students to the political heritage of France, contemporary political institutions and problems, and political and policy responses to these problems. (Cross-listed with PSCI 4520)

PSCI 8556 POLITICAL VIOLENCE, INSURGENCY, AND TERRORISM (3 credits)

This course is a survey on the types of violence used within a political context, focusing on its causes, forms and consequences. Specifically, this course details why and how violence occurs, and its impact on institutions and the people operating within that system. (Cross-listed with PSCI 4550).

PSCI 8585 GOVERNMENT AND POLITICS OF RUSSIA AND THE POST-SOVIET STATES (3 credits)

This course introduces students to the political cultures, institutions, processes, and public policies of Russia and the states of the former Soviet Union. (Cross-listed with PSCI 3580)

PSCI 8626 ISLAM AND POLITICS (3 credits)

This course introduces students to the interaction between religion and politics in the Muslim world, covering various political ideologies in the Muslim world and different experiences of Muslim-majority countries such as Saudi Arabia, Pakistan, Iran, Turkey, Indonesia, and Egypt. It will also analyze mainstream and radical transnational Islamic movements. (Cross-listed with PSCI 4620)

PSCI 8645 GOVERNMENT AND POLITICS OF CHINA AND EAST ASIA (3 credits)

This course introduces students to the political cultures, institutions, processes, policies, and other characteristics of China and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 3640)

PSCI 8646 ASIAN POLITICS (3 credits)

This course provides students with a broad understanding of Asian Politics with a focus on Northeast Asia (Mainland China, Japan, South Korea, North Korea, and Taiwan) and some emphasis on Southeast Asia (Singapore, Philippines, Thailand, and Vietnam). Students in this course will investigate these Asian societies and discuss their shared history as well as their common political themes, patterns, and connections. Students will explore state institutions, political parties, and state-society relations through the overarching themes of development, democracy, and nationalism. Specific themes include the economic rise of East Asian states, the emergence and development of democracy in the region, and the persistence of authoritarianism. By the end of the course, students will be able to describe, explain, and critically evaluate from a social science perspective the principal political features and processes of these Asian societies and develop their own research projects based on a topic discussed in the course. (Cross-listed with PSCI 4630).

Prerequisite(s): PSCI 2500 or junior standing or permission of the instructor.

PSCI 8665 GOVERNMENT AND POLITICS OF JAPAN AND EAST ASIA (3 credits)

This course introduces students to the political cultures, institutions, processes, policies and other characteristics of Japan and neighboring states, with reference to other major powers engaged in the region. (Cross-listed with PSCI 3660)

PSCI 8685 GOVERNMENT AND POLITICS OF LATIN AMERICA (3 credits)

This course introduces students to the political institutions, processes, and public policies of the states of Latin America. (Cross-listed with PSCI 3680, LLS 3680, LLS 8685)

PSCI 8705 GOVERNMENT AND POLITICS OF THE MIDDLE EAST (3 credits)

This course introduces students to government and politics in the contemporary Middle East, including considerations of state formation, authoritarianism and democratization, state-society relations, religion, culture, gender, and economy. (Cross-listed with PSCI 3700)

PSCI 8716 COMPARATIVE INTERNATIONAL DEVELOPMENT AND INNOVATION (3 credits)

Comparative International Development and Innovation will analyze the rise and fall of civilizations from a historical and theoretical perspective in a comparative manner. The course will address issues concerning political, social, economic, and environmental change in national, and international contexts. Among its major emphases are state institutions, economic growth, entrepreneurship, and the transformation of social structure and culture. (Cross-listed with PSCI 4710, ENTR 4710, ENTR 8716).

PSCI 8776 POLITICAL SOCIOLOGY (3 credits)

This course explores political sociology, focusing on political processes and power. Political sociologists investigate relationships between political institutions and various other institutions, including but not limited to the economy, education, media, and religion, and the impacts that these relationships have on society and the individuals that comprise the society. This course will explore the concepts, theories, and knowledge that comprise this field such as power, legitimacy, the state, networks, stratification, and collective action. (Cross-listed with PSCI 4770, SOC 4770, SOC 8776).

Prerequisite(s): Graduate standing

PSCI 8826 POLITICS AND FILM (3 credits)

This course introduces students to the analysis of politics and film, focusing on how politics is portrayed in film and the politics of film making. (Cross-listed with PSCI 4820)

PSCI 8900 READINGS IN POLITICAL SCIENCE (1-3 credits)

This course provides students an opportunity to study an advanced and specialized subject matter in the field of political science not covered in existing courses. The student must be capable of pursuing a highly independent course of study, which must be approved in consultation with the instructor in advance. This course may be repeated for different topics up to a maximum of six credit hours.

Prerequisite(s): Permission of graduate adviser

PSCI 8910 POLITICAL SCIENCE INTERNSHIP (3 credits)

This course offers students an opportunity to experience the resolution of public issues through direct involvement in career-oriented policy organizations. The host organization must be approved in advance in consultation with the internship coordinator. This course may be repeated for a maximum of six credit hours.

Prerequisite(s): Permission of instructor.

PSCI 8920 SEMINAR IN SPECIAL TOPICS IN POLITICAL SCIENCE (1-3 credits)

This course introduces students to an advanced and specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of twelve credit hours.

Prerequisite(s): Permission of graduate advisor.

PSCI 8926 ADVANCED SPECIAL TOPICS IN POLITICAL SCIENCE (1-3 credits)

This course introduces students to an advanced and specialized subject matter in the field of political science not covered in existing courses. This course may be repeated for different topics up to a maximum of six credit hours. (Cross-listed with PSCI 4920)

PSCI 8950 GRADUATE PROGRAM COMPREHENSIVE ASSESSMENT (0 credits)

This zero-credit-hour course is used to assess the knowledge and skills that are imparted by the Political Science Graduate Program to its students. Graduating students must enroll in the class and take the comprehensive assessment, which will test how students can synthesize knowledge in three subfields of Political Science. The students will get pass/fail grades for the course.

Prerequisite(s): At least 21 credit hours taken, at least 3 subfield seminars taken, and permission of Graduate Program Chair. Not open to non-degree graduate students.

PSCI 8980 RESEARCH IN POLITICAL SCIENCE (3 credits)

This course provides students an opportunity to conduct research in a specialized subject matter in the field of political science. The student must be capable of pursuing a highly independent course of study, which must be approved in consultation with the instructor in advance. This course may be repeated for different topics up to a maximum of six credit hours.

Prerequisite(s): Permission of graduate advisor, not open to non-degree graduate students.

PSCI 8990 THESIS (3-6 credits)

A research project, written under the supervision of a graduate adviser in the Department of Political Science, in which the students establish their capacity to design, conduct and complete an original, independent, scholarly investigation of a high order. The research topic and the completed project must be approved by the student's departmental committee.

Prerequisite(s): Permission of graduate program chair. Not open to non-degree graduate students.

Human Centered Computing, MS

Human-Centered Computing (HCC) is the interdisciplinary practice of conceptualizing, designing, prototyping, and fielding technology-based products or services that place human needs, behaviors, and experiences at the forefront. It integrates both technological and humanistic perspectives

to ensure that computing solutions are usable, accessible, and impactful. By nature, HCC brings together aspects of computer science, design, psychology, data science, and videogame design and development with a wide range of other disciplines such as health care, education, entrepreneurship, the arts, and public administration. It emphasizes a holistic and immersive approach to technology development—focusing not only on the technical feasibility of an idea but also on its human relevance and societal implications.

There is a great demand for HCC entrepreneurs and professionals locally, regionally, and nationally, and the MS in HCC program was created, in part, to prepare a workforce to meet those demands, in addition to satisfying the intellectual curiosity and honing the intellectual capacity of passionate creatives who work in and with technology.

Program Website (<https://www.unomaha.edu/college-of-information-science-and-technology/academics/it-innovation.php>)

Fast Track

The School of Interdisciplinary Informatics (SI2) has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine (9) graduate hours toward the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following:
 - Students pursuing a CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field
 - Students pursuing the Bachelor of Multidisciplinary Studies desiring to pursue the MS in human centered computing.
 - Students pursuing the BS in neuroscience.
- Students must have completed no less than 60 undergraduate hours and with at least 24 undergraduate credits yet to complete.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit it to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in the selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.

- Admission to Fast Track does NOT guarantee admission to the graduate program.
- The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 1
- Summer 2026: April 1
- Fall 2026: July 1

Other Requirements

- The minimum undergraduate grade point average (GPA) requirement for the MS in human centered computing program is 3.0 or equivalent score on a 4.0 scale. Provisional admission may be granted to applicants with a GPA of 2.7 or above (see categories of admission below). Applicants should have the equivalent of a four-year undergraduate degree.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the [waiver list \(https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php\)](https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Writing Sample:** Applicants are required to submit a writing sample about an area of innovation, information technology, or design that is of specific interest to them. This should be a two page double-spaced word processed essay that showcases your unique interest in interdisciplinary ideas and applications in technology, and demonstrates your potential for success in a hands-on and self-directed the graduate program.
- **Resume:** Submit a detailed resume indicating your work experience and background.
- Optional: One letter of recommendation from a reference who can evaluate your work and/or academic achievements.

Non-Degree students interested in taking courses without admission to the MS in human centered computing degree program may do so with permission of the graduate program committee.

Degree Requirements

Code	Title	Credits
Core		9
HCC 8000	TECHNOLOGY & INNOVATION STUDIO (repeat 3 times for a total of 9 credits)	9
Electives		15-18
A total of 15-18 graduate-level credits from any program in the NU system that aligns with the student's area of interest. Students are encouraged to consider the following examples of acceptable electives from within the HCC program:		
HCC 8210	DESIGN SCIENCE AND THEORY DEVELOPMENT	
HCC 8220	DESIGN PROCESS	
HCC 8006	SPECIAL TOPICS IN IT INNOVATION	
HCC 8910	INTERNSHIP	
HCC 8900	INDEPENDENT STUDIES	
Exit Requirement (choose one)		3-6

HCC 8960	THESIS EQUIVALENT PROJECT IN IT INNOVATION	6
or		
HCC 8990	THESIS	6
or		
CIST 8950	GRADUATE CAPSTONE ³	3
Total Credits		30

¹ A maximum of 6 credit hours of internship may be used towards degree requirements.

² A maximum of 6 credit hours of independent study may be used towards degree requirements.

³ Students choosing the capstone exit option are required to take 3 additional credits of electives to earn 30 credit hours total.

Exit Requirements

Specific guidance and requirements for each exit requirement option are described below:

Guidance for Thesis-Equivalent Project Exit Option

Students who choose this exit option will identify a project topic that they would like to pursue. Thesis-equivalent projects are independent (each student is responsible for their own project) and involve a substantial development component (e.g., application, website, algorithm, hardware systems) of an artifact, system, or product of interest to the student. Students are highly encouraged work with IS&T faculty members to refine their ideas and seek mentors prior to starting the project. Students who choose this exit option are required to:

1. Apply for eligibility to take HCC 8960 with a chosen faculty advisor who will serve as their supervisory committee chair. The HCC graduate committee will act as the de facto supervisory committee for the thesis equivalent project.
2. Register for 6 credits of HCC 8960 to complete the chosen project.
3. Participate in a public oral defense of their project work to their supervisory committee.

Guidance for Thesis Exit Option

All candidates completing the thesis option should carefully review the Graduate College requirements for forming the supervisory committee, Thesis/Thesis-Equivalent Proposal Approval forms, and final approval and submission of the thesis. Students who choose this exit option are required to:

1. Apply for eligibility to take HCC 8990 with a chosen HCC faculty advisor who will serve as their thesis committee chair.
2. Form a supervisory thesis committee composed of 2 HCC faculty and 1 outside member. All supervisory committee members will then sign the Proposed Supervisory Committee form.
3. Students will draft a written thesis proposal outlining the proposed research activities to be conducted for their thesis. The scope and contributions are to be developed with the guidance of the supervisory committee chair. This proposal is distributed to their supervisory committee members for review.
4. Present their thesis proposal in a presentation to their supervisory committee members, and feedback received from this presentation is used to guide the student to refine their proposal. Once all changes have been finalized, the supervisory committee signs the Thesis Proposal Approval form.
5. Register for 6 credits of HCC 8990 to conduct the research under the supervision of their thesis committee chair.
6. At the conclusion of the student's thesis work, they will finalize a draft of the thesis and send it to their supervisory committee for review. Students will then schedule a public thesis defense session where they will present the work done to date and answer questions from their

committee about the research. The committee will then either approve the thesis outright or request changes. Once all changes have been finalized, the Report of Completion of Degree form will be signed by all committee members.

Since disciplinary norms can vary, students are strongly encouraged to work with their supervisory committee chair to make sure expectations are met.

Guidance for Capstone Exit Option

Students who choose this exit option will enroll in CIST 8950, which is an interdisciplinary capstone course in the final semester of their program. Students who choose this option are required to take 3 credits of additional electives, subject to the requirements outlined above. Students choosing this option are highly encouraged to take HCC 8210 and HCC 8220 prior to enrolling in CIST 8950.

Quality of Work Standards

The Graduate College's Quality of Work standards shall be applied to foundation courses as well as courses taken as part of the degree program. In particular, the GPC will recommend to the Graduate College that any

1. Student receiving a grade of "C-" or below in any foundation courses will be automatically dismissed from the program or, in the case of unclassified or non-degree students, be automatically denied admission.
2. Student receiving a grade of "C+" or "C" in any foundation course will be placed on probation or dismissed from the program.
3. Student not maintaining a "B" (3.0 on 4.0 scale) average in foundation courses will be placed on probation or dismissed from the program.

Computing & Information Science, PhD

The PhD program in computing and information science at the University of Nebraska Omaha (UNO) is a research-intensive, multidisciplinary program focused around the core areas of computer science, management information systems and interdisciplinary informatics.

Program Related Information

Program Contact

Emily Wiemers, Graduate Advisor

ewiemers@unomaha.edu

Program Website (<http://phd.ist.unomaha.edu/>)

Other Program Related Information

Student Learning Outcomes

Upon completion of a PhD in computing and information science:

- Students will be able to interpret and synthesize research literature from multiple areas of the discipline.
- Students will be able to identify open research questions and design appropriate approaches to investigate them.
- Students will demonstrate the ability to contribute to scholarly literature.
- Students will be able to effectively engage in learning about computing and information science content.

Admissions

Applicants with an earned undergraduate or graduate degree in a computing discipline (e.g., computer science, management information systems, bioinformatics, cybersecurity or a closely related discipline) can apply for admission to the PhD program. Applicants whose prior degrees

are outside of a computing discipline are encouraged to discuss their interests with the program director prior to application.

Admission decisions are based on a holistic review of application materials by the College of IS&T's Doctoral Program Committee (DPC). During this review process the committee is looking for candidates that demonstrate:

- **Technical Interest.** Our program is a PhD in computing & information science. As such, you will be expected to demonstrate an interest and aptitude in computing that fits with the nature of our program.
- **Prior Experience with Research.** A PhD is fundamentally a research degree. Highlight your involvement in existing research projects, thesis work, and/or publications. Be specific about the roles you played in various projects in your statement of purpose and seek reference letters from those who can speak to your research experience and potential.
- **Alignment with UNO Faculty Expertise.** Alignment of your research interests with the expertise of graduate faculty in the College of IS&T is an important consideration during admissions in order to ensure successful applicants will have access to appropriate research mentors from the start of the program. Review IS&T faculty profiles on the web, identify specific research areas that interest you in your statement of purpose, and explicitly mention faculty names with whom you see a good match. Feel free to reach out via email to our faculty prior to submitting your application to discuss your interest.
- **Independence and Initiative.** A PhD is largely self-motivated and self-directed work. As such, successful PhD applicants should demonstrate a history of taking the initiative to perform beyond expectations and work independently.
- **Proficiency in written and verbal English communication.** The ability to read, comprehend and write scholarly papers is key to success as a doctoral student.

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: September 15 (Limited availability)
- Fall 2026: January 15

NOTE: All materials, including recommendation letters, transcripts, and applicable test scores, must be received by the application deadline. Applications which are incomplete after the published deadline will not be reviewed.

Other Requirements

- **Entrance Exam:** Graduate Record Examination (GRE) scores are required for most applicants but are only one component of a holistic admission decision. Successful applicants have typically had GRE scores of 150 verbal and 160 quantitative or better. The GRE requirement may be waived for exceptional applicants subject to the GRE waiver procedures documented below.
 - The GRE may be automatically waived for applicants holding a master's degree from an accredited US institution provided that (1) the degree is in a computing discipline and (2) that the graduate GPA for that degree is 3.3 or higher.
 - A GRE waiver may also be requested for candidates meeting one or more of the conditions below.
 - Those who hold a bachelor's degree in a computing discipline from an accredited US institution with a GPA of 3.6 or higher.
 - Those with a minimum of 5 years of professional experience in the IT industry in the United States.
 - Those with a history of high-quality, peer-reviewed publications in a computing field who have made significant contributions to the authorship of those papers.
 - GRE waiver requests must be submitted to the DPC chair using the form located on the program website along with supporting

documentation. Requests must be received at least 1 month prior to the published application deadline for the applicable term. Note that eligibility to apply for a GRE waiver does not guarantee it will be granted, and waivers will only be approved by the DPC in cases where the candidate's record permits an evaluation of their research potential without reference to GRE scores.

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 90, IELTS: 7.0, PTE: 61, Duolingo: 120
- **Statement of Purpose:** A written statement (not to exceed two single-spaced pages) which addresses the following:
 - How is a PhD in computing & information science going to advance your career?
 - Why is UNO the right place for you to pursue doctoral studies?
 - In answering the questions above the statement should:
 - Describe your research interests and how they align with the work of current IS&T faculty members.
 - Describe any relevant technical knowledge/skills or professional experiences that relate to the research you hope to conduct in computing and information science.
 - Describe your prior research experiences. If you have participated in collaborative research, what was your role on those projects?
 - Lastly, if you have included optional supporting materials as part of your application, explain them.
- **Current resume or CV:** In addition to listing prior academic accomplishments and professional positions, please include complete citations for all prior authored academic publications if applicable.
- **Letters of Recommendation:** Three letters of recommendation are required. The best recommendation letters are from those who can give an in-depth evaluation of your strengths and weaknesses with respect to academic work.
 - We strongly recommend that at least one letter writer be able to speak directly about your prior research experiences.
 - Letters must be submitted directly to the application system by the letter writers. The DPC reserves the right to verify the content of recommendation letters with their authors.
- **Transcripts:** Transcripts from all higher-education institutions previously attended are required.
- **Optional Supporting Materials:** Applicants are encouraged to include a PDF portfolio of supporting materials that may provide additional evidence of research potential. This may include:
 - Copies of academic papers, publications, theses or project reports done in an academic or industrial setting
 - Documentation of technical accomplishments like a portfolio of significant software development projects
 - Documentation of certifications or other forms of micro-credentials not otherwise reflected on transcripts
 - Other materials you would like to share with the committee
 - If you are interested in applying for a doctoral fellowship, please submit a letter stating your interest in the fellowship, why you are interested, information on your research experience and knowledge, and a brief description of the type of research area you would

like to explore. For more information about the fellowship, please contact the CIS doctoral program advisor.

Admission Process and Timeline

Eligible students who request a GRE waiver must do so no later than one month prior to the published program application deadline for the term. These requests will be reviewed by the DPC, and applicants will be notified via email of the GRE waiver outcome prior to the admission deadline.

Following the admission deadline, the DPC will begin review of all complete applications. It is the applicant's responsibility to ensure all materials are available for review (including reference letters, transcripts, and others supporting materials) in the admission system by the deadline. Incomplete applications will not be considered by the committee.

Candidates identified for further consideration may be invited by the committee to take part in an interview with a small group of faculty to learn more. These interviews are usually conducted within 4-8 weeks following the application deadline. Final admission decisions are usually made within 2-3 weeks following those interviews.

Degree Requirements

Coursework

The PhD in computing & information science program requires 90 credit hours of graduate-level studies. The coursework taken by a student is entered into a plan of study that must be approved by the doctoral program committee before the beginning of the PhD student's second year of studies. The coursework consists of foundation courses, doctoral seminar and colloquia, a major field of study, and the dissertation. General rules applying to all plans of study include:

- Undergraduate course credits taken at UNO or another institution cannot be counted toward the PhD degree in computing & information science.
- Dual-listed undergraduate courses ending in 8xx5 cannot be counted as course credits in the PhD program.
- Only nine hours ending in 8xx6 are allowed outside the Foundation Course section of a plan of study.
- A maximum of three directed study type courses (totaling nine hours) may be counted in the plan of study, including CIST 9970, CIST 9980, masters-level independent study courses, or other equivalents.

The different categories of credit hour requirements for the program are outlined below.

Foundation Courses 24 credit hours

Foundation courses constitute any of the courses offered in the master's degree in a computing-related field (e.g.: computer science, management information systems, cybersecurity, IT innovation).

Credit for graduate computing-related coursework in a prior degree may only be used to satisfy foundation course hours in the plan of study. A grade of B- or better is required in all coursework from a prior degree applied to foundation requirements, and thesis, thesis-equivalent project, independent study credits, or their equivalents from a prior degree may not be counted towards foundation requirements.

Core Courses 6 credit hours

Code	Title	Credits
CIST 9080	RESEARCH DIRECTIONS IN I.T.	3
CIST 9040	COLLOQUIUM ON IT RESEARCH	1
CIST 9050	COLLOQUIUM ON IT TEACHING	1

CIST 9060	COLLOQUIUM ON IT PROFESSION AND ETHICS	1
Total Credits		6

Major Field of Study 18 credit hours

Coursework in the major field of study provides students the advanced study needed to develop an in-depth knowledge of their chosen field of research.

- For students who have indicated a concentration (requirements indicated on the concentrations tab above) within their PhD in computing & information science plan of study, the major of field of study courses comprise the concentration credit hours.
- If students opt to not pursue one of the approved concentrations, they may work with their doctoral program committee to create a major field of study. If this option is pursued, these courses could include independent research (six hours maximum), and doctoral level research other than dissertation (six hours maximum), and other approved 9000 level advanced research seminars. Regardless of the major field of study, at least three courses (nine hours) must be 9000 level courses. The remaining courses could include a maximum of three hours of 8xx0 level graduate only courses, with no course ending in 6.
- Only approved concentrations are noted on a student's transcript.

Electives 18 credit hours

- The goal of this category of courses is to provide greater flexibility to students so they can focus their research interests and engage in conducting research.
- The student in consultation with the doctoral program committee will develop a selection of electives for their plan of study.
- Courses (9xxx or 8xx0 levels) may include discipline specific research methods, statistical methods and tools, additional dissertation credits (maximum of 12 additional credits), research other than dissertation (maximum of 3 credits), advanced research seminars, and internship credit (one credit per semester and limited to three credits).

Dissertation 24 credit hours

A PhD dissertation is a substantial piece of independent research that is required for all students pursuing a doctorate degree. It is a piece of original work that has not been published elsewhere and, most importantly, makes a new contribution to the field. In order to provide additional flexibility and emphasis on conducting research, dissertation credits can be a maximum of 36 credit hours and a minimum of 24 credit hours.

Comprehensive Examination & Admission to Candidacy

Comprehensive exams will typically be scheduled around the middle of the fall and spring semester, as needed. Students intending to take comprehensive exams must apply to do so at least one semester prior to the term in which they plan to take the exam. Comprehensive exams may not be taken without an approved plan of study in place and the student has completed all core coursework in the plan. Typically, the comprehensive exam will be administered between the fourth and sixth semesters of study in the PhD program (not including summers).

The comprehensive exam will be a depth exam and assess the candidate's competency in the major field of study.

- Written Depth (Major Field of Study) Examination (one day)
 - When applying for the exam, students without an approved dissertation committee must name a depth examining committee. This committee shall consist of the student's faculty advisor and at least two graduate faculty members from IS&T with relevant expertise in the student's intended area of research. For students with an approved dissertation committee on file, that committee will serve in this capacity.

- The student and their faculty advisor will prepare a personal reading list of publications aligned with the student's intended dissertation research specialization. This reading list should be finalized no later than when the student applies to take the comprehensive exam.
- The faculty advisor, in consultation with other depth examining committee members, will prepare a minimum of two essay questions that assess the student's depth of knowledge in their individual research trajectory.
- Responses to depth questions will be assessed by the student's depth examining committee members.
- Students receiving a failing result on the written depth exam may not proceed to the oral examination.
- Oral Examination
 - Prior to taking the written depth exam, the student will prepare and submit a research pre-proposal about their intended dissertation focus to their depth examining committee members. Details about the structure and content of the pre-proposal can be found on the PhD in computing & information science program website.
 - Within two weeks of being notified of a passing result of the written depth comprehensive examination, the student will give a brief presentation (approximately 20 minutes) of their research pre-proposal to their depth examining committee members, followed by a question and answer period.

Faculty members assessing the different components of the exams will be responsible for communicating a strictly pass/fail result to the DPC. A student may not be asked to revise any part of their examination after submission. Should the student fail one or more parts of the comprehensive exam, they may be allowed to re-take it during the following academic term upon specific recommendation by the DPC. Students may only attempt a comprehensive exam a maximum of two times.

Upon successfully completing all three parts of the comprehensive examination and meeting the general residency requirements outlined in the Graduate Catalog, the student will advance to candidacy and should file the necessary paperwork with graduate studies.

Dissertation

Dissertation Committee

Students must establish their full dissertation committee no later than the end of the semester when they complete their comprehensive examination. Makeup of the dissertation committee is subject to general Graduate College rules governing dissertation committees. For purposes of the computing and information science program, all graduate faculty members in the College of Information Science & Technology are considered internal to the student's academic program.

Dissertation Credits

The dissertation of a PhD candidate is supervised by the chair or co-chairs of the student's dissertation committee in consultation with other members of the committee. While working on his or her dissertation, the candidate should take hours for the course CIST 9990. A minimum of 24 hours of this course is required for graduation. Dissertation course credits should be taken only after the PhD student has passed all elements of the comprehensive exam and advances to candidacy.

IMPORTANT NOTE: A minimum of seven months must elapse between the date of the PhD student's advancement to candidacy and the date of his or her dissertation defense.

Dissertation Proposal

Students must formally propose their dissertation to their approved dissertation committee. A written proposal should be prepared under the guidance of the dissertation committee, and a public oral defense of the proposal should be scheduled with the committee members allowing for sufficient time to review the written document. The result of the proposal

defense should be recorded on the appropriate form by the dissertation committee and submitted to DPC. To ensure timely progress in the program, the proposal milestone should be completed no later than when students have accumulated 12 hours of CIST 9900.

Scheduling Dissertation Defense

When the dissertation committee deems it appropriate for the PhD candidate to defend their dissertation, the PhD candidate should prepare a dissertation and submit it to the dissertation committee members. While submitting the dissertation to the dissertation committee, the candidate should also submit a final oral exam form to the Office of Graduate Studies. The final oral exam form requires the signatures of the dissertation committee members and the doctoral program committee chair, and should be submitted at least four weeks before the desired date of the public dissertation defense. Dissertation committee members should sign this form after receiving the final draft of the dissertation.

IMPORTANT NOTE: Before scheduling the dissertation defense, the student should refer to the Office of Graduate Studies website and/or the current graduate catalog for the graduation checklist, dissertation filing deadlines and commencement dates for the semester in which they plan to graduate. Be sure to apply to graduate in MavLINK prior to the deadline.

Teaching Requirement

PhD students are encouraged to teach at least one course in the College of IS&T at the undergraduate level as instructors of record during their PhD studies. Students typically will complete this requirement in their second or third year of studies. Further information about qualifications, timing, and funding related to teaching assignments can be found on the program website.

Concentrations

Artificial Intelligence Concentration

Code	Title	Credits
Required Courses *		12
CSCI 8456	PRINCIPLES OF ARTIFICIAL INTELLIGENCE	
CSCI 8110	ADVANCED TOPICS IN ARTIFICIAL INTELLIGENCE	
ISQA 9130	APPLIED MULTIVARIATE ANALYSIS	
CSCI 9810	RESEARCH FOUNDATIONS IN THEORETICAL COMPUTING	
Electives		6
CSCI 9410	ADVANCED TOPICS IN LOGIC PROGRAMMING	
ISQA 9120	APPLIED EXPERIMENTAL DESIGN AND ANALYSIS	
CSCI 8300	IMAGE PROCESSING AND COMPUTER VISION	
CSCI 8360	MACHINE LEARNING FOR TEXT	
CSCI 8450	ADVANCED TOPICS IN NATURAL LANGUAGE UNDERSTANDING	
CSCI/MATH 8480	MULTI-AGENT SYSTEMS AND GAME THEORY	
ISQA 8160	APPLIED DISTRIBUTION FREE STATISTICS	
ISQA 8340	APPLIED REGRESSION ANALYSIS	
ISQA 8720	APPLIED STATISTICAL MACHINE LEARNING	
HCC 8300	RESEARCH FOUNDATIONS	
MATH 8456	INTRODUCTION TO MACHINE LEARNING AND DATA MINING	
or STAT 8456	INTRODUCTION TO MACHINE LEARNING AND DATA MINING	

CSCI 8476	PATTERN RECOGNITION
CSCI 8486	ALGORITHMS FOR ROBOTICS
CSCI 8590	FUNDAMENTALS OF DEEP LEARNING
BMI 8400	LINEAR ALGEBRA FOR ADVANCED COMPUTING AND AI

Total Credits **18**

* Any required course completed while pursuing a master's degree may be substituted with any of the concentration electives.

Computing Systems Concentration

Code	Title	Credits
Required Courses (select any three from the list below) *		9
CSCI 8150	ADVANCED COMPUTER ARCHITECTURE	
CSCI 8210	ADVANCED COMMUNICATIONS NETWORKS	
CSCI 8530	ADVANCED OPERATING SYSTEMS	
CYBR 9460	SECURITY OF EMBEDDED SYSTEMS	
Electives		9
CIST 9100	SEMINAR ON READINGS IN IT	
CSCI 9420	INTELLIGENT AGENT SYSTEMS	
CSCI 8160	INTRODUCTION TO VLSI DESIGN	
CSCI 8410	DISTRIBUTED SYSTEMS AND NETWORK SECURITY	
CSCI 8390	ADVANCED TOPICS IN DATA BASE MANAGEMENT	
CSCI 8430	TRUSTED SYSTEM DESIGN, ANALYSIS AND DEVELOPMENT	
CYBR 8480	SECURE MOBILE DEVELOPMENT	
CSCI 8610	FAULT TOLERANT DISTRIBUTED SYSTEMS	
CSCI 8620	MOBILE COMPUTING AND WIRELESS NETWORKS	
CYBR 8436	QUANTUM COMPUTING AND CRYPTOGRAPHY	
CSCI 8446	INTRODUCTION TO PARALLEL COMPUTING	
CSCI 9810	RESEARCH FOUNDATIONS IN THEORETICAL COMPUTING	
Courses not used in concentration requirements may also satisfy concentration electives.		
Other courses may count as electives on a case-by-case basis with approval of the concentration faculty		

Total Credits **18**

* Any required course completed while pursuing a master's degree may be substituted with any of the concentration electives.

Human-Centered Computing Concentration

Code	Title	Credits
Required Courses *		
ISQA 9030	BEHAVIORAL AND ORGANIZATIONAL ISSUES IN INFORMATION SYSTEMS	3
CSCI 8256	HUMAN COMPUTER INTERACTION	3
CIST 9100	SEMINAR ON READINGS IN IT (3 total hours required)	1
Electives, selected from		9
CMST 8196	COMPUTER-MEDIATED COMMUNICATION	

CSCI/ACMP 8266	USER EXPERIENCE DESIGN
ISQA 9010	FOUNDATIONS OF INFORMATION SYSTEMS RESEARCH
HCC 8300	RESEARCH FOUNDATIONS
HCC 8220	DESIGN PROCESS
HCC 9300	SOCIAL COMPUTING AND ITS APPLICATIONS
SOC 8060	QUALITATIVE METHODS ¹
Other elective courses can be considered with faculty advisor, concentration, and DPC approval.	
Total Credits	18

¹ If not used as an HCC elective, SOC 8060 or ITIN 8300 can satisfy the IT PhD core requirement for a research methods course for students in the HCC concentration.

* Any required course completed while pursuing a master's degree may be substituted with any of the concentration electives.

IT Project Management Concentration

Code	Title	Credits
Required Courses *		
ISQA 9010	FOUNDATIONS OF INFORMATION SYSTEMS RESEARCH	3
ISQA 8810	INFORMATION TECHNOLOGY PROJECT FUNDAMENTALS	3
CIST 9100	SEMINAR ON READINGS IN IT (1 cr to be taken multiple times for 3 credits total, ITPM designated section only)	3
Electives		
Select 9 elective hours from below, with at least one elective at 9xxx level		9
CIST 9900	SPECIAL TOPICS IN INFORMATION TECHNOLOGY	
ISQA 9020	TECHNICAL AND PROCESS ISSUES IN INFORMATION SYSTEMS RESEARCH	
ISQA 9030	BEHAVIORAL AND ORGANIZATIONAL ISSUES IN INFORMATION SYSTEMS	
PSYC 9070	PROSEMINAR: COGNITIVE PSYCHOLOGY	
PSYC 9630	LEADERSHIP THEORIES AND RESEARCH	
CSCI 8710	MODERN SOFTWARE DEVELOPMENT METHODOLOGIES	
CSCI 8790	ADVANCED TOPICS IN SOFTWARE ENGINEERING	
CSCI 8700	SOFTWARE SPECIFICATIONS AND DESIGN	
ISQA 8210	MANAGEMENT OF SOFTWARE DEVELOPMENT	
ISQA 8820	PROJECT RISK MANAGEMENT	

Other elective courses may be selected with the by approval of the student's supervisory committee

* Any required course completed while pursuing a master's degree may be substituted with any of the concentration electives.

Academic Performance

Progress Report

Every doctoral student (full time or part time) and must complete an annual progress report in consultation with their faculty advisor. These forms must be submitted for review by the Doctoral Program Committee (DPC) to assess the student's progress in the program and track program level

Student Learning Outcomes. Students will report on their completion of program milestones, outcomes of teaching assignments, and publications or measures of scholarly output. An electronic copy of the current form is available on the IT PhD program website.

The DPC will review progress reports and provide the student and their faculty advisor with a written assessment of progress. Any items of concern identified in this written assessment should be addressed in a timely manner by the student and their faculty advisor to ensure continued satisfactory progress in the program. If the DPC deems progress as not satisfactory, the student will be placed on probationary status and the student will be ineligible for funding as a graduate assistant. Students placed on probation must complete an additional progress report in the next semester updating DPC of their progress. After one semester on probation, a student whose performance has not improved will be recommended for dismissal by the Graduate College.

If student progress reports are not completed by the specified deadline, an advising hold will be placed on the student record and the student will be contacted and given an opportunity to submit the progress report within five days of being notified. If no progress report is received, the student's progress will be considered unsatisfactory and they may lose their funding and be counseled out of the PhD program.

An individual dismissed from the PhD may petition the DPC for permission to reapply. The petition must be sent via email to the Director of the PhD in IT doctoral program. The email should include reasons for the poor academic performance. The DPC will decide each case on an individual basis. The petition must be received by April 1 for the fall or summer semester and by November 1 for the spring semester.

Literacy, MS

Literacy is foundational to every part of teaching and learning. The Master of Science in literacy focuses on literacy pedagogy, as well as supporting candidates to become critically engaged teachers who are prepared to support diverse learners in all aspects of literacy learning. Candidates will engage in experiences to bridge theory to practice, while working toward professional goals as leaders in the field.

For candidates who hold a current teaching certificate, the Master of Science in literacy leads to eligibility for an added PK-12 reading specialist endorsement. During the program candidates will:

- Bridge theory, research, and practice to support PK-12 students in authentic literacy experiences;
- Support, assess, and develop interventions to help students thrive as literacy learners in PK-12 settings;
- Create classrooms that engage culturally responsive teaching practices to support diverse students;
- Critically examine various types of literature to increase students' skills and perspectives;
- Engage as literacy leaders at local and national levels;
- Develop skills to navigate and to build action research in classrooms.

Special Notes:

- To add the endorsement to your teaching certificate, the Nebraska Department of Education requires a minimum of two years of teaching experience and successful completion of the Praxis II.
- The master's degree in literacy does not lead to initial teacher certification.

Program Related Information

Program Contact

unotedgraduateprograms@unomaha.edu

Program Website (<https://www.unomaha.edu/college-of-education-health-and-human-sciences/teacher-education/graduate/literacy.php>)

Unclassified Students

Students who are not planning to pursue a program leading to a graduate certificate or a master’s degree can be admitted to the literacy program with unclassified status. Candidates holding a previous master’s degree in education who are seeking additional teaching endorsements may wish to choose an unclassified status. Unclassified students are allowed to take courses for which they meet the prerequisite. Successful completion of graduate courses as an unclassified student does not obligate the department to accept those courses for credit toward the fulfillment of degree requirements. Formal advisement in an endorsement area is required. Students admitted as unclassified are not eligible for financial aid.

Formal advisement in an endorsement area is required.

- Candidates should apply for endorsements as soon as they are eligible. If a candidate applies 10 years or more after completing all coursework, a review is required to determine if more coursework is needed.
- To add an endorsement 1/3 of the coursework must be completed at UNO in the endorsement area.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 10
- Summer 2026: June 1
- Fall 2026: August 1

Other Requirements

- A minimum undergraduate GPA of 3.0 (on a 4.0 scale).
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Valid teaching certificate
- International students who do not expect to teach in the US **may** be eligible for admission.

The requirements displayed below are for students not pursuing a concentration.

Degree Requirements

Code	Title	Credits
TED 8050	DATA-DRIVEN DECISION MAKING FOR EDUCATORS	3
TED 8050 must be taken within the last nine hours of the program

Management Information Systems

Degree Programs Offered

- Management Information Systems, MS (p. 1133)
- Business Administration, MBA and Management Information Systems, MS (MBA/MIS (p. 1022))
- Public Administration, MPA and Management Information Systems, MS (MPA/MIS (p. 1142))

Certificates Offered

- Data Analytics Certificate (p. 1144)
- Data Management Certificate (p. 1145)
- Information Assurance Certificate (p. 1147)
- Project Management Certificate (p. 1148)
- Systems Analysis and Design Certificate (p. 1149)

Management Information Systems, MS

The Master of Science in management information systems (MIS) degree is designed to give students the skills and background needed to develop

and manage an organization's information resources, technology, and infrastructure with a focus on the practical application of these skills. The program prepares graduates to excel in workplaces transformed by machine learning and data analytics. It will serve as a source of added knowledge and experience for MIS graduates and practitioners interested in obtaining an advanced degree. It will also provide career growth opportunities for the non-MIS and non-business degree holders who find that their careers demand graduate level MIS education.

The MS in MIS prepares students for a variety of high-demand positions, including applications and web-site developer, computer network manager, business system analyst/manager, consultant, technology manager, as well as roles in artificial intelligence, cloud computing, and data analysis. Graduates gain competencies that can be applied in diverse industries including agriculture, healthcare, finance, banking, and retail. MS in MIS alumni have secured internships and positions at leading regional and national organizations, reflecting the program's robust industry connections and the breadth of career pathways it supports.

The MS in MIS also prepares students for admission to doctoral programs in information systems. A community advisory committee helps keep the program current with the needs of the business community. The MS in MIS program is a STEM designated program (CIP code: 11.0401)

Program Website (<http://www.unomaha.edu/college-of-information-science-and-technology/information-systems-and-quantitative-analysis/graduate/>)

Fast Track

The Department of Information Systems and Quantitative Analysis has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine (9) graduate hours toward the completion of their undergraduate program as well as the graduate degree program. Students will work with both undergraduate and graduate advisors to ensure graduate classes selected will count toward both programs, should a student wish to earn a graduate degree in a separate College of Information Science & Technology (CIST) area than their undergraduate degree.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following:
 - Students pursuing a CIST undergraduate degree desiring to pursue an MS in either the same or a related CIST field
 - Students pursuing a Bachelor of Multidisciplinary Studies who wish to pursue the MS in MIS.
- Students must have completed no less than 60 undergraduate hours and within at least 24 undergraduate credits yet to complete.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form, obtain all signatures and submit it to the Office of Graduate Studies prior to first enrollment in a graduate course.

- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. All applicants will need to meet any other admission requirements established for the MS in selected CIST program. The application fee will be waived if the applicant contacts the Office of Graduate Studies for a fee waiver code prior to submitting the MS application.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

International Dual Degree

The College of IS&T, in conjunction with the Management Center Innsbruck (Austria) (MCI) and the Technical University of Braunschweig (Germany) (TUB), offers a small number of interested students the opportunity to receive both the MS in MIS (UNO) degree and the MA in Management, Communications and Information Technology (MCiT) (MCI) or the Masters in MIS (TUB) degree in a two-year, full-time equivalent period. This is implemented as an international dual degree track within the MS in MIS degree with courses that transfer in both directions. The international dual degree track, like the traditional MS in MIS program, requires the equivalent of 36 U.S. credit hours of course work beyond any foundation requirements. Students who wish to pursue this option will work closely with an advisor to develop a detailed plan of study.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 1
- Summer 2026: April 1
- Fall 2026: July 1

Other Requirements

- The minimum undergraduate grade point average (GPA) requirement for the MS in MIS program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a four year undergraduate degree.
- **Entrance Exam:** Although not required, submitting GMAT or GRE scores may strengthen your application.
- **English Language-Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** Applicants are required to submit a statement of purpose (500-750 words) addressing the following. The statement must be written in the applicant's own words, reflecting their goals and aspirations. Plagiarism in the statement may result in the rejection of the entire application.
 - Motivations for pursuing graduate education
 - Relevant qualifications or work experience that demonstrate potential for success in the graduate program

- Career goals
- Why you want to study at UNO
- **Resume:** Submit a detailed resume indicating your work experience and background.
- **OPTIONAL:** One letter of recommendation from a reference who can evaluate your work and/or academic achievements.
- **OPTIONAL:** Application for Graduate Assistant Position

The MS in MIS program hires departmental graduate assistants (GA) after successful completion of at least a semester in the program. However, a few research positions may be available to incoming students. If you are interested in applying for one of those positions, please submit a letter stating your research area interests and why you feel you would make a good GA. Please note that GA positions will be considered after admission and program admission is not a guarantee of receiving a GA position.

Students interested in taking courses without admission to the MS in MIS degree program may do so with permission of the graduate program committee. Contact mgreiner@unomaha.edu.

Requirements

Foundation Courses

Foundation courses ensure that all students in the MS management information systems (MIS) program have a strong foundation on which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for other courses in the program, but they also contain a distinct body of knowledge that is an important part of the MIS professional's education. All foundation courses are required for all students. Students who have obtained an undergraduate MIS degree will typically have this foundation. Other students, including computer science or engineering majors, will usually have to take one or more foundation courses. Occasionally, a student's work experience may be sufficient to waive one or more foundation courses.

Waivers for foundation courses are granted by the chair of the graduate program committee upon the recommendation of the faculty member who is responsible for an individual foundation course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have an option for testing out. Results of a test out are not appealable or repeatable.

Foundation courses cannot be used to satisfy the 36 semester hours required for the MS in MIS degree. Students who have not completed all the foundation course requirements may be admitted on provisional status until those requirements have satisfactorily been completed. **Students are required to finish foundation courses within their first 18 credit hours.**

Code	Title	Credits
CIST 1600	INTRODUCTION TO PROGRAMMING USING PRACTICAL SCRIPTING (or equivalent)	3
ISQA 3900	WEB APPLICATION DEVELOPMENT	3
ISQA 8030	FOUNDATIONS OF INFORMATION SYSTEMS	3

Code	Title	Credits
ISQA 8990	THESIS	6
or		
ISQA 8950	CAPSTONE MANAGEMENT INFORMATION SYSTEMS	3

Other Requirements

- All core classes must be complete before students may enroll in ISQA 8950.
- All candidates should carefully review the Graduate College requirements for forming the supervisory committee, Thesis/Thesis Equivalent Proposal Approval forms, and final approval and submission of the thesis.
- Transfer students may request permission to transfer as many as 12 semester hours of credit on a 36-hour program provided the courses are pertinent to the student's graduate program. Submit petitions to the Graduate Program Committee for transfer credit and include a syllabus for each course to be transferred.
- ISQA 8086, ISQA 8076, and ISQA 8066 combined hours cannot exceed 9 credit hours.
- ISQA 8070, ISQA 8090, and ISQA 8080 combined hours cannot exceed 9 credit hours.
- Students have seven years to complete their MS in MIS degree. The 7-year time limit starts with the first degree-program class on the plan of study.

Concentrations

The ISQA faculty has developed a set of concentrations to assist students as they work to complete the MS in MIS program. Concentrations consist of a set of elective courses that are related to a particular subject area. Students may choose to take courses that make up a concentration, or not, as they see fit. Concentrations are not minors in the traditional sense, but rather reflect areas in demand in the community. If you have any questions regarding these concentrations, please contact the MS in MIS graduate advisor.

Analytics Concentration

Data analytics uses a variety of techniques to examine large amounts of data to discover patterns that can lead to business insights. Data analytics has broad applicability in customer behavior analysis, fraud detection, scientific inquiry, process improvement, financial analysis, trend analysis, forecasting, and decision-making. Techniques may include statistical

methods, data mining, modeling and simulation, and data visualization. The analytics concentration prepares students for work in the area of analytics, and also offers the necessary methodological foundation for thesis work in a master's or PhD program.

¹ This is not an exhaustive list. Other courses may be taken as electives with approval of the GPC.

² Topic must be related to Analytics concentration area. Prior approval from the GPC is required to use this course.

³ Only three hours of the required six hours of thesis may be applied to the concentration.

Data Management Concentration

The effective management of data and information is a fundamental task not only in the information society, but also for civilization as a whole. This concentration will prepare students to manage a growing variety of types of data throughout the data lifecycle. The curriculum gives students theoretical and practical training in database design, database administration, data quality management, knowledge management, business intelligence, data integration, and data governance. Students will gain exposure to transaction processing systems, data warehouses, and XML data stores. Students may also gain experience managing geospatial data.

³ Topic must be related to Data Management concentration area. Prior approval from the GPC is required to use this course.

⁴ Only three hours of the required six hours of thesis credit may be applied to the concentration.

Information Security Management Concentration

The information security management concentration focuses on understanding security governance, risk management, privacy, and compliance and the managerial aspects of security that are priorities within an organization. Students interested in information security management are encouraged to declare a formal concentration by contacting the graduate advisor.

¹ This is not an exhaustive list. Other courses may be taken as electives with approval of the GPC.

² Topic must be related to information security management concentration area. Prior approval from the GPC is required to use this course.

³ Only three hours of the required six hours of thesis credit may be applied to the concentration.

Project Management Concentration

The project management concentration will provide students with the technical, organizational and managerial background to be effective project managers, project leaders, information technology managers, and software engineers. The curriculum in this concentration integrates project management standards developed by organizations such as IEEE (The Institute of Electrical and Electronics Engineers) and PMI (Project Management Institute) with conceptual background from disciplines such as project management, software engineering, management science, psychology, organization behavior, and organization change. Students are to start coursework in the project management concentration after completion of at least 9 hours of the core courses, including ISQA 8210.

³ Only three hours of the required six hours of thesis credit may be applied to the concentration.

Quality of Work Standards

The Graduate College's Quality of Work standards shall be applied to foundation courses as well as courses taken as part of the degree program. In particular, the Graduate Program Chair (GPC) will recommend to the Graduate College that any

1. Student receiving a grade of "C-" or below in any foundation courses will be automatically dismissed from the program or, in the case of non-degree students, be automatically denied admission.
2. Student receiving a grade of "C+" or "C" in any foundation course will be placed on probation or dismissed from the program.
3. Student not maintaining a "B" (3.0 on 4.0 scale) average in foundation courses will be placed on probation or dismissed from the program.

Students who have been dismissed from a MIS graduate program may request reinstatement by following the process outlined below:

Step 1: Students must submit a written petition for reinstatement to the GPC. The petition needs to include a 1-2 paragraph letter explaining the circumstances that led to the student's academic difficulties, the specific challenges they faced during the semester, and their plan for improvement to ensure these issues do not recur.

Step 2: The petition will be shared with the graduate program committee. The committee will review the petition and decide the student's eligibility for reinstatement.

Step 3: If reinstated, the student will be placed on probation for the following semester of enrollment. The graduate program committee will determine the conditions of this probation. Please note that students who are on probation cannot hold a graduate assistantship or internship and are ineligible for an independent study.

Students are encouraged to take proactive steps to address any challenges that may impact their academic success. For any questions about this process, please contact the GPC.

Business Administration, MBA and Management Information Systems, MS (MBA/MIS)

In today's context of globally integrated and interdependent businesses, ubiquitous information technologies, and a mobile workforce, it is critical that graduate education provides students opportunities to develop integrated business and technology skills. The primary purpose of this dual degree program is to provide this integration by enabling students to complete the MBA and MS in MIS degrees simultaneously. This track is designed for dedicated students who are willing to take on the challenges related to graduate education from two perspectives—business administration and management information systems. As such, this program involves intensive preparation in both business administration and information systems and a specialization in an area that combines both backgrounds. The dual degree program requires a minimum of 55 hours of

course work beyond foundation requirements. Students who wish to pursue this option must work closely with an adviser to develop an integrated plan of study at an early stage. Students who complete the dual degree program will receive two degrees, two diplomas, and will have both degrees recorded on their transcript.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: November 1
- Summer 2026: April 1 (Limited availability for international applicants)
- Fall 2026: July 1 (June 1 for international applicants)

Other Requirements

- All applicants must have earned a minimum junior/senior GPA of 3.0 for both the MBA and the MS in MIS programs.
- **Entrance Exam:** Submitting GMAT or GRE scores may strengthen your application.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** Applicants are required to submit a statement of purpose (500-750 words) addressing the following. The statement must be written in the applicant's own words, reflecting their goals and aspirations. Plagiarism in the statement may result in the rejection of the entire application.
 - Why you want to study at UNO
 - Career goals
 - Relevant qualifications or work experience that demonstrate potential for success in the graduate program
 - Motivations for pursuing graduate education
- **Resume:** Include work experience and education
- **OPTIONAL:** One letter of recommendation from a reference who can evaluate your work and/or academic achievements.
- **Interview:** optional
 - Although not required, applicants are strongly encouraged to arrange for an interview with one or more members of the graduate

program committees of the MBA and MIS programs by directly contacting the committee chairperson of the College of IS&T. Telephone interviews are highly recommended for applicants outside the local area.

- Students qualifying for admission based on the standard outlined above, but lacking some foundation courses, will be granted provisional status until all foundation courses are completed with grades of "B" (3.0 on a 4.0 scale) or better.

Accounting		
Select one of the following:		3-6
BSAD 8110	ACCOUNTING AND FINANCIAL FUNDAMENTALS	
ACCT 2010 & ACCT 2020	PRINCIPLES OF ACCOUNTING I and PRINCIPLES OF ACCOUNTING II	
Or one year of Principles of Accounting at the undergraduate level		
Economics		
Select one of the following:		3-6
ECON 1200	SURVEY OF ECONOMICS	
ECON 2200 & ECON 2220	PRINCIPLES OF ECONOMICS (MICRO) and PRINCIPLES OF ECONOMICS (MACRO)	
Or Micro- and Macro-Economics at the undergraduate level		
College Algebra		
College Algebra or higher with the following courses at UNO:		
MATH 1220	COLLEGE ALGEBRA	3
or MATH 1300	COLLEGE ALGEBRA WITH SUPPORT	
or MATH 1320	COLLEGE ALGEBRA	
English Composition		
A required course for all international students entering the MBA program who are required to take the TOEFL:		
ENGL 1150	ENGLISH COMPOSITION I	3

MS in MIS Foundation Courses

Foundation courses ensure that all students have a strong foundation on which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for other courses in the program, but they also contain a distinct body of knowledge that is an important part of the MIS professional's education. All foundation courses are required for all students. Students who have obtained an undergraduate MIS degree will typically have this foundation. Other students, including computer science or engineering majors, will usually have to take one or more foundation courses. Occasionally, a student's work experience may be sufficient to waive one or more foundation courses.

Waivers for foundation courses are granted by the chair of the graduate program committee upon the recommendation of the faculty member who is responsible for an individual foundation course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have an option for testing out. Results of a test out are not appealable or repeatable.

Foundation courses cannot be used to satisfy the hours required for the dual degree. Students who have not completed all the foundation course requirements may be admitted on provisional status until those requirements have satisfactorily been completed. All must be completed

prior to or concurrent with the first six hours of MS in MIS graduate course work.

Code	Title	Credits

MBA Directed Elective Requirements

For students who have earned an undergraduate or graduate degrees in accounting, economics, management, or marketing, the core course(s) corresponding to the student's previously earned degree(s) will be waived. To satisfy degree requirements, the student must complete a directed elective in the waived field as indicated. For students who have earned an undergraduate or graduate degree in finance, the core course(s) corresponding to the student's previously earned degree may be waived upon request. Students with more than one core course waiver will be required to take an additional 1-credit hour seminar or 3-credit hour elective to fulfill degree requirements.

MBA/MIS Exit Requirements

Capstone Courses (5 hours)

BSAD 8800 - MBA Project-Focused Capstone. As the project-focused capstone course for the Master of Business Administration (MBA) degree, this course will focus on students completing a service-learning consulting project for a non-profit or other organization. This consulting project will focus on the application of the knowledge and skills learned in the MBA program. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite:** Students must successfully complete BSAD 8630, BSAD 8420, and BSAD 8830 before taking the Capstone course. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program. Permission from MBA advisor is required to register for this class.

OR

ECON 8330 - Data Analysis from Scratch. This course may be substituted for BSAD 8800 as the Capstone requirement for MBA students. Students in the course will work on a service-learning consulting project, specifically focused on a client data project. The consulting project will focus on the application of knowledge and skills learned in the MBA program and the Business Analytics concentration. A minimum B (3.0 on 4.0 scale) grade required to complete the course successfully and qualify for graduation. **Prerequisite(s)/Corequisite(s):** A multivariate or regression analysis course such as ECON 8300 (<https://catalog.unomaha.edu/search/?P=ECON%208300>), ISQA 9130 (<https://catalog.unomaha.edu/search/?P=ISQA%209130>) or STAT 8436 (<https://catalog.unomaha.edu/search/?P=STAT%208436>), and a programming class such as ECON 8320 (<https://catalog.unomaha.edu/search/?P=ECON%208320>) or equivalent programming experience; or instructor approval. Students also must successfully complete BSAD 8630 (<https://catalog.unomaha.edu/search/?P=BSAD%208630>), BSAD 8420 (<https://catalog.unomaha.edu/search/?P=BSAD%208420>), and BSAD 8830 (<https://catalog.unomaha.edu/search/?P=BSAD%208830>) before taking this course for the Capstone requirement. Students must also complete this course in the final semester or within the last nine (9) hours of their MBA program.

ISQA 8950 **MIS Capstone** (3 credits) (taken within the last 6 hours or the final semester of the program, with all core courses completed).

Code	Title	Credits
BSAD 8800	MBA PROJECT-FOCUSED CAPSTONE	2-3
or ECON 8330	DATA ANALYSIS FROM SCRATCH	

ISQA 8950	CAPSTONE MANAGEMENT INFORMATION SYSTEMS	3
-----------	---	---

Thesis Option

To take this option, a student will be required to enroll in six (6) hours of thesis credit:

MBA Program

Code	Title	Credits
BSAD 8990	THESIS	1-6

MS-MIS Program

Code	Title	Credits
ISQA 8990	THESIS	3

The thesis must be in an area that relates to both the business administration and information systems domains. The Supervisory Committee must include at least one CBA faculty member and one ISQA faculty member.

Other Requirements to Complete the Program

All MBA students must attend MBA Orientation in their first semester in the MBA program as part of their degree requirements. All MBA students must participate in a minimum of two (2) MBA Leadership Seminars prior to graduation.

Other Program-Related Information

Transfer Credits

A student may transfer credits into the MBA/MIS dual-degree program subject to the following conditions:

- No more than 1/3 of the credits for the dual-degree program may be transfer credits
- No more than 1/3 of the business credits for the dual-degree program may be transfer credits
- No more than 1/3 of the MIS credits for the dual-degree program may be transfer credits
- The transfer credits must conform to the transfer policies of the individual programs that make up the dual-degree program

Total Credit Hours: 55

Academic Performance

In addition to UNO Graduate College Quality of Work Standards, Dual Degree (DD) students may repeat only once a BSAD 8-0-level course in which they receive any grade, including "W" or "I". Students earning three "C/C+" grades, or a grade of "C-" or below, will be automatically dismissed from the DD program. Dismissed students will be immediately administratively withdrawn from all courses in which they are enrolled for DD credit.

Students who have been dismissed may not enroll in any courses for DD credit in any subsequent semester or summer session until reinstatement has been granted by the Dual-Degree Program Academic Standards Committee (DDPASC) comprised of the 2 GPC Chairs and 1 faculty member from each GPC.

Students who have been dismissed from the DD program may submit a written petition for reinstatement to the DDPASC. Students petitioning the DDPASC for reinstatement may not enroll in any course for DD credit until after the DDPASC has ruled on the petition. Upon receiving a petition for reinstatement, the DDPASC will evaluate the student's written petition for reinstatement. As part of the reinstatement petitioning process, the DDPASC reserves the right to examine the student's academic record and reserves the right to speak to any previous instructor who has taught the

student; this information may be used by the DDPASC in the reinstatement decision. Information provided by previous instructors will not be shared with the student. Reinstatement is a privilege and not all students who are dismissed will be reinstated. Students who have been reinstated will serve a probationary period at the DDPASC's discretion and must satisfy the probationary conditions specified by the DDPASC. In addition to probationary conditions, reinstated students will be subject to additional reinstatement conditions as specified by the DDPASC. These reinstatement conditions will include retaking one or more courses in which the student must earn a grade of "B" (3.0) or higher (the exact grade requirements for retaken courses may in fact be higher than "B" (3.0)). Students not satisfying the probationary or reinstatement conditions will be automatically dismissed.

Grades Earned in Repeated Courses

When making decisions related to the Quality of Work Standards issues outlined in the UNO Graduate Catalog, the Dual-Degree Program Academic Standards Committee (DDPASC) will consider the initial grade(s) received in a course as well as the most recent grade received for the course. This approach differs from the method used to calculate GPA in a student's MavLINK/DegreeWorks file, where the most recent grade replaces the grade received in the previous course attempt.

Public Administration, MPA and Management Information Systems, MS (MPA/MIS)

In government and non-profit organizations, there is a significant need and a long-term demand for persons with advanced skills in information management technology. The primary purpose of this dual degree option is to prepare students to manage and lead organizations in the future. To meet this need, the School of Public Administration and the College of Information Science & Technology offer the option to complete both the MPA and the MS in MIS degree jointly by completing 54-57 hours of course work beyond foundation requirements. This joint degree program is designed for dedicated students who are able to successfully complete graduate intensive study from two perspectives—public administration and management information systems—while achieving a synergy between the two fields. As such, the program involves graduate coursework in both public administration and information systems, with integrative experiences that will attain the desired synergy. Students interested in this option will work closely with a faculty mentor to develop an integrated plan of study at an early stage.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: October 1
- Fall 2026: June 1

Other Requirements

- The general prerequisite for admission to the program is a four year bachelors' degree with a minimum of a 3.0 GPA of the junior-senior year (last 50-60 credit hours).
- **Entrance Exam:** Submitting GMAT or GRE scores may strengthen your application.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose**
- **Writing Sample:** From work or previous academic experiences. Alternatively, if you do not have a writing sample, please submit a two page double-spaced word processed essay that addresses the following two topics:
 - Your unique personal qualities and life experiences that distinguish you from other applicants to our graduate program
 - Two accomplishments that demonstrate your potential for success in the graduate program
- **Resume:** Indicate your work experience and background
- **Letters of Recommendation:** Two letters of recommendation are required

Degree Requirements

MPA/MIS Foundation Courses

A student must have completed some basic courses either as an undergraduate student or prior to enrolling in the first MS in MIS course. Students may start MPA courses while completing the MIS foundation courses. All must be completed prior to or concurrent with the first six hours of MS in MIS graduate course work.

Foundation courses ensure that all students in the program have a strong foundation on which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for other courses in the program, but they also contain a distinct body of knowledge that is an important part of the MIS professional's education. All foundation courses are required for all students. Students who have obtained an undergraduate MIS degree will typically have this foundation. Other students, including computer science or engineering majors, will usually have to take one or more foundation courses. Occasionally, a student's work experience may be sufficient to waive one or more foundation courses.

Waivers for foundation courses are granted by the chair of the graduate program committee upon the recommendation of the faculty member who is responsible for an individual foundation course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have

an option for testing out. Results of a test out are not appealable or repeatable.

Code	Title	Credits
Six hours of programming coursework or equivalent experience:		6
CIST 1600	INTRODUCTION TO PROGRAMMING USING PRACTICAL SCRIPTING	3
ISQA 3900	WEB APPLICATION DEVELOPMENT	3
One semester of undergraduate information systems, or:		3
ISQA 8030	FOUNDATIONS OF INFORMATION SYSTEMS	
Select one of the following:		3-6
ISQA 8040	AN OVERVIEW OF SYSTEMS DEVELOPMENT	
ISQA 4110 & ISQA 4120 & ISQA 3310	INFORMATION SYSTEMS ANALYSIS and SYSTEM DESIGN AND IMPLEMENTATION and MANAGING THE DATABASE ENVIRONMENT	

Required Courses

ISQA/CYBR 8570	INFORMATION SECURITY POLICY AND ETHICS	3

Advisor approved course 3

Integrative Experience (Required) 3-6

Total Credits 9-12

MPA/MIS Exit Requirements

Capstone Option

Code	Title	Credits
PA 8990	CAPSTONE PROJECT IN PUBLIC ADMINISTRATION	3

The MPA capstone course is taken at the end of the program, with no more than nine credit hours remaining. All public administration core classes must be completed prior to taking the capstone course.

Code	Title	Credits
ISQA 8950	CAPSTONE MANAGEMENT INFORMATION SYSTEMS	3

Six credit hours or fewer may be left in the program. All MIS core courses must have been completed.

Thesis Option

To complete this option, a student will be required to enroll in six hours of thesis credit.

Code	Title	Credits
ISQA 8990	THESIS	6

The thesis must be in an area that relates to both the public administration and information systems domains.

Total Credit Hours: 57

Data Analytics Certificate

Data analytics uses a variety of techniques to examine large amounts of data to discover patterns that can lead to business insights. Data analytics has broad applicability in customer behavior analysis, fraud detection, scientific inquiry, process improvement, financial analysis, trend analysis, forecasting, and decision-making. Techniques may include statistical methods, data mining, modeling and simulation, and data visualization. The certificate is designed to equip students to apply the theory and practice of data analytics to solving problems in a variety of economic, social, and scientific domains.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 1
- Summer 2026: April 1
- Fall 2026: July 1

Other Requirements

- The minimum undergraduate grade point average requirement for the data analytics certificate program is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a four-year undergraduate degree.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Resume:** Submit a detailed resume indicating your work experience and background.
- **OPTIONAL Statement of Purpose:** Applicants may submit a statement of purpose with a maximum of 750 words that address:
 - why you want to study at UNO
 - career goals
 - relevant qualifications or work experience that demonstrate potential for success in the graduate program
 - motivations for pursuing graduate education

Degree Requirements

Foundation Requirements

Foundation courses ensure that all students program have a strong foundation on which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for other courses in the program, but they also contain a distinct body of knowledge that is an important part of the MIS professional's education. All foundation courses are required for all students. Students who have obtained an undergraduate MIS degree will typically have this foundation. Other students, including computer science or engineering majors, will usually have to take one or more foundation courses. Pick two of the remaining courses from any of the three categories above ¹		
Total Credits		15

¹ ISQA 8080, ISQA 8086, and ISQA 8900 may be used but must be related to data analytics. Prior approval from the GPC is required to use these courses.

Completion of the Certificate

During what is expected to be the semester the certificate is completed and prior to the posted deadline, students should apply for the certificate through MavLINK on or before the deadline. If you complete the application form and do not complete all of the requirements for the certificate, contact the Office of Graduate Studies as soon as possible. You must reapply during the next semester in which you expect to complete the certificate; no additional fee is charged to reactivate your application.

The following requirements are due 12 working days prior to commencement:

- "Incomplete" and "NR" grades from previous terms must be removed so that the grade will be in the Office of Graduate Studies.
- All fees, fines, and other obligations due the university must be settled.

For students currently enrolled in courses that are a part of their plan of study, enrollment must be maintained in order to complete the certificate. A grade for any current enrollment must be received by the Registrar's Office no later than the close of business on the fifteenth working day following the end of a semester.

Awarding of Graduate Certificates

The Office of Graduate Studies will mail the certificate to students when all requirements are completed and all obligations to the university are satisfied. The Graduate College will not approve any changes in the student's permanent record once the certificate is awarded.

Data Management Certificate

Data management focuses on the processes and techniques to manage data as a valuable organizational and societal asset throughout the data lifecycle. The certificate will give students theoretical and practical training in database design and development, database administration, data integration, data engineering, and data governance. Students will be exposed to a variety of data types and different kind of databases such as relational database, data warehouse, and NoSQL and big data databases.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 1
- Summer 2026: April 1
- Fall 2026: July 1

Other Requirements

- Individuals with an undergraduate degree and one to two years of work experience in information systems (IS) related roles are eligible to apply for this certificate programs.
- The minimum undergraduate grade point average requirement for the data management certificate is 3.0 or equivalent score on a 4.0 scale. Applicants should have the equivalent of a 4-year undergraduate degree.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, OR a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission. Minimum scores required for this program are:
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Resume:** Submit a detailed resume indicating your work experience and background
- **OPTIONAL Statement of Purpose:** Applicants may submit a statement of purpose with a maximum of 750 words that address:
 - motivations for pursuing graduate education
 - relevant qualifications or work experience that demonstrate potential for success in the graduate program
 - career goals
 - why you want to study at UNO

The data management graduate certificate consists of three core courses (9 credits) and two electives (6 credits) for a total of 15 credit hours. Specific course requirements for the graduate certificate are described below. There are three prerequisite courses which may be waived by the chair of the graduate program committee, based on courses already taken, applicable work experience, test out exams offered by the department, or the recommendation of faculty teaching the prerequisite courses.

Degree Requirements

Foundation Requirements

Foundation courses ensure that all students have a strong foundation on which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for other courses in the program, but they also contain a distinct body of knowledge that is an important part of the MIS professional's education. All foundation courses are required for all students. Students who have obtained an undergraduate MIS degree will

typically have this foundation. Other students, including computer science or engineering majors, will usually have to take one or more foundation courses. Occasionally, a student's work experience may be sufficient to waive one or more foundation courses.

Waivers for foundation courses are granted by the chair of the graduate program committee upon the recommendation of the faculty member who is responsible for an individual foundation course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have an option for testing out.

- One programming class such as CIST 1400 or equivalent
- One semester of undergraduate database management or equivalent, e.g.,
 - ISQA 3310 Managing the database environment
 - CSCI 4850 Database Management Systems
 - ISQA 8040 An overview of systems development

No more than two courses (6 credit hours maximum) can be used on two MIS-related certificates (data analytics, information assurance, project management, and systems analysis and design).

¹ Topic must be related to data management. Prior approval from the GPC is required to use this course.

Topic of ISQA 8080 and ISQA 8086 must be related to data management. Prior approval from the GPC is required to use this course. Other courses related to data management that are not included in the list of electives may count towards the certificate after approval by the GPC.

Information Assurance Certificate

The goal of this graduate certificate program is to allow post-baccalaureate students and working professionals to expand their educational background and complete work that could count towards a graduate degree. Earning the graduate certificate will enhance skill sets; provide exposure to new information technologies, theories and practices; allow individuals to work toward various professional certifications; increase growth potential with employers; and increase prospects of obtaining a graduate degree. The graduate certificate program offers existing technical and managerial professionals the chance to improve and hone their communication skills to aid in their professional development.

The information assurance certificate will provide students with the technical, organizational and managerial background to assist in planning, deploying, and managing security technologies to achieve information assurance.

 - career goals
 - relevant qualifications or work experience that demonstrate potential for success in the graduate program
 - motivations for pursuing graduate education

Degree Requirements

Foundation Requirements

Foundation courses ensure that all students have a strong foundation on which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for other courses in the program, but they also contain a distinct body of knowledge that is an important part of the MIS professional's education. All foundation courses are required for all students. Students who have obtained an undergraduate MIS degree will typically have this foundation. Other students, including computer science or engineering majors, will usually have to take one or more foundation courses. Occasionally, a student's work experience may be sufficient to waive one or more foundation courses.

Waivers for foundation courses are granted by the chair of the graduate program committee upon the recommendation of the faculty member who is responsible for an individual foundation course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have an option for testing out.

Code	Title	Credits
ISQA 3900	WEB APPLICATION DEVELOPMENT	3
or equivalent		
ISQA 8030	FOUNDATIONS OF INFORMATION SYSTEMS	3
or equivalent		
Select one of the following:		3-9
ISQA 8040	AN OVERVIEW OF SYSTEMS DEVELOPMENT	
ISQA 4110 & ISQA 4120 & ISQA 3310	INFORMATION SYSTEMS ANALYSIS and SYSTEM DESIGN AND IMPLEMENTATION and MANAGING THE DATABASE ENVIRONMENT	

Requirements

No more than two courses (6 credit hours maximum) can be used on two MIS-related certificates (data analytics, information assurance, project management, and systems analysis and design).

Code	Title	Credits
Required Courses		
ISQA 8210	MANAGEMENT OF SOFTWARE DEVELOPMENT	3
ISQA 8220	ADVANCED SYSTEMS ANALYSIS AND DESIGN	3
ISQA 8410	DATA MANAGEMENT	3
Electives		
Select one of the following:		3
ISQA 8420	MANAGING THE I.S. FUNCTION	
ISQA 8106	INFORMATION SYSTEMS ARCHITECTURE AND ORGANIZATION	
ISQA 8080	SEMINAR IN MANAGEMENT INFORMATION SYSTEMS ¹	
ISQA 8086	SPECIAL TOPICS: INFORMATION SYSTEMS & QUANTITATIVE ANALYSIS ¹	
ISQA 8900	INDEPENDENT RESEARCH IN MANAGEMENT INFORMATION SYSTEMS ¹	
Total Credits		12

¹ Topic must be related to systems analysis and design. Prior approval from the GPC is required to use this course.

Completion of the Certificate

During what is expected to be the semester the certificate is completed and prior to the posted deadline, students should apply for the certificate through MavLINK on or before the deadline. If you complete the application form and do not complete all of the requirements for the certificate, contact the Office of Graduate Studies as soon as possible. You must **reapply** during the next semester in which you expect to complete the certificate; no additional fee is charged to reactivate your application.

The following requirements are due 12 working days prior to commencement:

- "Incomplete" and "NR" grades from previous terms must be removed so that the grade will be in the Office of Graduate Studies.
- All fees, fines, and other obligations due the university must be settled.

For students currently enrolled in courses that are a part of their plan of study, enrollment must be maintained in order to complete the certificate. A grade for any current enrollment must be received by the Registrar's Office no later than the close of business on the fifteenth working day following the end of a semester.

Awarding of Graduate Certificates

The Office of Graduate Studies will mail the certificate to students when all requirements are completed and all obligations to the university are satisfied. The Graduate College will not approve any changes in the student's permanent record once the certificate is awarded.

Mathematics

Degree Programs Offered

- Mathematics, MA (p. 1151)
- Mathematics, MS (p. 1155)
- Mathematics, MAT (p. 1153)

Certificates Offered

- Secondary Mathematics Specialist Certificate (p. 1158)

Mathematics, MA

The Master of Arts in mathematics is designed to achieve two objectives:

- Provide a strong program of course work in mathematics beyond the undergraduate level and
- Be flexible enough to accommodate a wide variety of student interests and backgrounds. There are no required courses in the program, but students are strongly encouraged to develop an emphasis in the courses which make up their individual plan of study; such an emphasis provides both focus and depth in the graduate experience.

Whatever their objectives in their graduate programs, students should form a close working relationship with a faculty member having similar mathematical interests as soon as possible. This will ensure good advice in planning a coherent plan of study. In addition, an advisor may be able to suggest special topics courses, independent study, or the thesis option which could all be used to pursue one's interests in greater depth.

Finally, students who plan to pursue a doctoral degree in mathematics should include a sequence in analysis and a sequence in algebra in their plans of study.

Fast Track Program

The Department of Mathematics and Statistical Sciences has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine (9) graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BA/BS in mathematics or pursuing a double-major with BA/BS in mathematics as the primary or secondary major desiring to pursue a MA/MS/MAT in mathematics.
- Students must have completed no less than 60 undergraduate hours
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form, obtain all signatures, and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good academic standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.

- The admit term must be after the completion term of the undergraduate degree.

Graduate Assistantships

The Department of Mathematics and Statistical Sciences annually awards graduate assistantships for work within the department. These positions come with a salary, tuition waiver, and subsidized health insurance. For the details of the nature of the work, please visit the assistantships page of the Department of Mathematics and Statistical Sciences website.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: November 30
- Summer 2026: April 15
- Fall 2026: July 31

Other Requirements

For unconditional admission, an applicant should:

- Have completed a bachelor's degree with a grade point average of at least 3.0 in mathematics courses taken.
- Have completed 15 credit hours of mathematics courses beyond calculus, including MATH 3230/MATH 8235 or equivalent.
- Applicants lacking the 15 credit hours beyond calculus may be eligible for admission in a provisional or unclassified status with a deficiency to be made up in addition to the degree requirements listed.
- Applicants who satisfy the admission requirements above except for the GPA requirement may be granted provisional admission to the graduate program. They will be granted unconditional admission upon completion of 12 graduate hours with a grade of "B" or better in each course.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

Degree Requirements

Required Courses

There are no required courses. Students may choose courses with a MATH or STAT prefix numbered 8000 or above. At least 15 of these hours must be in courses with a number ending in the zero digit, including six hours of thesis (MATH 8990), but excluding MATH 8970 (independent study). Students may take up to three hours of MATH 8970, but these hours will not count toward the 15-hour requirement for courses ending in zero. Up to six hours of courses ending in digit 5 may count toward the degree. The following courses do not count for this degree: MATH 8235, STAT 8005, STAT 8805, STAT 8950, and any course with an MTCH prefix.

Electives

Since all courses are electives with the exception of the six thesis credit hours, all courses taken must satisfy the above requirements for the 30 credit hours. Up to 12 hours of graduate work electives may be taken in areas related to mathematics such as physics, computer science, and economics, if permission is obtained from the Graduate Program Committee.

Exit Requirements

Students are required to take six hours of MATH 8990. All candidates should carefully review the Graduate College requirements for forming the supervisory committee, Thesis/Thesis Equivalent Proposal Approval forms, and final approval and submission of the thesis.

Concentrations

Students may choose (although there is no requirement to do so) to add a concentration to their Mathematics MA degree. There are currently three available concentrations:

- Mathematics, MA with Computational Mathematics concentration
- Mathematics, MA with Operations Research concentration
- Mathematics, MA with Statistics concentration

Total Credit Hours: 30

Concentrations

Computational Mathematics Concentration

Code	Title	Credits
Core Courses		
Select at least 5 of the following:		15
MATH 8336	INTRODUCTION TO PARTIAL DIFFERENTIAL EQUATIONS ¹	
MATH 8250	PARTIAL DIFFERENTIAL EQUATIONS	
MATH/CSCI 8500	NUMERICAL LINEAR ALGEBRA	
MATH/CSCI 8510	NUMERICAL DIFFERENTIAL EQUATIONS	
MATH 8406	THE FINITE ELEMENT METHOD ¹	
Electives		
Select at least 9 credit hours of courses related to computational mathematics (see below).		9
MATH 8990	THESIS	6
Total Credits		30

¹ Students who were undergraduates at UNO and took MATH 4330, or MATH 4400 may not take MATH 8336 or MATH 8406 at the graduate level. Students will replace these requirements with additional elective courses.

Electives

At least nine credit hours of courses related to computational mathematics. Students must have at least 15 hours of courses ending on 0, including the core courses and the six hours of thesis, MATH 8990.

Some suggested courses are provided below. Other elective courses may be possible with the prior permission of the graduate program chair.

If any of the core course requirements were waived, then additional electives should be taken in their place.

Code	Title	Credits
MATH 8356	ORDINARY DIFFERENTIAL EQUATIONS ¹	3
MATH 8056	LINEAR ALGEBRA ¹	3
MATH 8236	MATHEMATICAL ANALYSIS I ¹	3
MATH 8246	MATHEMATICAL ANALYSIS II ¹	3
MATH 8276	COMPLEX ANALYSIS ¹	3
MATH 8400	DYNAMICAL SYSTEMS AND CHAOS	3
MATH 8766	TOPICS IN APPLIED MATHEMATICS	3

¹ Students who were undergraduates at UNO and took MATH 4350, MATH 4050, MATH 4230, MATH 4240 or MATH 4270 may not take

MATH 8356, MATH 8056, MATH 8236, MATH 8246, or MATH 8276 at the graduate level.

Exit Requirement

Students are required to take six hours of MATH 8990. All candidates should carefully review the Graduate College requirements for forming the supervisory committee, Thesis/Thesis Equivalent Proposal Approval forms, and final approval and submission of the thesis.

Operations Research Concentration

Code	Title	Credits
Core Courses		
Select at least 5 of the following:		15
MATH/CSCI 8306	DETERMINISTIC OPERATIONS RESEARCH MODELS ¹	
MATH/CSCI 8316	PROBABILISTIC OPERATIONS RESEARCH MODELS ¹	
MATH 8326	COMPUTATIONAL OPERATIONS RESEARCH ¹

STAT 8426	EXPLORATORY DATA VISUALIZATION AND QUANTIFICATION ¹	3
STAT 8446	TIME SERIES ANALYSIS ¹	3
STAT 8700	BAYESIAN STATISTICS	3
STAT 8720	RELIABILITY THEORY	3
STAT 8730	ADVANCED STATISTICAL MACHINE LEARNING	3

¹ Students who were undergraduates at UNO and took MATH 4310, STAT 4410, STAT 4420, or STAT 4440 may not take MATH 8316, STAT 8416, STAT 8426 or STAT 8446 at the graduate level.

Exit Requirement

Students are required to take six hours of MATH 8990. All candidates should carefully review the Graduate College requirements for forming the supervisory committee, Thesis/Thesis Equivalent Proposal Approval Forms, and final approval and submission of the thesis.

Mathematics, MAT

The Master of Arts for Teachers of Mathematics degree is ideal for:

- Current high school teachers who are planning on teaching advanced secondary mathematics such as dual-enrollment calculus at their high school.
- Any student interested in teaching freshman/sophomore level mathematics courses at local universities.
- Any student interested in pursuing a PhD in education with an emphasis in mathematics.

NOTE: This program does not help a student get a state certification to teach high school math. For those students with an undergraduate degrees already interested in pursuing a degree to teach high school math, but do not yet have a state certification to teach, consider the Teacher Academy Project (<http://www.unomaha.edu/college-of-education/moec/projects/teacher-academy-project/>).

Graduate Assistantships

The Department of Mathematics and Statistical Sciences annually awards graduate assistantships for work within the department. These positions come with a salary, tuition waiver, and subsidized health insurance. For the details of the nature of the work, please visit the assistantships page of the Department of Mathematics and Statistical Sciences website.

Teachers of Mathematics Scholarship

The Teacher of Mathematics Scholarship is awarded to teachers of high school mathematics who are interested in obtaining a graduate degree in mathematics (MS, MA, or MAT) at UNO for the purpose of becoming eligible to teach UNO calculus dual enrollment courses. These scholarships are awarded to teachers in school districts that are participating in the dual-enrollment program. They will provide for the reimbursement of resident tuition for up to six graduate credit hours per semester for one year. No scholarship award becomes final until UNO graduate admission status is obtained. Continuation beyond the first year depends upon satisfactory academic progress and funds available. For further information contact Dr. Janice Rech, jrech@unomaha.edu

Fast Track Program

The Department of Mathematics and Statistical Sciences has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine

(9) graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BA/BS in mathematics or pursuing a double-major with BA/BS in mathematics as the primary or secondary major desiring to pursue a MA/MS/MAT in mathematics.
- Students must have completed no less than 60 undergraduate hours
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form, obtain all signatures, and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good academic standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- Have obtained at least a “B” (3.0 on a 4.0 scale) average in previous mathematics courses, including two courses beyond elementary calculus.
- Hold state certification for teaching secondary school mathematics or related experience in an educational setting. Please note, a master’s degree does not lead to initial certification.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

Degree Requirements

MATH 8250	PARTIAL DIFFERENTIAL EQUATIONS
MATH 8500	NUMERICAL LINEAR ALGEBRA
or MATH 8510	NUMERICAL DIFFERENTIAL EQUATIONS

Total Credits	36
----------------------	-----------

¹ For example: Applied Modern Algebra, Algebra 1, and Algebra 2. If one of the courses has been taken previously as an undergraduate course will not count toward the 36 credits, however it will count in terms of completed the three course sequence. Such a situation would in effect enable the MAT student to finish the three course sequence quicker and free up one class for an elective in mathematics.

Exit Requirements

• Comprehensive Examination

- Pass the mathematics comprehensive examination. The examination is offered three times a year; on April 15, July 15, and November 15 (or the proceeding Friday if any of these dates falls on a weekend). The mathematics exam is three hours in length and covers the terminal course of each of the two math sequence of courses. Each course instructor will write a 1.5 hour exam and grade the exam as pass or fail. To pass the overall MAT mathematics portion comprehensive exam, the student must pass both.

Mathematics, MS

The Master of Science in mathematics is designed to achieve two objectives:

- Provide a strong program of course work in mathematics beyond the undergraduate level and
- Be flexible enough to accommodate a wide variety of student interests and backgrounds. There are no required courses in the program, but students are strongly encouraged to develop an emphasis in the courses which make up their individual plan of study; such an emphasis provides both focus and depth in the graduate experience.

Whatever their objectives in their graduate programs, students should form a close working relationship with a faculty member having similar mathematical interests as soon as possible. This will ensure good advice in planning a coherent plan of study. In addition, an advisor may be able to suggest special topics courses, independent study, or the thesis option which could all be used to pursue one's interests in greater depth. Finally, students who plan to pursue a doctoral degree in mathematics should include a sequence in analysis and a sequence in algebra in their plans of study.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: November 30
- Summer 2026: April 15
- Fall 2026: July 31

Other Requirements

For unconditional admission, an applicant should:

- Have completed a bachelor's degree with a grade point average of at least 3.0 in mathematics courses taken.
- Have completed 15 credit hours of mathematics courses beyond calculus, including MATH 3230/MATH 8235 or equivalent.
- Applicants lacking the 15 credit hours beyond calculus may be eligible for admission in a provisional or unclassified status with a deficiency to be made up in addition to the degree requirements listed.
- Applicants who satisfy the admission requirements above except for the GPA requirement may be granted provisional admission to the graduate program. They will be granted unconditional admission upon completion of 12 graduate hours with a grade of "B" or better in each course.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

Degree Requirements

Required Courses

There are no required courses. Choose mathematics courses with a MATH or STAT prefix numbered 8000 or above. At least 18 of these hours must be courses with a number ending in a zero digit (8xx0). These 18 hours may include three hours of independent study, MATH 8970. Up to six hours of courses ending in a five digit may count toward the degree (8xx5). The following courses do not count for this degree; MATH 8235, STAT 8005, STAT 8805, STAT 8950, and any courses with the MTCH prefix.

If the project option is chosen, the six required hours of MATH 8960 or STAT 8960 will count towards the overall credit hour total, and the required 18 hours of courses ending in a zero digit.

If a student chooses to add a concentration to their degree program (see below) then there will be specific courses that will be needed to be completed to fulfill the concentration requirements.

Electives

Since there are no required courses, all courses are electives which must satisfy the requirements given above for the 36 credit hours. Up to 12 hours of graduate work electives may be taken in areas related to mathematics, physics, computer science, and economics, if permission is obtained from the Graduate Program Committee.

Exit Requirements

Select One:

- **Comprehensive Examination**
 - The comprehensive examination is based on three related courses (one of which must have a number ending in a zero digit) consisting of two parts. The first part is a one-week take-home examination. The second part is a three hour examination which may be open book, at the discretion of the instructor(s). The examination is normally taken in the student's final semester and should be scheduled well in advance of the graduate college deadlines.
- **Project**
 - A mathematical or statistical project undertaken under the supervision of both a faculty advisor and an external (industry) advisory. The purpose of the project is for the student to work on a 'real-world' problem. The student will produce a written report and give an oral presentation of their work. Students are required to register for six hours of MATH 8960 or STAT 8960.

Concentrations

Students may choose (although there is no requirement to do so) to add a concentration to their mathematics MS degree. There are currently four available concentrations:

- Mathematics, MS with Computational Mathematics concentration
- Mathematics, MS with Data Science concentration
- Mathematics, MS with Operations Research concentration
- Mathematics, MS with Statistics concentration

Total Credit Hours: 36

Concentrations

Courses numbered 8–5 will not count towards the MS degree in Mathematics.

Computational Mathematics Concentration

MATH 8056	LINEAR ALGEBRA ¹	3
MATH 8236	MATHEMATICAL ANALYSIS I ¹	3
MATH 8246	MATHEMATICAL ANALYSIS II ¹	3
MATH 8276	COMPLEX ANALYSIS ¹	3
MATH 8356	ORDINARY DIFFERENTIAL EQUATIONS ¹	3
MATH 8400	DYNAMICAL SYSTEMS AND CHAOS	3
MATH 8766	TOPICS IN APPLIED MATHEMATICS	3
MATH 8970	INDEPENDENT GRADUATE STUDIES	1-3

¹ Students who were undergraduates at UNO and took MATH 4350, MATH 4050, MATH 4230, MATH 4240, or MATH 4270 may not take MATH 8356, MATH 8056, MATH 8236, MATH 8246, or MATH 8276 at the graduate level.

Exit Requirements

Comprehensive Examination

The comprehensive examination is based on three related courses (one of which must have a number ending in a zero digit) consisting of two parts. The first part is a one-week take-home examination. The second part is a 3-hour examination which may be open book, at the discretion of the instructor(s). The examination is normally taken in the student's final semester and should be scheduled well in advance of the graduate college deadlines.

(Note: The project exit requirement is not available for those students wishing to complete the computational mathematics concentration, only the comprehensive exam exit requirement is allowed).

Data Science Concentration

Prerequisites

Some statistics and computer programming are highly recommended.

Required Courses

Code	Title	Credits
Introductory Courses		
MATH 8746	INTRODUCTION TO PROBABILITY AND STATISTICS I ¹	3
MATH 8756	INTRODUCTION TO PROBABILITY AND STATISTICS II ¹	3
Core Courses		
STAT 8416	INTRODUCTION TO DATA SCIENCE ²	3

STAT 8426	EXPLORATORY DATA VISUALIZATION AND QUANTIFICATION ²	3
MATH/CSCI 8306	DETERMINISTIC OPERATIONS RESEARCH MODELS ²	3

Approved ElectivesSelect at least 15 credit hours from the following: ³ 15

MATH/CSCI 8316	PROBABILISTIC OPERATIONS RESEARCH MODELS ⁴	
MATH 8430	LINEAR PROGRAMMING	
MATH 8440	NETWORK PROGRAMMING	
MATH 8460	INTEGER PROGRAMMING	
MATH 8650	INTRODUCTION TO PROBABILITY MODELS	
MATH 8670	TOPICS IN PROBABILITY AND STATISTICS	
MATH 8970	INDEPENDENT GRADUATE STUDIES	
STAT 8436	LINEAR MODELS ⁴	
STAT 8446	TIME SERIES ANALYSIS ⁴	
STAT 8456	INTRODUCTION TO MACHINE LEARNING AND DATA MINING ⁴	
STAT 8700	BAYESIAN STATISTICS	
STAT 8710	DESIGN AND ANALYSIS OF EXPERIMENTS	
STAT 8720	RELIABILITY THEORY	
STAT 8730	ADVANCED STATISTICAL MACHINE LEARNING	
STAT/MATH 8960	MASTER'S PROJECT	6

Total Credits 36

¹ Students who were undergraduates at UNO and took MATH 4740 or MATH 4750 may not take MATH 8746 or MATH 8756. For those students who can demonstrate previous statistical exposure can appeal to the graduate program chair to waive the MATH 8746/MATH 8756 requirements. Students can replace these requirements with additional elective courses.

² Students who were undergraduates at UNO and took STAT 4410, STAT 4420, or MATH 4300 may not take STAT 8416, STAT 8426, or MATH 8306 at the graduate level. Students can replace these requirements with additional elective courses.

³ If any of the introductory or core course requirements were waived, then additional electives should be taken in their place. Other elective courses may be possible with the prior permission of the graduate program chair.

⁴ Students who were undergraduates at UNO and took MATH 4310, STAT 4430, or STAT 4440 may not take MATH 8316, STAT 8436, or STAT 8446 at the graduate level.

Exit Requirement

Each student is required to complete a project involving working with real-world data. The student will be advised by both a faculty and external advisor, and a completed written and oral report is required.

Students are required to sign up for 6 hours of MATH 8960 or STAT 8960.

(Note: The comprehensive exam exit requirement is not available for those students wishing to complete the data science concentration, only the project exit requirement is allowed).

Operations Research Concentration

Code	Title	Credits
Core Courses		
Select at least 5 of the following:		15
MATH/CSCI 8306	DETERMINISTIC OPERATIONS RESEARCH MODELS ¹	

MATH/CSCI 8316	PROBABILISTIC OPERATIONS RESEARCH MODELS ¹	
MATH 8326	COMPUTATIONAL OPERATIONS RESEARCH ¹	
MATH 8430	LINEAR PROGRAMMING	
MATH 8440	NETWORK PROGRAMMING	
MATH 8460	INTEGER PROGRAMMING	

Electives

Select one of the following (see below): 21

For students choosing the comprehensive exam option, at least 21 credit hours of courses related to operations research

For students choosing the project option, at least 15 credit hours of courses related to operations research and 6 credit hours of MATH 8960

Total Credits 36

¹ Students who were undergraduates at UNO and took MATH 4300, MATH 4310, or MATH 4320 may not take MATH 8306, MATH 8316, or MATH 8326 at the graduate level. Students can replace these requirements with additional elective courses.

Electives

For students choosing the comprehensive exam option, at least 21 credit hours of courses related to operations research.

For students choosing the project option, at least 15 credit hours of courses related to operations research.

Students must have at least 18 hours of courses ending on 0, including the core courses and, for those choosing the project option, the 6 hours of project, MATH 8960.

Some suggested courses are provided below. Other elective courses may be possible with the prior permission of the graduate program chair.

If any of the core course requirements were waived, then additional electives should be taken in their place.

Code	Title	Credits
MATH/CSCI 8156	GRAPH THEORY & APPLICATIONS ¹	3

Students are required to register for 6 hours of STAT 8960.

Secondary Mathematics Specialist Certificate

The secondary mathematics specialist certificate is ideal for:

- Current high school teachers who are planning on teaching advanced secondary mathematics such as dual-enrollment college algebra at their high school and already have a masters degree in a STEM or education field or would like to get one.
- Any student interested in teaching freshman/sophomore level mathematics courses at local universities.

NOTE: This program does not help a student get a state certification to teach high school math. For those students with an undergraduate degrees already interested in pursuing a degree to teach high school math, but do not yet have a state certification to teach, consider the Teacher Academy Project (<http://www.unomaha.edu/college-of-education/moec/projects/teacher-academy-project/>).

Teachers of Mathematics Scholarship

The Teacher of Mathematics Scholarship is awarded to teachers of high school mathematics who are interested in obtaining a graduate degree in mathematics (MS, MA, or MAT) at UNO for the purpose of becoming eligible to teach UNO calculus dual-enrollment courses. Students pursuing this certificate can qualify for this scholarship if planning to pursue a MS, MA or MAT in mathematics in conjunction with this certificate. These scholarships are awarded to teachers in school districts that are participating in the dual-enrollment program. They will provide for the reimbursement of resident tuition for up to six graduate credit hours per semester for one year. No scholarship award becomes final until UNO graduate admission status is obtained. Continuation beyond the first year depends upon satisfactory academic progress and funds available. For further information contact Dr. Janice Rech, jrech@unomaha.edu.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

Individuals applying must satisfy the following requirements which are the same as for the Mathematics MAT degree.

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Have obtained at least a "B" (3.0 on a 4.0 scale) average in previous mathematics courses, including two courses beyond elementary calculus.
- Hold state certification for teaching secondary school mathematics.
- Course prerequisites will be determined at admission.

Music

Degree Programs Offered

- Music, MM (p. 1159)

Certificates Offered

- Conducting Certificate (p. 1161)
- Kodaly Certificate (p. 1161)

Music, MM

The Master of Music degree at the University of Nebraska at Omaha (UNO) is divided into four concentrations: music education, music performance, jazz and conducting. The music performance and jazz concentrations are 30 hour programs that emphasize performance and applied music. Courses dealing with history, theory, and pedagogy are included, and opportunities for internships and performances in local professional organizations such as Opera Omaha, Omaha Performing Arts, North Omaha Music and Arts and the Omaha Symphony are enjoyed by students at UNO. The music education concentration is a 30 hour program with courses that emphasize pedagogy, practical application of music skills, and research for teachers at all levels. The class times and offerings are scheduled with the current practitioner in mind and include the option to complete the coursework online or during summer sessions. The conducting concentration is a 30 hour program that emphasizes individualized instruction in conducting and maximizes experiences in front of an ensemble. Courses in music history, literature, and theory supplement the practical experience to help produce well-rounded graduates with considerable knowledge of techniques and literature. The conducting concentration is available through in-person instruction, online/remote instruction, or hybrid instruction. In order to pursue the online/remote delivery option students must have an off-campus lab ensemble approved by graduate conducting faculty as part of the audition process.

Admissions

General Application Requirements and Admission Criteria

Application Deadlines

- Spring 2026: November 15
- Summer 2026: April 15
- Fall 2026: June 15

Other Requirements

- Applicants must have an undergraduate degree in music from an accredited institution and have an undergraduate cumulative GPA of 3.0 or a GPA of 3.0 or better in all music courses.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum

language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

- **Resume**

- If the applicant does not have an undergraduate degree in music, the applicant must take the School of Music Graduate Diagnostic Exam before enrolling in any graduate courses in order to determine which undergraduate foundation courses may be necessary.
- An audition for a panel of three graduate faculty members is required for all applicants wishing to pursue the performance, jazz or conducting concentration.
- Conducting students wishing to pursue the online delivery option must have an off-campus lab ensemble approved by graduate conducting faculty as part of the audition process. Video auditions may be requested prior to a live audition.

Degree Requirements

Student must select an area of concentration.

Exit Requirements

All students must take final comprehensive examinations. Students can take comprehensive exams before the semester in which they intend to graduate; however, all required coursework in the program must be completed. The exception is if a student has not completed one required course and is enrolled in that course during the semester in which they are taking the comprehensive exams. Comprehensive exams will be offered three times during the course of the year—Fall, Spring and Summer. Normally the exams are administered on the last Saturday of October or first Saturday in November (Fall Semester), the second or third Saturday in April (Spring

Semester), and the last Friday of June or the first Friday of July (Summer Term).

The concentrations identified below have an additional culminating demonstration of professional capability in the concentration field.

- Students completing the Conducting concentration must present and pass two public performances. The graduate program coordinator must approve the public performances which typically consist of a recital or concert.
- Students in Performance and Jazz concentrations must present and pass two public performances or present and pass one public performance and complete MUS 8970 Graduate Project. The graduate program coordinator must approve the public performance(s) which typically consist of a recital or major role in an opera. MUS 8970 can count toward electives.

Conducting Certificate

The conducting graduate certificate is designed to provide practitioners with an opportunity to enhance their conducting skills through a program emphasizing applied experiences in front of a performing ensemble. The program may be completed as a stand-alone certificate, or concurrently with the Master of Music-Education concentration. It is available through in-person instruction, online/remote instruction, or hybrid instruction. In order to pursue the online/remote delivery option students must have an off-campus lab ensemble approved by graduate conducting faculty as part of the audition process.

Exit Requirement

- Students completing the conducting certificate must present and pass one public performance. The graduate program coordinator must approve the public performance which typically consists of a recital or concert.

Kodaly Certificate

The Kodály graduate certificate program is designed provide music educators with an opportunity to enhance their pedagogical skills with a program that promotes music literacy through experiential learning in singing, movement, and reading activities. The program may be completed as a stand-alone certificate, or concurrently with the Master of Music-Education concentration. The Kodály program—named for the methods developed by Zoltán Kodály, a Hungarian composer and ethnomusicologist—includes courses that provide classroom applications of the method, folksong literature research, conducting experiences, and instruction in solfege.

Political Science

Degree Programs Offered

- Political Science, MS (p. 1162)

Certificates Offered

- Government Certificate (p. 1168)
- Global Information Operations Certificate (p. 1167)
- Intelligence and National Security Certificate (p. 1170)

Political Science, MS

The Department of Political Science's vision is to provide quality research, teaching, and service for our students, community, and academic field in order to produce qualified individuals and advanced knowledge to

benefit communities regionally, nationally, and internationally. UNO is recognized by the Carnegie Foundation for the Advancement of Teaching as a doctoral and research institution. We value diversity among faculty, staff, and students and recognize its essential contribution to campus culture and development of knowledge. The Master of Science in political science offers a broad foundation in the discipline with a high degree of interdisciplinary collaboration, if desired. Some students enter the program with the intention of continuing on with their PhD, while others use the program to prepare themselves as practitioners in the fields of education, government, intelligence, law, journalism, non-profit, or lobbying. Students can earn the degree completely on-line, on-campus, or blended (on-line/on-campus).

Other Program Related Information

The UNO PSCI master's program affords its students an environment that serves as an incubator for acquiring the skills necessary for students' desired careers, and for developing a self-understanding that will enable students to succeed both professionally and personally. Students are assured of a high-quality degree program that not only meets but exceeds national standards of education in political science.

- Our Flexibility: our program offers flexibility to tailor an area of specialization. This flexibility encourages students to create an approved program of study that incorporates interests in other disciplines, such as communications, criminal justice, economics, geography, history, psychology, public administration, social work, sociology, teacher education, and urban studies. We accept up to 9 hours of graduate-level transfer credit, graded at a B or above, from another accredited institution that has not been applied towards another degree or completed program. In addition, students can apply up to 12 approved elective credit hours of UNO-taught courses outside the field of political science.

Fast Track Program

The Department of Political Science has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine (9) graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing BA/BS in political science or BA in international studies desiring to pursue a MS in political science.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.

- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Notes:

- 8000-level courses taken at the undergraduate level without having been accepted into the integrated program will not count towards a graduate program.
- Students accepted into the Fast Track program may be denied entry into the graduate program due to, but not limited to poor performance, academic integrity issues, and other violations of the student code of conduct.
- Before starting graduate work, students are expected to complete all PSCI subfield introductory courses (1100, 2000, 2210, 2310, and 2500) and 2-3 upper-level (3000/4000) political science courses.
- Please inquire with the Department of Political Science graduate advisor for more information about this program.

Admissions

General Application Requirements and Admission Criteria

Application Deadlines

- Spring 2026: Review begins October 1
- Summer 2026: Review begins April 15
- Fall 2026: Review begins February 15

Note: Applications will be received and reviewed until the term begins.

If applying for a graduate assistantship, both admission and assistantship application materials must be completed by February 15 (for fall semester) and October 1 (for spring semester) for priority consideration.

Other Requirements

- Baccalaureate degree or previous master's degree with a minimum of 3.0 GPA.
- Fifteen credit hours in political science-related courses is preferred. The selection committee looks for previous coursework in American government, political theory, international relations, comparative politics, and social science (quantitative) methodology. Applicants without the above undergraduate background in political science may be admitted on a provisional basis and be required to take prerequisite courses before starting graduate work. A grade of B or above is required in each of these courses.
- **English-Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80 with no sub-score under 15, IELTS: 6.5, PTE: 53, Duolingo: 110

- Passing with a minimum score does not guarantee admission into the program.

- **Statement of Purpose:** A personal statement should be 1-2 pages and address why you are seeking admission to this program, how your academic/professional experiences will contribute to your success in the program, and how the program will contribute to your future academic/professional ambitions.
- **Writing Sample:** Submission of an academic, research-based writing sample. The sample must be written in English, include citations, and be a minimum of five pages in length. This writing sample can be a previous academic course assignment. If no such paper exists, the applicant should contact the academic advisor for an alternative assignment.
- **Resume:** Submit a professional resume
- **Letters of Recommendation:** Submit two letters of recommendation from a former professor (preferred), supervisor, or other professional contact who can speak to one's academic potential in a graduate program. If applicants have recently graduated from UNO, it is expected that one of the letters will be from a UNO political science faculty member. It is preferred that applicants use their references' institutional (.edu) or professional email.
- GRE scores are not required for admission, however, applicants are welcome to submit them.

Degree Requirements

Code	Title	Credits
Required: Methods Seminar		3
PSCI 8000	SEMINAR IN THE RESEARCH METHODS IN POLITICAL SCIENCE	
Required: Three Core Subfield Seminars		9
PSCI 8040	SEMINAR IN AMERICAN GOVERNMENT AND POLITICS	
PSCI 8250	SEMINAR IN INTERNATIONAL RELATIONS	
PSCI 8300	SEMINAR IN POLITICAL THEORY	
PSCI 8500	SEMINAR IN COMPARATIVE POLITICS	
Required for Non-thesis Students: Two Additional Seminars (from list below or remaining subfield seminar)		6
PSCI 8100	SEMINAR IN POLITICAL ECONOMY	
PSCI 8120	SEMINAR IN LEADERSHIP	
PSCI 8150	SEMINAR IN CONSTITUTIONAL LAW	
PSCI 8200	SEMINAR IN FOREIGN POLICY AND NATIONAL SECURITY	
PSCI 8220	SEMINAR ON INTERNATIONAL LEADERSHIP AND STRATEGY	
PSCI 8920	SEMINAR IN SPECIAL TOPICS IN POLITICAL SCIENCE	
Required: Four Elective Courses (from remaining seminars or list below)		12
PSCI 8005	QUANTITATIVE ANALYSIS IN POLITICAL SCIENCE	
PSCI 8015	URBAN POLITICS	
PSCI 8036	THE PRESIDENCY	
PSCI 8045	GOVERNMENT AND POLITICS OF NEBRASKA

PSCI 8990	THESIS (if approved by GPC)	
Complete Exit Requirement		
PSCI 8950	GRADUATE PROGRAM COMPREHENSIVE ASSESSMENT	0
Total Credits		30

Notes on Courses

- Courses may not be available every term or may only be offered on-campus or online for said term.
- Students must successfully complete PSCI 8000 within the first 15 credit hours/five courses of their program.
- A student who does not have sufficient background in one or more subfields may be required to take a provisional undergraduate course before taking its equivalent graduate seminar.
- Electives may be taken outside of the political science department with approval from the graduate chair. The course must be related to political science.
- Students who were undergraduate students at UNO cannot take a dual-listed course at the graduate level if they have already taken the course at the undergraduate level. For example, if they completed PSCI 4270/ENVN 4270 Global Environmental Politics as an undergraduate student, they cannot take PSCI 8276 Global Environmental Politics as part of their MS degree.
- Students may not count more than six credit hours of courses ending in 8-5 (for example, 8265) towards the completion of their degree.
- Any certificate must be added at least one semester prior to graduation.

Exit Requirement

All students begin this program as a non-thesis student. Students who would like to complete a thesis may petition to do so after completing 15 credit hours, but at least one term before they plans on starting the thesis. To petition to change to the thesis track, a student must request an application from, and submit it to the academic advisor during the time specified above. The graduate chair will then evaluate whether a thesis track is the best option for the petitioning student. If denied, a student may appeal once in a following term by going through the same process. During a petition, the graduate program committee will review the application.

Non-Thesis Exit Requirement: Comprehensive Exam/Essay

Graduating political science master's degree students will complete a written comprehensive essay synthesizing their knowledge of at least two political science subfields to answer one prompt. Passing answers must demonstrate proficiency in each of the four MS-PSCI student learning objectives: research methods, writing in the discipline, critical thinking and knowledge in the subfields.

Students must notify the graduate advisor at the beginning of their graduating term, and register for PSCI 8950. The essay is open book, open note. Students will have 72 hours to complete their essay(s).

Students must write their essay during the spring or fall semester of the year in which they graduate. Students graduating in the summer may write their essay the prior spring if they have 6 or fewer credit hours remaining to complete in the degree program to be taken over the summer term, AND they have completed at least three subfield seminars.

At the discretion of the GPC PSCI 8910 or PSCI 8980 may fulfill the exit requirement.

- If PSCI 8910 is approved as the exit requirement, students must have completed 15 credit hours. If a student completes an internship before completing 15 credit hours, it will count as an elective. To fulfill the exit requirement, enrollment in this course must be for three credit hours. Students wishing to complete an internship must first have approval from the PSCI internship coordinator, second be hired for the internship before the term, third create a reading list with a faculty member that aligns with their internship, fourth complete 150 hours of documented work, and fifth turn in an end-of-internship assignment incorporating their readings and documenting their experience to the internship coordinator. Students may not already work for the organization or company. See graduate advisor for more information and to start the approval process. Internships will be taken as pass/no pass.
- If PSCI 8980 is approved as the exit requirement, students will work with one faculty member on a political science-related topic of their choice and will produce a research-based product at the end of the term.

Thesis Exit Requirement (6 credit hours)

PSCI 8990: The first term of thesis includes the forming of the thesis committee and approval of one's thesis proposal. The second three credit hours will focus on writing and defending the thesis.

Students must have a minimum of three voting committee members. All committee members must be graduate faculty members with a PhD and employed by UNO. One of the committee members must be from a non-political science field. Distance students may work with a faculty member outside of UNO, however, this member cannot be a voting member on the committee. Please refer to the graduate catalog's thesis guidelines for more detailed information.

Students must follow UNO's Graduate College's thesis submission guidelines and ensure that all paperwork has been submitted to the graduate office on time.

Concentrations

American Government and Politics Concentration

The American government and politics concentration is a 15 credit hour/5 course subset of the MS in political science program (MS-PSCI). If students wish to add this concentration onto their program, they must do so within the first 15 credit hours of their MS-PSCI program following the proper change-of-program procedures.

Code	Title	Credits
Required Seminar		3
PSCI 8040	SEMINAR IN AMERICAN GOVERNMENT AND POLITICS	
Select one additional seminar from the following:		3
PSCI 8120	SEMINAR IN LEADERSHIP	
PSCI 8150	SEMINAR IN CONSTITUTIONAL LAW	
Select three hours from the following:		3
PSCI 8036	THE PRESIDENCY	
PSCI 8046	CONGRESS AND THE LEGISLATIVE PROCESS	
PSCI 8056	THE JUDICIAL PROCESS	
PSCI 8146	CONSTITUTIONAL LAW: CIVIL RIGHTS	

PSCI 8176	CONSTITUTIONAL LAW: FOUNDATIONS	
PSCI 8186	CONSTITUTIONAL LAW: THE FEDERAL SYSTEM	
PSCI 8196	CONSTITUTIONAL LAW: CIVIL LIBERTIES

PSYC 9120	MULTIVARIATE STATISTICAL ANALYSIS
SOC 8040	APPLIED DATA ANALYSIS & INTERPRETATION
STAT 8005	STATISTICAL METHODS I

Menu 4: On-campus Advanced ⁴

ECON 8300	ECONOMETRICS
ISQA 8156	ADVANCED STATISTICAL METHODS FOR IS&T
ISQA 8160	APPLIED DISTRIBUTION FREE STATISTICS
ISQA 8340	APPLIED REGRESSION ANALYSIS
STAT 8416	INTRODUCTION TO DATA SCIENCE
STAT 8426	EXPLORATORY DATA VISUALIZATION AND QUANTIFICATION
STAT 8436	LINEAR MODELS
STAT 8446	TIME SERIES ANALYSIS
STAT 8700	BAYESIAN STATISTICS

Or two statistics classes approved by the graduate program chair to count as quantitative electives

Students will choose one of the following to learn about the specific topic and develop hypotheses and theory: **3**

PSCI 8900	READINGS IN POLITICAL SCIENCE (or existing graduate seminar 3 hrs)
PSCI 8990	THESIS (6 hours of thesis is required)

Alternative courses to be approved by graduate program chair.

Total Credits **12**

¹ Offered on-line UNO

² The basic menu lists classes requiring no or few pre-requisites. For example, BIOS 806** requires the student to have passed a statistics class in the last 5 years. CRCJ 8950* has no pre-requisite. Please refer to the departments' course listings for more information.

³ Offered on-line UNMC

⁴ The advanced menu lists classes requiring that the student have passed at least one class in advanced math. For example, BIOS 818** requires the student to have passed differential and integral calculus. Please refer to the departments' course listings for more information.

Academic Progress Policy

Students may be dismissed from the program after:

1. Not enrolling and/or successfully completing a course after two consecutive years.
2. Earning three or more W grades.
3. Earning two or more grades of C+ or below.

Under extenuating circumstances, students may apply for a waiver through the GPC. If a waiver is granted, students may be updated to the most recent catalog year.

Students who do not successfully complete a course during their admit term, or allowed deferment time, will be dismissed from the program.

Students may reapply to the program if dismissed for inactivity.

Incomplete Policy

The department will comply with the UNO's Incomplete Policy (<https://www.unomaha.edu/registrar/faculty-and-staff/grading/incomplete.php>).

In line with the UNO graduate policy on **incomplete grades**, the grade "I" is only to be issued due to a student's illness, military service, hardship, or death in the immediate family after the student has completed a substantial amount of the course. The professor reserves the right to use his/her discretion in determining additional situations where a grade of "I" may apply and what "substantial" means for that course. The student is expected to discuss this matter with the professor and create a plan of action towards the completion of the course in a timely manner. The professor also reserves the right to decide the consequences for a student who does not finish the course in the time agreed. Consequences may include, but are not limited to, an extended deadline, a permanent incomplete, or a failing grade for the course.

In-progress grades (IP) are only to be issued during the second part of a thesis project when a student is actively working towards its completion.

Standing I/IP Grades

Students with an I/IP can have a maximum number of 9 'active' credit hours.

Students who have nine credit hours of I/IP grades (total from past terms), may not enroll in new courses. Students may start enrolling in new courses as they reduces their credit hours of I/IP grades. Any student with an I/IP cannot have more than 9 'active' credit hours at one time (includes current courses as well as I/IP grades).

I/IP Credit Hours	New Credit Hour Allowance	Total 'Active' Credit Hour Load
0	9 (full time)	9
3	6	9
6	3	9
9	0	9

The graduate program chair reserves the right to waive this policy for a student, based on compelling circumstances.

Academic Dishonesty Policy

Academic dishonesty is a violation of the student code of conduct and is cause for a student to be dismissed from the program. Graduate students are expected to know what counts as academic dishonesty (<https://www.unomaha.edu/student-life/student-conduct-and-community-standards/policies/academic-integrity.php>).

Instructors reserve the right to decide how to address issues of academic dishonesty in their courses. Students may be subject to (including, but not limited to): the failure on the specific assignment or failure of the entire course.

Faculty will report all instances of graduate student academic dishonesty to the Graduate Program Chair.

The student has the right to appeal this decision through the appropriate channels. Please see the student code of conduct for further information.

Global Information Operations Certificate

The certificate in global information operations is a program designed to meet the need for a broad-based, interdisciplinary understanding

of international cultures and related issues in today's global society by graduate students, active-duty military and civilian professionals working in the fields of public service, national security, defense policy and intelligence analysis. The program seeks to satisfy varying academic, career, and professional post graduate goals of traditional and non-traditional students that prepare them for their responsibility as active citizens through leadership, participation and employment in diverse environments throughout the nation and the world. At this point in time, this certificate is not offered for online students.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: Review begins October 1
- Summer 2026: Review begins April 15
- Fall 2026: Review begins February 15

Note: Applications will be received and reviewed until the term begins.

Other Requirements

For students applying to, or who are a current MS-PSCI student in good standing:

- Minimum of 3.0 GPA

For students applying for this certificate as a stand-alone program:

- Baccalaureate degree or previous master's degree with a minimum of 3.0 GPA.
- Nine credit hours in relevant fields is preferred. Students without the necessary background may be admitted on a provisional basis and be required to take prerequisite courses before starting graduate work. Students must earn a grade of B or above in each of these courses.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80 (with no sub-score under 15), IELTS: 6.5, PTE: 53, Duolingo: 110
 - Passing with a minimum score does not guarantee admission into the program.
- **Statement of Purpose:** The personal statement should be 1-2 pages and address why you are seeking admission to this program, how your academic/professional experiences will contribute to your success in the program and how the program will contribute to your future academic/professional ambitions.
- **Professional Resume**

- **Letters of Recommendation:** Two letters of recommendation from a former professor (preferred), supervisor, or other professional contact who can speak to one's academic potential in a graduate program. If applicants have recently graduated from UNO, it is expected that one of the letters will be from a UNO political science faculty member. It is preferred that applicants use their references' institutional (.edu) or professional email.
- GRE scores are not required for admission, but students are welcome to include them.
- Any certificate must be added at least one semester prior to graduation.

Degree Requirements

Code	Title	Credits
Required Courses		9
CSCI/CYBR 8366	PRINCIPLES OF SECURE SYSTEM DESIGN	
PSCI 8256	INTELLIGENCE AND NATIONAL SECURITY ¹	
RELI 8900	READINGS IN RELIGION	
Select 3 hours from the following:		3
ISQA 8420	MANAGING THE I.S. FUNCTION	
ISQA 8380	ENTERPRISE ARCHITECTURE AND SYSTEMS INTEGRATION	
ISQA/CYBR 8570	INFORMATION SECURITY POLICY AND ETHICS	
PSCI 8200	SEMINAR IN FOREIGN POLICY AND NATIONAL SECURITY	
PSCI 8250	SEMINAR IN INTERNATIONAL RELATIONS	
Total Credits		12

Note: Students who took undergraduate courses at UNO may not take cross-listed courses they took at the 3000-4000 level at the 8000 level.

Students may be required to take prerequisite courses before their ISQA, CYBR, PSCI, and/or RELI graduate courses. Such requirements are to be determined by the specific department in question.

Exit Requirements

Students must earn a 3.0 GPA to graduate with this certificate.

Academic Progress Policy

Students may be dismissed from the program after:

1. Not enrolling and/or successfully completing a course after two consecutive years.
2. Earning two or more W grades.
3. Earning more than one grade of C+ or below even if GPA is a 3.0 or above.

Under extenuating circumstances, students may apply for a waiver through the GPC. If a waiver is granted, students may be updated to the most recent catalog year.

Students who do not successfully complete a course during their admit term, or allowed deferment time, will be dismissed from the program.

Students may reapply to the program if dismissed for inactivity.

Government Certificate

UNO's Department of Political Science offers an 18 credit hour graduate certificate in government for educators and other professionals who already have an advanced degree in another field and wish to expand their

knowledge in political science. This certificate is designed to help educators meet the new requirements set by the Higher Learning Commission to teach government-related courses in institutions of higher education or dual enrollment/concurrent enrollment courses in high schools. This certificate can be earned completely online. This certificate can be earned as a stand-alone program, or in conjunction with the MS in political science.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: Review begins October 1
- Summer 2026: Review begins April 15
- Fall 2026: Review begins February 15

Note: Applications will be received and reviewed until the term begins.

Other Requirements

For current students in good standing in UNO's Master of Science in political science program:

- Minimum GPA of 3.0
- Students must be accepted into this certificate program within their first 15 credit hours. Students starting this program after 15 credit hours may not be able to count previous completed coursework towards this certificate.

For students applying for this certificate as a stand-alone program:

- Baccalaureate degree or previous master's degree with a minimum of 3.0 GPA.
- Nine credit hours in political science-related courses is preferred. The selection committee looks for previous coursework and/or professional experience in American government, political theory, international relations, comparative politics, and social science (quantitative) methodology. Students without the noted background may be admitted on a provisional basis and be required to take prerequisite courses before starting graduate work. Students must earn a grade of B or above in each of these courses.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80 (with no sub-score under 15), IELTS: 6.5, PTE: 53, Duolingo: 110
 - Passing with a minimum score does not guarantee admission into the program.
- **Statement of Purpose:** The personal statement should be 1-2 pages and address why you are seeking admission to this program, how your

academic/professional experiences will contribute to your success in the program, and how the program will contribute to your future academic/professional ambitions.

- **Professional Resume**
- **Letters of Recommendation:** Two letters of recommendation from a former professor (preferred), supervisor, or other professional contact who can speak to one's academic potential in a graduate program. If applicants have recently graduated from UNO, it is expected that one of the letters will be from a UNO political science faculty member. It is preferred that applicants use their references' institutional (.edu) or professional email.
- GRE scores are not required for admission, however, candidates may include them.
- Any certificate must be added at least one semester prior to graduation.

Note: Students who took undergraduate courses at UNO cannot take any dual-listed courses at the graduate level they took as an undergraduate.

Students cannot have more than two courses ending in 8–5 counted towards their program. Other courses may be approved at the discretion of the graduate chair.

Courses may not be offered every term. Some courses may only be offered online or on-campus.

Exit Requirements

Students must earn a 3.0 GPA or above to graduate with no more than one course graded as a C+ or below.

Academic Progress Policy

Students may be dismissed from the program after:

1. Not enrolling and/or successfully completing a course after two consecutive years.
2. Earning two or more W grades.
3. Earning more than one grade of C+ or below, even if GPA is a 3.0 or above.

Under extenuating circumstances, students may apply for a waiver through the GPC. If a waiver is granted, students may be updated to the most recent catalog year.

Students who do not successfully complete a course during their admit term, or allowed deferment time, will be dismissed from the program.

Students may reapply to the program if dismissed for inactivity.

Intelligence and National Security Certificate

The intelligence and national security certificate is a 15 credit hour program designed to meet the need for an in-depth and critical analysis of US foreign policy and national security by graduate students, active duty military, and civilian professionals working in the fields of public service, national security, defense policy, and intelligence analysis. The program of study seeks to satisfy varying academic, career, and personal post-graduate goals of traditional and non-traditional students that prepare them for their responsibility as active citizens through leadership, participation and employment in intelligence, military, and foreign relations careers. This certificate can be earned completely online. This certificate can be earned independently of the MS in political science or in conjunction with it.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: Review begins October 1
- Summer 2026: Review begins April 15
- Fall 2026: Review begins February 15

Note: Applications will be received and reviewed until the term begins.

Other Requirements

For students applying to, or who are a current MS-PSCI student in good standing:

- 3.0 GPA (most recent GPA)
- Students must be accepted into this certificate program within their first 15 credit hours. Students starting this program after 15 credit hours may not be able to count previous completed coursework towards this certificate.

For students applying for this certificate as a stand-alone program:

- Baccalaureate degree or previous master's degree with a minimum of 3.0 GPA.
- Nine credit hours in political science-related courses is preferred. The selection committee looks for previous coursework and/or professional experience in American government, political theory, international relations, comparative politics, and social science (quantitative) methodology. Students without the noted background may be admitted on a provisional basis and be required to take prerequisite courses before starting graduate work. Students must earn a grade of B or above in each of these courses.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80 (with no sub-score under 15 is required), IELTS: 6.5, PTE: 53, Duolingo: 110
 - Passing with a minimum score does not guarantee admission into the program.
- **Statement of Purpose:** The personal statement should be 1-2 pages and address why you are seeking admission to this program, how your academic/professional experiences will contribute to your success in the program, and how the program will contribute to your future academic/professional ambitions.
- **Professional Resume**
- **Letters of Recommendation:** Two letters of recommendation from a former professor (preferred), supervisor, or other professional contact who can speak to one's academic potential in a graduate program. If applicants have recently graduated from UNO, it is expected that one of the letters will be from a UNO political science faculty member. It is preferred that students use their references' institutional (.edu) or professional email.
- GRE scores are not required for admission, however, candidates are welcome to include them.
- Any certificate must be added at least one semester prior to graduation.

Psychology

Degree Programs Offered

- Psychology, MA (p. 1171)
- Psychology, PhD (p. 1174)
- Industrial/Organizational Psychology, MS (p. 1176)
- School Psychology, MS (p. 1178)
- School Psychology, EdS (p. 1177)
- Applied Behavior Analysis, MS (p. 1179)

Certificates Offered

- Human Resources and Training Certificate (p. 1048)

Psychology, MA

The Master of Arts in psychology is designed to give students a broad background in the field of psychology plus a sufficient degree of specialization to prepare them for either careers or further graduate training.

Fast Track

The Department of Psychology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BS in neuroscience desiring to pursue a MA in psychology
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.2.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the

applicant will need to contact the Office of Graduate Studies for a fee waiver code.

- Admission to Fast Track does NOT guarantee admission to the graduate program.
- The admit term must be after the completion term of the undergraduate degree.

Special Note: Eligible undergraduate students may enroll in any dual level psychology or neuroscience course (PSYC 8xx6 or NEUR 8xx6).

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Fall 2026: January 10

Other Requirements

- Baccalaureate degree with a minimum of 3.0 GPA.
- A minimum of 15 undergraduate semester hours (or the equivalent) of psychology courses including: basic statistics and an upper level laboratory course, independent research, or equivalent, emphasizing the experimental method, data collection, statistical analysis, and report writing are required.
- **Entrance Exam:** Graduate Record Examination (GRE)
 - GRE scores are OPTIONAL for those applying to the psychology MA program. All applications will be reviewed whether or not GRE scores are included.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose**
- **Writing Sample** (preferred APA style)
- **Resume**
- **Letters of Recommendation:** Three letters of recommendation from professors and individuals who can speak to applicant's potential for success in a graduate program are required.

Degree Requirements

Student must select an area of concentration.

Required Course

Code	Title	Credits
PSYC 8000	THE PROFESSION OF PSYCHOLOGY	0

Total number of required credits is determined by the area of concentration completed.

Other Requirements Needed for a Student to Complete the Program

Obtaining a score of at least 600 on the Advanced Psychology Test of the GRE. (NOTE: not required for the neuroscience & behavior, developmental, cognitive areas of concentration).

Total Credit Hours: 30-37

Concentrations

Cognitive Concentration (Thesis Option 30 hours)

Code	Title	Credits
Required Cognitive Concentration Proseminar Courses		
PSYC 9010	PROSEMINAR: STATISTICAL METHODS I	3
PSYC 9020	PROSEMINAR: STATISTICAL METHODS II	3
PSYC 9070	PROSEMINAR: COGNITIVE PSYCHOLOGY	3
PSYC 9230	PROSEMINAR: BEHAVIORAL NEUROSCIENCE	3
PSYC 9560	PROSEMINAR: DEVELOPMENTAL PSYCHOLOGY	3
Advanced Cognitive Courses		
Select three of the following:		9
PSYC 8526	PSYCHOLOGY OF LANGUAGE	
PSYC 9040	PROSEMINAR LEARNING

PSYC 9960	RESEARCH OTHER THAN THESIS ¹	1
Developmental Concentration Courses		
Select two of the following:		6
PSYC 9070	PROSEMINAR: COGNITIVE PSYCHOLOGY ²	
PSYC 9230	PROSEMINAR: BEHAVIORAL NEUROSCIENCE ²	
PSYC 9430	PROSEMINAR: PERSONALITY	
PSYC 9440	PROSEMINAR: SOCIAL PSYCHOLOGY	
Advanced Developmental Concentration Seminars		
Select two of the following:		6

PSYC 9500	SOCIOEMOTIONAL DEVELOPMENT	
PSYC 9510	RESEARCH METHODS IN DEVELOPMENTAL PSYCHOLOGY	
PSYC 9530	COGNITIVE DEVELOPMENT	
PSYC 9550	PSYCHOSOCIAL DEVELOPMENT	
PSYC 8990	THESIS	6
Total Credits		31

¹ PSYC 9960: (1-6 credit hours)

² Note you must take either PSYC 9070 or PSYC 9230 as one of the options.

Plan B (Non-Thesis Option 37 hours)

Plan B is recommended for students who plan to work in an applied setting involving children and/or families and who do not plan to pursue a PhD. This plan requires completion of a minimum of 37 credit hours. In addition to required course work, students choose 3 elective courses (within or outside the Department of Psychology).

Instead of a thesis, students complete two applied practica (6 credit hours).

Code	Title	Credits
PSYC 9560	PROSEMINAR: DEVELOPMENTAL PSYCHOLOGY	3
PSYC 9650	RESEARCH METHODS IN PSYCHOLOGY	3
PSYC 9960	RESEARCH OTHER THAN THESIS ¹	1

Statistics Course

PSYC 9010	PROSEMINAR: STATISTICAL METHODS I	3
or PSYC 9020	PROSEMINAR: STATISTICAL METHODS II	

Developmental Concentration Proseminars

Select two of the following: 6

PSYC 9070	PROSEMINAR: COGNITIVE PSYCHOLOGY	
PSYC 9230	PROSEMINAR: BEHAVIORAL NEUROSCIENCE	
PSYC 9430	PROSEMINAR: PERSONALITY	
PSYC 9440	PROSEMINAR: SOCIAL PSYCHOLOGY

Exit Requirements

- Comprehensive Examination - at least one of the following
 - Submission of a national funding agency proposal
 - Manuscript submitted to peer-reviewed journal
 - Co-author of a poster or presentation at a national conference or first author at a regional conference
- Thesis
 - All candidates should carefully review the Graduate College requirements for forming the supervisory committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval of a thesis and final submission of the thesis.
 - Oral and written thesis defense; public presentation of thesis

Special Performance Quality Rule

If at any time a grade of "C", (2.0 on a 4.0 scale) in graduate courses become a matter of record, a graduate student in the Department of Psychology will be placed on probation. An unexcused grade of "W" in a proseminar course will be considered equivalent to a grade of "C" for purposes of this policy. An excused "W" must be approved by the chair of the Department of Psychology. Students placed on this probation will forfeit any departmental graduate assistantship they may have and any approved programs of study will be subject to re-evaluation and change. Before registering for additional courses, a student placed on probation

must, with the assistance and approval of his/her advisor, submit a plan for remediation of his/her academic problems, and have that plan approved by the Graduate Program Committee (GPC). The GPC will review and, if appropriate, modify the plan. Further, any enrollment in graduate courses must be approved by the GPC. The student will remain on probation until the GPC approves termination of probation status. If a student earns a second "C", the student will be dismissed from the program and the GPC will work to come up with a plan, and evaluate if it is possible for the student to return to the program at some point.

Psychology, PhD

The PhD program in psychology prepares students for applied, research, or teaching positions in the areas of developmental psychology, industrial/organizational psychology and neuroscience and behavior.

Eligible courses:		
PSYC 9090	PSYCHOMETRIC THEORY	
PSYC 9320	SEMINAR IN PROGRAM EVALUATION	
SOC 8060	QUALITATIVE METHODS	

Statistical Analysis Coursework

Select at least 12 hours from the following:

Required:

PSYC 9010	PROSEMINAR: STATISTICAL METHODS I	
PSYC 9020	PROSEMINAR: STATISTICAL METHODS II	
Eligible courses:		

PSYC 9120	MULTIVARIATE STATISTICAL ANALYSIS	
PSYC 9910	TOPICAL SEMINAR IN PSYCHOLOGY	
GERO 8356	ISSUES IN AGING ³	
Human Diversity Coursework		
PSYC 8590	PSYCHOLOGY OF EXCEPTIONAL CHILDREN	3
Course in Cross-Cultural Development		3
Elective Coursework		
Select at least 12 hours of elective coursework. Students will also find eligible courses in (among other disciplines):		
Child, Youth, and Family Studies		
Sociology/Anthropology		
Gerontology		
Latino/Latin American Studies		
Empirical Research Coursework		
PSYC 9960	RESEARCH OTHER THAN THESIS ³	1-12
Included in MA concentration		
PSYC 8990	THESIS ⁴	6
PSYC 9990	PSYCHOLOGY DISSERTATION ⁵	12-24

¹ PSYC 8900: Readings, Presentation, Review Paper

² PSYC 9040: (in conjunction with MMI)

³ PSYC 9960: (at least 3 hours)

⁴ PSYC 8990: (6 hours; required for Master's degree)

⁵ PSYC 9990: (12-24 hours)

Every student must complete a two-party qualifying examination consisting of:

- Psychology readings including a written and oral examination across domains
- Grant proposal OR course development (child development, adolescent development or lifespan development)

Additionally, each student is expected to demonstrate proficiency with at least one research tool.

Neuroscience and Behavior Concentration

Code	Title	Credits

PSYC 9990	PSYCHOLOGY DISSERTATION (12-30 Hours Required)	

¹ PSYC 9990: (12-30 hours)

Exit Requirements

- Comprehensive Examination
- Dissertation

Special Performance Quality Rule

If at any time a grade of "C", (2.0 on a 4.0 scale) in graduate courses become a matter of record, a graduate student in the Department of Psychology will be placed on probation. An unexcused grade of "W" in a proseminar course will be considered equivalent to a grade of "C" for purposes of this policy. An excused "W" must be approved by the chair of the department of psychology. Students placed on this probation will

forfeit any departmental graduate assistantship they may have and any approved programs of study will be subject to re-evaluation and change. Before registering for additional courses, a student placed on probation must, with the assistance and approval of his/her advisor, submit a plan for remediation of his/her academic problems, and have that plan approved by the Graduate Program Committee. The Graduate Program Committee will review and, if appropriate, modify the plan. Further, any enrollment in graduate courses must be approved by the Graduate Program Committee. The student will remain on probation until the Graduate Program Committee approves termination of probation status. If a student earns a second "C", the student will be dismissed from the program and the GPC will work to come up with a plan, and evaluate if it is possible for the student to return to the program at some point.

Industrial/Organizational Psychology, MS

The MS in industrial/organizational psychology is designed to prepare students for work in applied settings as well as for continued education. Students are trained using the scientist-practitioner model advocated by Society for Industrial Organizational Psychology (SIOP). Please note, this program does have a STEM designation.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Fall 2026: January 10

Other Requirements

- A minimum of 15 undergraduate semester hours (or the equivalent) of psychology courses including: basic statistics and demonstration and involvement in research (through psychology lab course, independent study, research assistant, etc).
- **Entrance Exam:** Graduate Record Examination (GRE) scores are OPTIONAL for those applying to the industrial/organizational program. All applications will be reviewed whether or not GRE scores are included.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** The statement of purpose should include: your purpose in applying for graduate study, your particular area of specialization within the major field, your plans for future occupation or profession, and any additional information that may aid the selection committee in evaluating your preparation and your aptitude

for graduate study. You should specifically address your goals and objectives in pursuing graduate study.

- **Writing Sample**
- **Resume**
- **Letters of Recommendation:** Three letters are required

School Psychology, EdS

The UNO school psychology program's mission is to graduate students who have met high levels of academic excellence relevant to the knowledge and skills in the profession of school psychology and that are engaged in and committed to the community. The program is designed to prepare graduates to function as scientist-practitioners in service to children and their families, schools, and communities. The program emphasizes an indirect service delivery approach that is oriented in data-based problem-solving and is responsive to cultural and ecological contexts. Although indirect approaches are emphasized (e.g., consultation, assessment, prevention, and early intervention), graduates are prepared to apply direct psychological services (e.g., individual-, group-, and systems-level interventions) when conditions warrant.

Total Credits**36**

¹ PSYC 8550: the other course is taken at the EdS level.

Exit Requirement

Comprehensive Portfolio (CP)

Students are required to submit a Comprehensive Portfolio (CP) near the end of their master's work. A portfolio is a systematic and purposeful collection of work that documents a student's professional competencies within the program's training objectives. The CP meets the graduate school's master's-level comprehensive examination requirement. The portfolio is intended to represent the student's progress towards meeting program outcomes and his or her ability to effect positive change for children, schools, and families. Thus, it is a formative and summative evaluation of student progress through the program's training objectives.

Special Performance Quality Rule

If at any time a grade of "C", (2.0 on a 4.0 scale) in graduate courses become a matter of record, a graduate student in the Department of Psychology will be placed on probation. An unexcused grade of "W" in a proseminar course will be considered equivalent to a grade of "C" for purposes of this policy. An excused "W" must be approved by the chair of the Department of Psychology. Students placed on this probation will forfeit any departmental graduate assistantship they may have and any approved programs of study will be subject to re-evaluation and change. Before registering for additional courses, a student placed on probation must, with the assistance and approval of his/her advisor, submit a plan for remediation of his/her academic problems, and have that plan approved by the graduate program committee. The graduate program committee will review and, if appropriate, modify the plan. Further, any enrollment in graduate courses must be approved by the graduate program committee. The student will remain on probation until the graduate program committee approves termination of probation status. If a student earns a second "C", the student will be dismissed from the program and the GPC will work to come up with a plan, and evaluate if it is possible for the student to return to the program at some point.

Applied Behavior Analysis, MS

The University of Nebraska at Omaha and Munroe Meyer Institute applied behavior analysis program's (ABA) mission is to graduate students who have met high levels of academic excellence in clinical and research skills in behavior analysis. The ABA Program trains students to provide person-centered, culturally responsive, and collaborative services for individuals across the lifespan, including those with neurodevelopmental disabilities, to promote behavioral health outcomes.

mshriver@unmc.edu

Program Website (<https://www.unomaha.edu/college-of-arts-and-sciences/psychology/academics/graduate-programs/aba-program/>)

Other Program Related Information

The UNO and MMI ABA MS program leads to Board Certification in Behavior Analysis (BCBA). This involves completion of (1) the program's Association for Behavior Analysis International Verified Course Sequence and (2) the Behavior Analyst Certification Board fieldwork experience (1500-2000 hours). See BACB website (<http://bacb.com/>) for more details on attaining BCBA.

The majority of coursework is online. However, most online courses require a synchronous meeting, typically weekly, which students will join via Zoom video. All courses, including online courses, follow a semester schedule sequence.

Exit Requirement

- Comprehensive Examination

The ABA Handbook (<https://www.unomaha.edu/college-of-arts-and-sciences/psychology/academics/graduate-programs/aba-program/>) is a comprehensive resource for prospective and current students in the Applied Behavior Analysis program at UNO. Refer to this document for information concerning the program content, training, policies, research, and more.

Human Resources and Training Certificate

The purpose of the graduate certificate in human resources and training (HRST) is to help post-baccalaureate students and working professionals expand their educational background and enhance their knowledge and skills in either human resources or training and development. The first concentration, human resources, focuses on enhancing organizational effectiveness through employee recruitment, selection, placement, performance evaluation, motivation, and retention. The second concentration, training and development, focuses on enhancing training skills and program design including developing, implementing, assessing, and delivering training programs. The HRST certificate is useful for individuals currently employed in the human resources or training fields and for individuals who desire to enter those fields. The graduate courses required for this certificate address both theory and application from the fields of communication, psychology, and business.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications are accepted and reviewed on a rolling basis throughout the year.

Other Requirements

- Admission to the HRST graduate certificate program requires a baccalaureate degree with at least a 3.0 GPA, a major or a minor (or at least a 15 credit concentration) in communication studies, psychology, business, or related area, plus at least one three credit course in research methods or statistics.
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the U.S., **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Statement of Purpose:** A 1000 word maximum statement of purpose essay describing which concentration you wish to pursue and why.
- Resume:** A resume that includes your work history
- Letter of Recommendation:** One letter of recommendation from a current or former supervisor or professor. During your online application process, you will be asked to provide the name and email address of the person writing your recommendation letter. The online application system will send an email to your recommender containing a link for online submission of the recommendation letter.

Fast Track Program

The School of Public Administration has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine (9) graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following who wish to pursue a Master of Public Administration degree:
 - Students majoring in emergency management from the UNO School of Public Administration
 - Students pursuing the Bachelor of Multidisciplinary Studies
- Students should have senior status and must be within at least 30 undergraduate credits yet to complete their undergraduate degree. Exceptional students who do not meet this requirement may be considered.
- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast-Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses.
- Students must consult with the MPA advisor prior to enrollment in one of the courses listed below.
- A minimum cumulative GPA of 3.5 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the MPA program is required. The application fee will be waived, the

applicant will need to contact the Office of Graduate Studies for a fee waiver code.

- Admission to Fast Track does NOT guarantee admission to the graduate program.
- For this program, if students maintain at least a grade of B+ in courses taken, they will be recommended for admission to the MPA program.
- The admit term must be after the completion term of the undergraduate degree.

The following courses may be taken under the Fast-Track program:

- PA 8050: Foundations of Public Service
- PA 8090: Organizational Theory and Behavior
- PA 8100: Advanced Management and Leadership for Public and Nonprofit Organizations (Note: This course may only be taken if both PA 8050 and PA 8090 are completed).

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: October 1
- Fall 2026: June 1

Other Requirements

- The general prerequisite for admission to the MPA program is a four-year bachelors' degree with a minimum 3.0 GPA in the junior and senior years (last 50-60 credit hours)
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose/Admissions Essay:** The essay should be two to four pages (doubled-spaced) and answer the following questions:
 - Please tell us about the factors in your background that will help us understand your interest in a profession in the public or nonprofit sectors.
 - What are your professional goals? Ten years from now, what do you hope to be doing professionally?
 - How can an MPA from UNO help you to achieve these goals?
- **Resume:** Include information emphasizing interest in public service
- **Letters of Recommendation:** Two letters of recommendation are required. These may be from professional or academic references. Letters should discuss the applicant's readiness to engage in graduate education with associated reading, writing, and research requirements.

Generally, students will be admitted unconditionally if they have a strong undergraduate record, demonstrate good communication skills in their admission essay, receive favorable recommendations, and have goals consistent with the mission of the MPA program.

Degree Requirements

Code	Title	Credits
Required Courses		
The School of Public Administration has seven (7) core courses required for all MPA students. ¹		
PA 8050	FOUNDATIONS OF PUBLIC ADMINISTRATION	3

PA 8090	ORGANIZATION THEORY AND BEHAVIOR	3
PA 8100	ADVANCED MANAGEMENT AND LEADERSHIP FOR PUBLIC AND NONPROFIT PROFESSIONALS	3
PA 8120	ANALYSIS AND DECISION MAKING	3
PA 8400	PUBLIC AND NONPROFIT BUDGETING	3
PA 8300	POLICY DESIGN AND IMPLEMENTATION	3
PA 8530	PLANNING AND EVALUATION	3

General Elective Courses		
See MPA General Electives below		6
Specializations		
See MPA Specializations below		
At the end of the program, students complete a Capstone Project:		3
PA 8990	CAPSTONE PROJECT IN PUBLIC ADMINISTRATION	
Total Credits		39

¹ Must maintain a grade point average (gpa) of 3.2 or above during the first twelve (12) hours of public administration coursework in PA 8050, PA 8090, PA 8100 and PA 8120. Provisional students can earn no grade below a "B" in the first twelve (12) hours of coursework or the student will be dismissed or placed on academic probation. A grade of "C-" or below results in automatic dismissal.

Exit Requirement

- Capstone - 3 hours PA 8990

MPA General Electives

Students must complete six hours of elective courses. Any 8000 level public administration course may be taken as an elective (other than the required core and concentration classes). Courses from other departments may also be used as elective courses, but require approval in advance. Students are encouraged to speak with their advisor to select courses.

MPA Specializations

Criminology and Criminal Justice Specialization

Code	Title	Credits
Required Course		
PA 8410	PUBLIC HUMAN RESOURCE MANAGEMENT	3
Elective Courses		
Select two of the following:		6
CRCJ 8010	NATURE OF CRIME	
CRCJ 8020	SEMINAR IN ADMINISTRATION OF JUSTICE

Public Administration, PhD

The PhD in public administration program creates a supportive, collaborative, and rigorous environment for students to develop their intellectual identities and a comprehensive understanding of the field and a range of research traditions. Our students and alumni make significant contributions to theory, policy, research, and practice towards enhancing a

democratic society. We value intellectual openness, collaboration, diversity, and excellence.

The PhD program in public administration is a research degree with a focus on public and nonprofit administration and management in a democratic and diverse society. It is the terminal degree for research and theory development.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadline

- Fall 2026: Applicants seeking funding January 15, all other applicants March 1

Other Requirements

- An earned master’s degree in public administration or related field from an accredited institution.
- Generally, the target master’s degree level GPA is above 3.20 (on a 4.0 scale).
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL 90, IELTS: 7, PTE: 64, Duolingo: 120
- Applicants are expected to demonstrate the ability to communicate orally and in writing in a manner sufficient to compete effectively at the doctoral level.
- **Statement of Purpose:** A five-page statement of intent describing the applicant’s goals in pursuing a PhD and plans after completion of the PhD, research interests and desired area of specialization offered in the PhD program, discussion of school faculty with whom the applicant would like to work related to research interests, and an explanation of academic and professional backgrounds preparing the applicant to pursue a PhD.
- **Writing Sample:** An academic or professional writing sample is required. This can be, for example, a term paper, thesis, conference paper, evaluation report, or published work.
 - Include a separate 1-page abstract that summarizes the contents of the writing sample. If applicable, please include an explanation of your contribution if the work submitted is multi-authored.
- **Resume:** The resume or CV will be examined to assess an applicant’s professional work experience and/or extracurricular activities while attending school. Additionally, resumes are examined to assess an applicant’s potential ability to understand and do research on the context and practice of contemporary public administration.

- **Letters of Recommendation:** Three letters are required. At least two recommendations must be from academics such as current or former professors. The Office of Graduate Studies will contact each recommender via email to obtain the letters.
- Students are responsible for additional information found on the PhD in Public Administration website.
- The doctoral program committee reviews student academic preparation, specifying appropriate courses that must be taken as prerequisites to doctoral study. Except for those who have completed an MPA degree, new doctoral students may be required to first complete MPA course prerequisites or reading prior to enrolling in 9000-level core or research courses.

Degree Requirements

Required Courses Summary

92 hours of graduate credit hours beyond the baccalaureate degree. This includes 21 hours of core courses, 12 hours of research courses, six hours of specialization courses, two 1-hour workshops on teaching and research skills, 15 hours of dissertation coursework, and 36 hours of additional graduate-level coursework. The 36 hours of additional graduate-level coursework may be earned from an accredited institution toward a Master of Public Administration degree or a master’s degree (MA or MS) in a related academic discipline or field.

Progress Review

The doctoral program committee will conduct a review of student progress each year. The committee will make such recommendations as appropriate to the student's advisor. As part of the review, students will be required to submit a summary of annual progress and plans.

Field Examination

Following completion of coursework, doctoral students take the field examination, which includes two questions: one comprehensive and one related to the student's specialization. The field exam is given in open-book format over two days, eight-hours each day. The field exam testing period is in August (about one week before the fall semester starts) each year.

Degree Candidacy

Students who have successfully passed the required coursework in their program of study and the field examination apply for Admission to Candidacy for the Doctoral Degree. This application requires majority consent of the student's supervisory committee, the doctoral program committee, and the dean for Graduate Studies.

After admission to degree candidacy, the student must maintain continuous enrollment until they receive the degree. The School monitors this enrollment. Students not in residence must register for a minimum of one semester credit hour of dissertation research. Failure to register during each academic semester will result in termination of the candidacy. Per Graduate College policy, if the term of candidacy is extended beyond three years (excluding summer terms), the candidate must pass another examination.

Dissertation Proposal

Once field exams are successfully completed, students will complete and defend a dissertation proposal before their supervisory committee. Students are encouraged to submit the dissertation proposal within 12 months of completing field exams. Students enroll in PA 9970 for at least one semester while working on the proposal.

The proposal should consist at minimum of a statement of the topic to be addressed, an explanation of why the topic is important, a review of the relevant literature, and an appropriate research design. The supervisory committee chair will assist the student in the development of the proposal. Oral defense of the proposal will be before a majority of the members of the supervisory committee and the chair of the DPC no earlier than three weeks after they have received the proposal.

After the oral proposal defense, the Proposal Defense Form (https://drive.google.com/file/d/19J35OKcMWvTeghIR41QM_FSUd1KKCADb/view?pli=1) should be submitted to the chair of the DPC.

Dissertation

The dissertation represents an original contribution to knowledge development in the field of public administration. Following successful completion of all coursework and field exams, doctoral students apply for candidacy for the degree and then defend a dissertation proposal before their supervisory committee. Following successful defense of the proposal, students work under the guidance of their supervisory committee chair until the project is complete. Two readers from the student's supervisory committee then review the entire document and may recommend further

work or changes. After the committee chair and readers agree that the dissertation is ready for defense, the student schedules a public defense.

The time limit on granting the PhD in public administration degree is eight (8) years from the time of filing the plan of study in the Office of Graduate Studies

Quality of Work Standards

Doctoral students are expected to do work of high caliber. Failure to maintain quality of work standards may result in probation or dismissal from the program. Reasons for probation or dismissal may include:

- Failure to maintain a 3.33 average for all course work
- A grade of C+ or below in one course
- Failure to maintain continuous enrollment
- Failure to pass field exams
- Failure to form a supervisory committee
- Violating Student Code of Conduct (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/public-administration/documents/spa-doctoral-handbook-updated-september-2024.pdf>) standards

Public Administration, MPA and Criminology and Criminal Justice, MS

The Master of Public Administration and MS in criminology and criminal justice dual degree program is a collaborative effort between the Schools of Public Administration and Criminology and Criminal Justice. The dual degree offers interdisciplinary preparation in the fields of public administration and criminal justice leading to both the master of public administration and master of science in criminology and criminal justice degrees with fewer required hours than it would take to obtain these degrees independently.

Students pursuing this program must complete 57 total hours and can be pursued both online or in person.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: October 1
- Fall 2026: June 1

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose/Admissions Essay:** The essay should be two to four pages (doubled-spaced) and answer the following questions:
 - Please tell us about the factors in your background that will help us understand your interest in a profession in the public or nonprofit sectors, and criminology and criminal justice.
 - What are your professional goals? Ten years from now, what do you hope to be doing professionally?
 - How can this dual degree help you to achieve these goals?
- **Resume**
- **Letters of Recommendation:** Two letters of recommendation are required, the recommendation requests are generated from your online application. These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.

Public Administration, MPA and Gerontology, MA

The Master of Public Administration and MA in gerontology dual degree program is a collaborative effort between the School of Public Administration and Department of Gerontology. The dual degree offers interdisciplinary preparation in the fields of public administration and gerontology leading to both the Master of Public Administration and Master of Arts in gerontology degrees with fewer required hours than it would take to obtain these degrees independently.

The program prepares students to assume leadership in the public service sector, specifically in administrative and policy work with governmental units and nonprofit organizations, while providing advocacy and services for and on behalf of older adults and for individuals, families, groups, organizations, and communities that support the older population.

Students pursuing this program must complete 57 total hours and can be pursued both online or in person.

Public Administration, MPA and Management Information Systems, MS (MPA/MIS)

In government and non-profit organizations, there is a significant need and a long-term demand for persons with advanced skills in information management technology. The primary purpose of this dual degree option is to prepare students to manage and lead organizations in the future. To meet this need, the School of Public Administration and the College of Information Science & Technology offer the option to complete both the MPA and the MS in MIS degree jointly by completing 54-57 hours of course work beyond foundation requirements. This joint degree program is designed for dedicated students who are able to successfully complete graduate intensive study from two perspectives—public administration and management information systems—while achieving a synergy between the two fields. As such, the program involves graduate coursework in both public administration and information systems, with integrative experiences that will attain the desired synergy. Students interested in this option will work closely with a faculty mentor to develop an integrated plan of study at an early stage.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: October 1
- Fall 2026: June 1

Other Requirements

- The general prerequisite for admission to the program is a four year bachelors' degree with a minimum of a 3.0 GPA of the junior-senior year (last 50-60 credit hours).
- **Entrance Exam:** Submitting GMAT or GRE scores may strengthen your application.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose**
- **Writing Sample:** From work or previous academic experiences. Alternatively, if you do not have a writing sample, please submit a two page double-spaced word processed essay that addresses the following two topics:
 - Your unique personal qualities and life experiences that distinguish you from other applicants to our graduate program
 - Two accomplishments that demonstrate your potential for success in the graduate program
- **Resume:** Indicate your work experience and background
- **Letters of Recommendation:** Two letters of recommendation are required

Degree Requirements

MPA/MIS Foundation Courses

A student must have completed some basic courses either as an undergraduate student or prior to enrolling in the first MS in MIS course. Students may start MPA courses while completing the MIS foundation courses. All must be completed prior to or concurrent with the first six hours of MS in MIS graduate course work.

Foundation courses ensure that all students in the program have a strong foundation on which to build the rest of the program. These courses not only provide essential prerequisite knowledge and skills for other courses in the program, but they also contain a distinct body of knowledge that is an important part of the MIS professional's education. All foundation courses are required for all students. Students who have obtained an undergraduate MIS degree will typically have this foundation. Other students, including computer science or engineering majors, will usually have to take one or more foundation courses. Occasionally, a student's work experience may be sufficient to waive one or more foundation courses.

Waivers for foundation courses are granted by the chair of the graduate program committee upon the recommendation of the faculty member who is responsible for an individual foundation course. Students requesting a waiver for a particular course should be prepared to meet with a faculty member and answer questions in the area of the course. They should bring to the meeting any relevant transcripts, course syllabi, course material, or evidence of practical experience. Some foundation courses may have

an option for testing out. Results of a test out are not appealable or repeatable.

ISQA 8950	CAPSTONE MANAGEMENT INFORMATION SYSTEMS	3

Six credit hours or fewer may be left in the program. All MIS core courses must have been completed.

Thesis Option

To complete this option, a student will be required to enroll in six hours of thesis credit.

Code	Title	Credits
ISQA 8990	THESIS	6

The thesis must be in an area that relates to both the public administration and information systems domains.

Total Credit Hours: 57

Public Administration, MPA and Social Work, MSW (MPA/MSW)

The MPA/MSW dual degree program is a collaborative effort between the University of Nebraska at Omaha (UNO), Grace Abbott School of Social Work and the School of Public Administration. This program offers interdisciplinary preparation in the fields of social work and public administration leading to the master of social work and the master of public administration degrees, with fewer required credit hours than it would take to obtain these degrees independently.

The program prepares students to provide a variety of advanced level micro, mezzo, and macro social work services to individuals, families, groups, organizations, and communities; and assume leadership in the public service sector, specifically in administrative and policy work with governmental units and nonprofit organizations.

Students beginning the MPA/MSW program at the MSW Foundation level must complete 81 credit hours total. Students beginning the MPA/MSW program at the Advanced Standing level must complete 57 credit hours total.

- Master's level social workers are employed in public and private agencies, including medical settings, schools, residential treatment centers, court and correctional agencies, and community planning and development agencies.
- The MSW degree at the Grace Abbott School of Social Work is accredited by the Council on Social Work Education (CSWE), the national accrediting body for all social work education.
- Information on certification and licensure is available on the Nebraska Department of Health and Human Services website (<http://dhhs.ne.gov/Pages/default.aspx>).

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: November 1
 - Foundation MPA/MSW students (those who do not have an undergraduate degree in social work, BSSW) admitted for the spring term are limited to only the MPA coursework in spring and summer terms. The MSW coursework will be added in the fall term.

- Advanced MPA/MSW students (those with an undergraduate degree in social work, BSSW) can begin both MPA and MSW coursework in the spring term.
- Fall 2026: The priority deadline is February 1. Applications will be accepted through March 1.
 - Students who have earned or will be earning any undergraduate degree may apply for fall admission.
- Students admitted as either Generalist MPA/MSW or Advanced Generalist MPA/MSW can begin both MSW and MPA coursework in the fall term.

Note: If admitted to the Master of Social Work program and you wish to become a dual degree MSW/MPA student you will need to adhere to the MPA deadline date which is June 1(fall) or October 1(spring).

Other Requirements

- The general prerequisite for admission to the program is a four-year bachelors' degree with a minimum of a 3.0 GPA (on a 4.0 scale) in the junior and senior years (last 50-60 hours).
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL, 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** Two statements of purpose are required; one for the School of Public Administration and one for the Grace Abbott School of Social Work
 - For social work, the statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, in no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.
 - Why have you chosen social work?
 - Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.
 - What type of work are you planning to engage with once you attain your MSW degree?
 - Specifically, what are the issues, populations, and levels of practice you hope to work with after graduate school?
 - The social work profession is rooted in improving the lives of others. Social workers adopt a stance of humility and strive towards cultural awareness.
 - Discuss a time when you realized that your personal experience influenced your reaction to a situation.
 - Reflecting on that experience, how might it influence your future social work practice?
 - Social workers are self-reflective, strengths-based, and growth-oriented.
 - Identify a strength that you possess and an area for growth.
 - Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.
 - Social work is a values-based profession dedicated to enhancing human wellbeing. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>):
 - Identify and discuss one that resonates with you.
 - Identify and discuss one that may challenge you.

www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/):

- For public administration, the essay should answer the following questions:
 - Please tell us about the factors in your background that will help us understand your interest in a profession in the public or nonprofit sectors.
 - What are your professional goals? Ten years from now, what do you hope to be doing professionally?
 - How can this dual degree from UNO help you achieve these goals?
- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
 - Educational and occupational experiences since high school
 - List start and end dates with month and year
 - Identify whether the position is part or full-time
 - Identify whether the position is paid or volunteer
 - Field placements, internships or practicums
 - Honors or distinctions received
- **Letters of Recommendation:** Three letters of recommendation are required. Recommendation requests are generated from your online application. The recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past three years, at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.
- An undergraduate cumulative GPA of 2.7 or higher is required to be considered for admission.

The MSW Generalist Program is a 63 credit hour program available to applicants who do **not** hold a BSSW degree from an accredited school of social work.

The MPA/MSW Advanced Generalist Program is a 57 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

Public Management Certificate

The purpose of the certificate in public management is to allow working professionals with careers in the public sector or graduate students in a related field of study (such as political science or city and regional planning) to expand their educational background and to enhance their knowledge in the area of public management. The graduate certificate is designed to extend students' understanding of theory and practice in the field of public management.

Secondary Education, MS

Designed for those teaching in secondary schools across a variety of curricular areas, the secondary education program offers an integrated approach to developing the skills and dispositions needed for today's educational environments. Graduate students choose a program of study that explores content and pedagogy and that also supports their professional goals and standards of practice.

The program is specifically designed around the pillars of:

- Implementing culturally responsive teaching practices
- Engaging in research and assessment to inform instructional decision making
- Applying theoretical frameworks to guide teaching
- Using sound digital pedagogy

The master's degree in secondary education does not lead to initial teacher certification.

Program Website (<http://www.unomaha.edu/college-of-education/teacher-education/graduate/secondary-education.php>)

Unclassified Students

Students who are not planning to pursue a program leading to a graduate certificate or a master's degree can be admitted to secondary education with unclassified status. Candidates holding a previous master's degree in education who are seeking additional teaching endorsements may wish to choose an unclassified status. Unclassified students are allowed to take courses for which they meet the prerequisite. Successful completion of graduate courses as an unclassified student does not obligate the department to accept those courses for credit toward the fulfillment of degree requirements.

Formal advisement in an endorsement area is required.

- Candidates should apply for endorsements as soon as they are eligible. If a candidate applies 10 years or more after completing all coursework, a review is required to determine if more coursework is needed.
- To add an endorsement 1/3 of the coursework must be completed at UNO in the endorsement area.

Fast Track Program

The Department of Teacher Education has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine (9) graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing BS in Education desiring to pursue a MS in Secondary Education.

- Students must have completed no less than 75 undergraduate hours and successful completion of a significant number of undergraduate education courses.
- Students must have a minimum undergraduate GPA of 3.5.
- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 10
- Summer 2026: June 1
- Fall 2026: August 1

Other Requirements

- A minimum undergraduate GPA of 3.0 (on a 4.0 scale).
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Applicants working toward the master's degree must have a valid teaching certificate **or** application to a concentration that leads to certification (e.g. Teacher Academy Project concentration). Exceptions to this will be considered on an individual basis. If needed, please contact Chris Wilcoxon, the graduate program chair. Please note, a master's degree does not lead to initial certification.
- International students who do not intend to teach in the U.S. **may** be eligible for admission.

Social Work

Degree Programs Offered

- Social Work, MSW (p. 1198)
- Social Work, MSW and Criminology and Criminal Justice, MS (MSW/CRCJ) (p. 1074)
- Public Administration, MPA and Social Work, MSW (MPA/MSW) (p. 1189)
- Social Work, MSW and Public Health, MPH (MSW/MPH) (p. 1204)

Certificates Offered

- Managing Juvenile and Adult Populations Certificate (p. 1076)

Social Work, MSW

The mission of the Grace Abbott School of Social Work is to educate students to become highly qualified social workers who serve people of all ages and influence the systems that affect them, to advance knowledge through teaching and research, and to engage with communities to promote societal wellbeing.

Program Related Information

Program Contact

402.554.2793

Program Website (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/social-work/>)

The MSW program has received continuous accreditation from the Council on Social Work Education since 1940. The MSW program prepares students to provide a variety of advanced social work services with individuals, families, groups, organizations, and communities. The MSW degree is recognized for licensure for independent social work practice in the United States. More information regarding licensure and certification can be found on local Department of Health and Human Services websites.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: November 1
- Spring admission to the School of Social Work is limited to students who have already completed or will be completing a BSSW (Bachelor of Science in social work) from a CSWE accredited

program prior to beginning the MSW and are applying to the advanced generalist MSW program. Students who have earned or will be earning a degree other than a BSSW must apply for fall admission.

- Fall 2026: The priority deadline is February 1. Applications will be accepted through March 1.
 - Students who have earned or will be earning any undergraduate degree may apply for fall admission.

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 85, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** The statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, in no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.
 - Why have you chosen social work?
 - Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.
 - What type of work are you planning to engage with once you attain your MSW degree?
 - Specifically, what are the issues, populations, and levels of practice you hope to work with after graduate school?
 - The social work profession is rooted in improving the lives of others. Social workers adopt a stance of humility and strive towards cultural awareness.
 - Discuss a time when you realized that your personal experience influenced your reaction to a situation.
 - Reflecting on that experience, how might it influence your future social work practice?
 - Social workers are self-reflective, strengths-based, and growth-oriented.
 - Identify a strength that you possess and an area for growth.
 - Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.
 - Social work is a values-based profession dedicated to enhancing human wellbeing. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>):
 - Identify and discuss one that resonates with you.
 - Identify and discuss one that may challenge you.
 - **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
 - Educational and occupational experiences since high school
 - List start and end dates with month and year.
 - Identify whether the position is part or full-time.
 - Identify whether the position is paid or volunteer.

- Field placements, internships or practicums
- Honors or distinctions received.

- **Letters of Recommendation:** Three letters of recommendation are required; the recommendation requests are generated from your online application. These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.
- If transferring from another accredited MSW program, one letter must be from a current faculty member associated with that program.
- An undergraduate cumulative GPA of 2.7 or higher is required to be considered for admission.

The MSW **Generalist Program** is a 63 credit hour program available to applicants who do **not** hold a BSSW degree from an accredited school of social work.

The MSW **Advanced Generalist Program** is a 39 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work.

Electives		
Select 9 graduate credits (8000 or 9000 level) from social work, gerontology, criminology & criminal justice or public administration. Students who are pursuing a graduate certificate or a graduate minor may be able to apply certain courses in those program curricula as MSW electives.		9
Total Credits		39

¹ A student must receive a grade of B or higher in practicum courses (SOWK 8400 and SOWK 8410).

² This course requires special planning with the department. Students must go through the planning process one semester prior to the start of the course. No planning happens in the summer term.

³ This course is a continuation of SOWK 8400. If a new placement is necessary, students may be required to go through the original planning process again.

Exit Requirement

Satisfactory completion with a grade of B or better in SOWK 8400 and SOWK 8410

Academic Policies and Standards

- The MSW Student Handbook can be found here (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/social-work/student-resources/>).

Social Work, MSW and Criminology and Criminal Justice, MS (MSW/CRCJ)

The MSW and Master of Science in criminology and criminal justice (MSW/CRCJMS) dual degree program is a collaborative effort between the University of Nebraska at Omaha, Grace Abbott School of Social Work and the School of Criminology and Criminal Justice. The MSW/CRCJMS offers interdisciplinary preparation in the fields of social work and criminal justice leading to the master of social work and the master of criminal justice degrees, with fewer required credit hours than it would take to obtain these degrees independently.

This dual degree program prepares students to provide a range of advanced social work services for individuals, families, groups, organizations, and communities and assume leadership in the field of criminal justice and social work. Graduates with a dual MSW/CRCJMS are prepared to respond to the needs of the community by working with delinquent and criminal populations and the systems that impact these populations.

Students beginning the MSW/CRCJMS program at the MSW Generalist level must complete 81 credit hours total. Students beginning the MSW/

CRCJMS program at the Advanced Generalist level, must complete 57 credit hours total.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: November 1
 - Generalist MSW/MSCRJ students (those who do not have an undergraduate degree in social work, BSSW) admitted for the spring term are limited to only the MSCRCJ coursework in spring and summer terms. The MSW coursework will be added in the fall term.
 - Advanced Generalist MSW/MSCRJ students (those with an undergraduate degree in social work, BSSW) can begin both MSCRCJ and MSW coursework in the spring term.
- Fall 2026: The priority deadline is February 1. Applications will be accepted through March 1.
 - Students who have earned or will be earning any undergraduate degree may apply for fall admission.
 - Students admitted as either Foundation MSW/MSCRJ or Advanced MSW/MSCRJ can begin both MSW and MSCRCJ coursework in the fall term.

Other Requirements

- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Statement of Purpose:** The statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, in no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not

clearly and directly address each of the items or does not follow the instructions, it may not be considered.

- Why have you chosen social work?
 - Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.
- What type of work are you planning to engage with once you attain your MSW degree?
 - Specifically, what are the issues, populations, and levels of practice you hope to work with after graduate school?
- The social work profession is rooted in improving the lives of others. Social workers adopt a stance of humility and strive towards cultural awareness.
 - Discuss a time when you realized that your personal experience influenced your reaction to a situation.
 - Reflecting on that experience, how might it influence your future social work practice?
- Social workers are self-reflective, strengths-based, and growth-oriented.
 - Identify a strength that you possess and an area for growth.
 - Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.
- Social work is a values-based profession dedicated to enhancing human wellbeing. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>):
 - Identify and discuss one that resonates with you.
 - Identify and discuss one that may challenge you.
- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
 - Educational and occupational experiences since high school
 - List start and end dates with month and year
 - Identify whether the position is part or full-time
 - Identify whether the position is paid or volunteer
 - Field placements, internships or practicums
 - Honors or distinctions received
- **Letters of Recommendation:** Three letters of recommendation are required, the recommendation requests are generated from your online application. These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.
 - If transferring from another accredited MSW program, one letter must be from a current faculty member associated with that program.
- The MS application for criminology and criminal justice is completed online adhering to the same admission criteria for the MSW degree. The personal statement and letters of recommendation for admission to the MSW degree will be used by the School of Criminology and Criminal Justice to admit students.
- An undergraduate cumulative GPA of 2.7 or higher is required to be considered for admission.

The MSW/MSCRCJ **Generalist Program** is a 81 credit hour program available to applicants who do **not** hold a BSSW degree from an accredited school of social work within the last 10 years.

The MSW/MSCRCJ **Advanced Generalist Program** is a 57 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

CRCJ 8080	SEMINAR IN JUVENILE JUSTICE ⁴	
Criminology and Criminal Justice Electives		
Select six hours of CRCJ graduate courses.		6
Total Credits		57

- ¹ A student must receive a grade of "B" or higher in practicum courses (SOWK 8400 and SOWK 8410).
- ² This course requires special planning with the department. Students must go through the planning process one semester prior to the start of the course. No planning happens in the summer term.
- ³ This course is a continuation of SOWK 8400. If a new placement is necessary, students may be required to go through the original planning process again.
- ⁴ Courses not selected from among the three listed may be used as an elective.

Exit Requirements

- CRCJ 8970 capstone course is offered in the fall and spring semesters. Once all required coursework has been completed, the student can register to take the capstone course. The course will require students to engage in a problem-solving project involving group work, which culminates in a written report and oral presentation.
- Satisfactory completion with a grade of B or better in SOWK 8400 and SOWK 8410

Academic Policies and Standards

- The MSW Student Handbook can be found here (<https://www.unomaha.edu/college-of-public-affairs-and-community-service/social-work/student-resources/>).

Public Administration, MPA and Social Work, MSW (MPA/MSW)

The MPA/MSW dual degree program is a collaborative effort between the University of Nebraska at Omaha (UNO), Grace Abbott School of Social Work and the School of Public Administration. This program offers interdisciplinary preparation in the fields of social work and public administration leading to the master of social work and the master of public administration degrees, with fewer required credit hours than it would take to obtain these degrees independently.

The program prepares students to provide a variety of advanced level micro, mezzo, and macro social work services to individuals, families, groups, organizations, and communities; and assume leadership in the public service sector, specifically in administrative and policy work with governmental units and nonprofit organizations.

Students beginning the MPA/MSW program at the MSW Foundation level must complete 81 credit hours total. Students beginning the MPA/MSW

program at the Advanced Standing level must complete 57 credit hours total.

- Master's level social workers are employed in public and private agencies, including medical settings, schools, residential treatment centers, court and correctional agencies, and community planning and development agencies.
- The MSW degree at the Grace Abbott School of Social Work is accredited by the Council on Social Work Education (CSWE), the national accrediting body for all social work education.
- Information on certification and licensure is available on the Nebraska Department of Health and Human Services website (<http://dhhs.ne.gov/Pages/default.aspx>).

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026:** November 1
 - Foundation MPA/MSW students (those who do not have an undergraduate degree in social work, BSSW) admitted for the spring term are limited to only the MPA coursework in spring and summer terms. The MSW coursework will be added in the fall term.
 - Advanced MPA/MSW students (those with an undergraduate degree in social work, BSSW) can begin both MPA and MSW coursework in the spring term.
- Fall 2026:** The priority deadline is February 1. Applications will be accepted through March 1.
 - Students who have earned or will be earning any undergraduate degree may apply for fall admission.
 - Students admitted as either Generalist MPA/MSW or Advanced Generalist MPA/MSW can begin both MSW and MPA coursework in the fall term.

Note: If admitted to the Master of Social Work program and you wish to become a dual degree MSW/MPA student you will need to adhere to the MPA deadline date which is June 1(fall) or October 1(spring).

Other Requirements

- The general prerequisite for admission to the program is a four-year bachelors' degree with a minimum of a 3.0 GPA (on a 4.0 scale) in the junior and senior years (last 50-60 hours).
- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country

on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL, 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** Two statements of purpose are required; one for the School of Public Administration and one for the Grace Abbott School of Social Work
 - For social work, the statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, in no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.
 - Why have you chosen social work?
 - Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.
 - What type of work are you planning to engage with once you attain your MSW degree?
 - Specifically, what are the issues, populations, and levels of practice you hope to work with after graduate school?
 - The social work profession is rooted in improving the lives of others. Social workers adopt a stance of humility and strive towards cultural awareness.
 - Discuss a time when you realized that your personal experience influenced your reaction to a situation.
 - Reflecting on that experience, how might it influence your future social work practice?
 - Social workers are self-reflective, strengths-based, and growth-oriented.
 - Identify a strength that you possess and an area for growth.
 - Discuss how you became aware of these, how they show up in your current professional practice, and how they may influence your future professional practice.
 - Social work is a values-based profession dedicated to enhancing human wellbeing. From the core values and ethical principles identified in the NASW Code of Ethics (<https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English/>):
 - Identify and discuss one that resonates with you.
 - Identify and discuss one that may challenge you.
 - For public administration, the essay should answer the following questions:
 - Please tell us about the factors in your background that will help us understand your interest in a profession in the public or nonprofit sectors.
 - What are your professional goals? Ten years from now, what do you hope to be doing professionally?
 - How can this dual degree from UNO help you achieve these goals?
- **Resume:** Applicants are highly encouraged to have professional experience in the human service field. Please submit a professional resume that identifies:
 - Educational and occupational experiences since high school
 - List start and end dates with month and year
 - Identify whether the position is part or full-time
 - Identify whether the position is paid or volunteer
 - Field placements, internships or practicums
 - Honors or distinctions received

- **Letters of Recommendation:** Three letters of recommendation are required. Recommendation requests are generated from your online application. The recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past three years, at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.
- An undergraduate cumulative GPA of 2.7 or higher is required to be considered for admission.

The MSW Generalist Program is a 63 credit hour program available to applicants who do **not** hold a BSSW degree from an accredited school of social work.

The MPA/MSW Advanced Generalist Program is a 57 credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work within the last 10 years.

Social Work, MSW and Public Health, MPH (MSW/MPH)

The MSW/MPH dual degree program is a collaborative effort between the University of Nebraska Medical Center, College of Public Health, and the University of Nebraska at Omaha, Grace Abbott School of Social Work. This program offers interdisciplinary preparation in the fields of social work and

public health leading to the master of social work and the master of public health degrees, with fewer required credit hours than it would take to obtain these degrees independently.

This dual degree program prepares students to provide a variety of advanced social work services with individuals, families, groups, organizations, and communities. This dual degree also allows graduates to assume leadership in the public health sector to promote and protect physical and mental health, with a focus on population-based services, prevention, collaboration, and strategies and policies grounded in basic science.

Students beginning the MSW/MPH program at the MSW Generalist level must complete 78 credit hours total. Students beginning the MSW/MPH program at the Advanced Generalist level, must complete 54 credit hours total.

- Master's-level social workers are employed in public and private agencies, including medical settings, schools, residential treatment centers, court and correctional agencies, and community planning and development agencies.
- The MSW degree at the Grace Abbott School of Social Work is accredited by the Council on Social Work Education (CSWE), the national accrediting body for all social work education.
- Information on certification and licensure is available on the Nebraska Department of Health and Human Services' website (<http://dhhs.ne.gov/Pages/default.aspx>).

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Fall 2026:
 - MSW- The priority deadline is February 1. Applications will be accepted through March 1.
 - MPH- June 1
- The MPH application is completed online (<http://www.unmc.edu/publichealth/admissions/mphdualdegree/mph-msw.html>) through the College of Public Health at the University of Nebraska Medical Center.
 - The MSW Admissions Committee decides on admission to the MSW program; the MPH Admissions Committee decides on admission to the MPH program. A student not admitted to both programs may pursue the other degree if admitted.

MSW Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

- **Statement of Purpose:** The statement of purpose is an opportunity to demonstrate your understanding of and fit for the social work profession, as well as your aptitude for graduate-level social work education. The Admissions Committee pays close attention to both content and writing skills. In your statement of purpose, please address each of the items listed below, in no more than five (5) pages, double-spaced, in a 12-point font. Your response to each of the items should be roughly the same length. If your statement of purpose does not clearly and directly address each of the items or does not follow the instructions, it may not be considered.

- Why have you chosen social work?
 - Your response should demonstrate a basic understanding of the social work profession, including what distinguishes it from other helping professions.
- What type of work are you planning to engage with once you attain your MSW degree?

These recommendations should be from professional and academic sources who are directly familiar with your skills and experience. At least one reference should be from an immediate professional supervisor. If you have graduated from an academic program within the past two years, it is suggested that at least one reference should be from a faculty member who can speak directly to your academic preparation for graduate social work education. References from family members, family friends, personal friends, personal therapists, or other non-professional/academic sources will not be scored.
 - If transferring from another accredited MSW program, one letter must be from a current faculty member associated with that program.

- An undergraduate cumulative GPA of 2.7 or higher is required to be considered for admission.

The MSW/MPH Generalist Program is a 78-credit hour program available to applicants who do not hold a BSSW degree from an accredited school of social work.

The MSW/MPH Advanced Generalist Program is a 54-credit hour program available to applicants who have earned a BSSW degree from an accredited school of social work.

MSW/MPH dual degree students are expected to work closely with both their MSW advisor through UNO and MPH advisor through UNMC to ensure that all course requirements and exit requirements are met for each degree.

Sociology

Degree Programs Offered

- Sociology, MA (p. 1206)

Certificate Programs Offered

- Sociology, Graduate Certificate (p. 1208)

Sociology, MA

The MA in sociology offers students the opportunity to use social science theories and methods in applied settings with the goal of solving social problems. The program is constructed around a core set of seminars, including an introductory course on applied sociology and anthropology as well as a capstone experience. Required core and elective courses focus on the application of concepts, theories and methodologies of sociology and anthropology in applied or community engaged research. Students who complete this degree are prepared for careers in social advocacy, research, teaching, human or social services, and work in nonprofit, for profit, and government organizations. The degree is flexible and interdisciplinary and can be completed in two years.

Fast Track Program

The Department of Sociology & Anthropology has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine (9) graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing a BA/BS in sociology who are desiring to pursue an MA in sociology.
- Students must have completed no less than 60 undergraduate hours.
- Students must have a minimum undergraduate GPA of 3.0 and a GPA of 3.3 in SOC and ANTH courses.
- Students must complete the Fast Track Approval form, obtain all signatures, and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses.
 - ANTH 1050, SOC 1010, SOC 2120, SOC 2130, SOC 2134 should be completed before enrolling in the first graduate course.
 - SOC 3510 and SOC 3514 should be taken before or concurrently with enrollment in the first graduate course.
- A minimum cumulative GPA of 3.0 is required for graduate coursework to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status, including financial aid.
- Near the end of the undergraduate program, formal application to the graduate program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
- Admission to Fast Track does NOT guarantee admission to the graduate program.
- The admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- **Spring 2026 and Fall 2026:** Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

If you are applying for a **graduate assistantship**, both admissions and assistantship application materials should be completed by **February 15** (for Fall Semester). Review of materials begins soon after February 15 and continues until the graduate assistantship position is filled.

Other Requirements

- Baccalaureate degree or previous master's degree with a minimum 3.0 GPA.
- Applicants for admission to the graduate program in sociology should present a minimum of 15 undergraduate credit hours in the following social science courses:
 - Statistics, research methods, and social theory
 - A minimum of six additional hours of sociology or other social science courses
- Undergraduate courses in statistics, research methods, and social theory are required before the student can enroll in the graduate courses in the same areas.
 - Students without the specific prerequisite courses may be admitted provisionally, but deficiencies should be removed in the first year of graduate study.
 - All prerequisite courses must be passed with a grade of "B" (3.0 on a 4.0 scale) or better.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80 (no sub-score under 15), IELTS: 6.5, PTE: 53, Duolingo: 110
 - Passing with a minimum score does not guarantee admission into the program.
- **Statement of Purpose:** Outline your career goals, why a graduate degree in Sociology will help you attain these goals, and why the UNO MA in sociology is a good fit. Make sure your statement includes the following components:
 - Discuss how your academic goals fit into the Department of Sociology & Anthropology's strengths and areas of research.
 - Detail your research interests and how these interests are sociological.
 - Provide a brief (1-2 paragraph) personal statement regarding the development of your academic interest in Sociology.
- **Writing Sample:** Submission of an academic, research-based writing sample. The sample must be written in English, include citations, and be a minimum of five pages in length. This writing sample can be a previous assignment. If no such paper exists, the applicant should contact the graduate program chair for an alternative assignment.
- **Resume:** The resume should highlight the education and employment experiences that are especially relevant to graduate work in sociology.
- **Optional:** One letter of recommendation from a reference who can evaluate your work and/or academic achievements.
- GRE scores are not required for admission; however, students are welcome to submit them.

SOC 8040	APPLIED DATA ANALYSIS & INTERPRETATION	3
SOC 8070	APPLIED THEORY	3
SOC 8970	CAPSTONE IN APPLIED SOCIOLOGY & ANTHROPOLOGY	3

Electives**15**

Elective courses will be chosen in consultation with the GPC and/or your advisor. The department offers a rotating selection of elective courses based on faculty specialty areas. Students may take up to nine hours outside of sociology. All outside courses must be relevant to the student's interest area within sociology and should be approved by the GPC and/or advisor.

Special Note

Students who were undergraduate students at UNO cannot take a dual-listed course at the graduate level if they have already taken the course at the undergraduate level.

Total Credits**30****Exit Requirement**

Satisfactory completion of SOC 8970

Sociology Certificate

The graduate certificate in sociology is a flexible 18 credit hour program. It is ideal for educators and other degree-holding professionals who want to enhance their sociological knowledge and gain insight into our present-day world. It is designed to meet the needs of:

- High school educators who seek credentials to teach dual enrollment in sociology and are required to have 18 graduate credit hours in the discipline to be eligible;
- Part-time and full-time UNO graduate students in related fields;
- Professionals, especially those employed in social services and non-profits who engage in research/evaluation, who strive to complement and expand their knowledge of social inequality and its implications.###

This certificate can be earned independently of the MA in sociology or in conjunction with it.

Admissions

General Application Requirements and Admission Criteria (<https://catalog.unomaha.edu/graduate/admission/>)

Application Deadlines

- **Spring 2026 and Fall 2026:** Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- BA or MA with an overall GPA of 3.0
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum

language proficiency score requirement in order to be considered for admission.

- Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Writing Sample:** Provide an academic-style writing sample, approximately 5pp in length

Special Education

Degree Programs Offered

- Special Education, MS (p. 1208)

Certificate Offered

- Dyslexia Specialist Certificate (p. 1211)

Special Education, MS

The mission of the Special Education and Communication Disorders Department (SECD) is to prepare dedicated practitioners, reflective scholars, and responsible citizens to facilitate, design, implement, and evaluate programs to support people with varying abilities in educational settings and the community across the lifespan. Our candidates develop essential interpersonal skills that enable them to become valued members of collaborative, interdisciplinary teams.

SECD accomplishes this mission by creating opportunities for the acquisition and maintenance of knowledge and skills, aligned with the Council for Exceptional Children, the Council on Academic Accreditation in Audiology and Speech-Language Pathology (for graduate program only), and state and federal regulations.

Program Related Information

unosecd@unomaha.edu

Program Website (<https://www.unomaha.edu/college-of-education-health-and-human-sciences/special-education-communication-disorders/graduate/special-education.php>)

Other Program Related Information

Candidates seeking a master's degree in special education must meet the criteria for admission to the Graduate College and the department. Graduate-level hours taken as a non-degree student may be subsequently included in a program of study at the discretion of the graduate program committee and the dean for graduate studies. The department adheres to all restrictions on non-degree students. No student with non-degree status may enroll in a practicum course. Candidates completing the

degree program meet the academic requirements for PK-6, K-6 or 7-12 endorsement by the Nebraska Department of Education. Candidates may complete practicum experiences at both the K-6 and 7-12 levels. One of these practicum experiences may be completed in the candidate's classroom. The other must be completed outside the candidate's classroom.

Initial Certification

The accelerated special education concentration (AC-SEP) is an accelerated program that is designed for individuals with a baccalaureate degree or higher who wish to earn an Initial Teaching Certificate issued by the Nebraska Department of Education to teach special education (K-6 or 7-12). Students who successfully complete the qualifications MS in special education with the accelerated special education concentration will be eligible for Nebraska certification in special education.

Initial certification requires completion of 100 hours of practicum experience.

Unclassified Students

Students who are not planning to pursue a program leading to a graduate certificate or a master's degree can be admitted to the special education program as unclassified students. Candidates holding a previous master's degree in education who are seeking additional teaching endorsements may wish to choose an unclassified status. Unclassified students are allowed to take courses for which they meet the prerequisite. Successful completion of graduate courses as an unclassified student does not obligate the department to accept those courses for credit toward the fulfillment of degree requirements. Formal advisement in an endorsement area is required.

Praxis II Content Test Information

All candidates seeking an endorsement in special education (special education generalist, 33-hour behavior intervention specialist and accelerated SPED) for the first time, are required to receive a passing score on the Praxis II content test in each endorsement area of their preparation prior to the endorsement being recommended. This link (<http://www.ets.org/praxis/ne/requirements/>) will take you to the ETS website page for the Nebraska Department of Education requirements, which lists the Nebraska requirements for each endorsement area.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: December 1
- Summer 2026: May 1
- Fall 2026: August 1

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** Include a formal written statement, at least one page in length, of why you want to pursue a master's degree in special education. Explain your current job/position, career goals and additional experiences with individuals with disabilities.
- **Letters of Recommendation:** Two letters of professional/academic recommendation are required. These recommenders should be able to speak to the graduate's undergraduate academic work, the

applicant's potential to do graduate work, and/or the applicant's professional competence.

- Copy of teaching certificate (except for the Accelerated Program for Special Education concentration)
- All candidates must have completed TED 2300 Human Growth and Learning, SPED 1500 Introduction to Special Education or SPED 8030 Teaching Students with Exceptionalities (or an equivalent to any of these), and methods courses in reading and math.

Degree Requirements

Code	Title	Credits
Concentration		
Select an area of concentration:		
	Accelerated Program for Special Education	
	Behavior Intervention Specialist	
	Dyslexia Specialist	
	Special Education Generalist	

Exit Requirements

Once course work is completed candidates must successfully pass a comprehensive examination or write a thesis to receive a Master of Science degree.

Code	Title	Credits
	Comprehensive Examination	
SPED 8990	THESIS	6

All candidates should carefully review the Graduate College requirements for forming the supervisory committee, Thesis/Thesis Equivalent Proposal Approval forms and final approval and submission of the thesis.

All candidates must complete 6 credit hours in SPED 8990 in order to receive a Master's of Science degree in special education.

Graduate-Level Practicums

All candidates must obtain the permission of their academic advisor prior to applying for and registering for practicums. All candidates who are adding an endorsement must complete one (or more) practicum experience(s) as part of their preparation. At least one of these experiences must be an all-day, 16-week experience in the endorsement area. **Applications will not be considered unless all materials are submitted by September 15 for spring practicum and February 1 for fall practicum.**

The department will issue a permit that allows the candidate to enroll in the appropriate practicum course. It is the candidate's responsibility to apply for the proper course. Professional seminars are required as part of the experience and attendance is mandatory.

Candidates may be removed from their placement at the request of the candidate, department, or school district/community agency.

Academic Performance

A student can enroll only twice in each graduate course included on a plan of study. If the course is not successfully completed on the second attempt, the student will be dismissed from the program. An enrollment is defined as being enrolled in the course after the last day to withdraw via MavLINK and receive a 100% refund. The last day to withdraw will be stated in the current academic calendar. (<https://www.unomaha.edu/registrar/academic-calendar.php>) In addition to the Quality of Work Standards established by the Graduate College, students may only repeat a graduate level course on a plan of study one time in which they receive any grade, including "W" or "I".

Dyslexia Specialist Certificate

This graduate certificate program aims to provide advanced training on dyslexia. The scope of this certificate program will provide students with a combination of advanced content and pedagogical knowledge about dyslexia and the science of reading, as well as supervised application opportunities during a practicum experience. This program will also support interested participants in preparing their application for national certification from the Center for Effective Reading Instruction (CERI).

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Fall 2026: April 1

Other Requirements

- English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- Statement of Purpose:** Include a formal written statement, at least one page in length, explaining why you want to obtain the dyslexia specialist certificate. Provide information regarding your current job/position, career goals and additional experiences with individuals with disabilities.

This certificate program is a 15-credit hour program with a set course sequence. There will be an option for a subset of students interested in applying for national certification to take one additional 3 credit hour practicum course to fulfill national certification standards. Students will take all courses in a prescribed sequence designed to introduce, scaffold, and reinforce content knowledge across courses. The scope and sequence of the program, and all course objectives, have been designed to align with the *Knowledge and Practice Standards for Teachers of Reading* published by the International Dyslexia Association.

Program Website (<https://www.unomaha.edu/college-of-education-health-and-human-sciences/special-education-communication-disorders/graduate/speech-language-pathology.php>)

Program Description

The Master of Science (MS) education program in speech-language pathology (residential) at the University of Nebraska at Omaha is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (<https://caa.asha.org/>) (CAA) of the American Speech-Language-Hearing Association (<https://www.asha.org/>). The next accreditation will be in 2028.

Contact information for the accrediting body:
Council on Academic Accreditation in Audiology and Speech-Language Pathology
American Speech-Language Hearing Association
2200 Research Boulevard #310
Rockville, MD 20850
Phone: 800.498.2071

The program also is accredited by the Nebraska Department of Education. The University of Nebraska at Omaha is authorized and in good standing with Nebraska's Coordinating Commission for Postsecondary Education (CCPE) to provide the Master of Science in Speech-Language Pathology program.

The graduate program in speech-language pathology is designed to prepare speech-language pathologists for Nebraska teacher certification, state licensure, and certification by the American Speech-Language-Hearing Association.

Fast Track Program

The Department of Special Education and Communication Disorders has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to six (6) graduate hours toward the completion of their undergraduate program as well as the graduate program.

Program Specifics:

- This program is available for undergraduate students pursuing a Bachelor of Science in Education in communication disorders desiring to pursue a MS in speech-language pathology (SLP) at UNO.
- Students must submit the departmental application to be considered for the Fast Track program.
 - Complete the department application in March of the junior year (no less than 60 undergraduate hours). Application requirements are:
 - Successfully completed CDIS 2420, CDIS 2550, CDIS 2380, CDIS 3390, CDIS 3450, CDIS 3460, CDIS 3370 with a grade of B or better
 - 3.5 undergraduate GPA
 - Resume
 - Statement of Purpose (Please include the following in your response: Your aptitude and motivation for graduate study in speech-language pathology; your preparation for this field of study; your viewpoint on the value of diversity, equity, and inclusion in the field of speech-language pathology; your academic plans or research interests; and why would UNO be a good intellectual fit for you?)
- If the departmental application is approved, students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course.
- Students will work with their undergraduate advisor to register for the graduate courses (for a total of six [6] graduate credit hours).
 - During the fall semester of the senior year, students will register for CDIS 8310 and CDIS 8560
 - During the spring semester of the senior year, students will register for CDIS 8420
- A minimum cumulative GPA of 3.0 is required for the graduate course work to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all the rights and privileges granted undergraduate status including financial aid.
- Formal application to the graduate program is required by January 15 of the student's senior year. The application fee will be waived, the applicant must contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does not guarantee admission to the graduate program.
 - Fast Track students must successfully complete their undergraduate BS degree with a minimum cumulative GPA of 3.5 and all graduate courses with a minimum of 3.0 or better, be in good standing, and complete formal graduate admission application to be considered for full admission into the speech-language pathology graduate program.
 - The official admit term must be after the completion term of the undergraduate degree.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Fall 2026: January 15 for all application materials

Other Requirements

- A bachelor's degree in speech-language pathology or communication disorders; or if bachelor's degree in another field, must have completed the following courses in communication disorders:

Code	Title	Credits
CDIS 2420	EARLY LANGUAGE DEVELOPMENT IN CHILDREN	

CDIS 4750	INTRODUCTION TO CHILDHOOD LANGUAGE DISORDERS
CDIS 3450	PHONETICS
CDIS 3430	ARTICULATION AND PHONOLOGICAL DISORDERS
CDIS 3370	BASIC AUDIOLOGY
CDIS 3330	AURAL REHABILITATION
CDIS 4490	INTRODUCTION TO PROFESSIONAL PRACTICES
CDIS 4500	PRINCIPLES OF ASSESSMENT AND INTERVENTION
CDIS 2380	ANATOMY AND PHYSIOLOGY OF THE SPEECH MECHANISM
CDIS 4470	NEUROPHYSIOLOGY OF SPEECH AND LANGUAGE
CDIS 4480	RESEARCH METHODS IN COMMUNICATION DISORDERS

Chemistry or physics, statistics, biological sciences (e.g., biology, human anatomy or physiology), social/behavioral sciences (e.g., psychology, sociology, anthropology or public health) courses.

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>), must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110
- **Statement of Purpose:** Address the following (not to exceed two pages):
 - Please describe your aptitude and motivation for graduate study in speech-language pathology.
 - Your preparation for this field of study.
 - Your academic plans or research interests.
 - Why would UNO be a good intellectual fit for you?
- **Letters of Recommendation:** Two letters from references who are familiar with your strengths and weaknesses in respect to academic/clinical work, and motivation to complete a graduate degree in speech-language pathology. Ensure recommenders are competent to judge your probability of success in graduate school for speech-language pathology.
- **Resume**
- The program may conduct applicant interviews.

Degree Requirements

- In addition to satisfactory academic and clinical aptitude, candidates are expected to demonstrate Core Functions. These skills include academic and non-academic components necessary for graduate study and professional practice. Candidates must demonstrate skills and attributes in six areas: communication, motor, sensory, intellectual-cognitive, interpersonal, and cultural responsiveness. These core functions enable candidates to meet graduate and professional requirements as measured by state licensure and national certification. Candidates will review the Core Functions during orientation, mid-term of first semester and then on an as needed basis. (Council of Academic Programs in Communication and Sciences and Disorders, 2023).
- Candidates must successfully complete the following within the **first 30 days** of enrollment:
 - A background check and Nebraska Adult and Child Abuse & Neglect Registry Release prior to enrollment and prior to each clinical field placement (externship). The background check must be conducted in the time frame and by the vendor determined by the College of Education, Health, and Human Sciences. The candidate is responsible for the costs associated.
 - A ten-panel drug screen prior to medical clinical field placement (externship). The drug screen must be completed in the time frame established by the program and results must be submitted directly to the program. The candidate is responsible for the costs associated.
 - Academic integrity is expected for all interactions and requirements. This includes, but is not limited to: original work on exams, accountability and completion of requirements, maintenance of confidentiality for individuals and class discussions when appropriate, and accurate citation for original work. Plagiarism will result in an automatic failing grade for the assignment. Please refer to the UNO Academic Integrity Policy for more specific descriptions of academic integrity violations.
 - Each candidate must take the Praxis II - Subject Assessment test. Scores must be submitted prior to applying for graduation. Scores must be sent to UNO directly from ETS, using code RA0174.

Code	Title	Credits

SPED 8980/ TED 8850	PROFESSIONAL COLLABORATION
CDIS 8556	SPECIAL NEEDS STUDENTS FROM DIVERSE COMMUNITIES
SPED 8820	CHARACTERISTICS OF EMOTIONAL AND BEHAVIORAL DISORDERS
SPED 8900	SPECIAL EDUCATION LAW
GERO/PSYC 8476	MENTAL HEALTH AND AGING
GERO 8506	LEGAL ASPECTS OF AGING
GERO 8676	PROGRAMS AND SERVICES FOR OLDER ADULTS
GERO 8696/ SOWK 8046	AGING AND DIVERSITY

Total Credits**47**¹ CDIS 8500 (register three times)² CDIS 8510 (Schools). Placements for this practicum are made as space permits.³ CDIS 8520 (Hospitals; Rehabilitation Centers). Placements for this practicum are made as space permits.⁴ CDIS 8510 and CDIS 8520 each will be taken once for four credit hours each. Students must earn a grade of "B" or better in each of these courses, as students may not retake either course. Failure to achieve a grade of "B" or better in either course will result in automatic dismissal from the program. Withdrawal from 8510 or 8520 is contingent upon written permission of the advisor and current grade of B or better at the time of requested withdrawal. These varied practica are designed to provide the candidate with a wide range of clinical experiences with individuals across the age span, cultural backgrounds, cognitive levels, and disability categories.****All student clinicians need to earn a B or higher in order to pass externships. Externships may not be retaken.**

Exit Requirements

- Complete a minimum of 400 clinical clock hours.
- Successfully complete the Clinical Cumulative Evaluation.
- Completion of the Praxis II exam.

Non-Thesis Option

- Successfully complete the comprehensive exam.

Thesis Option

- Complete 6 credit hours of SPED 8990

Intervention Policy for Content and Clinicals

Every course/clinic assignment in the speech-language pathology program is connected to the Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC) along with the Council on Academic Accreditation Standards (CAA). CFCC and CAA standards are found in each course syllabus and must be successfully met for the course to count toward certification by the American Speech-Language-Hearing Association

(ASHA). Please refer to ASHA's website for more information on CFCC and CAA standards (links below).

Urban Studies, MS

Our graduates are social entrepreneurs, urban thinkers and agents of change. The Master of Science in urban studies is the degree for individuals desiring to make a difference in urban areas. UNO's urban studies program is a professional degree that trains leaders to critically analyze urban problems and engage residents in the creation of innovative solutions to conditions in the human community, built environment and natural systems.

Fast Track Program

The Master of Science in urban studies program has developed a Fast Track program for highly qualified and motivated students providing the opportunity to complete a bachelor's degree and a master's degree in an accelerated time frame. With Fast Track, students may count up to nine (9) graduate hours toward the completion of their undergraduate program as well as the graduate degree program.

Program Specifics:

- This program is available for undergraduate students pursuing any of the following who wish to pursue a MS in urban studies:
 - BS in emergency management
 - BS in black studies
 - Bachelor of Multidisciplinary Studies.
- Students must be within at least 30 undergraduate credits yet to complete their undergraduate degree. Exceptional students who do not meet this requirement may be considered.
- Students must have a minimum undergraduate GPA of 3.5.

- Students must complete the Fast Track Approval form and obtain all signatures and submit to the Office of Graduate Studies prior to first enrollment in a graduate course
- Students will work with their undergraduate advisor to register for the graduate courses.
- Students must consult with the urban studies advisor prior to enrollment in one of the courses listed below.
- A minimum cumulative GPA of 3.5 is required to remain in good standing.
- Students remain undergraduates until they meet all the requirements for the undergraduate degree and are eligible for all rights and privileges granted undergraduate status including financial aid.
- Near the end of the undergraduate program, formal application to the MS in urban studies program is required. The application fee will be waived, the applicant will need to contact the Office of Graduate Studies for a fee waiver code.
 - Admission to Fast Track does NOT guarantee admission to the graduate program.
 - For this program, if students maintain at least a grade of B+ in courses taken, they will be recommended for admission to the MS in urban studies.
 - The admit term must be after the completion term of the undergraduate degree.

The following courses may be taken under the Fast Track program

- BLST 8886:Seminar on Black Leadership
- UBNS 8000:Seminar in Urban Studies
- UBNS 8060:Introduction to Urban Planning
- UBNS 8020:Race, Ethnicity and American Urban Culture**
- UBNS 8200:Community Organizing and Development**
 - PA 8010:The Public Economy (Must have completed or be concurrently enrolled in UBNS 8000)

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

Spring 2026, Summer 2026, and Fall 2026: Applications for this program are accepted on a rolling basis. All materials must be submitted prior to the beginning of the semester in which the student has elected to begin coursework.

Other Requirements

- The general prerequisite for admission to the urban studies program is a four-year bachelors' degree with a minimum grade point average of 3.0 in the junior and senior years combined (last 50-60 credit hours). Under extenuating circumstances an average below 3.0 will be considered.
- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States, **OR** a baccalaureate or other advanced degree from a pre-determined country on the waiver list, must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

- **Statement of Purpose:** A two-page typed essay on how the MS in urban studies will further the applicant's career objectives must be included with the application for admission

- **Resume**

Electives		
Urban studies (UBNS) is an interdisciplinary field. The UBNS strives to expose students to courses taught by faculty in the School of Public Administration who have expertise in urban studies, as well as faculty in other academic units. Students select five elective courses with the approval of the UBNS chair from the following list based on interests in the human community, built environment or natural systems. This is subject to change depending on course availability, and prospective as well as current students should check the program's website periodically for updates approved by the director of urban studies. Electives are intended to give students knowledge and skills that prepare them to manage projects and organizations. Electives currently include, but are not limited to the following:		15
PA 8030	INTERNSHIP IN PUBLIC ADMINISTRATION (Students who have not had at least two years full-time professional experience in the public or nonprofit sector (experience must have been in the sector of the student's primary future career interest) are highly encouraged to complete an internship. The internship is taken following completion of preparatory coursework as determined by the director of the urban studies program.)

Internship

Students who have not had at least two years full-time professional experience in the public or nonprofit sector (experience must have been in the sector of the student's primary future career interest) are encouraged to complete an internship. The internship may be given as a supervised course of three credit hours as part of the 37 hours required in the urban studies program. The internship is taken following completion of preparatory coursework as determined by the director of the urban studies program.

Urban Leadership Certificate

The graduate certificate in urban leadership is an interdisciplinary certificate program that provides current and future urban leaders with the skills and training necessary to lead and communicate in diverse urban settings effectively and ethically.

World Languages and Literature

Certificate Programs Offered

- French Certificate (p. 1216)
- Spanish Certificate (p. 1217)
- Teaching Spanish to Heritage/Bilingual Learners Certificate (p. 1218)

French Certificate

The graduate certificate in French provides students with intensive language proficiency training in the target language through six courses (18 credits) in French/Francophone cultures and literatures. Students interested in language teaching can also meet course requirements with up to six credits in language teaching pedagogy courses.

The graduate certificate in French is designed for individuals wishing to improve their overall proficiency in French, as well as those interested in pursuing additional graduate credits so they can be accredited to teach courses for the dual-enrollment programs at UNO or at other metropolitan and regional universities.

Spanish Certificate

The graduate certificate in Spanish provides students with the opportunity to earn a certificate degree after successful completion of 18 credit hours of intensive language proficiency training in Spanish. The program includes

courses in Hispanic cultures, literature, linguistics, and, for those students interested in language teaching, language teaching pedagogy.

The graduate certificate in Spanish presents a rigorous language program that seeks to serve these student populations: (a) High school faculty interested in teaching dual-enrollment classes and who are required to have 18 graduate credit hours in their discipline to be eligible. (b) Bilingual instructors who support dual language and world language programs. (c) Individuals in various fields (e.g., law enforcement, social work, psychological services, healthcare) who work with Spanish-speaking individuals.

Teaching Spanish to Heritage/Bilingual Learners Certificate

A graduate certificate in teaching Spanish to heritage/bilingual learners will provide students with the opportunity to earn a graduate certificate after completion of 18 credit hours. Courses will focus on the study of sociolinguistic and pedagogical (theory and practice) subjects relevant to the intricacies and challenges of teaching Spanish to bilingual learners (children who are bilingual) and heritage learners (bilingual adults).

Writing, MFA

The MFA in writing is a two-year program of focused instruction for creative writers who are committed to a literary career. The program comprises four 16-week distance writing seminars and five 10-day, conference-style Nebraska residency sessions. The seminars and residencies are integrated to help those who need to hone their writing and critical thinking in order to participate competitively in the wider domain of contemporary American letters. In a two-year course of study, the student earns 60 credit hours toward a Masters of Fine Arts degree in one of six genres: fiction, creative nonfiction, poetry, young adult, playwriting, or screenwriting.

Program Related Information

221 Weber Fine Arts Building (WFAB)
402.554.5987
kclouter@unomaha.edu

Program Website (<http://www.unomaha.edu/unmfaw/>)

Other Program Related Information

- The MFA in writing is low-residency.
- Upon acceptance, a \$500 non-refundable deposit is required to hold the student's place in the program. This deposit is applied toward the first residency's meals and lodging fee.

Admissions

General Application Requirements and Admission Criteria (p. 972)

Application Deadlines

- Spring 2026: November 1
- Fall 2026: June 1

Other Requirements

- **English Language Proficiency:** Applicants are required to have a command of oral and written English. Those who do not hold a baccalaureate or other advanced degree from the United States **OR** a baccalaureate or other advanced degree from a predetermined country on the waiver list (<https://www.unomaha.edu/office-of-graduate-studies/admissions/entrance-exams.php>) must meet the minimum language proficiency score requirement in order to be considered for admission.
 - Internet-based TOEFL: 80, IELTS: 6.5, PTE: 53, Duolingo: 110

- **Statement of Purpose:** A one- to two-page single-spaced self-assessment of your background in writing, reasons for wanting to enter the MFA program, and your goals as a writer.
 - For **fiction, creative nonfiction, poetry, and young adult** include any other experience you have in the wider community of literature (e.g. organizing or participating in workshops, attending conferences, working for literary magazines, etc.).
 - For **playwriting and screenwriting**, include any specific experience as it pertains to screenwriting or to full-length plays, one-act plays, and ten-minute plays, as well as any experience in other areas of film or theatre.
- **Writing Sample:** A manuscript representing your best work in the genre track (fiction, creative nonfiction, poetry, young adult, playwriting, or screenwriting) for which you are applying.
 - 15 pages of poetry
 - 15-20 pages of playwriting
 - 30 pages of screenwriting
 - 30-40 pages of fiction, creative nonfiction, or young adult
- **Letters of Recommendation:** Two letters of recommendation from persons who can attest to your ability to complete a course of graduate study, the ability to work independently, and/or the quality of your prior literary achievements.

NOTE: Your statement of purpose and your writing sample must be submitted in your online application in .pdf format. Manuscripts should be in 12-point typeface with 1" margins. Prose should be double-spaced; poetry may be single-spaced. Playwriting submissions should follow standard playwriting format; screenwriting submissions should follow standard screenwriting format. Material in genres other than the one in which you are applying will not be read. For specific information, as well as current residency dates for the program, please consult the program website (<https://www.unomaha.edu/college-of-communication-fine-arts-and-media/writers-workshop/mfa-program/>).

Degree Requirements

Pathway 1 Traditional MFA in Writing

Currently enrolled and new students are automatically enrolled in this pathway, unless otherwise approved.

Pathway 2 Partial Substitution of Credit Hours Already Earned

Students who have successfully completed graduate-level coursework at UNO or any accredited institution can reduce costs by requesting that up to 18 hours of previously earned credit be applied to the UNO MFA in Writing degree. Subject to individual approval.

Pathway 3 Partial Substitution of Credit Hours Earned Through Additional Coursework

Students have the option to enroll in a limited number of approved courses offered online or on any University of Nebraska campus and have those credits substituted for required MFA degree credit hours. Approval must be obtained from the program coordinator BEFORE enrolling.

Required Residency Session

Code	Title	Credits
MFAW 8700	RESIDENCY SESSION	3

Register for one 3-hour session per semester (4 semesters)

Residencies are conference-style sessions (10 days) consisting of workshops of student writing, craft and theory classes, individual conferences with mentoring faculty, and readings.

Writing Options (choose one)

Seminars

Seminars are semester-long (16 weeks) supervised distance studies in writing, during which the student corresponds regularly with a faculty mentor on the work that was proposed during the preceding residency session. At least four times a semester, the student must submit creative and critical writing to the faculty mentor. The mentor will respond with revisions, suggestions for further readings, and discussion. Students must register for one 12-hour seminar session per semester for four semesters.

Ancient Mediterranean Studies Minor

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor

department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Anthropology Minor Requirements

Code	Title	Credits
Select nine hours from the following		9
ANTH 8216	CULTURAL ANTHROPOLOGY	
ANTH 8226	NORTH AMERICAN ARCHAEOLOGY	
ANTH 8236	ETHNOMEDICINES OF THE AMERICAS	
ANTH 8246	MEDICAL ANTHROPOLOGY	
ANTH 8256	ENVIRONMENTAL ANTHROPOLOGY AND NATIVE PEOPLES OF THE GREAT PLAINS	

ANTH 8276	DECOLONIZING NATIVE AMERICAN HEALTH
ANTH 8926	SEMINAR IN ANTHROPOLOGY
ANTH 8980	INDEPENDENT STUDY IN ANTHROPOLOGY

If a student has taken the 4000 level equivalent of an 8xx6 course, the 8xx6 course cannot count toward the minor.

Art History Minor Minor Requirements

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Black Studies Minor Minor Requirements

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Business Administration Minor Minor Requirements

Graduate students may complete a graduate minor in business administration. The minor requires the approval of the MBA advisor, completion of the MBA foundation courses, and the completion of a minimum of nine (9) graduate credit hours of BSAD courses, at least six (6) of which are in BSAD courses open only to graduate students (8000-level or higher), excluding courses which are foundation courses for any degree program. BSAD 8060 cannot be counted toward the minor. A grade of "B" (3.0 on a 4.0 scale) must be earned in each course counting toward the minor. All hours counting toward the minor must be earned at UNO.

Criminology and Criminal Justice Minor

Minor Requirements

Code	Title	Credits
Required Course		
CRCJ 8020	SEMINAR IN ADMINISTRATION OF JUSTICE	3

CRCJ 9160	SEMINAR IN COMMUNITY-BASED CORRECTIONS	
CRCJ 9170	ADVANCED SEMINAR ON CORRECTIONS	
CRCJ 9200	SEMINAR ON VIOLENT CRIME AND CRIMINAL BEHAVIOR	
Total Credits		9

Economics Minor

Minor Requirements

The Department of Economics offers a graduate minor to students pursuing a graduate degree in other programs. The requirement for the minor is that the student completes a minimum of three graduate courses (9 hours) in economics with grades of "B" or better (3.0 on a 4.0 scale) in each course. The courses to be taken for the minor are to be approved by both the student's advisor in the student's major subject and by the Graduate Program Chair (GPC) of economics.

English Minor

Minor Requirements

With the approval of the student's advisor and the English graduate program committee, a student may include a minor as part of their plan of study. A minor requires nine (9) hours of approved coursework.

French Minor

Minor Requirements

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor

department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Geography Minor

Minor Requirements

Code	Title	Credits
GEOG 8000	HISTORY AND PHILOSOPHY OF GEOGRAPHY	3
Additional geography courses selected in consultation with the graduate program chair		6
Total Credits		9

German Minor

Minor Requirements

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Gerontology Minor

Minor Requirements

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

History Minor

Minor Requirements

To earn a graduate minor in history, a student must complete nine hours of graduate-level history courses with the grade of a "B" (3.0 on a 4.0 scale) or better.

Management Information Systems Minor

Minor Requirements

The management information systems area offers a graduate minor to students pursuing graduate degrees in other programs at UNO. The requirements for the minor are that the student completes a minimum of three graduate courses (nine semester hours ending in 0), receiving a grade of "B" (3.0 on a 4.0 scale) or better in each course. The courses to be taken for the minor are to be approved by the student's advisor in the student's major subject and by the Graduate Program Chair (GPC) in management information systems. For declaring a MIS minor, a minimum TOEFL score of 550 is required and a GPA of 3.0 or better in current graduate program are required.

Mathematics Minor

Minor Requirements

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours of MATH or STAT prefixed courses, with at least a B average. At least six of the nine graduate credit hours must be from courses ending in zero. Note that MATH 8880 cannot be used to satisfy the requirements of a mathematics minor. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student's transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Medical Humanities Minor

Minor Requirements

This cross-disciplinary minor allows students to select nine credit hours from the approved graduate courses listed below.

Code	Title	Credits
Anthropology		
ANTH 8236	ETHNOMEDICINES OF THE AMERICAS	3
ANTH 8246	MEDICAL ANTHROPOLOGY	3
English		
ENGL 8956	BRINGING THE WAR HOME: DEPICTIONS OF WAR VETERANS IN LITERATURE AND FILM	3
ENGL 8976	WRITING ABOUT SICKNESS AND HEALTH	3
Gerontology		

GERO 8466	PSYCHOLOGY OF ADULT DEVELOPMENT AND AGING	3
GERO 8556	HEALTH ASPECTS OF AGING	3
Medical Humanities		
MEDH 8006	TOPICS IN MEDICAL HUMANITIES	3
MEDH 8996	INDEPENDENT STUDY IN MEDICAL HUMANITIES	1-3
Music		
MUS 8696	HEALTH AND WELLNESS FOR MUSICIANS	3
Psychology		
PSYC 8446	ABNORMAL PSYCHOLOGY	3
PSYC 8806	LAW & PSYCHOLOGY: ETHICS, RESEARCH & SERVICE	3
Religious Studies		
RELI 8036	AFRICANA RELIGIONS	3
Sociology		
SOC 8446	HUMAN CONNECTION, LONELINESS, & HEALTH	3
SOC 8706	WOMEN'S HEALTH AND ISSUES OF DIVERSITY	3
SOC 8836	SOCIOLOGY OF MENTAL HEALTH & ILLNESS	3

Directed readings and various special topics courses can be used for the minor with advisor approval. Special note, students who were undergraduate students at UNO cannot take a dual-listed course at the graduate level if they have already taken the course at the undergraduate level.

The minimum requirement for the graduate minor is nine credit hours taken at the 8000 and/or 9000 levels. A student's program will be planned in consultation with a medical humanities (MEDH) graduate advisor. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. Up to three hours of previously completed graduate credit may be applied if taken within the time to degree requirement and subject to approval by the Graduate Advisor. The minor will be reflected on the student's transcript at the time of graduation.

Medieval/Renaissance Studies Minor

Minor Requirements

9

NOTE: The preceding list does not include the various departmental numbers for graduate directed readings courses, even though these highly individualized reading and research classes may be applied to the requirements for the minor. This list also does not include the various special topics courses in individual departments which may be taken for graduate credit.

Native American Studies Minor

Minor Requirements

The minimum requirement for the graduate minor is 9 credits taken at the 8000 and/or 9000 levels.

A student’s program will be planned in consultation with the Native American Studies (NAS) Graduate advisor, who will hold graduate faculty status. This cross-disciplinary minor will include choices among approved graduate lecture courses, seminars, and directed reading courses.

Three (3) hours of thesis can be counted toward the minimum requirement of 9 credits, but only in the graduate advisor and the thesis committee members agree that the topic is related to Native American studies.

Students must complete each course of their 9-credit minor with a grade of “B” (3.0 on a 4.0 scale) or better.

No comprehensive exam will be required after completion of the three required courses for the minor.

Political Science Minor

Minor Requirements

Students outside of political science may earn a political science minor in conjunction with their graduate program by taking 9 graduate credit hours in political science. The courses to be taken for the minor are to be approved by both the student’s advisor in the student’s major subject and by the Graduate Program Chair (GPC) of political science.

Religious Studies Minor

Minor Requirements

A student is not required by the graduate faculty to have a minor. However, a student may elect a minor with permission of the major department/school and the minor department/school.

The minor must consist of no fewer than nine graduate hours. The courses must be included on the Change in Plan of Study form and the minor department must sign off on this form. The minor will be reflected on the student’s transcript at the time of graduation.

Students who elect to complete a minor may be required to take a comprehensive examination over the minor field. This requirement will be at the discretion of the minor advisor. If such an examination is given, it should be given at a date arranged at the convenience of both the student and the minor advisor, but falling within the limits established for all comprehensive examinations.

Sociology Minor

Minor Requirements

Accounting (ACCT)

Accounting Graduate Courses

ACCT 8016 ADVANCED FINANCIAL ACCOUNTING (3 credits)

Specialized issues in financial accounting. Principal topics include business combinations and consolidated financial statements, partnership accounting, translation of foreign currency financial statements, accounting for foreign currency denominated transactions, and SEC reporting requirements. (Cross-listed with ACCT 4010).

Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3030 and ACCT 3040 with a grade of "C+" (2.33) or better in each. Not open to non-degree graduate students.

ACCT 8046 ADVANCED FEDERAL INCOME TAXATION (3 credits)

Analysis of various advanced tax issues, such as accounting methods, property transactions, and formation, operation, and liquidation of C-corporations, S-corporations and partnerships. (Cross-listed with ACCT 4040).

Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3020 with a grade of "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8050 FINANCIAL STATEMENT ANALYSIS (3 credits)

Using the financial statement and supplemental information as inputs, this course utilizes a systematic fundamental analysis approach across a variety of decision-making contexts to understand how a business generates value for shareholders.

Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 3040 with a "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8056 PRINCIPLES OF INTERNAL AUDIT (3 credits)

This course introduces students to the internal audit profession and the internal audit process. Topics include: the definition of internal auditing, The Institute of Internal Auditor's International Professional Practices Framework, risk, governance and control issues, fraud detection and mitigation, communicating results, and conducting internal audit engagements. (Cross-listed with ACCT 4050).

Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. Not open to non-degree graduate students.

ACCT 8066 ADVANCED MANAGERIAL ACCOUNTING (3 credits)

Intensive study and discussion of the responsibilities of managerial accountants in the decision-making process in organizations and the consequences of the manner in which they use cost accounting information in decision-making. (Cross-listed with ACCT 4060).

Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3050 with a grade of "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8076 GOVERNMENTAL/NONPROFIT ACCOUNTING AND AUDITING (3 credits)

Study of budgeting, accounting, financial reporting and auditing in governmental and nonprofit entities. (Cross-listed with ACCT 4070).

Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 3030 with a grade of "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8080 CURRENT TECHNOLOGY USE IN ACCOUNTING (3 credits)

This course will cover tools and methods that facilitate business analytic techniques, with a focus on current and emerging technology. This may include tools for databases, spreadsheets, robotic process automation, data mining, artificial intelligence, and others.

Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. Successful completion of BSAD 8110, ACCT 2020, or equivalent. Not open to non-degree graduate students.

ACCT 8090 INFORMATION SYSTEMS AUDITING (3 credits)

This course presents a broad overview of the professional practice of information systems audit, emphasizing control and audit procedures related to security along with Information Technology General Controls. Content studied will include professional standards, guidelines, and procedures promulgated by the Information Systems Audit and Control Association.

Prerequisite(s): ACCT 4080 or ACCT 4050 or ACCT 8056 with a grade of C (2.0) or better. Admission to MAcc or MBA program or permission of instructor. Not open to non-degree graduate students.

ACCT 8210 FINANCIAL ACCOUNTING THEORY (3 credits)

The development of accounting, current accounting theory and present controversies and suggested theory and practice.

Prerequisite(s): ACCT 3040. Not open to non-degree graduate students.

ACCT 8220 GRADUATE TOPICS IN INCOME TAXATION (3 credits)

This course will discuss commonly encountered tax issues such as gift and estate taxation, income taxation of estates and trusts, and exempt organizations, as well as discuss current events while introducing the student to practitioner-oriented research publications.

Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 4040 or ACCT 8046 with a "C" (2.0) or better, or concurrent enrollment in ACCT 4040 or ACCT 8046. Not open to non-degree students.

ACCT 8230 MANAGEMENT ACCOUNTING ISSUES (3 credits)

An analysis of information to assist managers in determining successful strategies, developing those strategies into plans and controlling operating activities to achieve strategic goals.

Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 3050 or BSAD 8210 with a "C" (2.0) or better. Not open to non-degree graduate students.

ACCT 8250 SEMINAR IN ACCOUNTING (3 credits)

A study of a specific area within the accounting discipline. Possible areas include: auditing, financial, managerial, systems and tax. May be repeated, but no area can be taken more than once.

Prerequisite(s): Admission to MAcc or MBA programs or permission of instructor. Not open to non-degree students.

ACCT 8260 FEDERAL TAX RESEARCH AND PLANNING (3 credits)

This course is intended to provide students with a working knowledge of the primary and secondary tax resources used in practice to solve tax problems, as well as basic tax planning concepts.

Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. ACCT 4040 or ACCT 8046 with a "C" (2.0) or better. Not open to non-degree students.

ACCT 8280 SEMINAR IN ACCOUNTING INFORMATION SYSTEMS (3 credits)

This course examines current topics in Accounting Information Systems (AIS), how AIS contributes to business effectiveness and ineffectiveness, and the interaction between AIS and human decision-makers.

Prerequisite(s): Admission to MAcc or MBA program or permission of instructor. Successful completion of BSAD 8110, ACCT 2020, or equivalent. Not open to non-degree graduate students.

ACCT 8290 ADVANCED FINANCIAL AUDITING (3 credits)

This course will provide students with an intense study of financial auditing in accordance with generally accepted auditing standards.

Prerequisite(s): Admission to MAcc or MBA program or permission of the Director of the MAcc program. ACCT 4080 with a grade of "C" (2.0) or better.

ACCT 8900 INDEPENDENT RESEARCH (1-3 credits)

This is an independent research course in which the student completes a focused project, typically individual research, under faculty supervision to supplement graduate study in a specific area within the Accounting discipline.

Prerequisite(s): Completed contract and permission needed from director of MACC program. Not open to non-degree graduate students.

ACCT 8910 SPECIAL TOPICS IN ACCOUNTING (3 credits)

A variable content course with accounting topics based on student and faculty interest. May be repeated to a maximum of six (6) hours.

Prerequisite(s): Admission to MAcc program and permission of instructor. Not open to non-degree graduate students.

Anthropology (ANTH)

Anthropology Graduate Courses

ANTH 8216 CULTURAL ANTHROPOLOGY (3 credits)

Cultural Anthropology is the sub-discipline of Anthropology that systematically considers cultural diversity (similarities and differences) in all known human societies. The scope of cultural anthropology is one of the broadest in the social sciences and includes the study of subsistence strategies and economies, kinship and social organization, political organization, religion, gender, language, expressive arts, human-environment relationships, and globalization. (Cross-listed with ANTH 4210).

Prerequisite(s): ANTH 1050 or permission of Instructor

ANTH 8226 NORTH AMERICAN ARCHAEOLOGY (3 credits)

This course explores more than 20,000 years of Native American culture and lifeways in North America. Indigenous peoples faced numerous challenges throughout this vast and diverse continent. Hunters, gatherers, fishers, and horticulturalists adapted to all regions of North America. Students will be introduced to a range of archaeological concepts, methods and theoretical perspectives central to learning about this rich heritage of American archaeology. (Cross-listed with ANTH 4220).

Prerequisite(s): ANTH 1050 or permission of instructor

ANTH 8236 ETHNOMEDICINES OF THE AMERICAS (3 credits)

An anthropological approach to the study of the cultural systems of specific American ethnomedicines (traditional medicines) of North, Central and South America. For each ethnomedicine, the historical context, philosophy, practice, therapeutics, and utilization will be examined to understand how and why each ethnomedicine has survived despite tremendous extermination pressure. (Cross-listed with ANTH 4230).

Prerequisite(s): ANTH 1050 or permission of the instructor.

ANTH 8246 MEDICAL ANTHROPOLOGY (3 credits)

Medical anthropology is the cross-cultural study of human culture, health and illness. Using multiple theoretical perspectives, this course examines how cultural, social, environmental, and biological factors interact to produce patterns of health and illness in past and present human societies. (Cross-listed with ANTH 4240)

Prerequisite(s): Junior standing or the permission of the instructor

ANTH 8256 ENVIRONMENTAL ANTHROPOLOGY AND NATIVE PEOPLES OF THE GREAT PLAINS (3 credits)

Environmental anthropology seeks to understand the interrelationships between human societies and their biophysical and social environments. This course introduces students to basic concepts and theories used by anthropologists to study environmental influences upon both past and present Native American societies on the North American Great Plains. Particular attention will be given to the rapid and dramatic environmental changes that continue to challenge Native Americans in the Great Plains today. (Cross-listed with ANTH 4250)

ANTH 8276 DECOLONIZING NATIVE AMERICAN HEALTH (3 credits)

This course will utilize an interdisciplinary lens to interrogate Native American health and wellness grounded in the decolonizing theoretical and methodological tools drawn from Medical Anthropology and Native American Studies. Topics covered will include: Health Disparities, Federal Indian Health Policy, Historical Trauma, Medical Mistrust, Traditional Healing, Food Sovereignty and Research Ethics. (Cross-listed with ANTH 4270, NAMS 4270, NAMS 8276).

ANTH 8286 CLINICAL ETHNOGRAPHY (3 credits)

Using ethnographic texts, this course explores the clinical world from an anthropological perspective. Students will use anthropological theories and methods to learn about cultures of medical practices, diverse health professions, the contexts of health care delivery, and the structural, cultural, and historical forces that influence the practice of healthcare in the U.S. and cross-culturally. (Cross-listed with ANTH 4280, MEDH 4280).

Prerequisite(s): ANTH 1050 or MEDH 1000 or permission of the instructor.

ANTH 8296 DRUG USE, ADDICTION, & CULTURE (3 credits)

What does "addiction" and its treatment look like in different cultures? How do social practices and cultural values shape drug use and addiction? Why do some people become addicted to drugs and others don't? This course examines drug use and addiction cross-culturally. Using anthropological theories and methods, we will explore: definitions of addiction across time and place; drug use and addiction in relation to social inequalities; interventions targeting drug use and the assumptions underlying them; and lived experiences of drug use and addiction. We will also consider the implications of these issues for healthcare, policy, and social justice in the context of contemporary problems such as the rise in opioid overdose in the U.S. (Cross-listed with ANTH 4290, MEDH 4290)

Prerequisite(s): ANTH 1050, MEDH 1000, or permission of the instructor

ANTH 8926 SEMINAR IN ANTHROPOLOGY (3 credits)

This course reviews research and writing in an area of current interest in the field of anthropology. The specific topic(s) to be covered will be announced at the time the course is being offered. Since the topics will vary, students may elect to take this course more than once. (Cross-listed with ANTH 4920).

Prerequisite(s): Graduate standing or permission of instructor

ANTH 8946 ARCHAEOLOGICAL FIELD METHODS (3 credits)

This course introduces students to the field methods of scientific archaeology. These field methods include map reading, use of satellite and aerial photographs, instrument survey and mapping, pedestrian survey or reconnaissance, site survey data collection, identification of artifacts (stone tools, ceramics, etc.) and ecofacts (animal remains, macrobotanicals, etc.), systematic artifact collection and documentation, soil probes and coring methods, GPS-based mapping, excavation methods, and data recording. Additional topics include laboratory methods (artifact and ecofact analysis, interpretation, and documentation). This field course ultimately focuses upon the use of empirical data to test or evaluate our interpretations of past human behavior. (Cross-listed with ANTH 4940).

ANTH 8980 INDEPENDENT STUDY IN ANTHROPOLOGY (1-3 credits)

This course is guided reading or independent research in special topics in Anthropology under the supervision of a member of the Anthropology faculty. This course is designed primarily for the student interested in topics not currently available in the departmental offerings and who has demonstrated capability of working independently. May be repeated once for credit.

Prerequisite(s): Permission of the instructor. Not open to non-degree graduate students.

Art (ART)

Art Graduate Courses

ART 8006 SPECIAL SEMINARS IN ART EDUCATION (1-3 credits)

A series of intensive courses in the history and theory of art education designed specifically for elementary and secondary school art teachers. These courses are scheduled as special seminars or workshops according to purpose. (Cross-listed with ART 4000)

ART 8316 ADVANCED SCULPTURE (3 credits)

Advanced work in area of student's choice with facilities for oxyacetylene welding, arc welding and wood working. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 4310)

ART 8416 ADVANCED PAINTING (3 credits)

Advanced instruction in oil painting permits students the time and environment to work and develop individually. Emphasis on developing cohesive body of work as continuation from work done in Intermediate painting. Knowledge of contemporary painting integral to painting practice. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 4410)

ART 8516 ADVANCED TECHNIQUES IN PRINTMAKING (3 credits)

This course allows students to develop their skills in both lithography and intaglio and the color processes for each printmaking technique. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 4510)

ART 8616 ADVANCED CERAMICS (3 credits)

This course will consist of advanced work on the potter's wheel, casting and preparations in glaze composition, as well as loading and firing of a high-fire kiln. The content of this course varies from semester to semester allowing students the opportunity to investigate and practice a variety of techniques. (May be repeated for credit up to 6 hours.) Lab fee required. (Cross-listed with ART 4610)

ART 8736 CLASSICAL ART HISTORY (3 credits)

This course is a study of painting, sculpture, architecture and minor arts of the classical world beginning with Cycladic art and including Minoan, Mycenaean, Greek, Etruscan and Roman art through 300 A.D. Lab fee required. (Cross-listed with ART 4730)

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 8756 LATE ROMAN AND BYZANTINE ART HISTORY (3 credits)

A study of painting, sculpture and architecture of the Eastern Roman Empire from the founding of Constantinople, and of Western Europe from the time of Constantine to the dissolution of the Western Roman Empire. Lab fee required. (Cross-listed with ART 4750)

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 8836 ITALIAN RENAISSANCE ART HISTORY (3 credits)

A study of painting, sculpture and architecture in Italy during the 14th, 15th and 16th centuries. Lab fee required. (Cross-listed with ART 4830)

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 8856 BAROQUE AND ROCOCO ART HISTORY (3 credits)

This course is a study of painting, sculpture and architecture in Europe during the 17th and 18th centuries. Lab fee required. (Cross-listed with ART 4850)

Prerequisite(s): For Fine Arts majors, completion of ART 2050 & ART 2060 (Prereq or coreq), plus junior standing. For non-majors, junior standing and permission of the instructor are required.

ART 8886 MODERN ART I (ART OF EUROPE AND THE AMERICAS, 1850-1920) (3 credits)

A study of the most significant developments in European art and architecture dating from the early Modern period and examined in varied contexts (artistic, religious, political, economic, etc.). (Cross-listed with ART 4880)

ART 8896 MODERN ART II (ART OF EUROPE AND THE AMERICAS, 1918-1968) (3 credits)

This course explores the major artistic movements and artists active in Europe and the Americas between the end of WWI and the Vietnam Era circa 1968. (Cross-listed with ART 4890)

ART 8906 CONTEMPORARY ART HISTORY SINCE 1968 (3 credits)

This course introduces contemporary visual arts in a global context from 1968 to the present with topics of discussion including art, aesthetics, politics, gender and sexuality, race and economics. (Cross-listed with ART 4900)

ART 8910 INDEPENDENT STUDY IN ART HISTORY (3 credits)

Independent research under the direct supervision of the sponsoring faculty member, generally involving the writing of a paper. The topic of the research and the expectations for credit should be jointly agreed upon in writing by the student and the faculty member at the beginning of the semester.

Prerequisite(s): Permission of instructor and graduate standing.

ART 8936 SPECIAL TOPICS IN ART HISTORY (3 credits)

These illustrated lecture courses deal with a limited topic in the field of art history. The course may be coordinated with an external event such as an exhibition, publication or study trip. Lab fee required. (Cross-listed with ART 4930)

Prerequisite(s): ART 2050 or ART 2060 or instructor permission.

Athletic Training (ATHT)

Athletic Training Graduate Courses

ATHT 8110 ATHLETIC TRAINING TECHNIQUES (2 credits)

Overview course including basic components of the athletic training profession including the prevention, recognition, evaluation and immediate care of athletic injuries. Medical terminology, tissue healing, taping procedures, and professional considerations will be covered.

Prerequisite(s): Admission to the Master of Arts in Athletic Training. Not open to non-degree graduate students.

ATHT 8120 EMERGENCY MANAGEMENT OF INJURY AND ILLNESS (2 credits)

The purpose of this course is to prepare students to respond to emergent conditions that affect patients involved in physical activity. Students will learn to recognize the signs and symptoms of acute injury and illness, assess patients using evidence-based methods, apply appropriate treatments, make appropriate referral decisions, and implement effective prevention strategies to reduce the risk of injury and illness.

Prerequisite(s): Admission to the Master of Arts in Athletic Training program. Not open to non-degree graduate students.

ATHT 8130 THERAPEUTIC INTERVENTIONS I (2 credits)

This course will cover the pathophysiology of musculoskeletal injuries as well as the theory, physiology and application of physical agents used in the treatment of these injuries. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.

Prerequisite(s): Not open to non-degree graduate students.

ATHT 8230 THERAPEUTIC INTERVENTIONS II (2 credits)

This course will introduce students to the use of basic theories and principles of athletic injury rehabilitation including therapeutic exercise. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.

Prerequisite(s): ATHT 8130/HEKI 8130. Not open to non-degree graduate students.

ATHT 8240 ORTHOPEDIC ASSESSMENT I (2 credits)

The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the lower extremity. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the foot, ankle, lower leg, knee, thigh and hip. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.

Prerequisite(s): Admission to the Master of Arts in Athletic Training Program. Not open to non-degree graduate students.

ATHT 8250 CLINICAL PRACTICUM IN ATHLETIC TRAINING I (2 credits)

Clinical Practicum in Athletic Training I is the first course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s): Admission to the MA in Athletic Training program, instructor permission, & compliance with published Athletic Training Program Technical Standards for Admission. Not open to non-degree graduate students.

ATHT 8330 THERAPEUTIC INTERVENTIONS III (2 credits)

This course will introduce students to the use of basic theories and principles of physical agents and manual therapies. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.

Prerequisite(s): ATHT 8230/HEKI 8230. Not open to non-degree graduate students.

ATHT 8340 ORTHOPEDIC ASSESSMENT II (2 credits)

The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the upper extremity. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the shoulder, elbow, wrist, hand and fingers. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.

Prerequisite(s): ATHT 8240/HEKI 8240. Not open to non-degree graduate students.

ATHT 8350 CLINICAL PRACTICUM IN ATHLETIC TRAINING II (2 credits)

Clinical Practicum in Athletic Training II is the second course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a licensed athletic trainer in order to improve clinical and decision-making skills.

Prerequisite(s): ATHT 8250/HEKI 8250 Clinical Practicum I. Not open to non-degree graduate students.

ATHT 8360 ADVANCED ORTHOPEDIC & MEDICAL ASPECTS OF ATHLETIC TRAINING (3 credits)

This course will provide the student with knowledge and skill in the area of orthopedic and medical aspects of athletic training. Students will gain this knowledge through directed observation, experiential learning, literature review, and hands-on experience under the supervision of local medical professionals. The student will be exposed to advanced evaluation of medical conditions, systemic diseases, and other disorders; observe common surgical procedures for orthopedic conditions; and medical management of patients and physically active populations in conjunction with other healthcare providers.

Prerequisite(s): Admission to Master of Arts in Athletic Training Program

ATHT 8410 ATHLETIC TRAINING ADMINISTRATION (3 credits)

This course will introduce students to administrative topics related to athletic training. Management strategies for financial resources, personnel, facilities, medical records, and third-party reimbursement will be covered. Additionally, legal and ethical professional practice standards will be introduced.

Prerequisite(s): Not open to non-degree graduate students.

ATHT 8450 INTERNSHIP IN ATHLETIC TRAINING (2 credits)

This course is designed to provide an immersive athletic training clinical experience for students. The internship is a supervised, educational clinical work experience of at least 300 hours over a minimum of 4-weeks during a single semester. This experience will allow the student the opportunity to take more responsibility for the care, prevention, and rehabilitation of athletic injuries with a particular team or group of patients, as well as help plan and provide daily coverage for practices or clinical appointments.

Prerequisite(s): Permission from the instructor or program director. Not open to non-degree graduate students.

ATHT 8530 THERAPEUTIC INTERVENTIONS IV (2 credits)

This course will introduce students to the use of basic theories and principles of athletic training related to pharmacology, nutrition and psychosocial wellness. This course will include the development of treatment programs involving these skills utilizing hands-on practical application.

Prerequisite(s): ATHT 8330/HEKI 8330. Not open to non-degree graduate students.

ATHT 8540 ORTHOPEDIC ASSESSMENT III (2 credits)

The primary purpose of this course is to provide the student with knowledge and skill in the area of advanced athletic injury assessment to the head, face and spine. The student will be exposed to current methodology in the field of orthopedic physical assessment, particularly the head, face and spine. In addition, students will learn how to use the principles of evidence-based practice (EBP) to select and evaluate specific tests during the diagnostic process.

Prerequisite(s): ATHT 8340/HEKI 8340. Not open to non-degree graduate students.

ATHT 8550 CLINICAL PRACTICUM IN ATHLETIC TRAINING III (2 credits)

Clinical Practicum in Athletic Training III is the third course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s): ATHT 8350/HEKI 8350 Clinical Practicum II. Not open to non-degree graduate students.

ATHT 8650 CLINICAL PRACTICUM IN ATHLETIC TRAINING IV (2 credits)

Clinical Practicum in Athletic Training IV is the fourth course in the Clinical Practica series for students admitted to the Master of Arts in Athletic Training Program. Students will perform required clinical experiences under the supervision of a preceptor in order to improve clinical and decision-making skills.

Prerequisite(s): ATHT 8550/HEKI 8550 Clinical Practicum III

ATHT 8706 INTERNSHIP IN SPORTS MEDICINE AND BIOMECHANICS RESEARCH (3 credits)

This course is an on-campus, supervised, educational work experience of at least 150 clock hours at an approved worksite offering programs and experiences in sports medicine or biomechanics. (Cross-listed with BMCH 4700, BMCH 8706).

Prerequisite(s): 2.5 GPA and instructor permission

ATHT 8900 ATHLETIC TRAINING PROGRAM COMPREHENSIVE ASSESSMENT (0 credits)

This zero-credit-hour course is used to assess the knowledge and skills that students accumulate over the course of the CAATE-accredited entry-level graduate Athletic Training Program. Students must enroll in this course in their final semester in the program to take and pass the comprehensive examination. The exam assesses the student on their knowledge of the domains of athletic training and preparedness to sit for and take the national Board of Certification exam. Students will receive a pass/fail grade for this course.

Prerequisite(s): Requires departmental approval. Not open to non-degree graduate students.

Aviation (AVN)

Aviation Graduate Courses

AVN 8086 AIRPORT SAFETY AND SECURITY (3 credits)

This course will explore the role of airports in relation to safety and security. Topics will include regulations, responsibilities, security issues, ramp safety, disaster preparedness, and emergency management.

Prerequisite(s): AVN 1000 or its equivalent or permission of the instructor.

AVN 8510 AEROSPACE EDUCATION WORKSHOP (3 credits)

This course will focus on aviation and space education and its impact on society. It will seek to communicate knowledge, impart skill, and develop attitudes relative to the scientific, engineering and technical as well as the social, economic and political aspects of aviation and space flight efforts. (Cross-listed with TED 8510, STEM 8510).

Prerequisite(s): Graduate standing.

AVN 9900 ADVANCED TOPICS (3 credits)
